3. For ships at pier side, the HSP shall place containers or trucks within twenty-five (25) meters of the ship or as permitted by port regulation, or barges alongside the ship. The HSP shall empty the containers or barges when full and shall assure their continuous availability for trash disposal.

4. For ships at anchorage, the HSP shall remove trash at the times agreed to by the HSP and Supply Officer. For trash collection at anchorage, the trash barge shall be available 24 hours a day (when not contrary to law or port regulation) with suitable self-fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

5. For trash collection by barge, the HSP shall provide trash barges/scows (with tug service if barge is not self-propelled) for ships at anchorage. The barges shall be completely empty at time of arrival at the ship. In situations where an empty barge is not available, the HSP shall provide a system to measure the volume of trash deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of the trash. The HSP shall have ready access to sufficient barges and equipment to support multiple ships at anchorage simultaneously. The barge's crew shall be entirely responsible for the tending of lines and for barge's security. The movement of trash from the ship to the barge shall be performed with care by the ship's sailors.

6. In instances of bad weather or emergency where the ship must depart on short notice, the HSP shall remove barges within four hours of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the HSP at least four (4) hours in advance for the barge pick-up.

7. The HSP shall submit, as an attachment to the invoices, a document that certifies the quantity collected and the name of the disposal plant where the trash will be disposed. The HSP is also responsible to follow any environmental regulations required by each country. The HSP is required to keep all disposal certificates and shall make them available to the Contracting Officer upon request.

8. Refuse containers, when used and when emptied, shall be returned to their original position with the lids (if any) replaced thereon.

9. The HSP shall be paid based on the ACTUAL CUBIC METERS of trash removed.

10. Where trash is required to be segregated, the Ordering Activity shall be required to segregate the material at the time of disposal. The HSP shall be responsible for providing separate containers for each vessel, clearly marked with the required categories and for informing the Ordering Activity, upon arrival, that segregation is required. If the Ordering Activity does not segregate trash as required, the HSP shall inform the Ordering

Activity and Logistic Support Representative (LSR) prior to departure and bill for the cost of trash segregation within 48 hours after the vessel's departure.

LINE ITEM XX03 – FLEET LANDING

1. When ordered by the ship, the HSP shall furnish services/supplies for the fleet landing area. The following is a list of the basic supplies and services that a ship may need.

2. FLEET LANDING. HSP shall provide the sub-line items specified in this Line Item and shall provide a unit price for each sub-line item. The unit price shall be per day for each item. Mobilization/demobilization charges shall be included in sub-line item price. Fleet Landing services include the following:

    a. PORTABLE TOILET UNIT SERVICES. The unit price shall be for a single commode and one (1) urinal. The daily rate shall include pumping and cleaning as many times as necessary to ensure clean, sanitary condition and providing all chemicals, cleaning products and toilet paper. The HSP shall check toilet facilities at least every six (6) hours to ensure cleanliness.

    b. PORTABLE ELECTRIC GENERATORS. The HSP shall provide a portable, gasoline powered, electric generator capable of supplying power to portable lighting and miscellaneous portable electrical equipment (radios, stereos, hand tools, etc.). Generator shall be at least 5KW with circuit breaker protector. Daily rate includes fuel, oil, and necessary consumables to operate the generator, transportation, set-up, dismantling and labor.

    c. Chairs (each per day)

    d. Long tables - approximately 2 meters in length (each per day)

LINE ITEM XX04 – BROW SERVICES

1. BROWS

    a. Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The HSP shall provide the brows specified in the schedule as ordered by the ship. A range of brow sizes is provided in each of the sub lot line items of lot line item XX04. All brows provided by port authorities, host nation, or US Government shall be billed at cost as port tariff items. Mobilization, demobilization, setup and placement shall be included in the proposed unit price of all XX04 sub lot line items.

    b. Due to the height difference between the submarine deck and pier, the HSP provided submarine brow must afford personnel a smooth and safe transit when entering or exiting the submarine deck. The submarine brow must be capable of supporting shore power cables without damaging the cable.

2. MOBILE CRANE SERVICES

    a. The HSP shall provide mobile crane services (shore crane) with operator(s). The HSP shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HSP

shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each mobile crane ordered.

b. Crane services under this Line Item are for land cranes only.

3. FORKLIFT SERVICES

a. The HSP shall provide forklift services with operator(s). The HSP shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. Upon the Supply Officer's request, the HSP shall provide information concerning forklift/lifting capacity. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The forklifts shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HSP shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each forklift ordered.

LINE ITEM XX05– SHIP MOVEMENT SERVICES (PILOTS, TUGS, LINEHANDLERS)

1. The HSP shall arrange pilots, tugs, and line handlers as ordered. The HSP shall coordinate with port authorities, as necessary, to ensure that the services are available at the times requested. It should be noted that the port authority or other authorized sources provide these services, and are, therefore, to be priced in accordance with current tariff rates.

2. The HSP shall provide tugs to bring ships to and from berthing locations. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

LINE ITEM XX06 - WATER FERRY/TAXI SERVICES

1. The HSP shall provide water taxis to transfer ship personnel to and from the ship and the fleet. At the commencement of service, the HSP is required to advise the ship of scheduled breaks and any changes to the taxi service schedule. The HSP shall provide water taxi service when the vessel is expected to be at anchorage for twenty-four (24) hours or more. Water taxi service shall be always available, with the exception of inclement weather, during the two (2) one-hour meal breaks and during refueling.

2. Taxi water service shall include a minimum of two (2) qualified operators (a driver and one other operator), any other helpers or crew members required by local authorities, all insurance, fuel, holiday surcharges, overtime, and other operating expenses. Operator qualifications are set forth in paragraph (14) below.

3. Service begins when the first water taxi is alongside the designated pick-up point and ends when the last passenger disembarks from the water taxi at the designated drop-off point as ordered by the ship. However, when required to arrive early for inspection as a force protection measure, service begins at time of inspection. The HSP shall be entitled to a six (6) hour minimum rental fee in cases where actual usage is less than six hours per day.

4. If the HSP cannot provide the size of water taxi ordered, the HSP shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event the ship will be charged for the size of the water taxi ordered. For example, if one (1) 250-pax water taxi is ordered and is not available, then two (2) 125-pax water taxis shall be provided for the rate of one (1) 250-pax water taxi, if acceptable to the Ordering Officer.

5. The HSP shall ensure that the water taxi is in sound mechanical condition and meets all safety standards required by local laws and regulations to preclude breakdown and injury. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of the port or the country in which the port is located. Apart from compliance with local laws and regulations, the HSP shall meet all additional requirements as set forth throughout the PWS. Water taxi shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, and fitted for service required. Further, water taxi shall be in a clean condition when presented for service and shall be free of debris.

6. Each water taxi shall be equipped with at least one clean and serviceable life jacket for each passenger and crewmember, and all jackets shall be stowed in a readily accessible place.

7. Except as otherwise specified herein, the service shall include all equipment needed to transport personnel between the vessel anchored in the outer harbor, or in the inner harbor, fleet landing, or any designated pier or berth within the port. If it becomes necessary to change the landing point of the water taxi (pier or berth) within the port, the HSP shall dock at the new landing point. In the event this occurs, it will be considered to be a "Change" to the contract.

8. All water taxis used by the HSP shall provide overhead covering.

9. Before the commencement of any services under this contract, the HSP shall make the water taxi available to the Ordering Vessel's Commanding Officer or designated representative for inspection.

10. The following information shall be conspicuously posted in each water taxi shall be in English and the language of the country in which the port is located:

    a. Current operator's/captain's license.
    b. Passenger/weight capacity limits notice.
    c. Location of life jackets and other life saving equipment.
    d. Location of all exits indicated in large letters.
    e. Emergency procedures.

11. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

12. The consumption of alcoholic beverages shall not be permitted aboard the water taxi.

13. Operator Qualifications: All personnel or employees of the HSP operating water taxis, shall have all certification required and issued by the law of the country in which the port is located for the operation of the type, class, or size of water taxi being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the water taxis are to be operated to ensure the water taxis are operated in a safe and seaworthy manner. At least one operator on each boat must speak English.

14. Security: During the term of this contract, the ship(s) to be serviced will provide adequate and sufficient security personnel for maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the ship's Commanding Officer or designated representative. When such naval personnel are embarked in a HSP-operated water taxi, he will be responsible for the good order and discipline of naval personnel.

15. In the event of a water taxi breakdown, immediately prior to, or during a trip, the HSP shall immediately provide a replacement water taxi that complies in all respects with this contract, at no additional cost to the U.S. Government. If a water taxi is not operable when required under this contract, the HSP shall immediately provide at no additional expense to the U.S. Government, a replacement water taxi which complies in all respects with this contract.

16. Any personal articles or items found on the water taxi after completion of each trip shall be turned over to the ship's Security Officer or his direct representative.

17. To verify a claim by the HSP for any damage or destruction caused by the U.S. Government, it shall be the responsibility of the HSP to ensure that the water taxi is jointly inspected before and after each trip by the HSP and an authorized representative of the U.S. Government.

18. When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

19. Inspection and acceptance criteria for water taxi services. The Commanding Officer or his designated representative of the ARMY/USS/USNS/USCG ship shall inspect and accept all liberty boats/water taxis prior to transporting any personnel. Each order for liberty boat/water taxi services is made on the basis that the request is to be considered a final order/obligation of the US Government only after each water taxi has been inspected and accepted by the ship's representative. The ship's Commanding Officer is solely responsible for the safety of his crew and the subsequent acceptance of liberty boat/water taxi services. The following features or components may be inspected prior to acceptance. The following items must be functional and in safe operating condition:

a. HULL
    i. Watertight integrity of weather decks, bulkheads, watertight closures and interior hull structure.
    ii. Superstructure (including masts and stacks).
    iii. Railings, bulwarks and their attachment to hull, especially guardrails and lifelines.
    iv. Provisions for drainage of seawater from exposed decks.

b. MACHINERY
    i. Main propulsion and auxiliary machinery essential to operation of craft.
    ii. Sea and bulkhead closure valves.
    iii. Bilge suction strainers and dewatering systems bilge pumps to be tested by operation.
    iv. Bilges free of flammable liquids.

c. ELECTRICAL
    i. Cables.
    ii. Navigation, deck and emergency lighting.
    iii. Rotating electrical machinery, e.g., generators and motors.
    iv. Storage batteries.

d. LIFESAVING EQUIPMENT
    i. Life preservers sufficient number for maximum capacity of craft, accessible and in satisfactory condition.
    ii. Life raft(s) and hydrostatic release (where applicable) sufficient for maximum capacity.
    iii. First aid kits, life rings and distress lights.
    iv. Distress signaling devices.

e. FIRE FIGHTING EQUIPMENT
    i. Fire pump passes fire pump pressure test.
    ii. Portable fire extinguishers (eg. CO2 cylinders)

f. STEERING APPARATUS

g. MISC SYSTEMS AND EQUIPMENT
   i. Harbor charts.
   ii. Ground tackle and mooring lines.
   iii. Whistle/fog horn, bell.
   iv. Compass.
   v. Radar.
   vi. 2 way radio capable of bridge to bridge communications.
   vii. Current licenses.

20. The HSP shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for U.S. Government review and inspection.

LINE ITEM XX07 – GENERAL CHARTER & HIRE ITEMS

1. YOKOHAMA OR COMPARABLE TYPE FENDERS

   a. The HSP shall furnish Yokohama or comparable type fenders for all classes of ships in accordance with the Schedule of Supplies and Services. Fenders provided shall be appropriate and safe for the class of ship and pier configuration. In the schedule there is a sub contract line item (SUBLINE ITEM) for a daily rental fee PER Yokohama or comparable type fender. All costs associated with installation, and removal of one fender, as well as round trip costs associated with transport of the fender from another port or storage location, if required, are to be included in the proposed line item price.

   b. Rental is on a daily (24-hour) basis, per fender. The HSP shall be responsible for securing the fenders to the pier.

   c. The HSP shall provide fenders with a minimum of two (2) mooring lines.

2. CAMELS, BREASTING, AND FENDERING BARGES

   a. The camels shall be flat surface platforms to be placed alongside the pier and sufficiently capable of breasting the ship away from the pier or from other ships.

   b. The HSP shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3. LANDING BARGES

   a. The landing barges shall be flat surface barges for positioning at the stern or side of the vessel to serve as a loading/unloading platform for water taxi personnel or cargo; they shall not interfere with the

operations of the ships' elevators or other equipment. Although landing barges are primarily used for class IV and V vessels, they may be ordered for use with any class vessel.

b. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

4. OILY WASTE REMOVAL (TRUCK AND BARGE)

a. Oily Waste is defined as any liquid petroleum product mixed with wastewater and/or oil in any amounts, which, if discharged overboard, would cause or show sheen on the water. The HSP shall dispose of any combination of oily waste and grey water as oily waste.

b. Oily Waste is measured by Cubic Meter (1CM = 264.2 Gallons). The HSP shall submit, as an attachment to the invoices for disposal services, a document verifying the quantity collected and the name of the disposal plant where the oily waste have been or will be disposed.

c. The HSP shall comply with the environmental requirements of each country where oily waste is disposed and shall be liable for any costs incurred as a result of the HSP's failure to comply with such requirements. The HSP shall keep all disposal certificates and shall make them available to the Contracting Officer upon request. If the ship concurs with the volume, the ship will pay for the entire amount.

d. Oily Waste Removal involves the collection of Oil and Aggregate Water generated by the ships. The requiring vessel will pump this waste into HSP-provided tanks or barges. The HSP shall provide all equipment and facilities required to remove oily waste, including hoses and connections compatible with the ship being serviced. The HSP shall provide hoses of sufficient length from equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

e. In all cases when a ship orders oily waste disposal services, the HSP shall invoice and will be paid the for a minimum daily quantity of 60 CM for providing the disposal services, even if the oily waste quantity pumped and disposed that day is less than the 60 CM minimum quantity.

f. In the event the HSP subcontracts oily waste disposal, the HSP shall be liable for any costs incurred as a result of the disposal operator's failure to comply with local requirements.

g. The HSP shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed. The Government reserves the right to independently verify the volume of discharge using certified flow measuring devices. The Government reserves the right to request a written statement from the HSP describing the method of measurement used to determine the amount of Oily Waste removed from the vessel.

h. When removal is done via barge, the HSP shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge. The HSP shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

5. INTERPRETER SERVICES

a. The HSP shall provide interpreter services when ordered. The interpreter shall be fluent in both spoken and written local language and English.

6. PRATIQUE

a. The HSP shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

7. STEVEDORE SERVICES

a. The HSP shall provide stevedores for general labor. Billing shall be at the hourly rate for worker.

8. PORT DUES

a. In some countries, the port authority or concessionaire charges port dues to the visiting ship. The port dues may be based on the length or based on the gross tonnage of the ship. Only 'FINAL' invoices will be accepted for payment.

LINE ITEM XX08 - COLLECTION, HOLDING, AND TRANSFER (CHT)

1. The HSP is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships throughout the area covered by this contract. The HSP shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The HSP shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence upon ship's arrival whether, at anchor or pierside. The HSP shall pre-position CHT barges, when necessary, in accordance with force protection or other requirements.

2. The HSP shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

3. The HSP shall remove sewage from the ship in HSP-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

4. The HSP shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT. The Government reserves the right to use its own metering device to verify measurement of sewage discharge.

5. The HSP shall provide CHT hoses of sufficient length from HSP equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

6. The HSP shall properly dispose of all sewage whether by pier-side or at anchorage.

7. The CHT service shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the U.S. Government. In those limited number of cases where this is not possible, the HSP shall provide a system to measure the volume of sewage deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT.

8. The HSP shall submit, as an attachment to the invoices, a document (certified by the ship's personnel) that indicates the quantity collected and the name of the disposal plant where the CHT will be disposed. The Government reserves the right to independently verify the actual volume of CHT discharged using a certified flow measuring device provided by the HSP. The Government reserves the right to request a

written statement from the HSP describing the method of measurement used to determine the amount of Oily Waste removed from the vessel.

9. The HSP shall follow any environmental regulations required by each country. If the ship concurs with the volume, the ship will pay for the entire amount.

10. The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the HSP's report in writing. The HSP is also responsible to keep all disposal certificates and shall make them available to Contracting Officer upon request.

11. When CHT removal is via barge, The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

In all cases when a ship orders CHT disposal services, the HSP shall invoice and will be paid the for a minimum daily quantity of CHT for providing the disposal services, even if the CHT quantity pumped and disposed that day is less than the 60 CM minimum quantity.

LINE ITEM XX09 - FRESH POTABLE WATER

1. Potable water is defined as fresh drinking water of a quality not less than that prescribed in:

   a. Current Drinking Water Standards, as published by the United States Environmental Protection Agency, Office of Water and shall comply with specifications of the National Primary and Secondary Drinking Water Regulations (NPDWR). See below:

1. Contaminant levels for inorganic chemicals (effective 1 January 1993)

CONTAMINANT	*MCLG (mg/L)* [1]	*MCL (mg/L)*	*AL (mg/L* [2]*)*
ASBESTOS	7 million fibers/L longer that 10 micrometers	7 million fibers/L longer than 10 micrometers

CONTAMINANT	*MCLG (mg/L) [1]*	*MCL (mg/L)*	*AL (mg/L [2])*
NITRITE (AS N)	1	1	
TOTAL NITRATE AND NITRITE (AS N)	10	10	
SELENIUM	0.05	0.05	
FLUORIDE :	4	4	

(1). Maximum contaminant level goal (MCLG). The maximum level of a contaminant in drinking water at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MCLGs are nonenforceable health goals.

(2) Action level (AL). Concentrations of lead or copper in water that determine, in some cases, whether a water system must install corrosion control treatment, monitor source water, replace lead service lines, and undertake a public education program.

(3) The copper action level is exceeded if the concentration of copper in more than 10 percent of tap water samples properly collected during any monitoring period is greater than 1.3 mg/L (i.e., if the "90th percentile" copper level is greater that 1.3 mg/L).

(4) The lead action level is exceeded if the concentration of lead in more that 10 percent of tap water samples properly collected during any monitoring period is greater that 0.015 mg/L (i.e., if the "90th percentile" level is greater than 0.015 mg/L).

2. Contaminant levels for volatile organic chemicals (VOCs) (effective 01 January 1993)

ALDICARB SULFOXIDE	0.001	0.004
ALDICARB SULFONE	0.001	0.002
PENTACHLOROPHENOL	0	0.001
TOTAL TRIHALOMETHANES (THE SUM OF THE CONCENTRATIONS OF BROMODICHLOROMETHANE, DIBROMOCHLOROMETHANE, TRIBROMOMETHANE (BROMOFORM), AND TRICHLOROMETHANE (CHLOROFORM)		0.10[(1)]

[(1)]. The MCL for total trihalomethanes applies only to water systems serving 10,000 or more individuals and which add a disinfectant to the water. For systems serving less than 10,000 individuals, individual States or BUMED (in overseas locations) may adopt an effective date for the MCL.

4. Coliform Bacteria

a. The MCL for coliform bacteria (also called total coliforms) is based on the presence or absence of total coliforms in a sample rather than on an estimate of coliform density.

b. The MCL for potable water systems analyzing at least 40 samples each month: No more than 5.0 percent of the monthly samples may be total coliform-positive.

c. The MCL for systems analyzing fewer than 40 samples each month: No more than one sample each month may be total coliform-positive.

d. Monitoring and Analytical Requirements

(1) Public water systems must collect total coliform samples at sites that are representative of water through the distribution system. Sampling must be accomplished according to a written sampling plan. The monitoring frequency and number of routine samples required for total coliform monitoring are based on the population served by the system and the type of water source, i.e., groundwater, surface water, etc. Reference (d) contains sampling requirements for the Navy public water system.

(2) The standard sample volume for microbiological analyses must be 100 milliliters.

(3) Approved methods of microbiological analysis include the Autoanalysis Coliert System, also called the Minimum Media ONPG-MUG (MMO-MUG) Test; the Presence-Absence (PA) Coliform Test; the multiple-Tube Fermentation (MTF) Technique, and the membrane Filter (MF) Technique. A step-by-step microbiological test procedure for shipboard use is included in reference (1).

e. Repeat Monitoring

(1) A set of three repeat samples for each total coliform-positive routine sample must be collected. One repeat sample must be collected from the same tap as the original total coliform-positive sample, the other repeat samples must be collected from within five service connections of the original total coliform-positive sample. At least one sample must be upstream and the other downstream. These repeat samples must be collected within 24 hours of being notified of the positive result of the original sample, except where the State waives this requirement on a case-by-case basis.

(2) If a total coliform-positive sample is at the end of the distribution system, or one service connection away from the end of the distribution system, the State may waive the requirement to collect at least one sample upstream or downstream of the original positive sampling site.

(3) If total coliforms are detected in any repeat sample, the system must collect another set of repeat samples, as before, unless the MCL has been violated and the system has notified the State (in which case the State may reduce or eliminate the requirement to take the remaining samples).

(4) If any routine or repeat sample is total coliform-positive, it must also be analyzed to determine if fecal coliforms are present, except that the system may test for E. coli in lieu of fecal coliforms. Or E. coli testing on total coliform-positive samples if the system treats every total coliform-positive sample as fecal coliform positive or E. coli positive and complies with all requirements that apply when a sample is fecal coliform-positive.

5. Turbidity The MCL for turbidity applies to both community water systems and noncommunity water systems using surface water sources in whole or in part. The MCL for turbidity in drinking water measured at representative entry points to the distribution system is:

a. One turbidity unit for monthly average (5 turbidity units monthly may apply at State option).

b. Five turbidity units (maximum) average for 2 consecutive days.

c. These requirements apply to filtered systems until 29 JUNE 1993. The requirements apply to unfiltered systems that the State has determined, in writing, must install filtration until 29 June 1993 or until filtration is installed whichever is later. After the above dates, consult the latest edition of 40 CFR 141.

6. The MCL for Radiological Contaminants are:

Gross alpha particle activity including radium 226 but excluding radon and uranium . . . . . .15 pCi/L
Combined radium-226 and radium 228 . . .. .5 pCi/L
Tritium . . . . .20,000 pCi/L
Strontium-90. . . . . 8 pCi/L

Note: Screening indicators have been established for radiological contaminants. Gross Alpha present at less than or equal to 5 pCi/L, as an indicator, eliminates the need to analyze for radium 226 and 228. Gross beta present at less than or equal to 8 pCi/L, as an indicator, eliminates the need to analyze for tritium and strontium-90.

7. Sodium and Corrosivity. No MCLs have been published; however, monitoring is required.

b. Code of Federal Regulations Title 21, Volume 2, Part 165.110 (21CFR165).

a. These documents are incorporated by reference with the same force and effect as if they were given in full text. Full text may be accessed electronically at these websites: http://www.epa.gov/OGWDW and http://www.tdh.state.tx.us/bfds. The HSP shall be responsible for identifying and providing water from a source that meets U.S. Government requirements. The U.S. Government reserves the right to accept deliveries of potable waters that do not comply with above specifications, and to bring the water up to specification standards through chlorination.

b. The HSP shall provide for the delivery of fresh potable water to the ships as ordered. The barges, tankers or trucks and equipment used for transfer, storage and transportation of potable water shall not be used for cargo other than potable water, and must be equipped with independent pipe systems and working, CERTIFIED METERING DEVICES.

c. Source of Water. Water deliveries are to be made from sources that meet the requirements of paragraphs (2)(a) and (2)(b) above. If the water source does not meet the requirements of potable water, the HSP shall be required to provide water from an alternate approved source at no increase in the contract price.

d. Potable water pierside shall be delivered by pipeline if available. If a vessel is at anchorage SUBLINE ITEM XX09AC applies.

2. The HSP shall be paid based on the ACTUAL METRIC TONS of potable water received on the ship. The Government reserves the right to require a written statement from the HSP describing the method of measurement used to determine the amount of potable water provided to the vessel.

LINE ITEM XX10 – SHIP UTILITY SERVICES

1. SHORE STEAM

   a. The HSP shall provide shore steam to the ship. This sub lot line item is performance-based. Shore steam provided to the ship may be provided by any means (boiler or generator) so long as the pressure of steam delivered to the vessel is approximately 100 PSI (standard commercial pressure) and of acceptable quality for the vessel. Pricing for provision of shore steam shall be on a TBD basis and should include the boiler or generator, fuel for the generator, mobilization/demobilization, hoses, and adapters appropriate to the vessel type, and water (where required) for the generator or boiler. This item shall be billed on a daily basis.

2. OIL BOOMS

   a. The HSP shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom. Billing for LINE ITEM XX10AA & XX10AB shall be per meter. For example, a 300-meter oil boom would be billed at 300 meters per day.

   b. Oil Booms are intended to act as a precautionary measure in case of inadvertent leakage from equipment otherwise in sound operating equipment. Oil booms are also intended to mitigate the environmental damages that may otherwise result from inadvertent leakage. The HSP shall notify the Ordering Activity, upon receipt of a LOGREQ request, if deployment of an oil boom at the proposed mooring location is contrary to host nation or port authority regulation so that the order for the oil boom service can be cancelled. Cleanup and disposal of oil is a port authority function. If the HSP incurs charges for these services, they shall be billed as port tariff items on a reimbursable basis.

3. SHORE POWER (INCLUDES CABLES, CONNECTION, FUEL, AND OPERATORS) 450-480V, 60 HZ

   a. The HSP shall provide shore power to the ship using a port-provided, permanent connection system or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels. The HSP shall provide all cables and make all power connections between the generator and ship. The availability of shore power shall be in accordance with the schedule established by the ship.

   b. Sub Lot Line Items XX10AC through XX10AG are to be used only if/when shore power provided by port authorities is, for any reason, not available or inadequate.

LINE ITEM XX11 – LAND TRANSPORTATION (PERSONNEL) SERVICES (BUS SERVICE AND VEHICLE RENTAL SERVICE)

1. GENERAL REQUIREMENTS :

   a. All drivers must be fully qualified and possess valid driving licenses. Drivers shall be familiar with local area and conversant in English. All vehicles shall be registered, licensed and insured. The HSP is responsible for delivering all cargo and personnel to the correct location on schedule.

   b. If a Government official is designated to drive the vehicle, he or she is required to be at least 21years and meet all requirements for driving in the host nation. The HSP is responsible for passing the information required to register with the local rental company from the Ordering Activity.

   c. The HSP shall provide vehicles that have been properly maintained and serviced. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government

shall have the right to reject the vehicle for performance of services. The HSP shall ensure that each vehicle is jointly inspected before and after a trip by the HSP and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

d. If a vehicle is not operable when required under this contract, the HSP shall provide, at no additional expense to the U.S. Government, a replacement vehicle within three (3) hours that complies in all respects with this contract.

2. BUS SERVICE

a. The HSP shall provide air-conditioned bus services on an hourly rate basis and bill under LINE ITEM XX11AA and XX11AB. The hourly rate shall include one driver or operator, any additional helpers or crew required by local authorities, all insurance, fuel, holiday surcharges, overtime, and all other operating expenses. Any additional driver, if required, shall be priced separately. Any tolls for long distance trips (over 50 kilometer radius) will be reimbursed at cost.

b. The HSP shall ensure that the bus is in sound mechanical condition and meets all safety standards required by local laws and regulations. Further, the bus shall be in a clean condition when presented for service and shall be free of debris.

c. In the event of a bus breakdown, the HSP shall provide within two hours, at no additional expense to the U.S. Government, a replacement bus complying in all respects with this contract.

d. Any personal articles or items found on the bus after completion of each trip shall be turned over to the ship's Ordering Officer.

e. The HSP shall be responsible for ensuring that the HSP and an authorized representative of the U.S. Government jointly inspect before and after a trip each bus. The U.S. Government will not consider any claim for damage to a bus, which has not been inspected.

3. VEHICLE RENTAL SERVICE

a. Vehicle Specifications, Maintenance, and Malfunctions

(i) The HSP shall furnish "new" air-conditioned vehicles (i.e., not more than five years old), in good order and condition and otherwise in full compliance with best commercial practices and local laws and regulations.

Sedans or SUVs shall have a minimum capacity of four (4) passengers and 1600cc engine.

In the event a "new" vehicle is not available in certain countries, the HSP shall contact the Contracting Officer to request a waiver from the requirement and provide background information as to why a waiver would be appropriate. The Contracting Officer will consider, and grant or refuse, the request. Vehicles shall be priced on a daily rate. They shall be equipped with front and back seat belts, an emergency triangle, spare tire, jack and complete set of tools for changing a flat tire, as well as any other equipment required by local authorities. Upon initial rental, the gasoline tank shall be full. The prices for vehicles rented are based upon an assumption that the vehicles will be returned with an empty tank of gas. There shall be no surcharge applied to the commercial price of the fuel. Vehicles can be returned with any amount of gasoline. Ships shall not be responsible for returning the vehicle with a full tank of fuel, and the HSP shall not be obligated to credit the ship for the remaining fuel.

(ii) The HSP shall provide vehicles that have been properly maintained and serviced, including all motor oils, lubricants, antifreeze, coolants and other fluids such as windshield washer fluid, and be responsible for all emergency repairs and services.

(iii) Should any vehicle break down while in the U.S. Government's possession, the HSP shall replace it with another vehicle of the same or larger size as quickly as possible, but in any case no more than three (3) hours later. The replacement shall take place either at the point of breakdown or at the HSP's office closest to that point; whichever is more convenient for the U.S. Government. All repair or replacement costs, including transportation, shall be at the HSP's expense. In addition, the HSP shall be liable for any U.S. Government incurred costs because of the breakdown; such as towing, repair costs, and related transportation expenses because the HSP was unreachable.

b. Substitution of Vehicles

(i) If the HSP does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the HSP shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a Group B car is ordered but unavailable, and if no other Group B vehicle is available, the HSP shall furnish a higher group vehicle at the price listed for the Group B vehicle originally ordered.
(ii) In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

c. General Description of Vehicle Types

(i) The vehicles shall meet the general description set out below:

Medium-size Sedan (Group "B"): 2 - 4 doors; 4 - 5 passenger capacity; air conditioning; minimum 1600 cc engine sedan.

Executive Sedan (Group "E"): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan.

Passenger Van (Group "M"): 9-passenger capacity; air conditioning; minimum 2000cc engine.

Cargo Van (Group "X"): 12 Cubic Meter volume capacity, air conditioning; minimum 2000cc engine.

d. Insurance and Liability.

(i) The prices for vehicle rental services, as set forth in the schedule, shall be subject to the conditions below.

(ii) The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cause, except where the loss or damage is caused by the willful and wanton negligence of the U.S. Government employee.

(iii) The HSP and any Subcontractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, resulting from the fault, negligence, or wrongful act or omission of the HSP, its subcontractors, its agents, or employees.

(iv) The HSP shall provide and maintain at its expense, all vehicle operator's insurance required by the law of the country in which the vehicle is to be operated. All necessary insurance certificates shall be provided with the rental vehicle. Such insurance shall include all coverage required by law for bodily injury, collision, and property damage liability. The HSP shall be liable for, and shall indemnify and

hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, within the required policy limits, arising out of or in connection with the rental or use by the U.S. Government, its agents or its employees of any vehicle under this contract.

(v) Paragraph (iv) shall not be construed as limiting the HSP's liability to the amounts of the required minimum insurance coverage specified therein.

e. Traffic Violations and Fines. Each vehicle operator shall be responsible for payment of fines and legal costs incurred as a consequence of the violations of traffic laws or regulations. The HSP shall notify the Supply Officer of the infraction and amount cited.

f. Mileage and Deposit Charges. There are no mileage or deposit charges for the vehicles rented under this contract.

g. Time Periods of Rental. Rental time shall begin once U.S. Government employees have taken possession of the vehicle. The daily rate is defined as 24 consecutive hours. If the vehicle is rented with a driver, and if a driver is required during the entire period of rental, no individual driver shall be required to drive more than 8 hours straight. Drivers must not have been driving within the previous 8 hours.

h. Executive Sedan with Driver (Group "Y"): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan. This group requires an executive sedan and shall be provided with a driver. Drivers must be familiar with local area, and must speak English. Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. No individual driver shall be required to drive more than 8 hours. Drivers must not have been driving within the previous 8 hours. The HSP shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations by the provided driver. The U.S. Government will reimburse the HSP for additional costs in two cases: for highway tolls, and for the driver's overnight accommodation up to $120.00 or equivalent local currency, when required by U.S. Government business such as travel to another city, and upon presentation of an original invoice.

LINE ITEM XX12 - TELEPHONE SERVICES AND COMMUNICATIONS EQUIPMENT

1. Cellular Telephone Services (LINE ITEM XX12AC): Daily charges shall be inclusive of delivery, removal, provision of 110V to 220V transformers, adapters and extra batteries. Activation, auto roaming, and long distance accounts shall be included under LINE ITEM XX12AC. The HSP shall have readily available a minimum of 10 cellular telephones at a given time. Each mobile phone provided shall include an operating manual/instruction with published rates for usage.

2. Landlines (LINE ITEM XX12AA): Whether installed on a permanent or temporary basis, sufficient landlines shall be made available for official, local, and international use. Installation charges shall be inclusive of all costs for installation and removal of landlines. Usage charges and port tariff fees associated with landline connections (LINE ITEM XX12AB) will be the actual charges computed in accordance with the local or national tariff.

3. The HSP shall provide pre-paid International Calling Cards for official use (LINE ITEM XX12AE).

LINE ITEM XX13, XX14, XX15 - FORCE PROTECTION BARRIERS, PERSONNEL, AND SUPPLIES

1. Only the ship's Commanding Officer, the ship's Supply Officer, or the FISC Yokosuka Contracting Officer is authorized to order Force Protection (FP) services under this contract. If any other activity or individual attempts to order FP services (e.g., NCIS, DAO, etc), the Husbanding Service (HSP) Contractor is required to immediately inform the ship and receive a proper order prior to beginning performance of these services.

2. The HSP is responsible for providing and coordinating the FP services described in paragraphs 2-6 and 8-15 as part of their Husbanding Services under Lot Line Item XX01. The HSP shall develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HSP must coordinate all aspects of FP planning and services with Port Authorities, host nation agencies, and U.S. Embassy security staff. If the host nation is supplying FP assets the HSP must verify they are available and are scheduled to show up on time.

3. The HSP will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer. The HSP shall not add any requirements without prior approval.

4. The HSP is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Yokosuka Contracting Officer. The HSP must explain what the added FP service will include and why it has been requested. The FISC Yokosuka Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HSP will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

5. FP is considered a combination of practices and procedures, including the use of specific material, equipment, and personnel, having the objective of improving security to personnel and ships while in port. FP services or supplies may be provided by the host nation at no cost or may be billed at the public tariff rate. The HSP is required to verify what services will be provided by the host nation. For the services that cannot be provided by the host nation, the HSP is required to arrange these services by obtaining them from commercial sources at the prices indicated in the pricing schedule.

6. The HSP shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HSP's written policy shall describe the required measures to protect ship schedule information.

7. The HSP shall provide as many services identified below as ordered by the ship or FISC Yokosuka Contracting Officer. These services do not include other related services not listed, but may be required and separately ordered to attain a higher level of security in a port.

8. Personnel providing force protection services must be responsive to instructions from the ship. This does not authorize force protection personnel to violate any local regulations, any Port Authority ordinances, or local decrees. The equipment and material used for the force protection services will be inspected by the ship's force to ascertain that they meet force protection requirements.

9. Access Points: The HSP shall establish a single entry and exit point to the pier area.

10. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

11. Personnel Identification: The HSP shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

12. Background Checks: The HSP shall conduct security background checks on employees and subcontractor employees with local or national police departments or other government organizations. The HSP shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers. The HSP shall issue photo identification badges to its personnel and ensure subcontractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times. The HSP shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing. In addition, the HSP will be required to provide vetting services for third party contractors such as DLA-Engery contractors.

13. Access Lists: The HSP shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

14. Inspections: The HSP shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

15. Stand-Off Distances:

    a. Objects: To the maximum extent practicable the HSP shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

    b. Unloading Zones: To the maximum extent practicable the HSP shall establish unloading zones at least 400 feet (125 meters) away from the ship.

    c. Warning Signs: The HSP shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

        i. Sign Specifications:
            1. Language: Must be in the local language(s) as well as English.
            2. Wording: Must state "Restricted Area, Do Not Enter"
            3. Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
            4. Color: Yellow or white with black lettering
            5. Visibility: Must be highly visible from a distance of 400 feet (125 meters)
            6. Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

16. The unit price for force protection services shall include all costs associated with providing transportation, mobilization/installation and demobilization/de-installation, or arranging the requested services below unless the transportation, mobilization/installation and demobilization/de-installation is identified as a separate Lot Line item number. The HSP's invoice shall set forth the unit of issue identified for each service, total quantity ordered for each service, unit price, and the total price.

17. The force protection services that the ships may order if included on the contract schedules are:

(a) Jersey-type security barriers and CONEX box barriers capable of stopping a vehicle (automobile). (Price per meter per day)

(i) Concrete barriers

(ii) Water filled barriers (completely filled with water). Price must include water.

(iii) CONEX box barriers.

Mobilization, installation and demobilization will be billed under a separate contract line item number.

(b) Unarmed security guard to control vehicle and personnel access to pier. (Price per guard per hour) Must be English speaking, and equipped with own handheld radio (not ship's radio) to communicate with ship. Duties and responsibilities will be coordinated with the ship upon arrival.

(c) Floating Line of Demarcation (LOD) at pierside, equipped with anchors and lighting (for night visibility). (Price per meter per day) The floating LOD must be anchored at least 30 meters from ship. Oil booms are acceptable. Mobilization, installation and demobilization will be billed under a separate contract line item number.

(d) Unarmed and manned waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities. Continuous coverage is required for the period of performance ordered by the ship or by the Contracting Officer. (Price per patrol craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HSP is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(e) Unarmed and manned motorized patrol craft, approximately 5-10 meters in length, with own radio to communicate with ship and local authorities, to escort ship from pilot pickup point to mooring location. (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HSP is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(f) Unarmed and manned waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities, on call (available within 15 minutes). (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HSP is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(g) Tire-shredding strips, equipped with metal spikes, to be placed across the entry to pier access. (Price per one strip per day) Must be capable of disabling a vehicle, which drives over the strips in the wrong direction. Strips must be at least one meter in length.

(h) Metal pedestrian-control fences. (Price per 2x2 meters fence per day) Must be at least two (2) meters high, two (2) meters wide, and sturdy enough to withstand wind and other inclement weather.

(i) Signs in host nation language. Signs shall be at least one (1) meter long and a half (1/2) meter wide, with lettering at least 10 cm high. (Price per sign per day). Each sign is to read: "Controlled area. Unauthorized entry prohibited." Signs shall be legible, on a sturdy material that will not fade, run, or be ruined due to inclement weather (plastic material preferable). Signs shall also be written in fluorescent paint/material or be lighted, so they can be seen at night. Signs shall have some type of securing means on them, such as a hole punched in each corner, to use wire to secure sign to fence.

(j) Portable fluorescent lighting capable of illuminating 300 meters by 100-meter area. The HS Contractor shall

provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port's installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting. (Price per portable unit per day)

(k) Weather resistant guard shacks, capable of holding at least two persons. Guard shack shall be enclosed, and shall have, at a minimum, one door and one window. Please indicate guard shack measurements. (Price per unit per day).

(l) Hand held metal detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition (Price per unit per day)

(m) Walk-through metal detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

(n) Trained metal detector operators. (Price per hour per operator). Operators shall search host nationals and host national vehicles. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

(o) Hand held explosives detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day).

(p) Walk-through explosive detector, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

(q) Trained explosives detector operators, (Price per hour per operator). Operators shall search host nationals and host national vehicles. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

(r) X-ray baggage scanning machines, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

(s) Trained X-ray baggage scanning operators (Price per hour per operator). Operators shall search host national baggage. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

(t) Explosives disposal-trained diving services capable of inspecting pier before ship arrival. Must have obtained all applicable licenses and/or certifications from host nation prior to diving. (Price per hour)

(u) Battery operated bullhorns, new batteries included. (Price per unit per day)

(v) Sturdy tables with dimensions of at least two (2) meters long and one (1) meter wide, with four folding chairs. (Price per unit per day)

(w) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and open on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(x) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and closed on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(y) 800 MHz radios. Must be in excellent condition, and battery operated, with batteries included. (Price per unit per day)

Note: If the FP services required in support of the port visit are not included as pre-priced items in the contract schedules, paragraph D.5. of the PWS applies.

LINE ITEM XX16 - PORT HANDLING COSTS

1. PAINT FLOAT

a. The paint float shall be no less than 5M in length but, in all cases, large enough to provide a safe and stable working platform for the occupants. Scaffolding may be of any height less than 3.5M from the deck, so as to provide a working platform at least 4M from the waterline. The paint float shall be equipped with suitable self-fendering to prevent damage to the ship. The price of these fenders shall be included in the quoted price of the paint float. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge. Rails shall be no less than 1M from the working platform. The working platform shall be equipped with anchor points for harnessing. The Ordering Activity shall be responsible for providing safety harnesses, for obtaining permission from local authorities prior to all work on the paint float, and for cleanup/disposal of all hazardous material generated or released outside the paint float. The HSP shall notify the Ordering Activity of local regulatory requirements concerning paint floats, assist the Ordering Activity in submitting requests and passing required documentation to the local authority where permission is required to work on the paint float, and arrange for required cleaning of the paint float upon return. The ordering activity is responsible for securing the paint float from the time custody has been transferred to them until returned to the HSP or the ship departs, whichever is earlier.

2. MATERIAL HANDLING (UP TO 150 LBS)

a. The HSP shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

b. The HSP shall use counter-to-counter delivery and charge by each Bill of Lading. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

c. Shipping documents shall be labeled "SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HSP.

d. The HSP shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel. The HSP shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

e. The HSP shall receive the package from the ship and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

f. The HSP shall deliver the package to the ship the day of arrival in port or the following morning. The HSP shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative.

g. The HSP shall forward the package to a designated location if for any reason it cannot be delivered to the ship. The HSP shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

3. MANLIFT (WITHOUT OPERATOR)

a. The HSP shall provide a manlift (without operator) and a full fuel tank. The HSP shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning. The HSP shall conduct training on safety and operating procedures for ship personnel. The HSP shall maintain documentation of ship personnel acknowledgement of the training.

LINE ITEM XX17 - COST REPORTING

LINE ITEM XX17AA - LogSSR Reporting

Upon award, the HSP shall utilize the LogSSR to submit all reports and documentation related to the husbanding order. LogSSR can be accessed through the NAVSUP One Supply website at https://www.navsup.navy.mil/onesupply, redirected through www.navsup.navy.mil/logssr or directly at the official website of https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(1) LogSSR access and input.

(a) At the start of the contract period of performance, the HSP shall begin to enter the final itemized port cost information for every order under this contract directly into the LogSSR database (Actual Cost Report) and email all corresponding documentation (LOGREQ, Initial Cost Estimate Report, validation of submission of cost estimate, final invoices, and supporting documentation required by the contract). External Certification Authority Public Key Infrastructure (ECA PKI) is not required for entry, but no access to the HSP's information is accessible unless obtaining an ECA PKI.

(2) LogSSR functionality.

(a) This system is designed to gather all reports and documentation related to ALL ordering activity e.g. a ship's visit, beginning with the Initial Cost Estimate (referred to in this solicitation as the 'pre-arrival cost estimate') to the Actual Cost Report. All supporting documentation will be submitted by email to navsup_hq_logssr@navy.mil in PDF format (Adobe Acrobat) when the port visit information is entered into LogSSR. Although the pre-arrival cost estimate is a separate reporting requirement, a copy of this report shall also be submitted as part of the Actual Cost Report documentation described in paragraph (b) below. The Documentation is discussed below:

(b) Actual Cost Report:

(1) The HSP shall create the Actual Cost Report in the LogSSR website directly, **within seven (7) calendar days from completion of the ship's visit**. The HSP shall also send a copy of the order (i.e. SF 1155 or 1449), a copy of any Initial Cost Estimates, a copy of the LOGREQ, and all HSP and any sub-contractor invoices and supporting documentation required by the contract as PDF files to the LogSSR email address of **navsup_hq_logssr@navy.mil** and to the email address specified at the time of contract award for each region concurrent with the creation of the Actual Cost Report in LogSSR. The HSP shall identify the line items as actual or estimated. This option is for those line items where the HSP has not received the actual invoice before the ship leaves port, i.e. telephone bills. The HSP shall include ALL port costs paid by each ship for which the HSP provides husbanding services. Email submissions should be limited to no more than 10 MB per email (multiple emails authorized if needed) and reference the port visit identification number in the subject line (received when a port visit is submitted).

(2) For ships or ordering activities that do not have disbursement capabilities, the HSP shall send the signed DD Form 1155, invoices and the additional documents required clearly indicating that a

payment is pending to email address husbanding@fe.navy.mil and to the LogSSR email address of **navsup_hq_logssr@navy.mil.**

(3) Any changes to an Actual Cost Report (i.e. finalize the charges made on an estimated amount) shall be forwarded by e-mail to and to the email address husbanding@fe.navy.mil and to **navsup_hq_logssr@navy.mil** email account as PDF file within seven (7) calendar days of the change. The email must contain a summary of the changes. The FISC contracting office will update changes to the LogSSR.

(4) The Actual Cost Report and supporting documentation will be visible in the LogSSR website by the government personnel with validation authority. Final reports of an HSP representative can be accessed through the website only by obtaining an ECA PKI that will provide access only to the HSP's submitted information.

NOTE: Before submission of reports or any other data to the FISC Contracting Office via electronic transmission or any other data media, the HSP shall scan all documents with current anti-virus software to ensure computer virus free transmission. The LogSSR server scans all reports for computer viruses before inclusion in the databases. Any reports received containing computer viruses will be immediately deleted and not necessarily returned to the HSP.

NOTES:

1. "All data obtained by the Government through the use of LOGSRR during the course of the contract is for the Government's use and shall be treated as 'limited rights' as described in DFAR 252.227-7013(13) after the contract expires".

2. Failure to provide required reports in a timely manner as outlined in the PWS will result in penalties as outlined in the Quality Assurance Surveillance Plan (QASP).

Line Item XX18 - PORT TARIFFS NOT OTHERWISE SPECIFIED

Line item XX18AE – Port Tariff Items

1. Port tariffs (PT) billable under XX18 include all PT items for which a specific sub-line item is not specified in the Attachment 2.

2. The HS Contractor shall also provide all original documents with any invoices for port tariff items which have been provided to the ship for certification by the ship's Supply Officer prior to departure. Invoices for port tariff items not available prior to the ship's departure shall be presented for payment in accordance with OC-1.

CONTRACT ADMINISTRATION PLAN
PROGRAM TITLE: Pacific Islands Ocean Husbanding Logistics Services for U.S. Naval Forces

DESCRIPTION OF PROGRAM: This requirement is for husbanding logistics services to support U.S. Naval forces and other U.S. Government agencies in Pacific Islands. This is an indefinite-delivery indefinite-quantity (IDIQ) contract and task orders will be issued by authorized ordering officers or FISC contracting officers.

PROCURING CONTRACT OFFICE: U.S. Fleet & Industrial Supply Center, Detachment Singapore

CONTRACT ADMINISTRATION OFFICE: U.S. Fleet & Industrial Supply Center, Detachment Singapore

Note: Prior to award of regional contracts, Contracting Officer Representatives (CORs) will be assigned to specific contracts, ports, and/or countries. Additionally, 30 days after award, Administrative Contracting Officers (ACOs) will be assigned.

PAYING OFFICE: Payment will be made by government purchase card, by the ship's disbursing office, or the DFAS Yokota Paying Office. Individual task orders will identify the office making payment.

1. PURPOSE: The purpose of this Contract Administration Plan (CAP) is to:

- Identify key contract administration milestones
- Provide a consistent and uniform approach through the region for monitoring performance requirements
- Identify key roles and responsibilities
- Outline the ordering and invoice processes
- Outline the cost reporting process
- Outline the past performance documentation process

2. CONTRACT ADMINISTRATION MILESTONES:

Event	Milestone Date	Government Person Responsible
1. Provide minimum IDIQ funds for award	90 days before award	Fleet
2. Write COR's designation letter	Prior to Award	Contracting Officer
3. Award contracts	Award date	Contracting Officer
4. Write ACO's designation letter	30 days after award	Contracting Officer
5. Prepare funded delivery orders	When service required	Authorized Ordering Officer or Contracting Officer
6. Establish schedule with HSP of actions and Deliverables	30 days after award	COR or Contracting Officer
7. Hold post-award orientation meeting	30 days after award	Contracting Officer and COR
8. Obtain HSP's schedule of any actions during phase-in	45 days after award	Contracting Officer and COR
9. Schedule quarterly performance meetings & notify participants	45 days after award	Contracting officer and COR
10. Provide quarterly and semi-annual input for performance assessments (i.e., QASP/CPARS)	45 days after award	Fleet, COR, HSP, Contracting Officer
11. Document HSP performance for past performance purposes (i.e., CPARS)	Semi-annually after contract award	COR, Contracting Officer
12. Close-out contract file	180 days after contract complete	Contracting Officer

3. MONITORING CONTRACTOR PERFORMANCE: Contract performance will be monitored and feedback provided in accordance with the Quality Assurance Surveillance Plan (QASP) and Contractor Performance Assessment Reporting System (CPARS). The contract contains negative incentives if metric goals, as identified in the QASP, are not achieved. Documentation of performance through the QASP will be performed on a quarterly basis and the CPARS will be performed on a semi-annual basis.

The QASP will monitor the following areas:

- Adherence to Port Visit Cost Reporting
    - Timeliness of cost estimates received
    - Timeliness of final cost estimates
    - Cost reporting submittal accuracy and completeness

- Fair and Reasonable Pricing for Non-Contract Items
    - Competition promoted to the maximum extent
    - Documentation of reasonableness

- Customer Satisfaction
    - Ship's satisfaction with HSP services
- Cost Savings

CPARS will monitor performance in the following areas:

- Quality of Product or Service
    - Are reports/data accurate?
    - Does the product or service provided meet the specifications of the contract?
    - Does the HSP's work measure up to commonly accepted technical or professional standards?
    - What degree of Government technical direction was required to solve problems that arise during performance?

- Schedule
    - Assess the timeliness of the HSP against the completion of the task orders, milestones, delivery schedules, and administrative requirements
    - This assessment of the HSP's adherence to the required delivery schedule should include the HSP's efforts during the assessment period that contributes to or affect the schedule variance.

- Cost Control
    - Does the HSP keep within the estimated costs?
    - Did the HSP do anything innovative that resulted in cost savings?
    - Were invoices accurate, complete and timely?

- Business Relations
    - Is the HSP oriented toward the customer?
    - Is interaction between the HSP and the government satisfactory or does it need improvement?
    - Address the timeliness of awards to subcontractors and management of subcontractors, including subcontract costs. Consider efforts taken to ensure early identification of subcontract problems and the timely application of corporate resources to preclude subcontract problems from impacting overall prime contractor performance.
    - Assess the prime contractor's effort devoted to managing subcontracts and whether subcontractors were an integral part of the contractor's team.

- Management of Key Personnel
    - How well did the HSP match the qualifications of the key position, as described in the contract, with the person who filled the key position?
    - Did the HSP support key personnel so they were able to work effectively?
    - If a key person did not perform well, what action was taken by the HSP to correct this?
    - If a replacement of a key person was necessary, did the replacement meet or exceed the qualifications of the position as described in the contract schedule?

4. ROLES AND RESPONSIBILITIES: The following outlines the major roles and responsibilities for contract administration purposes.

Contracting Officer: Contracting officers assigned to this contract are responsible for ensuring performance of all necessary actions for effective contracting, ensuring compliance with the terms of the contract, safeguarding the interests of the United States in its contractual relationships.

In order to perform these responsibilities, contracting officers assigned to this contract are allowed wide latitude to exercise business judgment. Contracting officers must:

Ensure that the requirements of the pertinent laws, regulations, etc., have been met;

Ensure that sufficient funds are available for obligation;

Ensure that HSPs receive impartial, fair, and equitable treatment; and

Request and consider advice of specialists in audit, law, logistics, transportation, and other fields, as appropriate.

Make fair and reasonable determinations for all non-priced line items with an extended value greater than $3,000.00.

Notify the Ordering Activity when quoted prices cannot be determined fair and reasonable.

Contracting officers must also perform the actions required for the business relationship:

Interpreting and implementing diverse contract terms and conditions;

Analyzing costs;

Issuing changes and negotiating modifications to the contract; and

Organizing and coordinating efforts of all the functional specialists who comprise the contract administration team.

Monitor timeliness of required reports from the HSP (e.g. pre-arrival cost estimates);

Determine whether there is sufficient rationale to add previously ordered, non-priced items to the contract as fixed prices;

Monitor contract performance data and track performance metrics as required by the QASP;

Annually assess the HSP's performance in the Contractor Performance Assessment Reporting System (CPARS).

Contracting Officer Representatives (CORs): Various CORs may be assigned to this contract. The responsibilities of the CORs are:

Monitoring contract performance on behalf of the contracting officer;

Monitor compliance with the terms and conditions of the contract;

Providing technical advice/recommendations/clarifications of requirements to the ship;

Coordinating LOGREQ information;

Working with database information;

Liaison between the ships and HSP;

Informing the contracting officer of performance problems;

Furnishing the contracting officer of conference report;

Coordinating with the contracting officer corrective actions, when necessary;

Coordinating with the contracting officer on the content of any contractually significant correspondence addressed to the HSP;

Monitoring financial management controls;

Reviewing HSP invoices, when requested;

Assembling the documentation for quarterly QASP reviews and semi-annual CPARS; and

Maintaining a file system.

Review LOGREQs and provide feedback to the Ordering Officer;

When requested, assist the Ordering Officer with invoice reconciliation;

Submit a quarterly report to the Contracting Officer which addresses HSP performance concerns.

NOTE: The COR is not an administrative contracting officer and does not have the authority to direct the accomplishment of effort which is beyond the scope of the performance work statement (PWS) in the contract. When in the opinion of the HSP, the COR requests effort outside the existing scope of the contract, the HSP shall promptly notify the contracting officer in writing. No action shall be taken by the HSP under such direction, until the contracting officer has issued a modification to the contract, or until the issue is resolved.

Ordering Officers: The contract allows U.S. Navy Supply Officers assigned to a ship or and other designated personnel authorized in the contract to place task orders off the contract as ordering officers. The responsibilities of the ordering officers are as follows:

Issuance of delivery/task orders;

Obligating funds when issuing task orders;

Authorize performance;

Complying with ordering procedures;

Bring to the attention of the contracting officer or COR any significant deficiencies with respect to HSP performance, deliveries, or actions which might jeopardize contract performance;

Notify the contracting officer or COR if the HSP is of the opinion the task order is deficient or beyond the scope of the basic contract;

Monitoring services of the HSP;

Providing feedback on HSP performance;

Notifying the contracting officer when cost estimates are not provided in a timely manner;

Notifying the contracting officer of invoice discrepancies or overcharges; and

Maintaining contractual records of task orders.

Make fair and reasonable determinations for all non-priced items with an extended cost of less than $25,000;

Review HSP invoices prior to payment;

Arrange for payment of finalized invoices prior to departure.

Prohibitions: The COR and ordering officers are prohibited from:

Modifying any of the stated terms of the contract;

Taking any action, either directly or indirectly, that could result in change in pricing, quantity, quality, place of performance, delivery schedule, or any other terms or conditions of the basic contract;

Direct the accomplishment of effort which would exceed the scope of the basic contract and delivery/task order;

Taking action with respect to termination, except to notify the contracting officer that the action is desired;

Giving guidance to the HSP, either orally or in writing, that might be interpreted as a change to the scope of the terms of the contract; and

Directing the HSP to begin work prior to the order date.

5. ORDERING AND INVOICE PROCESS: Task orders for husbanding services are normally provided by the ship's Supply Officer with contracting authority delegated through the Type Commanders (TYCOMs). In unique instances, the Contracting Officer may issue task orders on behalf of the ships for husbanding services.

For husbanding services, the ship provides a Logistics Requisition (LOGREQ) through as a Naval Message to the organizations responsible for coordinating the order (e.g., FISC's Logistics Support Center (LSC) and Defense Attaché Office (DAO)) with the HSP. The COR (within the LSC) will pass the LOGREQ to the Contracting Officer for review and feedback on possible contractual issues/concerns. The COR will review the LOGREQ for quality and cost saving recommendation purposes and provide information back to the ship. The COR will also pass the LOGREQ on to the HSP on behalf of the ship. Once the HSP receives the LOGREQ, the HSP will provide a cost estimate to the Contracting Officer, and ship. The COR and contracting officer will review the cost estimate to ensure items are priced in accordance with the contract. In cases where a ship is ordering non-priced items, the Contracting Officer will be responsible for negotiating these items when it is outside the contracting authority of the Ship's Supply Officer. The COR will notify the ship of the results of the negotiated prices. The goal is the timely resolution of all pricing issues prior to the port visit. If prices are not negotiated prior to the visit, prices must be negotiated before the the non-priced services are provided. If there are any disputes regarding the prices, the Contracting Officer has the responsibility to resolve the issue.

For husbanding services, invoices shall be submitted to the ship's Supply Officer and payment will normally be made by the ship's disbursing office prior to the ship's departure. In instances where there is a dispute or invoices can not be paid by the ship's disbursing office, invoices will be submitted to the contracting officer and payment will be made by DFAS Yokota. For OOTW task orders, a warranted contracting officer will negotiate and issue the orders and invoices will normally be paid out of DFAS Yokota. In all cases, the HSP is responsible for reporting all expenditures under the contract through the LogSSR.

6. COST REPORTING PROCESS: The HSP is responsible for fully participating in the execution of the LogSSR. Requirements for these reports are contained in the Performance Work Statement and quality monitoring procedures are outlined in the QASP.

7. PAST PERFORMANCE DOCUMENTATION PROCESS: The COR and contracting officer will be responsible for documenting past performance through the CPARS system. There will be one final record annually, with an interim review every six months. The COR will be responsible for collecting and forwarding relevant past performance information to the contracting officer. CPARS records will be forwarded to the HSP for review and an opportunity to provide any feedback on negative performance documented in the record.

CLAUSES INCORPORATED BY REFERENCE

52.202-1	Definitions	JUL 2004
52.212-4	Contract Terms and Conditions--Commercial Items	JUN 2010
52.222-50	Combating Trafficking in Persons	FEB 2009

252.233-7001	Choice of Law (Overseas)	JUN 1997

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (JUL 2010)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (Aug 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(2) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(3) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

_X__ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.203-13, Contractor Code of Business Ethics and Conduct (APR 2010)(Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note)).

___ (3) 52.203-15, Whistleblower Protections under the American Recovery and Reinvestment Act of 2009 (JUN 2010) (Section 1553 of Pub. L. 111-5). (Applies to contracts funded by the American Recovery and Reinvestment Act of 2009.)

___ (4) 52.204-10, Reporting Executive Compensation and First-Tier Subcontract Awards (JUL 2010) (Pub. L. 109-282) (31 U.S.C. 6101 note).

___ (5) 52.204-11, American Recovery and Reinvestment Act—Reporting Requirements (JUL 2010) (Pub. L. 111-5).

___ (6) 52.219-3, Notice of Total HUBZone Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (7) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (8) [Reserved].

___ (9)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (10)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (iii) Alternate II (MAR 2004) of 52.219-7.

___ (11) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637 (d)(2) and (3)).

___ (12)(i) 52.219-9, Small Business Subcontracting Plan (JUL 2010) (15 U.S.C. 637(d)(4)).

___ (ii) Alternate I (OCT 2001) of 52.219-9

___ (iii) Alternate II (OCT 2001) of 52.219-9.

___ (iv) Alternate III (JUL 2010) of 52.219-9.

___ (13) 52.219-14, Limitations on Subcontracting (DEC 1996) (15 U.S.C. 637(a)(14)).

___ (14) 52.219-16, Liquidated Damages--Subcontracting Plan (JAN 1999) (15 U.S.C. 637(d)(4)(F)(i)).

___ (15)(i) 52.219-23, Notice of Price Evaluation Adjustment for Small Disadvantaged Business Concerns (OCT 2008) (10 U.S.C. 2323) (if the offeror elects to waive the adjustment, it shall so indicate in its offer).

___ (ii) Alternate I (JUNE 2003) of 52.219-23.

___ (16) 52.219-25, Small Disadvantaged Business Participation Program--Disadvantaged Status and Reporting (APR 2008) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (17) 52.219-26, Small Disadvantaged Business Participation Program--Incentive Subcontracting (OCT 2000) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (18) 52.219-27, Notice of Total Service-Disabled Veteran-Owned Small Business Set-Aside (MAY 2004) (U.S.C. 657 f).

___ (19) 52.219-28, Post Award Small Business Program Rerepresentation (APR 2009) (15 U.S.C. 632(a)(2)).

___ (20) 52.222-3, Convict Labor (JUNE 2003) (E.O. 11755).

___ (21) 52.222-19, Child Labor--Cooperation with Authorities and Remedies (JUL 2010) (E.O. 13126).

___ (22) 52.222-21, Prohibition of Segregated Facilities (FEB 1999).

___ (23) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

___ (24) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of theVietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (25) 52.222-36, Affirmative Action for Workers with Disabilities (JUN 1998) (29 U.S.C. 793).

___ (26) 52.222-37, Employment Reports on Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (27) 52.222-54, Employment Eligibility Verification (JAN 2009). (Executive Order 12989). (Not applicable to the acquisition of commercially available off-the-shelf items or certain other types of commercial items as prescribed in 22.1803.)

___ (28) (i) 52.223-9, Estimate of Percentage of Recovered Material Content for EPA-Designated Items (MAY 2008) (42 U.S.C. 6962(c)(3)(A)(ii)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (ii) Alternate I (MAY 2008) of 52.223-9 (42 U.S.C. 6962(i)(2)(c)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (29) 52.223-15, Energy Efficiency in Energy-Consuming Products (DEC 2007) (42 U.S.C. 8259b)

___ (30)(i) 52.223-16, IEEE 1680 Standard for the Environmental Assessment of Personal Computer Products (DEC 2007) (E.O. 13423) .

___ (ii) Alternate I (DEC 2007) of 52.223-16. .

___ (31) 52.225-1, Buy American Act--Supplies (JUNE 2003) (41 U.S.C. 10a-10d).

___ (32)(i) 52.225-3, Buy American Act--Free Trade Agreements--Israeli Trade Act (JUN 2009) (41 U.S.C. 10a-10d, 19 U.S.C. 3301 note, 19 U.S.C. 2112 note, 19 U.S.C. 3805 note, Pub. L. 108-77, 108-78, 108-286, 108-302, 109-53, 109-169, 109-283, and 110-138).

___ (ii) Alternate I (JAN 2004) of 52.225-3.

___ (iii) Alternate II (JAN 2004) of 52.225-3.

___ (33) 52.225-5, Trade Agreements (AUG 2009) (19 U.S.C. 2501, et seq., 19 U.S.C. 3301 note).

___ (34) 52.225-13, Restrictions on Certain Foreign Purchases (JUN 2008) (E.O.'s, proclamations, and statutes administered by the Office of Foreign Assets Control of the Department of the Treasury).

___ (35) 52.226-4, Notice of Disaster or Emergency Area Set-Aside (Nov 2007) (42 U.S.C. 5150).

___ (36) 52.226-5, Restrictions on Subcontracting Outside Disaster or Emergency Area (Nov 2007) (42 U.S.C. 5150).

___ (37) 52.232-29, Terms for Financing of Purchases of Commercial Items (FEB 2002) (41 U.S.C. 255(f), 10 U.S.C. 2307(f))

___ (38) 52.232-30, Installment Payments for Commercial Items (OCT 1995) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).

_X__ (39) 52.232-33, Payment by Electronic Funds Transfer--Central Contractor Registration (OCT 2003) (31 U.S.C. 3332).

___ (40) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332)

_X__ (41) 52.232-36, Payment by Third Party (FEB 2010) (31 U.S.C. 3332).

___ (42) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (43)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

___ (ii) Alternate I (APR 2003) of 52.247-64.

____

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.)

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

____ (7) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations (Mar 2009) (Pub. L. 110-247).

____ (8) 52.237-11, Accepting and Dispensing of $1 Coin (SEP 2008)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to

litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in this paragraph (e)(1)in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause—

(i) 52.203-13, Contractor Code of Business Ethics and Conduct (APR 2010) (Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note).

(ii) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(iii) Reserved.

(iv) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(v) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(vi) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(vii) Reserved.

(viii) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (AUG 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(x) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(xi) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

(xii) 52.222-54, Employment Eligibility Verification (JAN 2009).

(xiii) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations. (MAR 2009) (Pub. L. 110-247). Flow down required in accordance with paragraph (e) of FAR clause 52.226-6.

(xiv) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from 1 Dec 2010 through 30 Nov 2011.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than $3,000.00, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The Contractor is not obligated to honor a series of orders within 30 days for performance at a specific port that together call for quantities that exceed those identified in the pricing schedule by more than 300 percent (300%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering

clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the effective period of the contract.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before contract expires.

(End of clause)

52.217-9 OPTION TO EXTEND THE TERM OF THE CONTRACT (MAR 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 15 days; provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 30 days before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed 18 months.

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses: http://acquisition.gov/comp/far/
DFARS Clauses: http://www.acq.osd.mil.dpap/dars/dfars/

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (JUN 2010)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X__ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___252.203-7000, Requirements Relating to Compensation of Former DoD Officials (JAN 2009) (Section 847 of Pub. L. 110-181).

(2) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(3) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(4) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (AUG 2008) (15 U.S.C. 637 note).

(5) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JAN 2009) (41 U.S.C. 10a-10d, E.O. 10582).

(6) ____ 252.225-7008, Restriction on Acquisition of Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(7) ____ 252.225-7009, Restriction on Acquisition of Certain Articles Containing Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(8) ____ 252.225-7012, Preference for Certain Domestic Commodities (JUN 2010) (10 U.S.C. 2533a).

(9) ____ 252.225-7015, Restriction on Acquisition of Hand or Measuring Tools (JUN 2005) (10 U.S.C. 2533a).

(10) ____ 252.225-7016, Restriction on Acquisition of Ball and Roller Bearings (MAR 2006) (Section 8065 of Public Law 107-117 and the same restriction in subsequent DoD appropriations acts).

(11))(i) ___ 252.225-7021, Trade Agreements (NOV 2009) (19 U.S.C. 2501-2518 and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (SEP 2008)

(12) ____ 252.225-7027, Restriction on Contingent Fees for Foreign Military Sales (APR 2003) (22 U.S.C. 2779).

(13) ____ 252.225-7028, Exclusionary Policies and Practices of Foreign Governments (APR 2003) (22 U.S.C. 2755).

(14)(i) ____ 252.225-7036, Buy American Act--Free Trade Agreements--Balance of Payments Program (JUL 2009) (41 U.S.C. 10a-10d and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (JUL 2009) of 252.225-7036.

(15) ____ 252.225-7038, Restriction on Acquisition of Air Circuit Breakers (JUN 2005) (10 U.S.C. 2534(a)(3)).

(16) ____ 252.226-7001, Utilization of Indian Organizations, Indian-Owned Economic Enterprises, and Native Hawaiian Small Business Concerns (SEP 2004) (Section 8021 of Public Law 107-248 and similar sections in subsequent DoD appropriations acts).

(17) ____ 252.227-7015, Technical Data--Commercial Items (NOV 1995) (10 U.S.C. 2320).

(18) ____ 252.227-7037, Validation of Restrictive Markings on Technical Data (SEP 1999) (10 U.S.C. 2321).

(19) ____ 252.232-7003, Electronic Submission of Payment Requests and Receiving Reports (MAR 2008) (10 U.S.C. 2227).

(20) ____ 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(21) __X__ 252.243-7002, Requests for Equitable Adjustment (MAR 1998) (10 U.S.C. 2410).

(22)____ 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(23)(i) ____ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ____ Alternate I (MAR 2000) of 252.247-7023.

(iii) ____ Alternate II (MAR 2000) of 252.247-7023.

(iv) ____ Alternate III (MAY 2002) of 252.247-7023.

(24) ____ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(2) 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

ADDENDUM TO FAR 52.212-4

(a) The Contracting Officer may at any time, by written order, and without notice to the sureties, if any, make changes within the general scope of this contract in any one or more of the following:

(1) Description of services to be performed where the services affect health, force protection, safety, and/or prevention of damage to Naval vessels.

(2) Time of performance (i.e. hours of the day, days of the week, etc.) where the services affect health, force protection, safety, and/or prevention of damage to Naval vessels.

(3) Place of performance of the services where the services affect health, force protection, safety, and/or prevention of damage to Naval vessels.

(4) Specifications when the supplies or services to be furnished are to be specially manufactured for the Government in accordance with the specifications and affect health, force protection, safety, and/or prevention of damage to Naval vessels.

(5) Place of delivery where the services affect health, force protection, safety, and/or prevention of damage to Naval vessels

(b) If any such change causes an increase or decrease in the cost of, or the time required for, performance of any part of the work under this contract, whether or not changed by the order, the Contracting Officer shall make an equitable adjustment in the contract price, the delivery schedule, or both, and shall modify the contract.

(c) The Contractor must assert its right to an adjustment under this clause within 30 days from the date of receipt of the written order. However, if the Contracting Officer decides that the facts justify it, the Contracting Officer may receive and act upon a proposal submitted before final payment of the contract.

(d) If the Contractor's proposal includes the cost of property made obsolete or excess by the change, the Contracting Officer shall have the right to prescribe the manner of the disposition of the property.

(e) Failure to agree to any adjustment shall be a dispute under the Disputes clause. However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

(End of clause)

CVN 65	39 (11.9)	1,123 (342)	133 (40.5)	89,600	5,900
CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

GLOSSARY OF TERMS AND ABBREVIATIONS

AGOS	RESEARCH SHIP
AGSS	RESEARCH SUBMARINE
AOE	FAST COMBAT SUPPORT SHIP

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, and its detachments will use to monitor contractor's performance, evaluating port visit cost reporting, non-priced item pricing performance, and ship's overall satisfaction with the of the husbanding service contractor's port visit services.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the port visit cost reporting requirements, adhering to the non-priced item pricing performance standards, and meeting the ship's task order requirements as identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

2.0 PERFORMANCE MANAGEMENT APPROACH

2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

3.0 PERFORMANCE MANAGEMENT STRATEGY

3.1 The contractor will set forth the staffing and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with processes to assess and report their performance to the Contracting Officer.

3.2 The Contracting Officer will monitor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

4.0 ROLES AND RESPONSIBILITIES

4.1. Procuring Contracting Officer (PCO). The PCO is the individual who performs preaward functions and awards or executes a contract. The PCO will retain post award functions. Accordingly, the PCO performs assigned post award functions related to the administration of the contract. Ensures performance of all necessary actions for effective contracting, monitors compliance with the terms of the contract, and safeguards the interests of the Government. The PCO makes certain the contractor receives impartial, fair, and equitable treatment under the contract. The PCO is ultimately responsible for the final determination of the adequacy of the contractor's performance.

4.2. Contracting Officer Representative (COR). The Government personnel who perform quality assurance functions for a contracted service.

- Provide technical assistance to the contracting office
- Provide functional continuity and stability
- Maintain proficiency in contract surveillance procedures
- Perform surveillance in accordance with the surveillance plan and provide documentation of surveillance observations to the PCO, as required
- Notify the PCO of any significant performance deficiencies
- Prepare input to the Contractor Performance Assessment Reporting System (CPARS)

4.3 Ordering Officers (e.g., Ship SUPPO) are responsible to

- Issue the orders in accordance with the terms and conditions
- Monitor, assess, and communicate the performance of the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

PERFORMANCE OBJECTIVES AND METHOD OF SURVEILLENCE

The contractor shall provide husbanding service support in accordance with the PWS. While the contractor is fully expected to comply with all requirements in the PWS, the government's assessment of contractor performance will focus mainly on the performance objectives that are also listed in the Attachment 4a. Performance Reporting Summary (PRS). The level of the acceptance for each objective is also established

5.1. Performance Objective #1:

Submit pre-arrival cost estimate to ship and Contracting Officer within 48 hours after receipt of LOGREQ. The estimates must be itemized in detail, with the appropriate price shown against each contract line item in a format the same as Attachment 2.

Method of surveillance: E-mail received by the contractor; PVCRs received by the ships, or customer's complaints to verify that the estimate has been provided.

Level of acceptance:

- On time 100%

- Up to 2 working days late, but before ship's arrival 80%

- 3-4 working days late, but before ship's arrival 60%

- Over 4 working days late but before ship's arrival 40%

- None before ship's arrival 0%

5.2. Performance Objective #2:

Submit final LogSSR within seven (7) days of each ship's departure (includes entering data into LogSSR and submitting all supporting documentation).

Method of surveillance: Periodically check the LogSSR database to verify that the contractor has input all costs associated with the visits and submit all documentation related to the ship's visit.

Level of acceptance:

- Within 7 calendar days after ship's departure 100%

- Within 08-14 calendar days after ship's departure 80%

- Within 15-30 calendar days after ship's departure 50%

- Over 30 calendar days after ship's departure 0%

5.3. Performance Objective #3:

LogSSR submittals are accurate and complete (as validated with invoices and/or port visit cost report messages).

Any changes after the LogSSR entry must be sent with a summary of the changes to LogSSR for the update.

Method of surveillance: Compare the LogSSR data and PVCR/invoice data.

Level of acceptance:

- No errors 100%

- 1 error 80%

- 2 errors 60%

- 3 errors 40%

- Over 3 errors 0%

5.4 Performance Objective #4:

Ship's satisfaction of the contractor's services during the port visit as identified in the ship's port visit cost report.

Method of surveillance: After each ship visit, the ship submits a port visit cost report indicating performance of the contractor. Areas normally addressed are timeliness, quality, costs, and customer service. This will be the primary means to measuring contractor performance for customer satisfaction.

Level of acceptance:

- Satisfied 100%

- Not Satisfied 0%

6.0 METHODOLOGIES TO MONITOR PERFORMANCE

6.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The Contracting Officer will use, the LogSSR and any input from the requiring activity as sources of comments on the contractor's performance.

6.2 The ships always have the option to communicate complaints to the Contracting Officer as opposed to the contractor. The complaints can be submitted during or after the visit; however the primary document that reports the complaints is the Port Visit Cost Report (PVCR). The Contracting Officer will accept the ships complaints and will investigate.

7.0 QUALITY ASSURANCE REPORTING

7.1. Within 30 days following the end of each quarter, the COR/PCO will prepare a report that shows the level of acceptance for each performance objective reached. An overall goal of 80% is the average of the level of acceptance of each performance objective.

8.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

8.1 The Government shall use the observation methods cited to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives should performance not meet the AQL (for failure performance, see paragraph 9.0)

8.2 The PCO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The PCO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the PCO as often as required or per the contractor's request. The agenda of the reviews may discuss:

- Performance measured by the metrics and trends
- Issues and concerns of both parties
- Recommendations made by the KO based on contractor information
- Issues arising from independent reviews and inspections

8.3 The PCO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the PCO.

9.0. FAILURE TO PERFORM

9.1 The contractor may receive negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

Termination. If the KO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the KO shall issue a notice of termination, consistent with FAR Part 12.

ATTACHMENT 4 – REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

- List of products for which approval is requested.
- Establishment letterhead - four places.
- Name of establishment owner.
- Site area size - acres, square feet or square meters.
- General description of the area surrounding the plant site.
- Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
- Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).
- List of major processing equipment.
- Sources of raw materials.
- Output of finished product - average kilograms or tons per day, per week or per month.
- Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
- Number of employees.
- Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
- Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
- Cleaning and sanitizing methods, including chemical used.
- Detailed written cleaning and sanitizing program.
- Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
- Name of water source.
- Waste disposal program.
- Pest control program.
- Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
- Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
- What laboratory examinations are performed on products and plants environment? Are the results available for review?
- Total number of company vehicles?
- Key personnel and point of contact for inspectors.
- Direction to plant.

European Economic community (EEC) and United States Department of Agriculture (USDA) plant establishment number(s).

OC-1 INVOICES AND PAYMENTS

(a) Invoice Content

The Contractor shall submit to the ordering officer an invoice that lists all the expenses incurred by the ship during the port visit. The contractor's invoice shall list items priced under this contract and include subcontractor invoices for all other items not priced in the contract. All invoices submitted shall have all supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by ship's personnel, with a legible signature and printed name and rank, port tariff invoices, invoices for items not pre-priced in the contract, and any other documentation that the supplies/services have been delivered and accepted) and must be submitted in accordance with the paragraph below.

All items listed on the invoices must be completely detailed (i.e., broken down) for quantity, contract unit of issue, unit price, etc. No lump sum amount will be accepted.

The Contractor has the responsibility to keep copies of all documentation submitted to the ship for each visit for all supplies and services rendered and in the quantities invoiced. The Contractor shall keep a copy of all such documentation in one place that will be indicated to the Contracting Officer at the time of contract award. FISC Yokosuka and its detachments contracting personnel may examine these files at any time during the performance of this contract.

The invoices must be easily identifiable as original (i.e. original signature or stamped as ORIGINAL). If an electronic invoice is authorized, the Contractor must certify on the invoice that it is the first time that the invoice is submitted. If the original invoice has been lost, a copy of the invoice may be submitted. This invoice must be marked as 『DUPLICATE COPY』 and a signed and dated statement with a contractor's stamp must be made on the duplicate invoice confirming that payment has not been received.

Each invoice must include—

(1) Name and address of the Contractor;
(2) Invoice number and date issued;
(3) Contract number, Contract Line Item Number, Lot Line Item and , if applicable, the Order Number;
(4) Description, quantity, unit of measure, unit price and extended price of the items delivered;
(5) If appropriate, the shipping number and date of shipment including the bill of lading number and weight of shipment if shipped on a Government bill of lading;
(6) Terms of any prompt payment discount offered;
(7) Name and address of the official to whom payment is to be sent;
(8) Name, title, and phone number of the person to be notified in the event of a defective invoice;
(9) Supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by the ship's personnel, with a legible signature and printed name and rank, and any other documentation that the supplies/services have been delivered and accepted);
(10) The invoice must be correct and complete and without handwritten figures.
(11) Electronic funds transfer (EFT) information.

The Contractor shall include EFT banking information on the invoice only if required elsewhere in this contract.

If EFT banking information is not required to be on the invoice, in order for the invoice to be a proper invoice, the Contractor shall have submitted correct EFT banking information in accordance with the applicable solicitation provision, contract clause (e.g. FAR 52.232-33, Payment by Electronic Funds Transfer – Central Contractor Registration), or applicable agency procedures.

EFT banking information is not required if the Government waived the requirement to pay by EFT.

Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) prompt payment regulations at 5 CFR Part 1315.

If an item is not included on the original invoice, a supplemental invoice shall be issued with the same number followed by alpha suffix (e.g. Invoice No. 0001/03-A). The same requirements for submittal of the original invoice apply to the supplemental invoice.

If an invoice for an item is not available prior to the ship's departure (e.g. cell phone charges, port tariff items, port dues, etc.), the item shall be listed on the invoice with the words 『TO BE DETERMINED (TBD)』. Once the invoice has been received and the exact amount is known, the Contractor shall issue a supplemental invoice (with all supporting documentation attached) as 『FINAL』 for the final payment. TBD invoices shall not be paid until a 'FINAL' invoice is submitted.

It is the Contractor's responsibility to verify with port authorities and concessionaires that there are no pending charges prior to the ship's departure. This is to avoid any possible future invoices that may be submitted for unknown services to the U.S. Government.

When preparing an invoice the term 『Miscellaneous』 or any similar type description should be avoided. If this is not possible and the Contractor must use the term 『Miscellaneous』 when submitting an invoice, the Contractor shall provide a detailed list of items purchased and item prices on the invoice.

Invoices not in compliance with these instructions are not considered to be proper invoices and may be rejected.

(b) Invoice Submission

The invoice must be submitted to the listed activities in the following order:

(1) To the ship's Supply Officer or his designated representative one day prior to its sailing date. In the event the Contractor is unable to present any invoice to the ordering ship for payment prior to the departure of the ship, the Contractor shall submit invoices and attempt to obtain payment at the ship's next port of call.

(2) If unsuccessful, to the Contracting Officer. In the event the Contractor is unable to present any invoice to the ordering ship prior to its departure, the invoice must be promptly submitted to the CO for payment through DFAS Yokota. In no case should the invoice be submitted beyond 90 days after the ship's departure from the port. The Disbursing Officer will annotate the date the invoices are received for the purpose of calculating any interest due. An exception to the 90-day limit will be given only for charges made by the port authorities or concessionaires, or the host nation authorities, including military authorities. It is the Contractor's responsibility to verify that there are no pending charges and to obtain the invoices from these authorities no later than six months after the ship's departure.

(3) Alternatively, whenever a non-Navy ordering authority orders services under the contract, the Contractor shall submit invoices and all supporting documents to that ordering activity.

(c) Payment of Invoices

Payments under this contract will be made in accordance with the clause FAR 52.232-33 Payment by Electronic Funds Transfer – Central Contractor Registration (Oct 2003).

Payment will be made after delivery and acceptance of supplies or performance and acceptance of services.

『Acceptance』 means the act of an authorized representative of the Government by which the Government, for itself or as an agent of another, assumes ownership of existing identified supplies tendered or approves specific services rendered as partial or complete performance of the contract (from FAR 46.101 Definitions).

Bill payment shall be disbursed through one of the following methods, check, purchase card, submission of invoices to a Defense Finance and Accounting Command (DFAS) via regular mail or electronically through Wide Area Work Flow (WAWF).

The Contractor shall present to the ordering officer or SUPPO all pricing that is firm and finalized one-day prior to the ship's sailing or the ordering activity departure. At that time, the Contractor shall relay any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for these functions shall be the ordering officer or the ordering officer's designated representative. In addition, the Contractor shall present all documentation and invoices from other Contractors subject to provision of services under this contract.

The Contractor shall obtain a signed delivery order (DD 1155) to verify that the services were received and that charges presented in the port visit cost reporting program are correct for payment. This may be accomplished via email from the Ordering Officer or the SUPPO of the ship. The ordering officer shall pay for all supplies and services accepted during the period of performance by one of the aforementioned methods of payment.

In the absence of a delivery order, forward invoices and all documentation regarding inspection and acceptance of supplies and services by the ship's representative with appropriate accounting data to the Administrative Contracting Office.

(d) The Government will not make direct payments of VAT to the host nation nor will it withhold taxes, including VAT, from invoices for orders that are submitted to the husbanding services contractor by the Government. Payment of appropriate taxes required as part of conducting business in the specific country at which a port visit takes place are a responsibility of the husbanding services contractor. Offerors are further directed to FAR 52.229-6, Taxes-Foreign Fixed-Price Contracts (JUN 2003), which is included in the solicitation.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION SF 1449 - CONTINUATION SHEET

The following have been modified:
PERFORMANCE WORK STATEMENT

A. DESCRIPTION OF CONTRACTUAL SCOPE

1. The geographic scope and region covered by this contract includes the following ports:
   Lot 1 – Noumea, New Caledonia
   Lot 2 – Honiara, Solomon Islands
   Lot 3 – Nuku Alofa, Pangai, Tonga
   Lot 4 – Koror, Palau

2. This contract is a Firm-Fixed-Price Indefinite-Delivery, Indefinite-Quantity (IDIQ) type contract for the provision of maritime husbanding support. It is not for husbanding agency. The holder of this contract is a U.S. Navy contractor or Husbanding Service Provider (HSP). The holder of this contract is not an agent of the U.S. Navy and does not have the authority to bind the U.S. Navy. Maritime Husbanding Support is defined as: Providing supplies and services as defined in the Performance Work Statement of the contract in support of U.S. Vessels within a port area.

   a. This support is provided by a Husbanding Services provider from a standard list of services under contract.
   b. For items not supported by existing supply chains: e.g. fuel, subsistence, etc.

3. Users authorized to use this contract are United States Navy Commands, United States Marine Corps (USMC), Military Sealift Command (MSC), United States Coast Guard (USCG) and SUBGROUP SEVEN. Other users including the United States Army (USA) shall require specific authorization from the Contracting Officer to use this contract or have a Contracting Officer's Representative designated.

4. This contract is for a period of twelve (12) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months.

5. The HSP shall assure that supplies and services arranged on behalf of the authorized ordering officer conform to the general requirements of the contract in accordance with this PWS. The HSP shall assist the SUPPO or authorized ordering officer with resolving any problems in meeting the requirements.

6. Minimum guarantee for this contract is US$20,000.00 and the maximum value (maximum quantity) of this contract is US$4,000,000.00.

B. QUALITY

1. The HSP shall provide goods and services at requested delivery times at fair and reasonable prices to ships and other authorized users making port visits, provide continuous oversight of costs and performance throughout the area covered by this contract, and make meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. This contract and PWS do not specify how the

HSP is to perform, but instead provide measurable performance standards, which are established in the Quality Assurance Surveillance Plan (QASP) to monitor contract performance during each ship's visit.

2. The percentile goals in the QASP are fixed for each factor. The failure of the HSP to meet the percentile goal for any factor will be investigated and evaluated by the Contracting Officer. The HSP will be given the opportunity to refute an adverse assessment prior to finalizing the metric for a quarter.

C. PRICING – SEE ATTACHMENT 2

1. The services described in this PWS are performance based. All prices as a result of this contract are firm-fixed prices. With the exception of Port Tariffs, pricing for all supplies/services shall, include at a minimum, unless otherwise specifically provided on an applicable price schedule, all necessary equipment, licensed operators, all liability insurance as required by local laws, holiday and overtime costs, customs clearances, mobilization, demobilization, removal, disposal, pre-positioning, staging, vetting of operations, fuel and operating expenses associated with performing the entire cycle to deliver and dispense with the logistic services described in this contract. In layman terms, all services are 'all inclusive' of all pricing variables and contingencies unless specifically stated otherwise in the pricing. These Fixed Prices shall also include performance at night, overtime, Saturdays, Sundays, and Holidays; and services performed under heavy rain, other inclement weather, or service to tankers and ships carrying explosives. These requirements do not include performance during typhoons except where ships are required to depart in advance of typhoons as part of a typhoon evasion plan. Performance is not required during periods when operations have been suspended by host nation port authorities. The HS Contractor will not be liable for performance delays and will be entitled to payment for services (at the rate quoted in the Attachment 2 schedule for that line item) provided during periods where operations have been suspended by host nation port authorities. The HSP shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the U.S. Government.

2. Fees for Husbanding Services cover regular and overtime labor of contractor personnel supporting the ships plus indirect expenses, including all management, overhead and office expenses as well as profit.

3. Several services are based on hourly or daily rates. Time will begin being measured once the equipment and/or labor is along-side the vessel and capable of operations. For the purposes of this contract, one (1) day is equal to 24 hours and begins with the performance of service. For example, service from 1800 until 1800 the next calendar day is equal to one (1) day of service. In cases where the billing unit is 'day' and a full day of service is not used by the Ordering Activity, the HSP shall be entitled to bill for one day of service. For example, if a sub lot line item with a billing unit of day were ordered and used for 30 hours, the HSP would be entitled to bill for two days of service. In cases where the ship does not arrive at the time specified in the ordering LOGREQ and services are made available based upon the time requested in the ordering LOGREQ, billing for services may commence at the time requested by the Government unless notice of cancellation is provided by the Ordering Activity or the organization authorized to pass this information on behalf of the Ordering Activity.

4. When the HSP obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HSP shall be reimbursed for the published price of the item. The HSP shall not be paid an amount in addition to the published price of the item. A copy of the published price list shall be provided to the Ordering Officer or Contracting Officer, if requested.

5. Repositioning is defined as: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions. Where a ship is

at anchorage and the Ordering Activity requests repositioning of equipment, the HSP may be entitled to additional fees for repositioning to be determined by use of:

a. Prior agreement of the Ordering Officer in cases where the total repositioning costs do not exceed $3,000
b. Prior agreement of the Contracting Officer in cases where the total repositioning costs exceed $3,000.

6. Port Tariffs: The HSP will be fully reimbursed for Port Tariff items. Port Tariffs will apply to those services which are based on Port Tariff rates established and controlled by Port Authorities. English translated copies of the Port Tariffs must be submitted to the Supply Officer of the ship entering a specific Port.

7. Purchase Card Surcharge: The U.S. Government reserves the right to make payment by purchase card. All purchase card surcharges will be identified as a separate entry on each invoice. Surcharges are not authorized for priced items as the fixed price must include the use of the purchase card.

D. SHIPS'S LOGISTIC REQUIREMENTS (LOGREQ)

1. U.S. Navy ships and other activities authorized to pass LOGREQ requirements on behalf of Ordering Officers will provide, via e-mail, a copy of the unclassified "logistics requirements" (LOGREQ) message directly to the HSP. This LOGREQ may include logistical requirements that are pre-priced under the contract and logistical requirements that are pre-priced under the contract. The LOGREQ is an order for logisitical requirements that are pre-priced under the contract. The HSP shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning price performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Operations Officers, and FISC.

2. After receipt of a LOGREQ the HSP shall make such arrangements for pre-priced items as necessary with port authorities, other U.S. Government Contractors, and other commercial firms to provide supplies and services requested. The HSP shall confirm receipt of the ordering LOGREQ (to the activity who provides the LOGREQ to the HSP) within 24 hours. Confirmation of receipt shall be made by email to the activity passing the LOGREQ.

3. The HSP shall furnish to the ordering activity and FISC Yokosuka Contracting Officer a pre-arrival cost estimate in response to the receipt of a LOGREQ. This estimate will be prepared using the **Attachment 2** spreadsheet format, and will include estimated prices for items submitted on the LOGREQ pre-priced in the contract. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff." This estimate shall be provided to the ordering officer and FISC Yokosuka Contracting Officer via email within (48) hours of receipt of the LOGREQ. This report shall also include cost saving or avoidance recommendations and will explain any anticipated "additional" costs. A LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

4. Ships will not provide force protection requirements in an unclassified LOGREQ message. The activity to which this message is addressed will contact the HSP and pass the ship's force protection requirements for action. The HSP shall confirm with the ship that these force protection requirements received have been actually ordered by the ship prior to beginning performance. The ship's Supply Officer (SUPPO) or Commanding Officer may also request additional force protection requirements not covered by the force protection LOGREQ by email, telephone, or personally upon the ship's arrival. The HSP shall coordinate with the SUPPO before providing any additional force protection. If any other activity or individual orders force protection services (i.e. NCIS, etc) not covered in the ship's force protection LOGREQ provided to the HSP, the HSP is required to immediately inform the ship and receive confirmation prior to beginning performance of these services. Organizations such as NCIS and DAO are not authorized Ordering Officers under this contract unless specific authorization is given by the Contracting Officer, therefore, they have no

contractual authority to place orders. Any services provided in this contract ordered by an entity otherwise described in this contract shall be provided at the HSP's own risk and shall result in no additional cost to the government.

5. If a ship requires supplies and services during the course of a port visit that are not included on the schedule of supplies and services at Attachment 2 as pre-priced, (PT(port tariff), TBD, or NSP (not separately priced), the supplies and services will be acquired separately from the contract.

E. ADVANCE LOGISTICS RESPONSE TEAM

1. In the event that a Logistics Response Team for a ship arrives in port prior to a ship's arrival, the HSP will assist the logistics response team by providing logistical support and coordinating all requirements.

2. When the HSP provides support for a Logistics Response Team so that it can perform its mission, the HSP shall bill at the "Subsequent Days" daily rate for husbanding services for each day of support provided "in person" to the logistics response team.

F. INITIAL BOARDING

1. The HSP shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival. All HSP personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port. All correspondence shall be in English. The HSP is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered. Upon initial boarding the HSP shall provide all emergency telephone numbers, i.e. police, hospitals, firefighters, shipboard generated industrial waste (SGIW) disposal and hazardous material (HAZMAT) and oil spill response. The HSP shall visit the ship at least once per day and shall be available on call at all times (24 hours per day, seven days per week) to assist the ship with requirements and to resolve problems.

2. The HSP shall brief the ordering officer(s) about ordered services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HSP shall provide its POC information with 24-hour contact phone numbers.

3. The HSP shall provide the ordering officer(s) with copies of applicable port tariffs and current prices for frequently ordered services, and with any other information provided by other government agencies for distribution. The HSP shall be prepared to take additional ships' orders for supplies or services not placed in the ordering LOGREQ.

G. ORDERING SUPPLIES AND SERVICES AFTER RECEIPT OF A LOGREQ

1. After receipt of a LOGREQ, the HSP must first use Host Nation (HN) services and supplies that can be provided free of charge by the host nation. If services and supplies are not available free of charge from the host nation, they must be provided if within the scope of this contract. The Contracting Officer will be notified if there is a question regarding the scope of the contract. U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or, if the port-provided supplies and services are less expensive than similar services provided by the HSP or its subcontractors, or finally provide it themselves to include subcontractors. Where the reasonable cost of mobilization/demobilization for U.S. Government owned equipment exceeds the quoted price of the sub lot line item it is intended to replace, the HSP shall use the least cost alternative to meet the requirement. If, for any reason, an item that would otherwise be provided by the Government, host nation, or port authority

is not available, that item shall be provided by the HSP at the price quoted in the **Attachment 2** pricing schedules.

2. Passing Requirements to other U.S. Government agencies or contractors: The HSP may be required to coordinate and pass orders on behalf of the ship, to include transmission via fax or e-mail, to other U.S. Government Supply Chain agencies or contractors holding U.S. Government contracts (e.g., Defense Supply Center Prime Vendor (DSCP) or DLA-Energy for various supplies and services required. Any disputes or discrepancies arising from the order will be resolved directly between the ordering officer and the other agency or Contractor(s).

3. Money Exchange Services: The HS Contractor shall arrange for authorized moneychangers to exchange U.S. dollars for ship personnel into local currency. Money Exchange services shall be made available onboard ship to crewmembers at least two hours daily with buy-back service on the day before the ship's departure. The moneychangers may include a commission of not more than plus or minus 1.5% difference from the Official Exchange Rate. A locally-available and verifiable currency exchange rate may be used as the Official Exchange Rate. Verification of the exchange rate shall be provided to the Ordering Activity at the time of service. The HS Contractor shall maintain adequate records justifying its basis for determining the Official Exchange Rate and shall make those records available to the U.S. Government upon request. This Official Exchange Rate will be used for financial conversions not covered by payments in U.S. dollars.

4. Laundry Services: The HS Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Laundry and dry cleaning services that are required by the ship from the laundry and dry cleaning vendor will be ordered from the vendor by the ship. Payment for services will be made by the ship to the vendor rather than through the HS Contractor. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure. The HS Contractor shall assist in resolving vendor billing discrepancies.

5. Mail Delivery Services: The HS Contractor shall provide daily mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

6. Immigration, Customs and Visa: The HS Contractor shall assist ship personnel with immigration, customs and visa requirements into the country of the port visit.

7. Medical Emergencies: If requested, the HS Contractor may be required to make arrangements for emergency medical treatment of ship's crewmembers while the ship is in port. In cases where a member is airlifted into a port by the ship, the HS Contractor, in coordination with the U.S. Consulate/Embassy, will arrange for proper medical care until the member can be returned to the ship, or evacuated to the United States. If there are costs associated with arranging these services, the HS Contractor shall obtain approval from the SUPPO/Contracting Officer prior to providing the support.

8. The HS Contractor shall facilitate the ship's timely departure. The HS Contractor shall provide timely invoices of provided services and supplies to the Supply Officer at the time of the pre-sailing visit. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided. The HS Contractor shall remove all provided equipment.

9. The U.S. Government will not pay the HSP for any personal requests from individual crewmembers, whether military or civilian.

    a. Morale Welfare and Recreation (MWR) Services: The HSP may be required to assist the ship in booking MWR trips, tours, hotel accommodations, or other MWR type items

    b. If another U.S. Navy authorized Information, Ticket and Tours (ITT) contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests

to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

10. Pre-Departure Visit / Bill Payment: The HSP shall schedule a visit to the ship one day prior to its departure date in order to present invoices which can be validated, accepted and certified for payment. Written receipt for acceptance of all goods and services shall be obtained during this visit. The ordering activity shall provide a check for all **finalized** invoices prior to departure where the content of the invoice is not disputed. The HSP shall obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure. The HSP shall relay at that time any late information on pilot and tug schedule changes and any additional information applicable to the ship and its departure.

H. UNIQUE / PARTICULAR SITUATIONS

1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within 3 days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back on Saturday, Sunday or Monday, it will be charged subsequent day fees. If the ship comes back Tuesday, it will be charged the first day rate).

2. If a ship comes into port and does not notify the HSP or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days as applicable.

3. The HSP is required to be able to simultaneously husband ten (10) separate ships throughout the Region, to include two (2) large ships in a single port simultaneously (e.g., two aircraft carriers).

4. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HSP shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office.

5. Short Notice Orders: If orders are issued less than 48 hours prior to the required time for the start of performance, the HSP shall use its best efforts to provide the required supplies and services in accordance with the order's delivery schedule but shall promptly inform the government if it will not be able to meet the delivery schedule.

I. CANCELLATION OF ORDERS

1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

Note: Although a supply or service may be described as part of the line item descriptions, the only items that are being acquired under the contract are the supplies and services that are listed on the price schedules for each lot.

J. LINE ITEM DESCRIPTIONS –

LINE ITEM XX01 - FIRST DAY/SUBSEQUENT DAY HUSBANDING SERVICES (ANCHORAGE AND PIERSIDE)

1. The HSP shall provide husbanding services to ships visiting the ports in the Region covered by this contract. Line Item XX01 requires that the HSP perform all services and provide all supplies necessary to fully comply with the tasks and responsibilities described at paragraphs A-H above unless a task or responsibility is specifically included in a separately-priced Line Item below. The HSP's responsibilities under these Line Items start prior to the arrival of the ship and continue after the ship's departure.

2. The husbanding fee is based on the First Day and Subsequent Day(s) of the ship visit. A husbanding fee may be provided to the HSP for services rendered prior to the ship's visit, i.e. assistance to the ship's logistics response team.

3. The HSP is responsible for providing and coordinating the FP services described in paragraphs 2-6 and 8-15 of the PWS description for Line Items XX13, xx14, and xx15 as part of their Husbanding Services under Lot Line Item XX01.

LINE ITEM XX02 - TRASH REMOVAL

1. Trash removal service is the collection and disposal of refuse (i.e., trash) including liquid, semi-liquid, or solid garbage. Refuse does not include explosives and incendiary waste, or waste contaminated by medical and radiological processes.

2. The HSP shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse.

3. For ships at pier side, the HSP shall place containers or trucks within twenty-five (25) meters of the ship or as permitted by port regulation, or barges alongside the ship. The HSP shall empty the containers or barges when full and shall assure their continuous availability for trash disposal.

4. For ships at anchorage, the HSP shall remove trash at the times agreed to by the HSP and Supply Officer. For trash collection at anchorage, the trash barge shall be available 24 hours a day (when not contrary to law or port regulation) with suitable self-fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

5. For trash collection by barge, the HSP shall provide trash barges/scows (with tug service if barge is not self-propelled) for ships at anchorage. The barges shall be completely empty at time of arrival at the ship. In situations where an empty barge is not available, the HSP shall provide a system to measure the volume of trash deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of the trash. The HSP shall have ready access to sufficient barges and equipment to support multiple ships at anchorage simultaneously. The barge's crew shall be entirely responsible for the tending of lines and for barge's security. The movement of trash from the ship to the barge shall be performed with care by the ship's sailors.

6. In instances of bad weather or emergency where the ship must depart on short notice, the HSP shall remove barges within four hours of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the HSP at least four (4) hours in advance for the barge pick-up.

7. The HSP shall submit, as an attachment to the invoices, a document that certifies the quantity collected and the name of the disposal plant where the trash will be disposed. The HSP is also responsible to follow any environmental regulations required by each country. The HSP is required to keep all disposal certificates and shall make them available to the Contracting Officer upon request.

8. Refuse containers, when used and when emptied, shall be returned to their original position with the lids (if any) replaced thereon.

9. The HSP shall be paid based on the ACTUAL CUBIC METERS of trash removed.

10. Where trash is required to be segregated, the Ordering Activity shall be required to segregate the material at the time of disposal. The HSP shall be responsible for providing separate containers for each vessel, clearly marked with the required categories and for informing the Ordering Activity, upon arrival, that segregation is required. If the Ordering Activity does not segregate trash as required, the HSP shall inform the Ordering Activity and Logistic Support Representative (LSR) prior to departure and bill for the cost of trash segregation within 48 hours after the vessel's departure.

LINE ITEM XX03 – FLEET LANDING

1. When ordered by the ship, the HSP shall furnish services/supplies for the fleet landing area. The following is a list of the basic supplies and services that a ship may need.

2. FLEET LANDING. HSP shall provide the sub-line items specified in this Line Item and shall provide a unit price for each sub-line item. The unit price shall be per day for each item. Mobilization/demobilization charges shall be included in sub-line item price. Fleet Landing services include the following:

    a. PORTABLE TOILET UNIT SERVICES. The unit price shall be for a single commode and one (1) urinal. The daily rate shall include pumping and cleaning as many times as necessary to ensure clean, sanitary condition and providing all chemicals, cleaning products and toilet paper. The HSP shall check toilet facilities at least every six (6) hours to ensure cleanliness.

    b. PORTABLE ELECTRIC GENERATORS. The HSP shall provide a portable, gasoline powered, electric generator capable of supplying power to portable lighting and miscellaneous portable electrical equipment (radios, stereos, hand tools, etc.). Generator shall be at least 5KW with circuit breaker protector. Daily rate includes fuel, oil, and necessary consumables to operate the generator, transportation, set-up, dismantling and labor.

    c. Chairs (each per day)

d. Long tables - approximately 2 meters in length (each per day)

LINE ITEM XX04 – BROW SERVICES

1. BROWS

   a. Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The HSP shall provide the brows specified in the schedule as ordered by the ship. A range of brow sizes is provided in each of the sub lot line items of lot line item XX04. All brows provided by port authorities, host nation, or US Government shall be billed at cost as port tariff items. Mobilization, demobilization, setup and placement shall be included in the proposed unit price of all XX04 sub lot line items.

   b. Due to the height difference between the submarine deck and pier, the HSP provided submarine brow must afford personnel a smooth and safe transit when entering or exiting the submarine deck. The submarine brow must be capable of supporting shore power cables without damaging the cable.

2. MOBILE CRANE SERVICES

   a. The HSP shall provide mobile crane services (shore crane) with operator(s). The HSP shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HSP shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each mobile crane ordered.

   b. Crane services under this Line Item are for land cranes only.

3. FORKLIFT SERVICES

   a. The HSP shall provide forklift services with operator(s). The HSP shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. Upon the Supply Officer's request, the HSP shall provide information concerning forklift/lifting capacity. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The forklifts shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HSP shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each forklift ordered.

LINE ITEM XX05– SHIP MOVEMENT SERVICES (PILOTS, TUGS, LINEHANDLERS)

1. The HSP shall arrange pilots, tugs, and line handlers as ordered. The HSP shall coordinate with port authorities, as necessary, to ensure that the services are available at the times requested. It should be noted that the port authority or other authorized sources provide these services, and are, therefore, to be priced in accordance with current tariff rates.

2. The HSP shall provide tugs to bring ships to and from berthing locations. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

LINE ITEM XX06 - WATER FERRY/TAXI SERVICES

1. The HSP shall provide water taxis to transfer ship personnel to and from the ship and the fleet. At the commencement of service, the HSP is required to advise the ship of scheduled breaks and any changes to the taxi service schedule. The HSP shall provide water taxi service when the vessel is expected to be at anchorage for twenty-four (24) hours or more. Water taxi service shall be always available, with the exception of inclement weather, during the two (2) one-hour meal breaks and during refueling.

2. Taxi water service shall include a minimum of two (2) qualified operators (a driver and one other operator), any other helpers or crew members required by local authorities, all insurance, fuel, holiday surcharges, overtime, and other operating expenses. Operator qualifications are set forth in paragraph (14) below.

3. Service begins when the first water taxi is alongside the designated pick-up point and ends when the last passenger disembarks from the water taxi at the designated drop-off point as ordered by the ship. However, when required to arrive early for inspection as a force protection measure, service begins at time of inspection. The HSP shall be entitled to a six (6) hour minimum rental fee in cases where actual usage is less than six hours per day.

4. If the HSP cannot provide the size of water taxi ordered, the HSP shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event the ship will be charged for the size of the water taxi ordered. For example, if one (1) 250-pax water taxi is ordered and is not available, then two (2) 125-pax water taxis shall be provided for the rate of one (1) 250-pax water taxi, if acceptable to the Ordering Officer.

5. The HSP shall ensure that the water taxi is in sound mechanical condition and meets all safety standards required by local laws and regulations to preclude breakdown and injury. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of the port or the country in which the port is located. Apart from compliance with local laws and regulations, the HSP shall meet all additional requirements as set forth throughout the PWS. Water taxi shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, and fitted for service required. Further, water taxi shall be in a clean condition when presented for service and shall be free of debris.

6. Each water taxi shall be equipped with at least one clean and serviceable life jacket for each passenger and crewmember, and all jackets shall be stowed in a readily accessible place.

7. Except as otherwise specified herein, the service shall include all equipment needed to transport personnel between the vessel anchored in the outer harbor, or in the inner harbor, fleet landing, or any designated pier or berth within the port. If it becomes necessary to change the landing point of the water taxi (pier or berth) within the port, the HSP shall dock at the new landing point. In the event this occurs, it will be considered to be a “Change” to the contract.

8. All water taxis used by the HSP shall provide overhead covering.

9. Before the commencement of any services under this contract, the HSP shall make the water taxi available to the Ordering Vessel’s Commanding Officer or designated representative for inspection.

10. The following information shall be conspicuously posted in each water taxi shall be in English and the language of the country in which the port is located:

    a. Current operator’s/captain’s license.
    b. Passenger/weight capacity limits notice.
    c. Location of life jackets and other life saving equipment.
    d. Location of all exits indicated in large letters.
    e. Emergency procedures.

11. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

12. The consumption of alcoholic beverages shall not be permitted aboard the water taxi.

13. Operator Qualifications: All personnel or employees of the HSP operating water taxis, shall have all certification required and issued by the law of the country in which the port is located for the operation of the type, class, or size of water taxi being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the water taxis are to be operated to ensure the water taxis are operated in a safe and seaworthy manner. At least one operator on each boat must speak English.

14. Security: During the term of this contract, the ship(s) to be serviced will provide adequate and sufficient security personnel for maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the ship's Commanding Officer or designated representative. When such naval personnel are embarked in a HSP-operated water taxi, he will be responsible for the good order and discipline of naval personnel.

15. In the event of a water taxi breakdown, immediately prior to, or during a trip, the HSP shall immediately provide a replacement water taxi that complies in all respects with this contract, at no additional cost to the U.S. Government. If a water taxi is not operable when required under this contract, the HSP shall immediately provide at no additional expense to the U.S. Government, a replacement water taxi which complies in all respects with this contract.

16. Any personal articles or items found on the water taxi after completion of each trip shall be turned over to the ship's Security Officer or his direct representative.

17. To verify a claim by the HSP for any damage or destruction caused by the U.S. Government, it shall be the responsibility of the HSP to ensure that the water taxi is jointly inspected before and after each trip by the HSP and an authorized representative of the U.S. Government.

18. When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

19. Inspection and acceptance criteria for water taxi services. The Commanding Officer or his designated representative of the ARMY/USS/USNS/USCG ship shall inspect and accept all liberty boats/water taxis prior to transporting any personnel. Each order for liberty boat/water taxi services is made on the basis that the request is to be considered a final order/obligation of the US Government only after each water taxi has been inspected and accepted by the ship's representative. The ship's Commanding Officer is solely responsible for the safety of his crew and the subsequent acceptance of liberty boat/water taxi services. The following features or components may be inspected prior to acceptance. The following items must be functional and in safe operating condition:

    a. HULL
        i. Watertight integrity of weather decks, bulkheads, watertight closures and interior hull structure.
        ii. Superstructure (including masts and stacks).
        iii. Railings, bulwarks and their attachment to hull, especially guardrails and lifelines.
        iv. Provisions for drainage of seawater from exposed decks.

b. MACHINERY
   i. Main propulsion and auxiliary machinery essential to operation of craft.
   ii. Sea and bulkhead closure valves.
   iii. Bilge suction strainers and dewatering systems bilge pumps to be tested by operation.
   iv. Bilges free of flammable liquids.

c. ELECTRICAL
   i. Cables.
   ii. Navigation, deck and emergency lighting.
   iii. Rotating electrical machinery, e.g., generators and motors.
   iv. Storage batteries.

d. LIFESAVING EQUIPMENT
   i. Life preservers sufficient number for maximum capacity of craft, accessible and in satisfactory condition.
   ii. Life raft(s) and hydrostatic release (where applicable) sufficient for maximum capacity.
   iii. First aid kits, life rings and distress lights.
   iv. Distress signaling devices.

e. FIRE FIGHTING EQUIPMENT
   i. Fire pump passes fire pump pressure test.
   ii. Portable fire extinguishers (eg. CO2 cylinders)

f. STEERING APPARATUS

g. MISC SYSTEMS AND EQUIPMENT
   i. Harbor charts.
   ii. Ground tackle and mooring lines.
   iii. Whistle/fog horn, bell.
   iv. Compass.
   v. Radar.
   vi. 2 way radio capable of bridge to bridge communications.
   vii. Current licenses.

20. The HSP shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for U.S. Government review and inspection.

LINE ITEM XX07 – GENERAL CHARTER & HIRE ITEMS

1. YOKOHAMA OR COMPARABLE TYPE FENDERS

   a. The HSP shall furnish Yokohama or comparable type fenders for all classes of ships in accordance with the Schedule of Supplies and Services. Fenders provided shall be appropriate and safe for the class of ship and pier configuration. In the schedule there is a sub contract line item (SUBLINE ITEM) for a daily rental fee PER Yokohama or comparable type fender. All costs associated with installation, and removal of one fender, as well as round trip costs associated with transport of the fender from another port or storage location, if required, are to be included in the proposed line item price.

   b. Rental is on a daily (24-hour) basis, per fender. The HSP shall be responsible for securing the fenders to the pier.

c. The HSP shall provide fenders with a minimum of two (2) mooring lines.

2. CAMELS, BREASTING, AND FENDERING BARGES

a. The camels shall be flat surface platforms to be placed alongside the pier and sufficiently capable of breasting the ship away from the pier or from other ships.

b. The HSP shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3. LANDING BARGES

a. The landing barges shall be flat surface barges for positioning at the stern or side of the vessel to serve as a loading/unloading platform for water taxi personnel or cargo; they shall not interfere with the operations of the ships' elevators or other equipment. Although landing barges are primarily used for class IV and V vessels, they may be ordered for use with any class vessel.
b. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

4. OILY WASTE REMOVAL (TRUCK AND BARGE)

a. Oily Waste is defined as any liquid petroleum product mixed with wastewater and/or oil in any amounts, which, if discharged overboard, would cause or show sheen on the water. The HSP shall dispose of any combination of oily waste and grey water as oily waste.

b. Oily Waste is measured by Cubic Meter (1CM = 264.2 Gallons). The HSP shall submit, as an attachment to the invoices for disposal services, a document verifying the quantity collected and the name of the disposal plant where the oily waste have been or will be disposed.

c. The HSP shall comply with the environmental requirements of each country where oily waste is disposed and shall be liable for any costs incurred as a result of the HSP's failure to comply with such requirements. The HSP shall keep all disposal certificates and shall make them available to the Contracting Officer upon request. If the ship concurs with the volume, the ship will pay for the entire amount.

d. Oily Waste Removal involves the collection of Oil and Aggregate Water generated by the ships. The requiring vessel will pump this waste into HSP-provided tanks or barges. The HSP shall provide all equipment and facilities required to remove oily waste, including hoses and connections compatible with the ship being serviced. The HSP shall provide hoses of sufficient length from equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

e. In all cases when a ship orders oily waste disposal services, the HSP shall invoice and will be paid the for a minimum daily quantity of 60 CM for providing the disposal services, even if the oily waste quantity pumped and disposed that day is less than the 60 CM minimum quantity.

f. In the event the HSP subcontracts oily waste disposal, the HSP shall be liable for any costs incurred as a result of the disposal operator's failure to comply with local requirements.

g. The HSP shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed. The Government reserves the right to independently verify the volume of discharge using certified flow measuring devices. The Government reserves the right to request a written statement from the HSP describing the method of measurement used to determine the amount of Oily Waste removed from the vessel.

h. When removal is done via barge, the HSP shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge. The HSP shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

5. INTERPRETER SERVICES

a. The HSP shall provide interpreter services when ordered. The interpreter shall be fluent in both spoken and written local language and English.

6. PRATIQUE

a. The HSP shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

7. STEVEDORE SERVICES

a. The HSP shall provide stevedores for general labor. Billing shall be at the hourly rate for worker.

8. PORT DUES

a. In some countries, the port authority or concessionaire charges port dues to the visiting ship. The port dues may be based on the length or based on the gross tonnage of the ship. Only 'FINAL' invoices will be accepted for payment.

LINE ITEM XX08 - COLLECTION, HOLDING, AND TRANSFER (CHT)

1. The HSP is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships throughout the area covered by this contract. The HSP shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The HSP shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence upon ship's arrival whether, at anchor or pierside. The HSP shall pre-position CHT barges, when necessary, in accordance with force protection or other requirements.

2. The HSP shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

3. The HSP shall remove sewage from the ship in HSP-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

4. The HSP shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT. The Government reserves the right to use its own metering device to verify measurement of sewage discharge.

5. The HSP shall provide CHT hoses of sufficient length from HSP equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

6. The HSP shall properly dispose of all sewage whether by pier-side or at anchorage.

7. The CHT service shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the U.S. Government. In those limited number of cases where this is not possible, the HSP shall provide a system to measure the volume of sewage deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT.

8. The HSP shall submit, as an attachment to the invoices, a document (certified by the ship's personnel) that indicates the quantity collected and the name of the disposal plant where the CHT will be disposed. The Government reserves the right to independently verify the actual volume of CHT discharged using a certified flow measuring device provided by the HSP. The Government reserves the right to request a written statement from the HSP describing the method of measurement used to determine the amount of Oily Waste removed from the vessel.

9. The HSP shall follow any environmental regulations required by each country. If the ship concurs with the volume, the ship will pay for the entire amount.

10. The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the HSP's report in writing. The HSP is also responsible to keep all disposal certificates and shall make them available to Contracting Officer upon request.

11. When CHT removal is via barge, The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions. If sea state, weather, or other conditions, to include but not limited to the configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

In all cases when a ship orders CHT disposal services, the HSP shall invoice and will be paid the for a minimum daily quantity of CHT for providing the disposal services, even if the CHT quantity pumped and disposed that day is less than the 60 CM minimum quantity.

LINE ITEM XX09 - FRESH POTABLE WATER

1. Potable water is defined as fresh drinking water of a quality not less than that prescribed in:

   a. Current Drinking Water Standards, as published by the United States Environmental Protection Agency, Office of Water and shall comply with specifications of the National Primary and Secondary Drinking Water Regulations (NPDWR). See below:

1. Contaminant levels for inorganic chemicals (effective 1 January 1993)

CONTAMINANT	*MCLG (mg/L)* [1]	*MCL (mg/L)*	*AL (mg/L* [2]*)*

CONTAMINANT	*MCLG (mg/L) [1]*	*MCL (mg/L)*	*AL (mg/L [2])*
ASBESTOS	7 million fibers/L longer that 10 micrometers	7 million fibers/L longer than 10 micrometers	
ARSENIC		0.05	
BARIUM	2	2

NITRATE (AS N)	10	10	
NITRITE (AS N)	1	1	
TOTAL NITRATE AND NITRITE (AS N)	10	10	
SELENIUM	0.05	0.05	
FLUORIDE :	4	4	

(1). Maximum contaminant level goal (MCLG). The maximum level of a contaminant in drinking water at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MCLGs are nonenforceable health goals.

(2) Action level (AL). Concentrations of lead or copper in water that determine, in some cases, whether a water system must install corrosion control treatment, monitor source water, replace lead service lines, and undertake a public education program.

(3) The copper action level is exceeded if the concentration of copper in more than 10 percent of tap water samples properly collected during any monitoring period is greater than 1.3 mg/L (i.e., if the "90th percentile" copper level is greater that 1.3 mg/L).

(4) The lead action level is exceeded if the concentration of lead in more that 10 percent of tap water samples properly collected during any monitoring period is greater that 0.015 mg/L (i.e., if the "90th percentile" level is greater than 0.015 mg/L).

2. Contaminant levels for volatile organic chemicals (VOCs) (effective 01 January 1993)

PENTACHLOROPHENOL	0	0.001
TOTAL TRIHALOMETHANES (THE SUM OF THE CONCENTRATIONS OF BROMODICHLOROMETHANE, DIBROMOCHLOROMETHANE, TRIBROMOMETHANE (BROMOFORM), AND TRICHLOROMETHANE (CHLOROFORM)		0.10[(1)]

[(1)]. The MCL for total trihalomethanes applies only to water systems serving 10,000 or more individuals and which add a disinfectant to the water. For systems serving less than 10,000 individuals, individual States or BUMED (in overseas locations) may adopt an effective date for the MCL.

4. Coliform Bacteria

a. The MCL for coliform bacteria (also called total coliforms) is based on the presence or absence of total coliforms in a sample rather than on an estimate of coliform density.

b. The MCL for potable water systems analyzing at least 40 samples each month: No more than 5.0 percent of the monthly samples may be total coliform-positive.

c. The MCL for systems analyzing fewer than 40 samples each month: No more than one sample each month may be total coliform-positive.

d. Monitoring and Analytical Requirements

(1) Public water systems must collect total coliform samples at sites that are representative of water through the distribution system. Sampling must be accomplished according to a written sampling plan. The monitoring frequency and number of routine samples required for total coliform monitoring are based on the population served by the system and the type of water source, i.e., groundwater, surface water, etc. Reference (d) contains sampling requirements for the Navy public water system.

(2) The standard sample volume for microbiological analyses must be 100 milliliters.

(3) Approved methods of microbiological analysis include the Autoanalysis Coliert System, also called the Minimum Media ONPG-MUG (MMO-MUG) Test; the Presence-Absence (PA) Coliform Test; the multiple-Tube Fermentation (MTF) Technique, and the membrane Filter (MF) Technique. A step-by-step microbiological test procedure for shipboard use is included in reference (1).

e. Repeat Monitoring

(1) A set of three repeat samples for each total coliform-positive routine sample must be collected. One repeat sample must be collected from the same tap as the original total coliform-positive sample, the other repeat samples must be collected from within five service connections of the original total coliform-positive sample. At least one sample must be upstream and the other downstream. These repeat samples must be collected within 24 hours of being notified of the positive result of the original sample, except where the State waives this requirement on a case-by-case basis.

(2) If a total coliform-positive sample is at the end of the distribution system, or one service connection away from the end of the distribution system, the State may waive the requirement to collect at least one sample upstream or downstream of the original positive sampling site.

(3) If total coliforms are detected in any repeat sample, the system must collect another set of repeat samples, as before, unless the MCL has been violated and the system has notified the State (in which case the State may reduce or eliminate the requirement to take the remaining samples).

(4) If any routine or repeat sample is total coliform-positive, it must also be analyzed to determine if fecal coliforms are present, except that the system may test for E. coli in lieu of fecal coliforms. Or E. coli testing on total coliform-positive samples if the system treats every total coliform-positive sample as fecal coliform positive or E. coli positive and complies with all requirements that apply when a sample is fecal coliform-positive.

5. Turbidity The MCL for turbidity applies to both community water systems and noncommunity water systems using surface water sources in whole or in part. The MCL for turbidity in drinking water measured at representative entry points to the distribution system is:

a. One turbidity unit for monthly average (5 turbidity units monthly may apply at State option).

b. Five turbidity units (maximum) average for 2 consecutive days.

c. These requirements apply to filtered systems until 29 JUNE 1993. The requirements apply to unfiltered systems that the State has determined, in writing, must install filtration until 29 June 1993 or until filtration is installed whichever is later. After the above dates, consult the latest edition of 40 CFR 141.

6. The MCL for Radiological Contaminants are:

Gross alpha particle activity including radium 226 but excluding radon and uranium . . . . . .15 pCi/L
Combined radium-226 and radium 228 . . .. .5 pCi/L
Tritium . . . . .20,000 pCi/L
Strontium-90. . . . . 8 pCi/L

Note: Screening indicators have been established for radiological contaminants. Gross Alpha present at less than or equal to 5 pCi/L, as an indicator, eliminates the need to analyze for radium 226 and 228. Gross beta present at less than or equal to 8 pCi/L, as an indicator, eliminates the need to analyze for tritium and strontium-90.

7. Sodium and Corrosivity. No MCLs have been published; however, monitoring is required.

b. Code of Federal Regulations Title 21, Volume 2, Part 165.110 (21CFR165).

a. These documents are incorporated by reference with the same force and effect as if they were given in full text. Full text may be accessed electronically at these websites: http://www.epa.gov/OGWDW and http://www.tdh.state.tx.us/bfds. The HSP shall be responsible for identifying and providing water from a source that meets U.S. Government requirements. The U.S. Government reserves the right to accept deliveries of potable waters that do not comply with above specifications, and to bring the water up to specification standards through chlorination.

b. The HSP shall provide for the delivery of fresh potable water to the ships as ordered. The barges, tankers or trucks and equipment used for transfer, storage and transportation of potable water shall not be used for cargo other than potable water, and must be equipped with independent pipe systems and working, CERTIFIED METERING DEVICES.

c. Source of Water. Water deliveries are to be made from sources that meet the requirements of paragraphs (2)(a) and (2)(b) above. If the water source does not meet the requirements of potable water, the HSP shall be required to provide water from an alternate approved source at no increase in the contract price.

d. Potable water pierside shall be delivered by pipeline if available. If a vessel is at anchorage SUBLINE ITEM XX09AC applies.

2. The HSP shall be paid based on the ACTUAL METRIC TONS of potable water received on the ship. The Government reserves the right to require a written statement from the HSP describing the method of measurement used to determine the amount of potable water provided to the vessel.

LINE ITEM XX10 – SHIP UTILITY SERVICES

1. SHORE STEAM

a. The HSP shall provide shore steam to the ship. This sub lot line item is performance-based. Shore steam provided to the ship may be provided by any means (boiler or generator) so long as the pressure of steam delivered to the vessel is approximately 100 PSI (standard commercial pressure) and of acceptable quality for the vessel. Pricing for provision of shore steam shall be on a TBD basis and should include the boiler or generator, fuel for the generator, mobilization/demobilization, hoses, and adapters appropriate to the vessel type, and water (where required) for the generator or boiler. This item shall be billed on a daily basis.

2. OIL BOOMS

a. The HSP shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom. Billing for LINE ITEM XX10AA & XX10AB shall be per meter. For example, a 300-meter oil boom would be billed at 300 meters per day.

b. Oil Booms are intended to act as a precautionary measure in case of inadvertent leakage from equipment otherwise in sound operating equipment. Oil booms are also intended to mitigate the environmental damages that may otherwise result from inadvertent leakage. The HSP shall notify the Ordering Activity, upon receipt of a LOGREQ request, if deployment of an oil boom at the proposed mooring location is contrary to host nation or port authority regulation so that the order for the oil boom service can be cancelled. Cleanup and disposal of oil is a port authority function. If the HSP incurs charges for these services, they shall be billed as port tariff items on a reimbursable basis.

3. SHORE POWER (INCLUDES CABLES, CONNECTION, FUEL, AND OPERATORS) 450-480V, 60 HZ

a. The HSP shall provide shore power to the ship using a port-provided, permanent connection system or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels. The HSP shall provide all cables and make all power connections between the generator and ship. The availability of shore power shall be in accordance with the schedule established by the ship.

b. Sub Lot Line Items XX10AC through XX10AG are to be used only if/when shore power provided by port authorities is, for any reason, not available or inadequate.

LINE ITEM XX11 – LAND TRANSPORTATION (PERSONNEL) SERVICES (BUS SERVICE AND VEHICLE RENTAL SERVICE)

1. GENERAL REQUIREMENTS :

a. All drivers must be fully qualified and possess valid driving licenses. Drivers shall be familiar with local area and conversant in English. All vehicles shall be registered, licensed and insured. The HSP is responsible for delivering all cargo and personnel to the correct location on schedule.

b. If a Government official is designated to drive the vehicle, he or she is required to be at least 21years and meet all requirements for driving in the host nation. The HSP is responsible for passing the information required to register with the local rental company from the Ordering Activity.

c. The HSP shall provide vehicles that have been properly maintained and serviced. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government shall have the right to reject the vehicle for performance of services. The HSP shall ensure that each vehicle is jointly inspected before and after a trip by the HSP and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

d. If a vehicle is not operable when required under this contract, the HSP shall provide, at no additional expense to the U.S. Government, a replacement vehicle within three (3) hours that complies in all respects with this contract.

2. BUS SERVICE

a. The HSP shall provide air-conditioned bus services on an hourly rate basis and bill under LINE ITEM XX11AA and XX11AB. The hourly rate shall include one driver or operator, any additional helpers or crew required by local authorities, all insurance, fuel, holiday surcharges, overtime, and all other operating expenses. Any additional driver, if required, shall be priced separately. Any tolls for long distance trips (over 50 kilometer radius) will be reimbursed at cost.

b. The HSP shall ensure that the bus is in sound mechanical condition and meets all safety standards required by local laws and regulations. Further, the bus shall be in a clean condition when presented for service and shall be free of debris.

c. In the event of a bus breakdown, the HSP shall provide within two hours, at no additional expense to the U.S. Government, a replacement bus complying in all respects with this contract.

d. Any personal articles or items found on the bus after completion of each trip shall be turned over to the ship's Ordering Officer.

e. The HSP shall be responsible for ensuring that the HSP and an authorized representative of the U.S. Government jointly inspect before and after a trip each bus. The U.S. Government will not consider any claim for damage to a bus, which has not been inspected.

3. VEHICLE RENTAL SERVICE

a. Vehicle Specifications, Maintenance, and Malfunctions

(i) The HSP shall furnish "new" air-conditioned vehicles (i.e., not more than five years old), in good order and condition and otherwise in full compliance with best commercial practices and local laws and regulations.

Sedans or SUVs shall have a minimum capacity of four (4) passengers and 1600cc engine.

In the event a "new" vehicle is not available in certain countries, the HSP shall contact the Contracting Officer to request a waiver from the requirement and provide background information as to why a waiver would be appropriate. The Contracting Officer will consider, and grant or refuse, the request. Vehicles shall be priced on a daily rate. They shall be equipped with front and back seat belts, an emergency triangle, spare tire, jack and complete set of tools for changing a flat tire, as well as any other equipment required by local authorities. Upon initial rental, the gasoline tank shall be full. The prices for vehicles rented are based upon an assumption that the vehicles will be returned with an empty tank of gas. There shall be no surcharge applied to the commercial price of the fuel. Vehicles can be returned with any amount of gasoline. Ships shall not be responsible for returning the vehicle with a full tank of fuel, and the HSP shall not be obligated to credit the ship for the remaining fuel.

(ii) The HSP shall provide vehicles that have been properly maintained and serviced, including all motor oils, lubricants, antifreeze, coolants and other fluids such as windshield washer fluid, and be responsible for all emergency repairs and services.

(iii) Should any vehicle break down while in the U.S. Government's possession, the HSP shall replace it with another vehicle of the same or larger size as quickly as possible, but in any case no more than three (3) hours later. The replacement shall take place either at the point of breakdown or at the HSP's

office closest to that point; whichever is more convenient for the U.S. Government. All repair or replacement costs, including transportation, shall be at the HSP's expense. In addition, the HSP shall be liable for any U.S. Government incurred costs because of the breakdown; such as towing, repair costs, and related transportation expenses because the HSP was unreachable.

b. Substitution of Vehicles

(i) If the HSP does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the HSP shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a Group B car is ordered but unavailable, and if no other Group B vehicle is available, the HSP shall furnish a higher group vehicle at the price listed for the Group B vehicle originally ordered.
(ii) In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

c. General Description of Vehicle Types

(i) The vehicles shall meet the general description set out below:

Medium-size Sedan (Group “B”): 2 - 4 doors; 4 - 5 passenger capacity; air conditioning; minimum 1600 cc engine sedan.

Executive Sedan (Group “E”): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan.

Passenger Van (Group “M”): 9-passenger capacity; air conditioning; minimum 2000cc engine.

Cargo Van (Group “X”): 12 Cubic Meter volume capacity, air conditioning; minimum 2000cc engine.

d. Insurance and Liability.

(i) The prices for vehicle rental services, as set forth in the schedule, shall be subject to the conditions below.

(ii) The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cause, except where the loss or damage is caused by the willful and wanton negligence of the U.S. Government employee.

(iii) The HSP and any Subcontractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, resulting from the fault, negligence, or wrongful act or omission of the HSP, its subcontractors, its agents, or employees.

(iv) The HSP shall provide and maintain at its expense, all vehicle operator's insurance required by the law of the country in which the vehicle is to be operated. All necessary insurance certificates shall be provided with the rental vehicle. Such insurance shall include all coverage required by law for bodily injury, collision, and property damage liability. The HSP shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, within the required policy limits, arising out of or in connection with the rental or use by the U.S. Government, its agents or its employees of any vehicle under this contract.

(v) Paragraph (iv) shall not be construed as limiting the HSP’s liability to the amounts of the required minimum insurance coverage specified therein.

e. Traffic Violations and Fines. Each vehicle operator shall be responsible for payment of fines and legal costs incurred as a consequence of the violations of traffic laws or regulations. The HSP shall notify the Supply Officer of the infraction and amount cited.

f. Mileage and Deposit Charges. There are no mileage or deposit charges for the vehicles rented under this contract.

g. Time Periods of Rental. Rental time shall begin once U.S. Government employees have taken possession of the vehicle. The daily rate is defined as 24 consecutive hours. If the vehicle is rented with a driver, and if a driver is required during the entire period of rental, no individual driver shall be required to drive more than 8 hours straight. Drivers must not have been driving within the previous 8 hours.

h. Executive Sedan with Driver (Group "Y"): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan. This group requires an executive sedan and shall be provided with a driver. Drivers must be familiar with local area, and must speak English. Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. No individual driver shall be required to drive more than 8 hours. Drivers must not have been driving within the previous 8 hours. The HSP shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations by the provided driver. The U.S. Government will reimburse the HSP for additional costs in two cases: for highway tolls, and for the driver's overnight accommodation up to $120.00 or equivalent local currency, when required by U.S. Government business such as travel to another city, and upon presentation of an original invoice.

LINE ITEM XX12 - TELEPHONE SERVICES AND COMMUNICATIONS EQUIPMENT

1. Cellular Telephone Services (LINE ITEM XX12AC): Daily charges shall be inclusive of delivery, removal, provision of 110V to 220V transformers, adapters and extra batteries. Activation, auto roaming, and long distance accounts shall be included under LINE ITEM XX12AC. The HSP shall have readily available a minimum of 10 cellular telephones at a given time. Each mobile phone provided shall include an operating manual/instruction with published rates for usage.

2. Landlines (LINE ITEM XX12AA): Whether installed on a permanent or temporary basis, sufficient landlines shall be made available for official, local, and international use. Installation charges shall be inclusive of all costs for installation and removal of landlines. Usage charges and port tariff fees associated with landline connections (LINE ITEM XX12AB) will be the actual charges computed in accordance with the local or national tariff.

3. The HSP shall provide pre-paid International Calling Cards for official use (LINE ITEM XX12AE).

LINE ITEM XX13, XX14, XX15 - FORCE PROTECTION BARRIERS, PERSONNEL, AND SUPPLIES

1. Only the ship’s Commanding Officer, the ship’s Supply Officer, or the FISC Yokosuka Contracting Officer is authorized to order Force Protection (FP) services under this contract. If any other activity or individual attempts to order FP services (e.g., NCIS, DAO, etc), the Husbanding Service (HSP) Contractor is required to immediately inform the ship and receive a proper order prior to beginning performance of these services.

2. The HSP is responsible for providing and coordinating the FP services described in paragraphs 2-6 and 8-15 as part of their Husbanding Services under Lot Line Item XX01. The HSP shall develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HSP must coordinate all aspects of FP planning and services with Port Authorities, host

nation agencies, and U.S. Embassy security staff. If the host nation is supplying FP assets the HSP must verify they are available and are scheduled to show up on time.

3. The HSP will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer. The HSP shall not add any requirements without prior approval.

4. The HSP is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Yokosuka Contracting Officer. The HSP must explain what the added FP service will include and why it has been requested. The FISC Yokosuka Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HSP will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

5. FP is considered a combination of practices and procedures, including the use of specific material, equipment, and personnel, having the objective of improving security to personnel and ships while in port. FP services or supplies may be provided by the host nation at no cost or may be billed at the public tariff rate. The HSP is required to verify what services will be provided by the host nation. For the services that cannot be provided by the host nation, the HSP is required to arrange these services by obtaining them from commercial sources at the prices indicated in the pricing schedule.

6. The HSP shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HSP's written policy shall describe the required measures to protect ship schedule information.

7. The HSP shall provide as many services identified below as ordered by the ship or FISC Yokosuka Contracting Officer. These services do not include other related services not listed, but may be required and separately ordered to attain a higher level of security in a port.

8. Personnel providing force protection services must be responsive to instructions from the ship. This does not authorize force protection personnel to violate any local regulations, any Port Authority ordinances, or local decrees. The equipment and material used for the force protection services will be inspected by the ship's force to ascertain that they meet force protection requirements.

9. Access Points: The HSP shall establish a single entry and exit point to the pier area.

10. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

11. Personnel Identification: The HSP shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

12. Background Checks: The HSP shall conduct security background checks on employees and subcontractor employees with local or national police departments or other government organizations. The HSP shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers. The HSP shall issue photo identification badges to its personnel and ensure subcontractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times. The HSP shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing. In addition, the HSP will be required to provide vetting services for third party contractors such as DLA-Engery contractors.

13. Access Lists: The HSP shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

14. Inspections: The HSP shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

15. Stand-Off Distances:

    a. Objects: To the maximum extent practicable the HSP shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

    b. Unloading Zones: To the maximum extent practicable the HSP shall establish unloading zones at least 400 feet (125 meters) away from the ship.

    c. Warning Signs: The HSP shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

        i. Sign Specifications:
            1. Language: Must be in the local language(s) as well as English.
            2. Wording: Must state "Restricted Area, Do Not Enter"
            3. Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
            4. Color: Yellow or white with black lettering
            5. Visibility: Must be highly visible from a distance of 400 feet (125 meters)
            6. Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

16. The unit price for force protection services shall include all costs associated with providing transportation, mobilization/installation and demobilization/de-installation, or arranging the requested services below unless the transportation, mobilization/installation and demobilization/de-installation is identified as a separate Lot Line item number. The HSP's invoice shall set forth the unit of issue identified for each service, total quantity ordered for each service, unit price, and the total price.

17. The force protection services that the ships may order if included on the contract schedules are:

    (a) Jersey-type security barriers and CONEX box barriers capable of stopping a vehicle (automobile). (Price per meter per day)
        (i) Concrete barriers
        (ii) Water filled barriers (completely filled with water). Price must include water.
        (iii) CONEX box barriers.

    Mobilization, installation and demobilization will be billed under a separate contract line item number.

    (b) Unarmed security guard to control vehicle and personnel access to pier. (Price per guard per hour)

Must be English speaking, and equipped with own handheld radio (not ship's radio) to communicate with ship. Duties and responsibilities will be coordinated with the ship upon arrival.

(c) Floating Line of Demarcation (LOD) at pierside, equipped with anchors and lighting (for night visibility). (Price per meter per day) The floating LOD must be anchored at least 30 meters from ship. Oil booms are acceptable. Mobilization, installation and demobilization will be billed under a separate contract line item number.

(d) Unarmed and manned waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities. Continuous coverage is required for the period of performance ordered by the ship or by the Contracting Officer. (Price per patrol craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HSP is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(e) Unarmed and manned motorized patrol craft, approximately 5-10 meters in length, with own radio to communicate with ship and local authorities, to escort ship from pilot pickup point to mooring location. (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HSP is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(f) Unarmed and manned waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities, on call (available within 15 minutes). (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HSP is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(g) Tire-shredding strips, equipped with metal spikes, to be placed across the entry to pier access. (Price per one strip per day) Must be capable of disabling a vehicle, which drives over the strips in the wrong direction. Strips must be at least one meter in length.

(h) Metal pedestrian-control fences. (Price per 2x2 meters fence per day) Must be at least two (2) meters high, two (2) meters wide, and sturdy enough to withstand wind and other inclement weather.

(i) Signs in host nation language. Signs shall be at least one (1) meter long and a half (1/2) meter wide, with lettering at least 10 cm high. (Price per sign per day). Each sign is to read: "Controlled area. Unauthorized entry prohibited." Signs shall be legible, on a sturdy material that will not fade, run, or be ruined due to inclement weather (plastic material preferable). Signs shall also be written in fluorescent paint/material or be lighted, so they can be seen at night. Signs shall have some type of securing means on them, such as a hole punched in each corner, to use wire to secure sign to fence.

(j) Portable fluorescent lighting capable of illuminating 300 meters by 100-meter area. The HS Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port’s installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting. (Price per portable unit per day)

(k) Weather resistant guard shacks, capable of holding at least two persons. Guard shack shall be enclosed, and shall have, at a minimum, one door and one window. Please indicate guard shack measurements. (Price per unit per day).

(l) Hand held metal detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition (Price per unit per day)

(m) Walk-through metal detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

(n) Trained metal detector operators. (Price per hour per operator). Operators shall search host nationals and host national vehicles. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

(o) Hand held explosives detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day).

(p) Walk-through explosive detector, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

(q) Trained explosives detector operators, (Price per hour per operator). Operators shall search host nationals and host national vehicles. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

(r) X-ray baggage scanning machines, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

(s) Trained X-ray baggage scanning operators (Price per hour per operator). Operators shall search host national baggage. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

(t) Explosives disposal-trained diving services capable of inspecting pier before ship arrival. Must have obtained all applicable licenses and/or certifications from host nation prior to diving. (Price per hour)

(u) Battery operated bullhorns, new batteries included. (Price per unit per day)

(v) Sturdy tables with dimensions of at least two (2) meters long and one (1) meter wide, with four folding chairs. (Price per unit per day)

(w) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and open on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(x) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and closed on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(y) 800 MHz radios. Must be in excellent condition, and battery operated, with batteries included. (Price per unit per day)

Note: If the FP services required in support of the port visit are not included as pre-priced items in the contract schedules, paragraph D.5. of the PWS applies.

LINE ITEM XX16 - PORT HANDLING COSTS

1. PAINT FLOAT

a. The paint float shall be no less than 5M in length but, in all cases, large enough to provide a safe and stable working platform for the occupants. Scaffolding may be of any height less than 3.5M from the deck, so as to provide a working platform at least 4M from the waterline. The paint float shall be equipped with suitable self-fendering to prevent damage to the ship. The price of these fenders shall be included in the quoted price of the paint float. If sea state, weather, or other conditions, to include but not limited to the

configuration of the vessel, the pier, or the barge, require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge. Rails shall be no less than 1M from the working platform. The working platform shall be equipped with anchor points for harnessing. The Ordering Activity shall be responsible for providing safety harnesses, for obtaining permission from local authorities prior to all work on the paint float, and for cleanup/disposal of all hazardous material generated or released outside the paint float. The HSP shall notify the Ordering Activity of local regulatory requirements concerning paint floats, assist the Ordering Activity in submitting requests and passing required documentation to the local authority where permission is required to work on the paint float, and arrange for required cleaning of the paint float upon return. The ordering activity is responsible for securing the paint float from the time custody has been transferred to them until returned to the HSP or the ship departs, whichever is earlier.

2. MATERIAL HANDLING (UP TO 150 LBS)

a. The HSP shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

b. The HSP shall use counter-to-counter delivery and charge by each Bill of Lading. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

c. Shipping documents shall be labeled "SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HSP.

d. The HSP shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel. The HSP shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

e. The HSP shall receive the package from the ship and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

f. The HSP shall deliver the package to the ship the day of arrival in port or the following morning. The HSP shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative.

g. The HSP shall forward the package to a designated location if for any reason it cannot be delivered to the ship. The HSP shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

3. MANLIFT (WITHOUT OPERATOR)

a. The HSP shall provide a manlift (without operator) and a full fuel tank. The HSP shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning. The HSP shall conduct training on safety and operating procedures for ship personnel. The HSP shall maintain documentation of ship personnel acknowledgement of the training.

LINE ITEM XX17 - COST REPORTING

LINE ITEM XX17AA - LogSSR Reporting

Upon award, the HSP shall utilize the LogSSR to submit all reports and documentation related to the husbanding

order. LogSSR can be accessed through the NAVSUP One Supply website at https://www.navsup.navy.mil/onesupply, redirected through www.navsup.navy.mil/logssr or directly at the official website of https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(1) LogSSR access and input.

(a) At the start of the contract period of performance, the HSP shall begin to enter the final itemized port cost information for every order under this contract directly into the LogSSR database (Actual Cost Report) and email all corresponding documentation (LOGREQ, Initial Cost Estimate Report, validation of submission of cost estimate, final invoices, and supporting documentation required by the contract). External Certification Authority Public Key Infrastructure (ECA PKI) is not required for entry, but no access to the HSP's information is accessible unless obtaining an ECA PKI.

(2) LogSSR functionality.

(a) This system is designed to gather all reports and documentation related to ALL ordering activity e.g. a ship's visit, beginning with the Initial Cost Estimate (referred to in this solicitation as the 'pre-arrival cost estimate') to the Actual Cost Report. All supporting documentation will be submitted by email to navsup_hq_logssr@navy.mil in PDF format (Adobe Acrobat) when the port visit information is entered into LogSSR. Although the pre-arrival cost estimate is a separate reporting requirement, a copy of this report shall also be submitted as part of the Actual Cost Report documentation described in paragraph (b) below. The Documentation is discussed below:

(b) Actual Cost Report:

(1) The HSP shall create the Actual Cost Report in the LogSSR website directly, **within seven (7) calendar days from completion of the ship's visit**. The HSP shall also send a copy of the order (i.e. SF 1155 or 1449), a copy of any Initial Cost Estimates, a copy of the LOGREQ, and all HSP and any sub-contractor invoices and supporting documentation required by the contract as PDF files to the LogSSR email address of **navsup_hq_logssr@navy.mil** and to the email address specified at the time of contract award for each region concurrent with the creation of the Actual Cost Report in LogSSR. The HSP shall identify the line items as actual or estimated. This option is for those line items where the HSP has not received the actual invoice before the ship leaves port, i.e. telephone bills. The HSP shall include ALL port costs paid by each ship for which the HSP provides husbanding services. Email submissions should be limited to no more than 10 MB per email (multiple emails authorized if needed) and reference the port visit identification number in the subject line (received when a port visit is submitted).

(2) For ships or ordering activities that do not have disbursement capabilities, the HSP shall send the signed DD Form 1155, invoices and the additional documents required clearly indicating that a payment is pending to email address husbanding@fe.navy.mil and to the LogSSR email address of **navsup_hq_logssr@navy.mil.**

(3) Any changes to an Actual Cost Report (i.e. finalize the charges made on an estimated amount) shall be forwarded by e-mail to and to the email address husbanding@fe.navy.mil and to **navsup_hq_logssr@navy.mil** email account as PDF file within seven (7) calendar days of the change. The email must contain a summary of the changes. The FISC contracting office will update changes to the LogSSR.

(4) The Actual Cost Report and supporting documentation will be visible in the LogSSR website by the government personnel with validation authority. Final reports of an HSP representative can be accessed through the website only by obtaining an ECA PKI that will provide access only to the HSP's submitted information.

NOTE: Before submission of reports or any other data to the FISC Contracting Office via electronic transmission or any other data media, the HSP shall scan all documents with current anti-virus software to ensure computer virus

free transmission. The LogSSR server scans all reports for computer viruses before inclusion in the databases. Any reports received containing computer viruses will be immediately deleted and not necessarily returned to the HSP.

NOTES:

1. "All data obtained by the Government through the use of LOGSRR during the course of the contract is for the Government's use and shall be treated as 'limited rights' as described in DFAR 252.227-7013(13) after the contract expires".

2. Failure to provide required reports in a timely manner as outlined in the PWS will result in penalties as outlined in the Quality Assurance Surveillance Plan (QASP).

Line Item XX18 - PORT TARIFFS NOT OTHERWISE SPECIFIED

Line item XX18AE – Port Tariff Items

1. Port tariffs (PT) billable under XX18 include all PT items for which a specific sub-line item is not specified in the Attachment 2.

2. The HS Contractor shall also provide all original documents with any invoices for port tariff items which have been provided to the ship for certification by the ship's Supply Officer prior to departure. Invoices for port tariff items not available prior to the ship's departure shall be presented for payment in accordance with OC-1.

(End of Summary of Changes)

Section SF 1449 - CONTINUATION SHEET

OVERIVEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting ports identified in the lots at Exhibit A.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).
2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is $10,000.00 of orders. The minimum guarantee applies to the base period only. The maximum quantity is $2,000,000 of orders per year.

4. DURATION OF CONTRACT - This contract is for a period of two (2) months and includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is eight (8) months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Other Authorized Users are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel conducting business related to a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships.

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband eight (8) ships at one time among the ports identified in the lots at Exhibit A.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The HS Contractor, as part of its understanding of the requirement, is expected to understand and be familiar with items that are available through HN and Port Authorities.

9. LONG TERM SHIP VISITS

9.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for

the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10. UNIQUE/PARTICULAR SITUATIONS:

10.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days' rate for the following days.)

10.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days' rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.

13.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passenger bus was ordered, but was not available and the HS Contractor substituted two, 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

13.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

13.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot, and utilities.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour

is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs).

20. Management Services - Husbanding CLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services CLIN, the Government shall order at least the initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- BARGE: Barges are flat-bottomed displacement ships used for carrying or storing cargo, for separation between vessels and other structures, or as a work platform. Barges may or may not be self-propelled

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Security Guards and XX11AB Tent, and so forth)

- CONTRACTING OFFICER (CO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order): A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis
Title of Individual:	Executive Group Chairman/President
Mailing Address:	15D Pandan Road Singapore 609266
Tel No:	(65) 6268-5300
Fax No:	(65) 6268-6689
Mobile:	(65) 9798-3155
E-mail address:	leonard@glennmarinegroup.com

PERFORMANCE WORK STATEMENT

1. LOTS: The contract is sub-divided into Lots. Lots may be for individual ports or they may include several ports under one Lot. For this contract, the following Lots apply:

- Lot 1 – Manila
- Lot 2 – Subic Bay

2. PRICING.

2.1 Except for Port Tariffs, unit prices for all contract items described below shall be inclusive of all necessary equipment, licensed operators, all liability insurance as required by local law, holiday and overtime costs, customs clearances, and fuel and operating expenses.

2.2 Fixed Prices are required in the Pricing Schedule except where Port Tariff (PT) prices, To Be Determined (TBD) prices, or Not Separately Priced (NSP) have been identified. Unless otherwise provided, these Fixed Prices shall also include performance at night, overtime, Saturdays, Sundays, and Holidays; and services performed under heavy rain, other inclement weather, or service to tankers and ships carrying explosives. These requirements do not include performance during cyclones or typhoons except where ships are required to depart in advance of cyclones or typhoons as part of a typhoon or cyclone evasion plan. They also include all operating expenses including tugs, barges, trucks, personnel, and customs clearances and any other charges unless specifically exempted by the Government.

2.3 Port Tariffs will apply to those services which are based on Port Tariff rates established and controlled by Port Authorities. English translated copies of the Port Tariffs must be submitted to the Supply Officer of the ship entering a specific Port.

2.4 Fees for Husbanding Services cover regular and overtime labor of contractor personnel supporting the ships plus indirect expenses, including all management, overhead and office expenses. The husbanding fees also include costs for arranging supplies and services described herein and include costs associated with attendance at periodic meetings and pre-deployment briefings. The husbanding fees represent total compensation for the contractor except for supplies and services with Fixed Prices.

2.5 Purchase Card Surcharge. The U.S. Government reserves the right to make payment by purchase card. All purchase card surcharges will be identified as a separate entry on each invoice. The Government will reimburse administrative surcharges, if any, for use of the Purchase Card at a rate not to exceed 5% of the purchase price for the underlying service.

2.6 If items are made available free of charge or at less than the quoted price by the Government, host nation, or port authority, only mobilization/demobilization charges, not to exceed the quoted unit price, may be charged. If, for any reason, an item that would otherwise be provided by the Host Nation, Government, or port authority is not available, that item shall be provided by the HSP at the unit price quoted in Exhibit A.

2.7 Order of Priority of Usage: The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or, if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. Where the reasonable cost of mobilization/demobilization for U.S. Government owned equipment exceeds the quoted price of the sub lot line item it is intended to replace, the HS Contractor shall use the least cost alternative to meet the requirement. If, for any reason, an item that would otherwise be provided by the Government, host nation, or port authority is not available, that item shall be provided by the HS Contractor at the price quoted in the Exhibit A pricing schedules.

3. CONTRACT LINE ITEMS.

3.1 FIRST AND SUBSEQUENT DAY HUSBANDING SERVICES (ANCHORAGE AND PIERSIDE) (CLINS XX01 and XX02)

3.1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 3.1.1.6 and 3.1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government’s order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 3.1.1.6 below) is addressed at paragraph 19.2 of the Overview. Compensation for assisting the ship’s Advance Party is addressed below at paragraph 3.1.1.8. Except when the facts detailed in paragraph 3.1.1.8 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

3.1.1.1. The HS Contractor shall communicate with the ship and FISC Detachment Singapore to coordinate requirements.

3.1.1.2. The HS Contractor shall order requested services and supplies.

3.1.1.3. LOGREQ Initial Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore a LOGSSR cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the LOGSSR spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and FISC Detachment Singapore

Contracting Office within two (2) working days after receipt of the LOGREQ, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs. The LOGREQ, when submitted by, under authority of, or on behalf of an AGR, is an order for pre-priced items under this contract. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

3.1.1.4. These estimates shall be provided for all authorized users including US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

3.1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

3.1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

3.1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

3.1.1.8. The HS Contractor shall assist the ship’s Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship’s advance party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship’s advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

3.1.2. POST-ARRIVAL HUSBANDING DUTIES

3.1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location, either at pierside or at anchorage.

3.1.2.2. The HS Contractor shall install all ordered equipment upon the ship’s arrival. This equipment includes but is not limited to fenders, curb caps, steps, and telephones.

3.1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

3.1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

3.1.2.5. The HS Contractor shall provide the SUPPO upon ship’s arrival a copy of the Exhibit A of the contract, the Performance Work Statement, and applicable port tariffs.

3.1.2.6. Laundry Services:

3.1.2.6.1. The HS Contractor shall arrange for laundry and dry cleaning services to be available for the ship. Service will be available for the ship’s laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure. If the ship requires laundry or dry cleaning services, such services will be ordered from the laundry and dry cleaning vendor by an AGR.

3.1.2.7. Interpreter Services:

3.1.2.7.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

3.1.2.8. Mail Delivery Services: The HS Contractor shall provide daily mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

3.1.2.9. Morale Welfare and Recreation (MWR) Services:

3.1.2.9.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

3.1.2.9.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

3.1.2.10. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders from an AGR, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s).

3.1.2.11. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms.

3.1.2.12. The HS Contractor shall facilitate the ship's timely departure.

3.1.2.12.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

3.1.2.12.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

3.1.2.12.3. The HS Contractor shall remove all provided equipment.

3.1.2.13 UNOFFICIAL REQUIREMENTS OR PERSONAL REQUESTS:

3.1.2.13.1 The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under auspices of this contract.

3.1.3. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract as further described in the contract section titled "Invoices and Payments".

3.1.4. LogSSR Report: Prepare and submit an "Actual Cost Report" in accordance with PWS paragraph 3.15.

3.2 TRASH REMOVAL (CLIN XX03)

3.2.1 Trash removal service is the collection and disposal of refuse (i.e., trash) including liquid, semi-liquid, or solid garbage. Refuse does not include explosives and incendiary waste, or waste contaminated by medical and radiological processes.

3.2.2 The HS Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse. The HS Contractor shall provide dedicated refuse bins to the ship. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins. The HS Contractor shall immediately clean up any spilled refuse. The HS Contractor shall properly dispose of all collected refuse.

3.2.3 For ships at pier side, the HS Contractor shall place containers or trucks within twenty-five (25) meters of the ship or as permitted by port regulation, or barges alongside the ship. The HS Contractor shall empty the containers or barges when full and shall assure their continuous availability for trash disposal.

3.2.4 For ships at anchorage, the HS Contractor shall remove trash at the times agreed to by the HS Contractor and Supply Officer. The frequency of removal shall be as follows:

SHIP CLASS	DAILY FREQUENCY
I, IA, IB	1
II	2
III	3
IV and V	Continuously Via Dedicated Barge when permitted

3.2.5 For trash collection at anchorage, the trash barge shall be available 24 hours a day (where not contrary to law or port regulation) with suitable self-fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.2.6 For trash collection by barge, the HS Contractor shall provide trash barges/scows (with tug service if barge is not self-propelled) for ships at anchorage. The barges shall be completely empty at time of arrival at the ship. In situations where an empty barge is not available, the contractor shall provide a system to measure the volume of trash deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of the trash. All trash barges/scows shall be properly fendered to prevent damages to U.S. Government vessels. The HS Contractor shall have ready access to sufficient barges and equipment to support at least two (2) ships at anchorage simultaneously. The barge's crew shall be entirely responsible for the tending of lines and for barge's security. The movement of trash from the ship to the barge shall be performed with care by the ship's sailors and in the manner ensuring the safety of the HS Contractor's crew and barges. Any instances of unsafe practices shall be brought to the attention of the ship's Commanding Officer, to ensure that corrective and preventive action is taken.

3.2.7 In instances of bad weather or emergency where the ship must depart on short notice, the HS Contractor shall remove barges within four hours of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the HS Contractor at least four (4) hours in advance for the barge pick-up at no additional cost to the U.S. Government.

3.2.8 The HS Contractor shall submit, as an attachment to the invoices, a document that certifies the quantity collected and the name of the disposal plant where the trash will be disposed. The HS Contractor is also responsible to follow any environmental regulations required by each country. The HS Contractor is required to keep all disposal certificates and shall make them available to FISC Yokosuka upon request.

3.2.9 Whether at anchor or pierside, U.S. Government personnel will dump the trash on the barges or in the containers.

3.2.10 Any spillage of refuse in the course of the removal operations shall be cleaned up immediately by the HS Contractor. Refuse containers, when used and when emptied, shall be returned to their original position with the lids (if any) replaced thereon.

3.2.11 The HS Contractor shall be paid based on the ACTUAL CUBIC METERS of trash removed. The HS Contractor shall be entitled to bill for 60 CM where the actual volume of trash removal is less than 60 CM (per order).

3.2.12 Where trash is required to be segregated, the Ordering Activity shall be required to segregate the material at the time of disposal. The HSP shall be responsible for providing separate containers for each vessel, clearly marked with the required categories and for informing the Ordering Activity, upon arrival, that segregation is required. If the Ordering Activity does not segregate trash as required, the HSP shall inform the Ordering Activity and Logistic Support Representative (LSR) prior to departure and bill for the cost of trash segregation within 48 hours after the vessel's departure.

3.3 COLLECTION, HOLDING AND TRANSFER (CHT) (CLIN XX04)

3.3.1 The HS Contractor is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships throughout the area covered by this contract. The HS Contractor shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The HS Contractor shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence upon ship's arrival whether, at anchor or pierside. The HS Contractor shall pre-position CHT barges, when necessary, in accordance with force protection or other requirements.

3.3.2 The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

3.3.3 The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

3.3.4 The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT. The Government reserves the right to use its own metering device to verify measurement of sewage discharge. Invoices submitted for payment for this service shall contain a statement describing the method used in determining liquid quantities offloaded from the ship.

3.3.5 The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

3.3.6 The HS Contractor shall properly dispose of all sewage. CHT collection, removal and disposal shall be priced based on the following conditions:

i. (XX04AA) – CHT BY TRUCK: The husbanding HS Contractor shall provide services when the visiting ship is at pierside.

ii. (XX04AB) – CHT BY BARGE: The HS Contractor shall provide services when the visiting ship is at anchorage or the port authority has issued a directive stating that service must be performed by barge or the barge has been ordered by the ship. The HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.3.7 The CHT service shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the U.S. Government. In those limited number of cases where this is not possible, the contractor shall provide a system to measure the volume of sewage deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT.

3.3.8 The HS Contractor will be guaranteed a minimum daily quantity of 60 cubic meters for providing these services even if the actual cubic meters of CHT removed is lower than 60 cubic meters. Note: 264.2 gallons = 1 CM (cubic meter).

3.3.9 The Government reserves the right to independently verify the actual volume of CHT discharged using a certified flow measuring device.

3.3.10 The HS Contractor shall request the ship's personnel to verify all removal figures at time of CHT collection. The HS Contractor shall follow any environmental regulations required by each country. If the ship concurs with the volume, the ship will pay for the entire amount. If the ship contests the volume, the ship will pay for the amount it actually believes was pumped or 60 cubic meters, whichever is greater. The HS Contractor shall submit a request to FISC for the difference, accompanied by disposal certificates. FISC will investigate and arrange for payment of any additional amounts that are determined to be due.

3.3.11 The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the HS Contractor's report in writing. The HS Contractor is also responsible to keep all disposal certificates and shall make them available to Contracting Officer upon request.

3.4 YOKOHAMA OR COMPARABLE TYPE FENDERS (CLIN XX05)

3.4.1 The HS Contractor shall furnish Yokohama or comparable type fenders for all classes of ships in accordance with the Schedule of Supplies and Services. Fender size is not specified as this is a performance based service. Fenders provided shall be appropriate and safe for the class of ship and pier configuration combination (eg. all class II vessels shall be billed under LINE ITEM XX05AB). The fenders quoted for each sub lot line item shall be safe and useable for the intended class of ship at all locations specified by the lot. In the schedule there is a sub contract line item (SUBLINE ITEM) for a daily rental fee PER Yokohama or comparable type fender, and there is another SUBLINE ITEM for all costs associated with installation, and removal of one fender, as well as round trip costs associated with transport of the fender from another port, if required.

3.4.2 Rental is on a daily (24-hour) basis, per fender. Installation, removal, and transportation are charged as a "lot" per fender. The HS Contractor shall be responsible for securing the fenders to the pier.

3.4.3 The HS Contractor shall provide fenders with a minimum of two (2) mooring lines.

3.4.4 Sub lot line item XX05AG is applicable only to submarine fenders. Sub lot line item XX05AA shall be used for all other class 1 vessels. Recognizing that mobilization/demobilization costs for submarine fenders (XX05AG) vary significantly from those of other type fenders, transportation charges for submarine fenders shall not be subject to the quoted transportation charges of XX05AF. Instead, all transportation, storage, setup, mobilization and demobilization charges associated with submarine fenders (XX05AG) shall be included in the quoted price of this sub lot line item.

3.5 FRESH POTABLE WATER (CLIN XX06)

3.5.1 Potable water is defined as fresh drinking water of a quality not less than that prescribed in:

3.5.2 Code of Federal Regulations Title 21, Volume 2, Part 165.110 (21CFR165).

3.5.2.1 These documents are incorporated by reference with the same force and effect as if they were given in full text. Full text may be accessed electronically at these websites: http://www.epa.gov/OGWDW and http://www.tdh.state.tx.us/bfds. The HS Contractor shall be responsible for identifying and providing water from a source that meets U.S. Government requirements. The U.S. Government reserves the right to accept deliveries of potable waters that do not comply with above specifications, and to bring the water up to specification standards through chlorination.

3.5.2.2 The HS Contractor shall provide for the delivery of fresh potable water to the ships as ordered. The HS Contractor shall be paid for the amount of water ordered by the vessel. The barges, tankers or trucks and equipment used for transfer, storage and transportation of potable water shall not be used for cargo other than potable water, and must be equipped with independent pipe systems and working, certified metering devices.

3.5.2.3 Source of Water. Water deliveries are to be made from sources that meet the requirements of paragraph 3.5.2.1 above. If the water source does not meet the requirements of potable water, the HS Contractor shall be required to provide water from an alternate approved source at no increase in the contract price.

3.5.3 The HS Contractor shall be paid based on the ACTUAL METRIC TONS of potable water received on the ship. The Government reserves the right to use its own metering device to verify measurement of potable water delivered to the vessel.

3.5.4 If potable water delivery is via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position water Barges, when necessary, in accordance with Force protection or other requirements. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.6 PILOTS (CLIN XX07), TUGS (CLIN XX08), LINEHANDLERS (CLIN XX09)

3.6.1 The HS Contractor shall arrange pilots, tugs, and line handlers as ordered. The HS Contractor shall coordinate with port authorities, as necessary, to ensure that the services are available at the times requested. It should be noted that the port authority or other authorized sources provide these services, and are, therefore, to be priced in accordance with current tariff rates.

3.6.2 The HS Contractor shall provide tugs to bring ships to and from berthing locations. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

3.6.3 Only if pilots, tugs, or line handlers are not available through the port authority, the HS Contractor shall use commercially available sources.

3.7 TRANSPORTATION SERVICE (BUS AND VEHICLE) (CLIN XX10)

3.7.1 GENERAL REQUIREMENTS :

3.7.1.1 All drivers must be fully qualified and possess valid driving licenses. Drivers shall be familiar with local area and conversant in English. All vehicles shall be registered, licensed and insured (including adequate passenger liability insurance). The HS Contractor is responsible for delivering all cargo and personnel to the correct location on schedule.

3.7.1.2 The HS Contractor shall provide vehicles that have been properly maintained and serviced. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government shall have the right to reject the vehicle for performance of services. The HS Contractor shall ensure that each vehicle is jointly inspected before and after a trip by the HS Contractor and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

3.7.1.3 If a vehicle is not operable when required under this contract, the HS Contractor shall provide, at no additional expense to the U.S. Government, a replacement vehicle within two (2) hours that complies in all respects with this contract.

3.7.2 BUS SERVICE

3.7.2.1 The HS Contractor shall provide air-conditioned bus services on an hourly rate basis and bill under LINE ITEM XX10AA. The hourly rate shall include one driver or operator, any additional helpers or crew required by local authorities, all insurance, fuel, holiday surcharges, overtime, and all other operating expenses. Any tolls for long distance trips (over 50 kilometer radius) will be reimbursed at cost.

3.7.2.2 The HS Contractor shall ensure that the bus is in sound mechanical condition and meets all safety standards required by local laws and regulations. Further, the bus shall be in a clean condition when presented for service and shall be free of debris. The bus shall be sufficiently clean so as not to soil passengers, their clothing or possessions with dirt, grease, oil, or other matter.

3.7.2.3 In the event of a bus breakdown, the HS Contractor shall provide within two hours, at no additional expense to the U.S. Government, a replacement bus complying in all respects with this contract.

3.7.2.4 Any personal articles or items found on the bus after completion of each trip shall be turned over to the ship's Ordering Officer.

3.7.2.5 The HS Contractor shall be responsible for ensuring that the HS Contractor and an authorized representative of the U.S. Government jointly inspect before and after a trip each bus. The U.S. Government will not consider any claim for damage to a bus, which has not been inspected.

3.5.2.6 The minimum bus capacity shall be 40 passengers.

3.5.2.7 A minimum daily price of four (4) continuous hours shall apply for each bus ordered less any time associated with bus breakdown or getting lost.

3.5.2.8 Drivers must be familiar with the area, have an appropriate driver license, and speak English. In the event the driver is unable to speak English, the contractor shall furnish an English speaking rider on the bus.

3.7.3 VEHICLE RENTAL SERVICE

3.7.3.1 Vehicle Specifications, Maintenance, and Malfunctions

3.7.3.1.1 The HS Contractor shall furnish "new" air-conditioned vehicles (i.e., not more than five years old), in good order and condition and otherwise in full compliance with best commercial practices and local laws and regulations.

3.7.3.1.2 Sedans or SUVs shall have a minimum capacity of four (4) passengers and 1600cc engine.

3.7.3.1.3 In the event a "new" vehicle is not available in certain countries, the contractor shall contact the Contracting Officer to request a waiver from the requirement and provide background information as to why a waiver would be appropriate. The Contracting Officer will consider, and grant or refuse, the request. Vehicles shall be priced on a daily rate, except as noted below. They shall be equipped with front and back seat belts, an

emergency triangle, spare tire, jack and complete set of tools for changing a flat tire, as well as any other equipment required by local authorities. Upon initial rental, the gasoline tank shall be full. The prices for vehicles rented are based upon an assumption that the vehicles will be returned with an empty tank of gas. Therefore ships will be charged for a full tank of gasoline at the time of rental. There shall be no surcharge applied to the commercial price of the fuel. Vehicles can be returned with any amount of gasoline. Ships shall not be responsible for returning the vehicle with a full tank of fuel, and the HS Contractor shall not be obligated to credit the ship for the remaining fuel.

3.7.3.1.4 The HS Contractor shall provide vehicles that have been properly maintained and serviced, including all motor oils, lubricants, antifreeze, coolants and other fluids such as windshield washer fluid, and be responsible for all emergency repairs and services.

3.7.3.1.5 Should any vehicle break down while in the U.S. Government's possession, the HS Contractor shall replace it with another vehicle of the same or larger size as quickly as possible, but in any case no more than two (2) hours later. The replacement shall take place either at the point of breakdown or at the HS Contractor's office closest to that point; whichever is more convenient for the U.S. Government. All repair or replacement costs, including transportation, shall be at the HS Contractor's expense. The U.S. Government shall be credited an hourly rate, pro-rated on the daily rate, for the rental cost between breakdown and vehicle replacement.

3.7.3.2 Substitution of Vehicles

3.7.3.2.1 If the HS Contractor does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the HS Contractor shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a Group B car is ordered but unavailable, and if no other Group B vehicle is available, the HS Contractor shall furnish a higher group vehicle at the price listed for the Group B vehicle originally ordered.

3.7.3.2.2 In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

3.7.3.3 General Description of Vehicle Types

3.7.3.3.1 Medium-size Sedan (Group "B"): 2 - 4 doors; 4 - 5 passenger capacity; air conditioning; minimum 1600 cc engine sedan.

3.7.3.3.2 Passenger Van (Group "M"): 9-passenger capacity; air conditioning; minimum 2000cc engine.

3.7.3.3.3 Executive Sedan with Driver (Group "Y"): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan. This group requires an executive sedan and shall be provided with a driver. Drivers must be familiar with local area, and must speak English. Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. No individual driver shall be required to drive more than 8 hours. Drivers must not have been driving within the previous 8 hours. Rentals less than 24 hours will be charged on an hourly pro-rata basis, based on the daily rate, with the HS Contractor entitled to a minimum charge of 4 hours. The HS Contractor shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations by the provided driver. The daily rate shall be inclusive of all necessary equipment, licensed drivers, all liability insurance as required by local law, holiday and overtime costs, fuel, all other operating expenses, and all other incidentals. The U.S. Government will reimburse the HS Contractor for additional costs in two cases: for highway tolls, and for the driver's overnight accommodation up to $120.00 or equivalent local currency, when required by U.S. Government business such as travel to another city, and upon presentation of an original invoice (using the online pricing application).

3.7.3.3.4 15-Passenger Buses with Driver (Group "Z"): All requirements concerning the rental of a vehicle with the driver described above in the "Executive Sedan with Driver" shall apply to this paragraph also.

3.7.3.4 Insurance and Liability.

3.7.3.4.1 The prices for vehicle rental services, as set forth in the schedule, shall be subject to the conditions below.

3.7.3.4.2 The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cause, except where the loss or damage is caused by the willful and wanton negligence of the U.S. Government employee.

3.7.3.4.3 The HS Contractor and any Subcontractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, resulting from the fault, negligence, or wrongful act or omission of the HS Contractor, its subcontractors, its agents, or employees.

3.7.3.4.4 The HS Contractor shall provide and maintain at its expense, all vehicle operator's insurance required by the law of the country in which the vehicle is to be operated. All necessary insurance certificates shall be provided with the rental vehicle. Such insurance shall include all coverage required by law for bodily injury, collision, and property damage liability. The HS Contractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, within the required policy limits, arising out of or in connection with the rental or use by the U.S. Government, its agents or its employees of any vehicle under this contract.

3.7.3.5 Traffic Violations and Fines. Each vehicle operator shall be responsible for payment of fines and legal costs incurred as a consequence of the violations of traffic laws or regulations.

3.7.3.6 Mileage and Deposit Charges. There are no mileage or deposit charges for the vehicles rented under this contract for all mileage travelled within a 250 kilometer radius of the ship berth (or departure point on the pier if ship is at anchor). Outstation charges, surcharges, or additional mileage rates shall not be assessed for travel within the 250 kilometer radius as the vehicle is rented on a daily basis with usage in accordance with the ordering activity's needs. The HS Contractor shall be entitled to an additional half days' rental fee at the daily rate for each day in which vehicle trips are required beyond the 250 kilometer radius described above.

3.7.3.7 Time Periods of Rental. Rental time shall begin once the vehicle and driver are available for use alongside the Ordering Activity. The daily rate is defined as 24 consecutive hours. No individual driver shall be required to drive more than 8 hours straight. Drivers must not have been driving within the previous 8 hours.

3.7.4 LIGHT TRUCKS (LOT LINE ITEM XX11AI)

3.7.4.1 The HS Contractor shall provide covered, lockable trucks with a driver to load/off load cargo and mail. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and offloading.

3.7.4.2 The HS Contractor shall be responsible for security and prevent loss/damage/destruction of cargo and mail.

3.7.4.3 The HS Contractor shall return all items left in rental vehicles to the ship's Ordering Officer.

3.7.4.4 The HS Contractor shall obtain written acknowledgement of vehicle service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

3.7.4.5 The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cost, except where the loss or damage is cost by the willful and wanton negligence of the U.S. Government employee.

3.7.4.6 Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. The daily rate is defined as 24 consecutive hours. No individual driver shall be required to drive more than eight (8) hours. Drivers must not have been driving within the previous eight (8)

hours. Rentals less than 24 hours will be charged on an hourly pro-rata basis, based on the daily rate, with the HS Contractor entitled to a minimum charge of four (4) hours. The HS Contractor shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations. The daily rate shall be inclusive of all necessary equipment, licensed drivers, all liability insurance as required by local law, holiday and overtime costs, fuel, all other operating expenses, and all other incidentals.

3.7.4.7 The HS Contractor shall provide vehicle service with qualified drivers for official government business related to port visits.

3.7.4.8 The HS Contractor shall provide one-way transfer vehicles with drivers to transfer cargo between a designated pick-up point and a specified destination within a 250 kilometer radius of the ship berth (or departure point on the pier if ship is at anchor). Outstation charges, surcharges, or additional mileage rates shall not be assessed for travel within the 250 kilometer radius as the vehicle is rented on a daily basis with usage in accordance with the ordering activity's needs. The HS Contractor shall be entitled to an additional half days' rental fee at the daily rate for each day in which vehicle trips are required beyond the 250 kilometer radius described above.

3.7.4.9 The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

3.7.4.10 The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

3.7.4.11 If the unit of issue is by "Day", then the rental period shall constitutes 24 hours.

3.8 FORCE PROTECTION SUPPLIES AND SERVICES (CLIN XX11)

3.8.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets and/or services at no cost or HN rate, the HS Contractor must verify that they are available and are scheduled to show up on time. When the HS Contractor obtains a FP supply or service from the port or local government-type organization and the price of that item is set by a published price list, the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor pays for the item, whichever is less. The HS Contractor shall provide supporting documents from the HN for verification to the Supply Officer. The HS Contractor shall not follow directions of the ship's Security Officer or Advanced Party FP Officer that vary from these contract requirements without first confirming that direction with the AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 3.8.4 below.

3.8.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

3.8.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

3.8.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to readily identify personnel while they are working.

3.8.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on its employees and the employees of its subcontractors with local or national police departments or other government organizations. The HS Contractor shall not use employees or employees of a subcontractor if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

3.8.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

3.8.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

3.8.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

3.8.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

3.8.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

3.8.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

3.8.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

3.8.1.6. Stand-Off Distances:

3.8.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

3.8.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

3.8.1.7. Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. To define the scope of this requirement, FP signage must be placed at intervals not to exceed every 200 ft. on the perimeter of the visiting ship. Specific locations where the signs are to be posted are at the discretion of each ship. Provision of these signs is a cost to be included in the management services fee.

3.8.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

3.8.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

3.8.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

3.8.2 Security Guards Services (CLIN XX11)

3.8.2.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

3.8.2.2. The HS Contractor shall comply with Attachment 3 for security guard operations.

3.8.2.3. All security guards shall be armed.

3.8.3. Beach Guard Office or Tent

3.8.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship's personnel while performing security checks on personnel, baggage, and vehicles.

3.8.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO2 fire extinguisher shall be provided and kept fully charged.

3.8.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language providing notice about the security checks that will be conducted in the immediate area.

3.8.4. Deleted

3.8.5. Non-Contract FP Measures: The HS Contractor is prohibited from providing any FP measures that are not included in this contract, whether requested by the ship or recommended by its contractor, unless approval is obtained in advance from the FISC Detachment Singapore Contracting Office. As part of its request for approval, the HS Contractor must explain what the added FP service will include and its understanding of why it has been requested. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made by FISC Detachment Singapore Office, then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

3.8.6. See Attachment 3,5,6 & 7 for additional force protection requirements.

3.9 MATERIAL HANDLING (UP TO 150 LBS) (CLIN XX12)

3.9.1 The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

3.9.2 The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

3.9.3 Shipping documents shall be labeled "SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

3.9.4 The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

3.9.5 The HS Contractor shall receive the package from the ship and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

3.9.6 The HS Contractor shall deliver the package to the ship the day of arrival in port or the following morning. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative.

3.9.7 The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or as otherwise directed by the ship.

3.10 BROWS (CLIN XX13)

3.10.1 Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The HS Contractor shall provide the brows specified in the schedule as ordered by the ship. A range of brow sizes is provided in each of the sub lot line items of lot line item XX13. All brows provided by port authorities, host nation, or US Government shall be billed at cost as port tariff items. Mobilization, demobilization, setup and placement shall be included in the proposed unit price of all XX13 sub lot line items. In cases where brows are provided by port authorities, host nation, or US Government free of charge, at reduced cost, or for mobilization/demobilization costs only; these costs will be reimbursed without additional fees or markup.

3.10.2 Due to the height difference between the submarine deck and pier, the HS Contractor provided submarine brow (must afford personnel a smooth and safe transit when entering or exiting the submarine deck. The submarine brow must be capable of supporting shore power cables without damaging the cable.

3.10.3 The HS Contractor shall be entitled to bill for 4 hours of usage under this line item when actual usage is less than 4 hours (per order). Billing for brows shall be calculated up until the scheduled time of departure. Discrepancies, if any, between the number of hours billed at the pre-sailing visit and the actual number of hours used shall be invoiced and paid in accordance with the procedures in OC-1, Invoices and Payments. The order of priority of usage in paragraph 2.7 applies.

3.11 MOBILE CRANE SERVICES (CLIN XX14)

3.11.1 The HS Contractor shall provide mobile crane services (shore crane) with operator(s). The HS Contractor shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HS Contractor shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each mobile crane ordered. Crane services under this Line Item are for land cranes only.

3.12 FORKLIFT SERVICES (CLIN XX15)

3.12.1 The HS Contractor shall provide forklift services with operator(s). The HS Contractor shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. Upon the Supply Officer's request, the HS Contractor shall provide information concerning forklift/lifting capacity. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The forklifts shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HS Contractor shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each forklift ordered.

3.13 TELEPHONE SERVICES AND COMMUNICATION EQUIPMENT (CLIN XX16)

3.13.1 Cellular Telephone Services (XX16AA): Daily charges shall be inclusive of delivery, removal, provision of 110V to 220V transformers, adapters and extra batteries. Activation, auto roaming, and long distance accounts shall be included under XX16AA. The HS Contractor shall have readily available a minimum of 10 cellular telephones at a given time. Each mobile phone provided shall include an operating manual/instruction with published rates for usage. Airtime for mobile phones shall be included under XX16AB. Usage charges associated with mobile phones (XX16AB) will be the actual charges computed in accordance with the local or national tariff.

3.13.2 SIM cards with prepaid airtime shall be provided where the ship or operating unit has mobile phones and desires only SIM cards for use in the specific port area. SIM cards provided under LINE ITEM XX16AC shall include activation of the SIM card. HS Contractors shall not be obligated to provide quantities of sub lot line item XX16AC in excess of quantities permitted by host nation law or regulation.

3.14 PORT TARIFFS NOT OTHERWISE SPECIFIED (CLIN XX17)

3.14.1 Port tariffs (PT) billable under XX17 include all PT items for which a specific sub-line item is not specified in the Exhibit A.

3.14.2 The HS Contractor shall also provide all original documents with any invoices for port tariff items which have been provided to the ship for certification by the ship's Supply Officer prior to departure. Invoices for port tariff items not available prior to the ship's departure shall be presented for payment in accordance with OC-1.

3.15 COST REPORTING (CLIN XX18)

3.15.1 All billing and cost reporting shall be made in the units specified in the respective contract Line Items.
3.15.2 The HS Contractor shall enter and report ALL expenditures under this contract, regardless of customer or ordering activity, into LogSSR.
3.15.3 The pre-arrival cost estimate is part of the Cost Reporting Line Item.

3.15.4 LogSSR Reporting(XX18AA)
The Contractor shall fully participate in the use of the Logistics Support Services Repository (LogSSR) web-based system. LogSSR replaces all previously used reporting processes such as legacy web-based systems like Cost Reporting and Forecasting Tool (CRAFT).
Upon award, the Contractor shall utilize the LogSSR to submit all reports and documentation related to the ship's visit. LogSSR can be accessed through the NAVSUP One Supply website at https://www.navsup.navy.mil/onesupply, redirected through www.navsup.navy.mil/logssr or directly at the official website of https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(1) LogSSR access and input.

(a) At the start of the contract period of performance, the Contractor shall enter the final itemized port cost information directly into the LogSSR database (Actual Cost Report) and email all corresponding documentation (Initial Cost Estimate Report, final invoices, and supporting documentation required by the contract). External Certification Authority Public Key Infrastructure (ECA PKI) is not required for entry, but no access to the contractor's information is accessible unless obtaining an ECA PKI.

(b) Contractors can obtain access to their submissions by obtaining an ECA PKI per the NAVSUP One Supply guidelines and requesting access through the website. Information can be obtained through the LogSSR website at https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(2) LogSSR functionality.

(a) This system is designed to gather all reports and documentation related to the ship's visit, beginning with the Initial Cost Estimate (referred to in this solicitation as the 'pre-arrival cost estimate') to the Actual Cost Report. All supporting documentation will be submitted by email to navsup_hq_logssr@navy.mil in PDF format (Adobe Acrobat) when the port visit information is entered into LogSSR. Although the pre-arrival cost estimate is a separate reporting requirement, a copy of this report shall also be submitted as part of the Actual Cost Report documentation described in paragraph (b) below. The Documentation is discussed below:

(b) Actual Cost Report:

(1) The Contractor shall create the Actual Cost Report in the LogSSR website directly, within seven calendar days from completion of the ship's visit . The contractor shall also send a copy of the order (i.e. SF 1155 or 1449), a copy of any Initial Cost Estimates, a copy of the logreq, and all the contractor's invoices and supporting documentation required by the contract as PDF files to theLogSSR email address of navsup_hq_logssr@navy.mil and to the email address specified at the time of contract award for each region concurrent with the creation of the Actual Cost Report in LogSSR.. The Contractor shall identify the line items as actual or estimated. This option is for those line items where the Contractor has not received the actual invoice before the ship leaves port, i.e. telephone bills. The Contractor shall include all port costs paid by each ship for which the Contractor provides husbanding services. The term "port costs" includes all supplies or services identified in the section of the contract titled, SUPPLIES/SERVICES AND PRICES, supplies or services furnished under another FISC contract, and any other charge paid by the ship during the port visit.

(2) For ships that do not have payment capabilities, the Contractor shall send the signed DD Form 1155, invoices and the additional documents required clearly indicating that a payment is pending to the and to the email address specified at the time of contract award for each region and to the LogSSR email address of navsup_hq_logssr@navy.mil.

(3) Any changes to an Actual Cost Report (i.e. finalize the charges made on an estimated amount) shall be forwarded by e-mail to and to the email address specified at the time of contract award for each region and to navsup_hq_logssr@navy.mil email account as PDF file within seven calendar days of the change. The FISC Detachment Singapore contracting office will update changes to the LogSSR.

(4) The Actual Cost Report and supporting documentation will be visible in the LogSSR website by the government personnel with validation authority. Final reports of an HSP representative can be accessed through the website only by obtaining an ECA PKI that will provide access only to the HSP's submitted information.

3.15.5 Pre-arrival Cost Estimate Report (XX18AB)

(1) The Contractor shall prepare an Initial Cost Estimate Report (referred to in this solicitation as the 'pre-arrival cost estimate') in response to all orders issued to the Contractor by any method identified under "ISSUANCE OF ORDER" in Contract Terms and Conditions – Commercial Items. The orders will be provided to the Contractor by ships, activities and individuals identified in the contract. The Initial Cost Estimate will include estimated prices

for all items ordered. It will not be sufficient to simply state that the estimated price is "per FISC contract" or "per Port Tariff". The Contractor shall utilize Pre-arrival Cost Estimate Report format included in Exhibit B.

(2) The Contractor shall send the Initial Cost Estimate Report by email to the requiring customers authorized to use this contract and to the and to the email address specified at the time of contract award for each region within 48 hours after receipt of the LOGREQ/order. In the situation where the Contractor receives the logreq with less than two working days prior to the arrival of the ship, the Contractor shall make every effort possible to provide the cost estimate prior to the ship's arrival, but in no case, more than 48 hours after receipt of the LOGREQ.

(3) Any changes to an Initial Cost Estimate Report shall be forwarded by email to the requiring customers authorized to use this contract and to the email address specified at the time of contract award for each region .

(4) These estimates shall be provided to any other requiring customers authorized to use this contract based on the customer's request.

(5) In addition to the initial cost estimate, the Contractor shall provide any additional information and respond to the activity authorized to act on behalf of the ship, such as the Port Services office or the DAO.

NOTE: Before submission of reports or any other data to the FISC Contracting Office via electronic transmission or any other data media, the Contractor shall scan all documents with current anti-virus software to ensure computer virus free transmission. The LogSSR server scans all reports for computer viruses before inclusion in the databases. Any reports received containing computer viruses will be immediately returned to the Contractor.

3.16 WATER FERRY/TAXI SERVICE (CLIN XX19)

3.16.1 The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the fleet landing. At the commencement of service, the HS Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule. The HS Contractor shall provide water taxi service when the vessel is expected to be at anchorage for twenty-four (24) hours or more. Water taxi service shall be always available, with the exception of inclement weather, during the two (2) one-hour meal breaks and during refueling. At the commencement of service, the HS Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule.

3.16.2 The hourly rate for taxi water service shall include a minimum of two (2) qualified operators (a driver and one other operator), any other helpers or crew members required by local authorities, all insurance, fuel, holiday surcharges, overtime, and other operating expenses. Operator qualifications are set forth in paragraph 3.16.15 below.

3.16.3 Service begins when the first water taxi is alongside the designated pick-up point and ends when the last passenger disembarks from the water taxi at the designated drop-off point as ordered by the ship. However, when required to arrive early for inspection as a force protection measure, service begins at time of inspection. The HS Contractor shall be entitled to a six (6) hour minimum rental fee in cases where actual usage is less than 6 hours (per order).

3.16.4 Cancellation. The Ordering Activity will notify the HS Contractor at least forty-eight (48) hours in advance for cancellation of service. If the service is cancelled with less than forty-eight (48) hours notice, the Ordering Activity shall be responsible for cancellation costs unless cancellation is required due to adverse weather conditions (described in paragraph 3.16.13 below). A cancellation fee shall not be assessed in the event service is cancelled with less than 48 hours notice due to adverse weather conditions.

3.16.5 If the HS Contractor cannot provide the size of water taxi ordered, the HS Contractor shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event the ship will be charged for the size of the water taxi ordered. For example, if one (1) 250-pax water taxi is

ordered and is not available, then two (2) 125-pax water taxis shall be provided for the rate of one (1) 250-pax water taxi, if acceptable to the Ordering Officer.

3.16.6 The HS Contractor shall ensure that the water taxi is in sound mechanical condition and meets all safety standards required by local laws and regulations to preclude breakdown and injury. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of the port or the country in which the port is located. Apart from compliance with local laws and regulations, the HS Contractor shall meet all additional requirements as set forth throughout the PWS. Water taxi shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, and fitted for service required. Further, water taxi shall be in a clean condition when presented for service and shall be free of debris. The water taxi shall be sufficiently clean so as not to soil passengers, their clothing, or possessions with dirt, grease, oil, or other matter. If the water taxi does not meet the requirements of this paragraph as determined by the Ordering Officer, the U.S. Government shall have the right to reject the water taxi for performance of services.

3.16.7 The HS Contractor shall ensure that all water taxis are fully licensed, registered, and insured, including adequate liability insurance, in accordance with local laws and regulations.

3.16.8 Each water taxi shall be equipped with at least one clean and serviceable life jacket for each passenger and crewmember, and all jackets shall be stowed in a readily accessible place.

3.16.9 All water taxis used by the HS Contractor shall provide overhead covering.

3.16.10 Before the commencement of any services under this contract, the HS Contractor shall make the water taxi available to the Ordering Vessel's Commanding Officer or designated representative for inspection.

3.16.11 The following information shall be conspicuously posted in English and the language of the country in which the port is located:

a. Current operator's/captain's license.
b. Passenger/weight capacity limits notice.
c. Location of life jackets and other life saving equipment.
d. Location of all exits indicated in large letters.
e. Emergency procedures.

3.16.12 Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

3.16.13 'Adverse weather' conditions are weather conditions in which operations of water taxis are unsafe for passengers and shall be determined by the Commanding Officer, Command Duty Officer, Operations Officer, Officer of the Deck, or local port authority. Operation of the water taxi shall be in a safe and seaworthy manner. Operation of water taxis is not allowed under adverse weather conditions.

3.16.14 Consumption of alcoholic beverages shall not be permitted aboard the water taxi.

3.16.15 Operator Qualifications: All personnel or employees of the HS Contractor operating water taxis, shall have all certification required and issued by the law of the country in which the port is located for the operation of the type, class, or size of water taxi being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the water taxis are to be operated to ensure the water taxis are operated in a safe and seaworthy manner. At least one operator on each boat must speak English. The HS Contractor is required to provide a minimum of two (2) qualified operators for each water taxi at all times.

3.16.16 Security: During the term of this contract, the ship(s) to be serviced will provide adequate and sufficient security personnel for maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the ship's Commanding Officer or designated

representative. When such naval personnel are embarked in a HS Contractor-operated water taxi, he will be responsible for the good order and discipline of naval personnel.

3.16.17 In the event of a water taxi breakdown, immediately prior to, or during a trip, the HS Contractor shall immediately provide a replacement water taxi that complies in all respects with this contract, at no additional cost to the U.S. Government. If a water taxi is not operable when required under this contract, the HS Contractor shall immediately provide at no additional expense to the U.S. Government, a replacement water taxi which complies in all respects with this contract.

3.16.18 Any personal articles or items found on the water taxi after completion of each trip shall be turned over to the ship's Security Officer or his direct representative.

3.16.19 To verify a claim by the HS Contractor for any damage or destruction caused by the U.S. Government, it shall be the responsibility of the HS Contractor to ensure that the water taxi is jointly inspected before and after each trip by the HS Contractor and an authorized representative of the U.S. Government.

3.16.20 When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

3.16.21 In the event the U.S. Government rejects a water taxi, the U.S. Government shall not be liable for any costs the HS Contractor incurs in presenting said water taxi for inspection.

3.16.22 The HS Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for U.S. Government review and inspection.

3.17. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

3.17.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

3.17.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

3.17.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

3.17.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

3.17.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items.

CONTRACT TERMS AND CONDITIONS
ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) ORAL ORDERS (Indefinite Delivery Contracts) (SUP 5252.216 9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) WRITTEN ORDERS (Indefinite Delivery Contracts) (SUP 5252.216 9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(d) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56 ▪ C(133 ▪ F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(e) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer

may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

SPS CONSOLIDATED SERVER TIME ZONE (Jun 2006) (NAVSUP)

All interested parties are hereby advised that the date and time for the Contracting Officer signature and the release of this contractual document are based on US Central Time Zone. All other dates and times are based on local time.

To calculate your time in relation to US Central Time Zone, vendors may visit the following url:

SUP 5252.243-9400 AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (JAN 1992)

(a) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(b) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(c) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and telephone number of the Contracting Officer is:

CLAUSES INCORPORATED BY FULL TEXT

52.204-7 CENTRAL CONTRACTOR REGISTRATION (APR 2008)

(a) Definitions. As used in this clause--

Central Contractor Registration (CCR) database means the primary Government repository for Contractor information required for the conduct of business with the Government.

Data Universal Numbering System (DUNS) number means the 9-digit number assigned by Dun and Bradstreet, Inc. (D&B) to identify unique business entities.

Data Universal Numbering System +4 (DUNS+4) number means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional CCR records for identifying alternative Electronic Funds Transfer (EFT) accounts (see the FAR at Subpart 32.11) for the same parent concern.

Registered in the CCR database means that--

(1) The Contractor has entered all mandatory information, including the DUNS number or the DUNS+4 number, into the CCR database; and

(2) The Government has validated all mandatory data fields, to include validation of the Taxpayer Identification Number (TIN) with the Internal Revenue Service (IRS), and has marked the record ``Active". The Contractor will be required to provide consent for TIN validation to the Government as a part of the CCR registration process.

(b)(1) By submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the CCR database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.

(2) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation “DUNS” or “DUNS +4” followed by the DUNS or DUNS +4 number that identifies the offeror's name and address exactly as stated in the offer. The DUNS number will be used by the Contracting Officer to verify that the offeror is registered in the CCR database.

(c) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number--

(i) Via the Internet at http://fedgov.dnb.com/webform or if the offeror does not have internet access, it may call Dun and Bradstreet at 1-866-705-5711 if located within the United States; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office. The offeror should indicate that it is an offeror for a U.S. Government contract when contacting the local Dun and Bradstreet office.

(2) The offeror should be prepared to provide the following information:

(i) Company legal business.

(ii) Tradestyle, doing business, or other name by which your entity is commonly recognized.

(iii) Company Physical Street Address, City, State, and Zip Code.

(iv) Company Mailing Address, City, State and Zip Code (if separate from physical).

(v) Company Telephone Number.

(vi) Date the company was started.

(vii) Number of employees at your location.

(viii) Chief executive officer/key manager.

(ix) Line of business (industry).

(x) Company Headquarters name and address (reporting relationship within your entity).

(d) If the Offeror does not become registered in the CCR database in the time prescribed by the Contracting Officer, the Contracting Officer will proceed to award to the next otherwise successful registered Offeror.

(e) Processing time, which normally takes 48 hours, should be taken into consideration when registering. Offerors who are not registered should consider applying for registration immediately upon receipt of this solicitation.

(f) The Contractor is responsible for the accuracy and completeness of the data within the CCR database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the CCR database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the CCR database to ensure it is current, accurate and complete. Updating information in the CCR does not alter the terms and conditions of this contract and is not a substitute for a properly executed contractual document.

(g)(1)(i) If a Contractor has legally changed its business name, “doing business as” name, or division name (whichever is shown on the contract), or has transferred the assets used in performing the contract, but has not completed the necessary requirements regarding novation and change-of-name agreements in Subpart 42.12, the Contractor shall provide the responsible Contracting Officer a minimum of one business day's written notification of its intention to (A) change the name in the CCR database; (B) comply with the requirements of Subpart 42.12 of the FAR; and (C) agree in writing to the timeline and procedures specified by the responsible Contracting Officer. The Contractor must provide with the notification sufficient documentation to support the legally changed name.

(ii) If the Contractor fails to comply with the requirements of paragraph (g)(1)(i) of this clause, or fails to perform the agreement at paragraph (g)(1)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the CCR information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the “Suspension of Payment” paragraph of the electronic funds transfer (EFT) clause of this contract.

(2) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the CCR record to reflect an assignee for the purpose of assignment of claims (see FAR Subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the CCR database. Information provided to the Contractor's CCR record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the “Suspension of payment” paragraph of the EFT clause of this contract.

(h) Offerors and Contractors may obtain information on registration and annual confirmation requirements via the internet at http://www.ccr.gov or by calling 1-888-227-2423, or 269-961-5757.

(End of clause)

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (JUL 2010)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (Aug 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(2) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(3) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.203-13, Contractor Code of Business Ethics and Conduct (APR 2010)(Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note)).

___ (3) 52.203-15, Whistleblower Protections under the American Recovery and Reinvestment Act of 2009 (JUN 2010) (Section 1553 of Pub. L. 111-5). (Applies to contracts funded by the American Recovery and Reinvestment Act of 2009.)

___ (4) 52.204-10, Reporting Executive Compensation and First-Tier Subcontract Awards (JUL 2010) (Pub. L. 109-282) (31 U.S.C. 6101 note).

___ (5) 52.204-11, American Recovery and Reinvestment Act—Reporting Requirements (JUL 2010) (Pub. L. 111-5).

___ (6) 52.219-3, Notice of Total HUBZone Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (7) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (8) [Reserved].

___ (9)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (10)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (iii) Alternate II (MAR 2004) of 52.219-7.

___ (11) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637 (d)(2) and (3)).

___ (12)(i) 52.219-9, Small Business Subcontracting Plan (JUL 2010) (15 U.S.C. 637(d)(4)).

___ (ii) Alternate I (OCT 2001) of 52.219-9

___ (iii) Alternate II (OCT 2001) of 52.219-9.

___ (iv) Alternate III (JUL 2010) of 52.219-9.

___ (13) 52.219-14, Limitations on Subcontracting (DEC 1996) (15 U.S.C. 637(a)(14)).

___ (14) 52.219-16, Liquidated Damages--Subcontracting Plan (JAN 1999) (15 U.S.C. 637(d)(4)(F)(i)).

___ (15)(i) 52.219-23, Notice of Price Evaluation Adjustment for Small Disadvantaged Business Concerns (OCT 2008) (10 U.S.C. 2323) (if the offeror elects to waive the adjustment, it shall so indicate in its offer).

___ (ii) Alternate I (JUNE 2003) of 52.219-23.

___ (16) 52.219-25, Small Disadvantaged Business Participation Program--Disadvantaged Status and Reporting (APR 2008) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (17) 52.219-26, Small Disadvantaged Business Participation Program--Incentive Subcontracting (OCT 2000) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (18) 52.219-27, Notice of Total Service-Disabled Veteran-Owned Small Business Set-Aside (MAY 2004) (U.S.C. 657 f).

___ (19) 52.219-28, Post Award Small Business Program Rerepresentation (APR 2009) (15 U.S.C. 632(a)(2)).

_X__ (20) 52.222-3, Convict Labor (JUNE 2003) (E.O. 11755).

___ (21) 52.222-19, Child Labor--Cooperation with Authorities and Remedies (JUL 2010) (E.O. 13126).

___ (22) 52.222-21, Prohibition of Segregated Facilities (FEB 1999).

___ (23) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

___ (24) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of theVietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (25) 52.222-36, Affirmative Action for Workers with Disabilities (JUN 1998) (29 U.S.C. 793).

___ (26) 52.222-37, Employment Reports on Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (27) 52.222-54, Employment Eligibility Verification (JAN 2009). (Executive Order 12989). (Not applicable to the acquisition of commercially available off-the-shelf items or certain other types of commercial items as prescribed in 22.1803.)

___ (28) (i) 52.223-9, Estimate of Percentage of Recovered Material Content for EPA-Designated Items (MAY 2008) (42 U.S.C. 6962(c)(3)(A)(ii)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (ii) Alternate I (MAY 2008) of 52.223-9 (42 U.S.C. 6962(i)(2)(c)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (29) 52.223-15, Energy Efficiency in Energy-Consuming Products (DEC 2007) (42 U.S.C. 8259b)

___ (30)(i) 52.223-16, IEEE 1680 Standard for the Environmental Assessment of Personal Computer Products (DEC 2007) (E.O. 13423) .

___ (ii) Alternate I (DEC 2007) of 52.223-16. .

___ (31) 52.225-1, Buy American Act--Supplies (JUNE 2003) (41 U.S.C. 10a-10d).

___ (32)(i) 52.225-3, Buy American Act--Free Trade Agreements--Israeli Trade Act (JUN 2009) (41 U.S.C. 10a-10d, 19 U.S.C. 3301 note, 19 U.S.C. 2112 note, 19 U.S.C. 3805 note, Pub. L. 108-77, 108-78, 108-286, 108-302, 109-53, 109-169, 109-283, and 110-138).

___ (ii) Alternate I (JAN 2004) of 52.225-3.

___ (iii) Alternate II (JAN 2004) of 52.225-3.

___ (33) 52.225-5, Trade Agreements (AUG 2009) (19 U.S.C. 2501, et seq., 19 U.S.C. 3301 note).

___ (34) 52.225-13, Restrictions on Certain Foreign Purchases (JUN 2008) (E.O.'s, proclamations, and statutes administered by the Office of Foreign Assets Control of the Department of the Treasury).

___ (35) 52.226-4, Notice of Disaster or Emergency Area Set-Aside (Nov 2007) (42 U.S.C. 5150).

___ (36) 52.226-5, Restrictions on Subcontracting Outside Disaster or Emergency Area (Nov 2007) (42 U.S.C. 5150).

___ (37) 52.232-29, Terms for Financing of Purchases of Commercial Items (FEB 2002) (41 U.S.C. 255(f), 10 U.S.C. 2307(f))

___ (38) 52.232-30, Installment Payments for Commercial Items (OCT 1995) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).

___ (39) 52.232-33, Payment by Electronic Funds Transfer--Central Contractor Registration (OCT 2003) (31 U.S.C. 3332).

___ (40) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332)

___ (41) 52.232-36, Payment by Third Party (FEB 2010) (31 U.S.C. 3332).

___ (42) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (43)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

___ (ii) Alternate I (APR 2003) of 52.247-64.

____

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.)

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

____ (7) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations (Mar 2009) (Pub. L. 110-247).

____ (8) 52.237-11, Accepting and Dispensing of $1 Coin (SEP 2008)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in this paragraph (e)(1)in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause—

(i) 52.203-13, Contractor Code of Business Ethics and Conduct (APR 2010) (Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note).

(ii) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(iii) Reserved.

(iv) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(v) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(vi) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(vii) Reserved.

(viii) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (AUG 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(x) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(xi) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

(xii) 52.222-54, Employment Eligibility Verification (JAN 2009).

(xiii) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations. (MAR 2009) (Pub. L. 110-247). Flow down required in accordance with paragraph (e) of FAR clause 52.226-6.

(xiv) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from 23 September 2010 through 22 November 2010.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than $3,000.00, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The Contractor is not obligated to honor a series of orders within 30 days for performance at a specific port that together call for quantities that exceed those identified in the pricing schedule by more than 300 percent (300%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the effective period of the contract.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before contract expires.

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses: http://acquisition.gov/comp/far/
DFARS Clauses: http://www.acq.osd.mil.dpap/dars/dfars/

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (JUN 2010)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X__ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___252.203-7000, Requirements Relating to Compensation of Former DoD Officials (JAN 2009) (Section 847 of Pub. L. 110-181).

(2) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(3) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(4) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (AUG 2008) (15 U.S.C. 637 note).

(5) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JAN 2009) (41 U.S.C. 10a-10d, E.O. 10582).

(6) ____ 252.225-7008, Restriction on Acquisition of Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(7) ____ 252.225-7009, Restriction on Acquisition of Certain Articles Containing Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(8) ____ 252.225-7012, Preference for Certain Domestic Commodities (JUN 2010) (10 U.S.C. 2533a).

(9) ____ 252.225-7015, Restriction on Acquisition of Hand or Measuring Tools (JUN 2005) (10 U.S.C. 2533a).

(10) ____ 252.225-7016, Restriction on Acquisition of Ball and Roller Bearings (MAR 2006) (Section 8065 of Public Law 107-117 and the same restriction in subsequent DoD appropriations acts).

(11))(i) ___ 252.225-7021, Trade Agreements (NOV 2009) (19 U.S.C. 2501-2518 and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (SEP 2008)

(12) ____ 252.225-7027, Restriction on Contingent Fees for Foreign Military Sales (APR 2003) (22 U.S.C. 2779).

(13) ____ 252.225-7028, Exclusionary Policies and Practices of Foreign Governments (APR 2003) (22 U.S.C. 2755).

(14)(i) ____ 252.225-7036, Buy American Act--Free Trade Agreements--Balance of Payments Program (JUL 2009) (41 U.S.C. 10a-10d and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (JUL 2009) of 252.225-7036.

(15) ____ 252.225-7038, Restriction on Acquisition of Air Circuit Breakers (JUN 2005) (10 U.S.C. 2534(a)(3)).

(16) ____ 252.226-7001, Utilization of Indian Organizations, Indian-Owned Economic Enterprises, and Native Hawaiian Small Business Concerns (SEP 2004) (Section 8021 of Public Law 107-248 and similar sections in subsequent DoD appropriations acts).

(17) ____ 252.227-7015, Technical Data--Commercial Items (NOV 1995) (10 U.S.C. 2320).

(18) ____ 252.227-7037, Validation of Restrictive Markings on Technical Data (SEP 1999) (10 U.S.C. 2321).

(19) ____ 252.232-7003, Electronic Submission of Payment Requests and Receiving Reports (MAR 2008) (10 U.S.C. 2227).

(20) ____ 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(21) __X__ 252.243-7002, Requests for Equitable Adjustment (MAR 1998) (10 U.S.C. 2410).

(22)____ 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(23)(i) ____ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ____ Alternate I (MAR 2000) of 252.247-7023.

(iii) ____ Alternate II (MAR 2000) of 252.247-7023.

(iv) ____ Alternate III (MAY 2002) of 252.247-7023.

(24) ____ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(2) 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

EXHIBITS AND ATTACHMENTS

Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A.	Schedule of Supplies and Services
B.	Pre-Arrival Cost Estimate Report

ATTACHMENT NO.	
1.	Classification of Ships
2.	Refuse Definitions
3.	Security Guard Operations
4	Water Taxi Specifications
5.	Floating Line of Demarcation
6.	Performance Work Statement (PWS) for Force Protection
7.	Picket Boat Operations & Specifications

8.	Request for Sanitary Inspection
9.	Quality Assurance Provisions (including Appendices A & B)
10.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A – SCHEDULE OF SUPPLIES AND SERVICES

Exhibit A (ELINs) Schedule of Supplies and Services.

Separate Excel spreadsheet is attached. Complete all unit prices in U.S. Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer to verify the formula when evaluating prices.

EXHIBIT B – PRE-ARRIVAL COST ESTIMATE REPORT

Separate Excel spreadsheet is attached. This is the format that the government requires Contractor to submit within 48 hours after receipt of the LOGREQ/order.

CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

        2.6.1. Uniform as provided by contractor or authorities;

        2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 4
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of Philippines. Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by the Republic of Philippines for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 5.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 5
FLOATING LINE OF DEMARCATION OR BUOY SYSTEM FLD SPECIFICATIONS

The following are Floating Line of Demarcation (FLD) or Buoy System FLD Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

3.1. Continuous Line FLD – If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

3.1.2. Specifications:

3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 6
PERFORMANCE WORK STATEMENT (PWS) FOR FORCE PROTECTION

CLIN XX11 - FORCE PROTECTION SERVICES AND SUPPLIES

(a) Only the ship's Commanding Officer, the ship's Supply Officer, or the FISC Det Singapore Contracting Officer is authorized to order Force Protection (FP) services under this contract. If any other activity or individual attempts to order FP services (e.g., NCIS, DAO, etc), the Husbanding Service (HS) Contractor is required to immediately inform the ship and receive a proper order prior to beginning performance of these services.

(b) The HS Contractor is responsible for providing or coordinating listed FP services as part of their Husbanding Services under Lot Line Item XX01 and XX02. The HS Contractor shall develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, host nation agencies, and U.S. Embassy security staff. If the host nation is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time.

(c) The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer. The HS Contractor shall not add any requirements without prior approval.

(d) The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Det Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The FISC Det Singapore Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

(e) FP is considered a combination of practices and procedures, including the use of specific material, equipment, and personnel, having the objective of improving security to personnel and ships while in port. FP services or supplies may be provided by the host nation at no cost or may be billed at the public tariff rate. The HS Contractor is required to verify what services will be provided by the host nation. For the services that cannot be provided by the host nation, the HS Contractor is required to arrange these services by obtaining them from commercial sources at the prices indicated in the pricing schedule.

(f) The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

(g) The HS Contractor shall provide as many services identified below as ordered by the ship or FISC Det Singapore Contracting Officer. These services do not include other related services not listed, but may be required and separately ordered to attain a higher level of security in a port.

(h) Personnel providing force protection services must be responsive to instructions from the ship. This does not authorize force protection personnel to violate any local regulations, any Port Authority ordinances, or local decrees. The equipment and material used for the force protection services will be inspected by the ship's force to ascertain that they meet force protection requirements.

(i) Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

(j) Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

(k) Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

(l) Background Checks: The HS Contractor shall conduct security background checks on employees and subcontractor employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers. The HS Contractor shall issue photo identification badges to its personnel and ensure subcontractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing. In addition, the HS Contractor will be required to provide vetting services for third party contractors such as DESC contractors.

(m) Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

(n) Inspections: The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

(o) Stand-Off Distances:

Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

Sign Specifications:
- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

(p) The unit price for force protection services shall include all costs associated with providing transportation, mobilization/installation and demobilization/de-installation, or arranging the requested services below unless the transportation, mobilization/installation and demobilization/de-installation is identified as a separate Lot Line item number. The HS Contractor's invoice shall set forth the unit of issue identified for each service, total quantity ordered for each service, unit price, and the total price.

(q) The force protection services that the ships may order are:

(1) CONEX box barriers capable of stopping a vehicle (automobile). (Price per meter per day)

(i) CCONEX box barriers.

Mobilization, installation and demobilization will be billed under a separate contract line item number.

The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

The barriers may be of different design and material as long as they are approved by the FP personnel. Empty 20 ft or 40 ft shipping containers may be used . Availability will determine the requested type of barrier. A combination of barriers may also be used.

A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

A personnel entry point must be established through the barriers. Barriers may also be used to seal off secondary Port gates. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

(2) Armed or unarmed security guard to control vehicle and personnel access to pier. (Price per guard per hour) Must be English speaking, and equipped with own handheld radio (not ship's radio) to communicate with ship. Duties and responsibilities will be coordinated with the ship upon arrival.

The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas. The HS Contractor shall comply with Attachment 3 for security guard operations.

(3) Floating Line of Demarcation (FLD) at pierside, equipped with anchors and lighting (for night visibility). (Price per meter per day) The floating FLD must be anchored at least 30 meters from ship. Oil booms are acceptable. Mobilization, installation and demobilization will be billed under a separate contract line item number.

The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone. The HS Contractor shall comply with the specification of the FLD in Attachment 5.

(4) Unarmed and manned picket boat or waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities. Continuous coverage is required for the period of performance ordered by the ship or by the Contracting Officer. (Price per patrol craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone. The HS Contractor shall comply with Attachment 7 for picket boat operations and specifications.

(5) Unarmed and manned motorized patrol craft, approximately 5-10 meters in length, with own radio to communicate with ship and local authorities, to escort ship from pilot pickup point to mooring location. (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(6) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and closed on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(7) Dive and Vetting: The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities. The pier will be vetted prior to the ship's arrival. To the maximum extent practicable the HS Contractor shall inspect all watercraft at least 400 feet (125 meters) from the ship. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in picket boats. (Per team per hour, minimum four (4) hours)

ATTACHMENT 7
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate Lot Line Item in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32°F and 41°F (0°C and 5°C). Frozen products shall be delivered at 0°F (-18°C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32°F and 41°F (0°C and 5°C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32°F and 50°F (0°C and 10°C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35°F and 55 °F (2°C and 12°C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 9 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)

Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk		10 per gram		
Cottage cheese		10 per gram		10 per gram
Cream, sour cultured		10 per gram		10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled		10 per gram		
Yogurt, frozen, plain		10 per gram		
Yogurt, frozen, flavored		20 per gram		
Yogurt, soft serve mix		10 per gram		

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

	Aerobic Plate Count (APC)	Coliform Count	
ATP (RLU) Counts			
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeast and Mold count
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)

Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]		
Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		

Silver [3]	None Detectable

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	

Campylobacter jejuni	Zero (0) Tolerance[1]

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries.	All other bakery products, including: Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry.

	Pies.	Cookies, unfilled.
	Soft pretzels.	Crackers.
	Won ton wrappers.	Cupcakes, unfilled.
	Filled bakery items.	Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.
		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940	Dietary foods and specialty preparations,	All other dietary and specialty
(*Notes 2, 3, 4, 5, 10)	specifically:	preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish products.	Baby formula, canned.
	Pickled eggs.	Chips, nacho or potato.
	Frozen dinners.	Creamer, coffee, imitation (non-
	Pudding novelties, frozen or chilled.	dairy).
	Tofu.	Dips.
		Nacho cheese, canned.
		Nutri-why.
		Popcorn.
		Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including:
		Salad dressings.
		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages,
	Ice.	including:
	Bottled water.	Dry ice.
		Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970	MRE food composite packages	Non-MRE composite food packages.
(*Note 2)		
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment

number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.

3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products*.
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Det Singapore will use in evaluating contractor performance under the contract including but not limited to evaluating pre-arrival estimate and port visit cost reporting of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the pre-arrival estimate and port visit cost reporting performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will establish policies and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with the capability to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor contractor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those

decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (CO) is responsible for monitoring contract compliance, performing contract administration, and the resolution of any differences between the observations documented by the requiring activity, and the contractor's performance. The CO is responsible for monitoring the contractor's quality assurance program through the QASP (See below)

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

2.3 The contracting officer's representative will be identified to the contractor at the time an order is issued. The CO will also have the responsibility for completing QA monitoring forms (refer to Attachments 10b and 10c) used to document the evaluation of the contractor's reporting and price performance.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED
The contractor shall provide husbanding service support in accordance with the PWS

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and self-assessments from the contractor and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 10c.

4.3 The acceptable quality levels (AQL) located in Attachment 10a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls. The Government will evaluate the total number of ship visits on a quarterly basis to determine if the contractor has met the goals assigned in the QASP.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes from the pre-arrival cost estimate, which is substantiated by the customer and contractor prior to the submission of the final invoices, finally communicated to the contracting officer via the customer service survey form and LOGSSR Reporting Data.

5.2 The Government's QA monitoring, accomplished by the CO, will be reported using the monitoring forms in Attachments 10b and 10c. The forms, when completed, will communicate the customer and COR evaluation of the contractor's performance to the contracting officer.

5.2.1 The CO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited in this QASP to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives (See Attachment 10a) should performance not meet the AQL's.

6.2 The CO will randomly select port visits to evaluate to analyze contractor performance. Within 30 days following the end of each selected order's performance period, the CO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 10b and 10c) will become part of the QA documentation.

6.3 The CO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The CO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the CO as often as required or per the contractor's request. The agenda of the reviews may discuss:
Performance measured by the metrics and trends
Issues and concerns of both parties
Recommendations made by the CO based on contractor information
Issues arising from independent reviews and inspections

6.4 The CO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the CO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. **Notifications**. Consistent with FAR Part 12, the CO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. **Deductions**. The Government has the right to deduct a specified fee for failure to meet performance standards. The amount is identified in the Performance Requirements Summary (PRS) of Attachment 5a.
3. **Termination**. If the CO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the CO shall issue a notice of termination, consistent with FAR Part 12.

ATTACHMENT 10a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit pre-arrival cost estimate to ship and Contracting Officer within 48 hours after receipt of LOGREQ (PWS Paragraph 3.15)	95%	E-mails receipts, files review, quarterly, random, observations, complaints	Contractor may be required to provide consideration, based on damage to the Government, for failing to meet the AQL.
	Submit final LogSSR cost reports to the NAVSUP LogSSR email address and the Contracting Officer within seven (7) days of each ship's departure (PWS Paragraph 3.15)	95%	E-mail receipts, files review, quarterly, random, complaints	Contractor may be required to provide consideration, based on damage to the Government, for failing to meet the AQL.
	LogSSR submittals are accurate and complete	95%	Files review, periodic, quarterly, random, observations, complaints	Contractor may be required to provide consideration, based on damage to the Government, for failing to meet the AQL.

INVOICES AND PAYMENTS
(a) Invoice Content

The Contractor shall submit to the ordering officer an invoice that lists all the expenses incurred by the ship during the port visit. The contractor's invoice shall list items priced under this contract and include subcontractor invoices for all other items not priced in the contract. All invoices submitted shall have all supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by ship's personnel, with a legible signature and printed name and

rank, port tariff invoices, invoices for items not pre-priced in the contract, and any other documentation that the supplies/services have been delivered and accepted) and must be submitted in accordance with the paragraph below. All items listed on the invoices must be completely detailed (i.e., broken down) for quantity, contract unit of issue, unit price, etc. No lump sum amount will be accepted. Invoices for volume-based services (e.g. CHT and potable water) shall include a statement describing the method used in determining the liquid quantities on-loade and/or off-loaded from the vessel.

The Contractor has the responsibility to keep copies of all documentation submitted to the ship for each visit for all supplies and services rendered and in the quantities invoiced. The Contractor shall keep a copy of all such documentation in one place that will be indicated to the Contracting Officer at the time of contract award. FISC Yokosuka and its detachments contracting personnel may examine these files at any time during the performance of this contract.

The invoices must be easily identifiable as original (i.e. original signature or stamped as ORIGINAL). If an electronic invoice is authorized, the Contractor must certify on the invoice that it is the first time that the invoice is submitted. If the original invoice has been lost, a copy of the invoice may be submitted. This invoice must be marked as "DUPLICATE COPY" and a signed and dated statement with a contractor's stamp must be made on the duplicate invoice confirming that payment has not been received.

Each invoice must include—

(1) Name and address of the Contractor;
(2) Invoice number and date issued;
(3) Contract number, Contract Line Item Number, Lot Line Item and , if applicable, the Order Number;
(4) Description, quantity, unit of measure, unit price and extended price of the items delivered;
(5) If appropriate, the shipping number and date of shipment including the bill of lading number and weight of shipment if shipped on a Government bill of lading;
(6) Terms of any prompt payment discount offered;
(7) Name and address of the official to whom payment is to be sent;
(8) Name, title, and phone number of the person to be notified in the event of a defective invoice;
(9) Supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by the ship's personnel, with a legible signature and printed name and rank, and any other documentation that the supplies/services have been delivered and accepted);
(10) The invoice must be correct and complete and without handwritten figures.
(11) Electronic funds transfer (EFT) information.

The Contractor shall include EFT banking information on the invoice only if required elsewhere in this contract.

If EFT banking information is not required to be on the invoice, in order for the invoice to be a proper invoice, the Contractor shall have submitted correct EFT banking information in accordance with the applicable solicitation provision, contract clause (e.g. FAR 52.232-33, Payment by Electronic Funds Transfer – Central Contractor Registration), or applicable agency procedures.

EFT banking information is not required if the Government waived the requirement to pay by EFT.

Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) prompt payment regulations at 5 CFR Part 1315.

If an item is not included on the original invoice, a supplemental invoice shall be issued with the same number followed by alpha suffix (e.g. Invoice No. 0001/03-A). The same requirements for submittal of the original invoice apply to the supplemental invoice.

If an invoice for an item is not available prior to the ship's departure (e.g. cell phone charges, port tariff items, port dues, etc.), the item shall be listed on the invoice with the words "TO BE DETERMINED (TBD)". Once the invoice

has been received and the exact amount is known, the Contractor shall issue a supplemental invoice (with all supporting documentation attached) as "FINAL" for the final payment. TBD invoices shall not be paid until a 'FINAL' invoice is submitted.

It is the Contractor's responsibility to verify with port authorities and concessionaires that there are no pending charges prior to the ship's departure. This is to avoid any possible future invoices that may be submitted for unknown services to the U.S. Government.

When preparing an invoice the term "Miscellaneous" or any similar type description should be avoided. If this is not possible and the Contractor must use the term "Miscellaneous" when submitting an invoice, the Contractor shall provide a detailed list of items purchased and item prices on the invoice.

Invoices not in compliance with these instructions are not considered to be proper invoices and may be rejected.

(b) Invoice Submission

The invoice must be submitted to the listed activities in the following order:

(1) To the ship's Supply Officer or his designated representative one day prior to its sailing date. In the event the Contractor is unable to present any invoice to the ordering ship for payment prior to the departure of the ship, the Contractor shall submit invoices and attempt to obtain payment at the ship's next port of call.

(2) If unsuccessful, to the Contracting Officer. In the event the Contractor is unable to present any invoice to the ordering ship prior to its departure, the invoice must be promptly submitted to the Contracting Officer for payment through DFAS Yokota. In no case should the invoice be submitted beyond 90 days after the ship's departure from the port. The Disbursing Officer will annotate the date the invoices are received for the purpose of calculating any interest due. An exception to the 90-day limit will be given only for charges made by the port authorities or concessionaires, or the host nation authorities, including military authorities. It is the Contractor's responsibility to verify that there are no pending charges and to obtain the invoices from these authorities no later than six months after the ship's departure.

(3) Alternatively, whenever a non-Navy ordering authority orders services under the contract, the Contractor shall submit invoices and all supporting documents to that ordering activity.

(c) Payment of Invoices

Payments under this contract will be made in accordance with the clause FAR 52.232-33 Payment by Electronic Funds Transfer – Central Contractor Registration (Oct 2003).

Payment will be made after delivery and acceptance of supplies or performance and acceptance of services.

"Acceptance" means the act of an authorized representative of the Government by which the Government, for itself or as an agent of another, assumes ownership of existing identified supplies tendered or approves specific services rendered as partial or complete performance of the contract (from FAR 46.101 Definitions).

Bill payment shall be disbursed through one of the following methods, check, purchase card, submission of invoices to a Defense Finance and Accounting Command (DFAS) via regular mail or electronically through Wide Area Work Flow (WAWF).

The Contractor shall present to the ordering officer or SUPPO all pricing that is firm and finalized one-day prior to the ship's sailing or the ordering activity departure. At that time, the Contractor shall relay any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for these functions shall be the ordering officer or the ordering officer's designated

representative. In addition, the Contractor shall present all documentation and invoices from other Contractors subject to provision of services under this contract.

The Contractor shall obtain a signed delivery order (DD 1155) to verify that the services were received and that charges presented in the port visit cost reporting program are correct for payment. This may be accomplished via email from the Ordering Officer or the SUPPO of the ship. The ordering officer shall pay for all supplies and services accepted during the period of performance by one of the aforementioned methods of payment.

In the absence of a delivery order, forward invoices and all documentation regarding inspection and acceptance of supplies and services by the ship's representative with appropriate accounting data to the Administrative Contracting Office.

(d) The Government will not make direct payments of VAT to the host nation nor will it withhold taxes, including VAT, from invoices for orders that are submitted to the husbanding services contractor by the Government. Payment of appropriate taxes required as part of conducting business in the specific country at which a port visit takes place are a responsibility of the husbanding services contractor. Offerors are further directed to FAR 52.229-6, Taxes-Foreign Fixed-Price Contracts (JUN 2003), which is included in the solicitation.

SOLICITATION/CONTRACT/ORDER FOR COMMERCIAL ITEMS

CLAUSES INCORPORATED BY FULL TEXT

52.204-7 CENTRAL CONTRACTOR REGISTRATION (APR 2008)

(a) Definitions. As used in this clause--

Central Contractor Registration (CCR) database means the primary Government repository for Contractor information required for the conduct of business with the Government.

Data Universal Numbering System (DUNS) number means the 9-digit number assigned by Dun and Bradstreet, Inc. (D&B) to identify unique business entities.

Data Universal Numbering System +4 (DUNS+4) number means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional CCR records for identifying alternative Electronic Funds Transfer (EFT) accounts (see the FAR at Subpart 32.11) for the same parent concern.

Registered in the CCR database means that--

(1) The Contractor has entered all mandatory information, including the DUNS number or the DUNS+4 number, into the CCR database; and

(2) The Government has validated all mandatory data fields, to include validation of the Taxpayer Identification Number (TIN) with the Internal Revenue Service (IRS), and has marked the record ``Active". The Contractor will be required to provide consent for TIN validation to the Government as a part of the CCR registration process.

(b)(1) By submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the CCR database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.

(2) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation “DUNS” or “DUNS +4” followed by the DUNS or DUNS +4 number that identifies the offeror's name and address exactly as stated in the offer. The DUNS number will be used by the Contracting Officer to verify that the offeror is registered in the CCR database.

(c) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number--

(i) Via the Internet at http://fedgov.dnb.com/webform or if the offeror does not have internet access, it may call Dun and Bradstreet at 1-866-705-5711 if located within the United States; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office. The offeror should indicate that it is an offeror for a U.S. Government contract when contacting the local Dun and Bradstreet office.

(2) The offeror should be prepared to provide the following information:

(i) Company legal business.

(ii) Tradestyle, doing business, or other name by which your entity is commonly recognized.

(iii) Company Physical Street Address, City, State, and Zip Code.

(iv) Company Mailing Address, City, State and Zip Code (if separate from physical).

(v) Company Telephone Number.

(vi) Date the company was started.

(vii) Number of employees at your location.

(viii) Chief executive officer/key manager.

(ix) Line of business (industry).

(x) Company Headquarters name and address (reporting relationship within your entity).

(d) If the Offeror does not become registered in the CCR database in the time prescribed by the Contracting Officer, the Contracting Officer will proceed to award to the next otherwise successful registered Offeror.

(e) Processing time, which normally takes 48 hours, should be taken into consideration when registering. Offerors who are not registered should consider applying for registration immediately upon receipt of this solicitation.

(f) The Contractor is responsible for the accuracy and completeness of the data within the CCR database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the CCR database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the CCR database to ensure it is current, accurate and complete. Updating information in the CCR does not alter the terms and conditions of this contract and is not a substitute for a properly executed contractual document.

(g)(1)(i) If a Contractor has legally changed its business name, “doing business as” name, or division name (whichever is shown on the contract), or has transferred the assets used in performing the contract, but has not completed the necessary requirements regarding novation and change-of-name agreements in Subpart 42.12, the Contractor shall provide the responsible Contracting Officer a minimum of one business day's written notification of its intention to (A) change the name in the CCR database; (B) comply with the requirements of Subpart 42.12 of the FAR; and (C) agree in writing to the timeline and procedures specified by the responsible Contracting Officer. The Contractor must provide with the notification sufficient documentation to support the legally changed name.

(ii) If the Contractor fails to comply with the requirements of paragraph (g)(1)(i) of this clause, or fails to perform the agreement at paragraph (g)(1)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the CCR information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the “Suspension of Payment” paragraph of the electronic funds transfer (EFT) clause of this contract.

(2) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the CCR record to reflect an assignee for the purpose of assignment of claims (see FAR Subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the CCR database. Information provided to the Contractor's CCR record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the “Suspension of payment” paragraph of the EFT clause of this contract.

(h) Offerors and Contractors may obtain information on registration and annual confirmation requirements via the internet at http://www.ccr.gov or by calling 1-888-227-2423, or 269-961-5757.

(End of clause)

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (APR 2010)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (Aug 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(2) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(3) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.203-13, Contractor Code of Business Ethics and Conduct (APR 2010)(Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note)).

___ (3) 52.203-15, Whistleblower Protections under the American Recovery and Reinvestment Act of 2009 (MAR 2009) (Section 1553 of Pub. L. 111-5). (Applies to contracts funded by the American Recovery and Reinvestment Act of 2009.)

__(4) 52.204-11, American Recovery and Reinvestment Act—Reporting Requirements (MAR 2009) (Pub. L. 111-5).

___ (5) 52.219-3, Notice of Total HUBZone Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (6) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (7) [Reserved].

___ (8)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (9)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (iii) Alternate II (MAR 2004) of 52.219-7.

___ (10) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637 (d)(2) and (3)).

___ (11)(i) 52.219-9, Small Business Subcontracting Plan (APR 2008) (15 U.S.C. 637(d)(4)).

___ (ii) Alternate I (OCT 2001) of 52.219-9

___ (iii) Alternate II (OCT 2001) of 52.219-9.

___ (12) 52.219-14, Limitations on Subcontracting (DEC 1996) (15 U.S.C. 637(a)(14)).

___ (13) 52.219-16, Liquidated Damages--Subcontracting Plan (JAN 1999) (15 U.S.C. 637(d)(4)(F)(i)).

___ (14)(i) 52.219-23, Notice of Price Evaluation Adjustment for Small Disadvantaged Business Concerns (OCT 2008) (10 U.S.C. 2323) (if the offeror elects to waive the adjustment, it shall so indicate in its offer).

___ (ii) Alternate I (JUNE 2003) of 52.219-23.

___ (15) 52.219-25, Small Disadvantaged Business Participation Program--Disadvantaged Status and Reporting (APR 2008) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (16) 52.219-26, Small Disadvantaged Business Participation Program--Incentive Subcontracting (OCT 2000) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (17) 52.219-27, Notice of Total Service-Disabled Veteran-Owned Small Business Set-Aside (MAY 2004) (U.S.C. 657 f).

___ (18) 52.219-28, Post Award Small Business Program Rerepresentation (APR 2009) (15 U.S.C. 632(a)(2)).

___ (19) 52.222-3, Convict Labor (JUNE 2003) (E.O. 11755).

_X__ (20) 52.222-19, Child Labor--Cooperation with Authorities and Remedies (AUG 2009) (E.O. 13126).

___ (21) 52.222-21, Prohibition of Segregated Facilities (FEB 1999).

___ (42)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

___ (ii) Alternate I (APR 2003) of 52.247-64.

____

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.)

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

____ (7) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations (Mar 2009) (Pub. L. 110-247).

____ (8) 52.237-11, Accepting and Dispensing of $1 Coin (SEP 2008)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in this paragraph (e)(1)in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause—

(i) 52.203-13, Contractor Code of Business Ethics and Conduct (APR 2010) (Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note).

(ii) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(iii) Reserved.

(iv) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(v) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(vi) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(vii) Reserved.

(viii) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (AUG 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(x) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(xi) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

(xii) 52.222-54, Employment Eligibility Verification (JAN 2009).

(xiii) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations. (MAR 2009) (Pub. L. 110-247). Flow down required in accordance with paragraph (e) of FAR clause 52.226-6.

(xiv) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from 01 Oct 2010 through 30 Sep 2011.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of

less than $3,000.00, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The HS Contractor is not obligated to honor:

(1) Any order for a single item in excess of $1,220,000; or,

(2) Any order for a combination of items in excess of $3,000,000; or

(3) A series of orders from the same ordering office within 1 day that together call for quantities exceeding the limitation in subparagraph (b)(1) or (2) of this section.

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the effective period of the contract.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before contract expires .

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses: http://acquisition.gov/comp/far/index.html
DFAR Clauses: http://www.acq.osd.mil/dpap/dars/dfars/index.htm

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (APR 2010)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X__ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___252.203-7000, Requirements Relating to Compensation of Former DoD Officials (JAN 2009) (Section 847 of Pub. L. 110-181).

(2) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(3) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(4) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (AUG 2008) (15 U.S.C. 637 note).

(5) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JAN 2009) (41 U.S.C. 10a-10d, E.O. 10582).

(6) ____ 252.225-7008, Restriction on Acquisition of Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(7) ____ 252.225-7009, Restriction on Acquisition of Certain Articles Containing Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(8) ____ 252.225-7012, Preference for Certain Domestic Commodities (DEC 2008) (10 U.S.C. 2533a).

(9) ____ 252.225-7015, Restriction on Acquisition of Hand or Measuring Tools (JUN 2005) (10 U.S.C. 2533a).

(10) ____ 252.225-7016, Restriction on Acquisition of Ball and Roller Bearings (MAR 2006) (Section 8065 of Public Law 107-117 and the same restriction in subsequent DoD appropriations acts).

(11))(i) ___ 252.225-7021, Trade Agreements (NOV 2009) (19 U.S.C. 2501-2518 and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (SEP 2008)

(12) ____ 252.225-7027, Restriction on Contingent Fees for Foreign Military Sales (APR 2003) (22 U.S.C. 2779).

(13) ____ 252.225-7028, Exclusionary Policies and Practices of Foreign Governments (APR 2003) (22 U.S.C. 2755).

(14)(i) ____ 252.225-7036, Buy American Act--Free Trade Agreements--Balance of Payments Program (JUL 2009) (41 U.S.C. 10a-10d and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (JUL 2009) of 252.225-7036.

(15) ____ 252.225-7038, Restriction on Acquisition of Air Circuit Breakers (JUN 2005) (10 U.S.C. 2534(a)(3)).

(16) ____ 252.226-7001, Utilization of Indian Organizations, Indian-Owned Economic Enterprises, and Native Hawaiian Small Business Concerns (SEP 2004) (Section 8021 of Public Law 107-248 and similar sections in subsequent DoD appropriations acts).

(17) ____ 252.227-7015, Technical Data--Commercial Items (NOV 1995) (10 U.S.C. 2320).

(18) ____ 252.227-7037, Validation of Restrictive Markings on Technical Data (SEP 1999) (10 U.S.C. 2321).

(19) ____ 252.232-7003, Electronic Submission of Payment Requests and Receiving Reports (MAR 2008) (10 U.S.C. 2227).

(20) ____ 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(21) __X__ 252.243-7002, Requests for Equitable Adjustment (MAR 1998) (10 U.S.C. 2410).

(22)____ 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(23)(i) ____ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ____ Alternate I (MAR 2000) of 252.247-7023.

(iii) ____ Alternate II (MAR 2000) of 252.247-7023.

(iv) ____ Alternate III (MAY 2002) of 252.247-7023.

(24) ____ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(2) 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting ports identified in the lots at Exhibit A.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Lot Line Item Numbers (LLINs).

2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is $20,000.00 of orders. The minimum guarantee applies to the base year period only. The maximum quantity is $20,000,000 of orders per year.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Other Authorized Users are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel conducting business related to a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships.

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband ten (10) ships at one time among the ports identified in the lots at Exhibit A.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided

by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The HS Contractor, as part of its understanding of the requirement, is expected to understand and be familiar with items that are available through HN and Port Authorities.

9. LONG TERM SHIP VISITS

9.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10. UNIQUE/PARTICULAR SITUATIONS:

10.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days' rate for the following days.)

10.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days' rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.

13.2. Advance Notice Period for Orders: The HS Contractor shall perform all orders that are issued within the minimum order lead time annotated for each lot in Exhibit A. If orders are issued with less than the required minimum order lead time prior to the start of performance, the HS Contractor shall use its best efforts to provide the

required supplies and services in accordance with the order's delivery schedule but shall promptly inform the government if it will not be able to meet the delivery schedule.

13.3. Substitutions: Substitution of ordered LLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted LLINs shall only be charged at a rate not to exceed that of the originally ordered LLIN. An example would be if a 20-passenger bus was ordered, but was not available and the HS Contractor substituted two, 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order or portion of an order is cancelled prior to the number of days specified for the 'Port Minimum Order Lead Time' for each lot in the Exhibit A schedules, the U.S. Government will not be liable for any charges. For any order, or portion of an order, not cancelled prior to the number of days specified for the 'Port Minimum Order Lead Time' for each lot in the Exhibit A schedules, the Ordering activity shall be responsible for any termination costs in accordance with paragraph (h) entitled "Terminal for the Government's Convenience" of the clause entitled "Contract Terms and Conditions – Commercial Items". Any disagreements shall be subject to the Disputes clause of the contract.

13.4.2. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 10.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious

activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the LLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate LLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply

or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot, and utilities.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. When the unit of issue is 'DY' and a partial day of service is required, the contractor shall be entitled to bill for one day of service for the partial day of service. For example, if service is provided for 26 hours, the contractor is entitled to bill for 2 days of service at the daily rate. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs).

20. Management Services - Husbanding LLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services LLIN, the Government shall order at least the initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- BARGE: Barges are flat-bottomed displacement ships used for carrying or storing cargo, for separation between vessels and other structures, or as a work platform. Barges may or may not be self-propelled

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CONTRACTING OFFICER (CO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order): A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Fender sizes are specified in the Exhibit A sub-lot line items.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- LLIN: Lot Line Item Number (LLIN). A separate line item for each service or supply required in the contract.

- LLIN NUMBERING: LLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a LLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example LLIN XX11 for Force Protection could be divided into XX11AA for Security Guards and XX11AB Tent, and so forth)

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis
Title of Individual:	Executive Group Chairman/President
Mailing Address:	15D Pandan Road
	Singapore 609266
Tel No:	(65) 6268-5300
Fax No:	(65) 6268-6689
Mobile:	(65) 9798-3155
E-mail address:	leonard@glennmarinegroup.com

PERFORMANCE WORK STATEMENT

1. LOTS: The contract is sub-divided into Lots. Lots may be for individual ports or they may include several ports under one Lot. For this contract, the following Lots apply:

- Lot 1 – Muara, Brunei
- Lot 2 – Bali, Indonesia
- Lot 3 – Batam, Indonesia
- Lot 4 – Bitung, Indonesia
- Lot 5 – Jakarta, Indonesia
- Lot 6 – Kota Kinabalu, Malaysia
- Lot 7 – Kuantan, Malaysia
- Lot 8 – Langkawi, Malaysia
- Lot 9 – Lumut, Malaysia
- Lot 10 – Port Klang, Malaysia
- Lot 11 – Sepangar, Malaysia
- Lot 12 – Dili, East Timor

2. PRICING.

2.1 Except for Port Tariffs, unit prices for all contract items described below shall be inclusive of all necessary equipment, licensed operators, all liability insurance as required by local law, holiday and overtime costs, customs clearances, and fuel and operating expenses.

2.2 Fixed Prices are required in the Pricing Schedule except where Port Tariff (PT) prices, To Be Determined (TBD) prices, or Not Separately Priced (NSP) have been identified. Unless otherwise provided, these Fixed Prices shall also include performance at night, overtime, Saturdays, Sundays, and Holidays; and services performed under heavy rain, other inclement weather, or service to tankers and ships carrying explosives. These requirements do not include performance during cyclones or typhoons or where operations have been suspended by host nation port authorities except where ships are required to depart in advance of cyclones or typhoons as part of a typhoon or cyclone evasion plan. They also include all operating expenses including tugs, barges, trucks, personnel, and customs clearances and any other charges unless specifically exempted by the Government.

2.3 Port Tariffs will apply to those services which are based on Port Tariff rates established and controlled by Port Authorities. English translated copies of the Port Tariffs must be submitted to the Supply Officer of the ship entering a specific Port.

2.4 Fees for Husbanding Services cover regular and overtime labor of contractor personnel supporting the ships plus indirect expenses, including all management, overhead and office expenses. The husbanding fees also include costs for arranging supplies and services described herein and include costs associated with attendance at periodic meetings and pre-deployment briefings. The husbanding fees represent total compensation for the contractor except for supplies and services with Fixed Prices.

2.5 Purchase Card Surcharge. The U.S. Government reserves the right to make payment by purchase card. All purchase card surcharges will be identified as a separate entry on each invoice. The Government will reimburse administrative surcharges, if any, for use of the Purchase Card at a rate not to exceed 3% of the purchase price for the underlying service.

2.6 If items are made available free of charge or at less than the quoted price by the Government, host nation, or port authority, only mobilization/demobilization charges, not to exceed the quoted unit price, may be charged. If, for any reason, an item that would otherwise be provided by the Host Nation, Government, or port authority is not available, that item shall be provided by the HS Contractor at the unit price quoted in Exhibit A.

2.7 Order of Priority of Usage: The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or, if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. Where the reasonable cost of mobilization/demobilization for U.S. Government owned equipment exceeds the quoted price of the sub lot line item it is intended to replace, the HS Contractor shall use the least cost alternative to meet the requirement. If, for any reason, an item that would otherwise be provided by the Government, host nation, or port authority is not available, that item shall be provided by the HS Contractor at the price quoted in the Exhibit A pricing schedules.

3. LOT LINE ITEMS.

3.1. FIRST AND SUBSEQUENT DAY HUSBANDING SERVICES (ANCHORAGE AND PIERSIDE) (LLINS XX01)

3.1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 3.1.1.6 and 3.1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 3.1.1.6 below) is addressed at paragraph 19.2 of the Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 3.1.1.8. Except when the facts detailed in paragraph 3.1.1.8 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

3.1.1.1. The HS Contractor shall communicate with the ship and FISC Detachment Singapore to coordinate requirements.

3.1.1.2. The HS Contractor shall order requested services and supplies.

3.1.1.3. Pre-arrival Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore a pre-arrival cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the LOGSSR spreadsheet format (Exhibit B), and will include estimated prices for all items submitted on the ship's LOGREQ. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and FISC Detachment Singapore Contracting Office within 48 hours after receipt of the LOGREQ, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs. The LOGREQ, when submitted by, under authority of, or on behalf of an AGR, is an order for pre-priced items under this contract. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

3.1.1.4. These estimates shall be provided for all authorized users including US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

3.1.1.5. The pre-arrival cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

3.1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

3.1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

3.1.1.8. The HS Contractor shall assist the ship's Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 man-hours assisting the ship's advance

party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship's advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

3.1.2. POST-ARRIVAL HUSBANDING DUTIES

3.1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location, either at pierside or at anchorage.

3.1.2.2. The HS Contractor shall install all ordered equipment upon the ship's arrival. This equipment includes but is not limited to fenders, curb caps, steps, and telephones.

3.1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

3.1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

3.1.2.5. The HS Contractor shall provide the SUPPO upon ship's arrival a copy of the Exhibit A of the contract, the Performance Work Statement, and applicable port tariffs.

3.1.2.6. Laundry Services:

3.1.2.6.1. The HS Contractor shall arrange for laundry and dry cleaning services to be available for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure. If the ship requires laundry or dry cleaning services, such services will be ordered from the laundry and dry cleaning vendor by an AGR.

3.1.2.7. Interpreter Services:

3.1.2.7.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

3.1.2.8. Mail Delivery Services: The HS Contractor shall provide daily mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

3.1.2.9. Morale Welfare and Recreation (MWR) Services:

3.1.2.9.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

3.1.2.9.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

3.1.2.10. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders from an AGR, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service

includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s).

3.1.2.11. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms.

3.1.2.12. The HS Contractor shall facilitate the ship's timely departure.

3.1.2.12.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

3.1.2.12.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

3.1.2.12.3. The HS Contractor shall remove all provided equipment.

3.1.2.13. UNOFFICIAL REQUIREMENTS OR PERSONAL REQUESTS:

3.1.2.13.1 The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under auspices of this contract.

3.1.3. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract as further described in the contract section titled "Invoices and Payments".

3.1.4. LogSSR Report: Prepare and submit an "Actual Cost Report" in accordance with PWS paragraph 3.23. and submit the PVE and any substantiating documentation for the port visit.

3.2. TRASH REMOVAL (LLIN XX02)

3.2.1. Trash removal service is the collection and disposal of refuse (i.e., trash) including liquid, semi-liquid, or solid garbage. Refuse does not include explosives and incendiary waste, or waste contaminated by medical and radiological processes.

3.2.2. The HS Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse. The HS Contractor shall provide dedicated refuse bins to the ship. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins. The HS Contractor shall immediately clean up any spilled refuse. The HS Contractor shall properly dispose of all collected refuse.

3.2.3. For ships at pier side, the HS Contractor shall place containers or trucks within twenty-five (25) meters of the ship or as permitted by port regulation, or barges alongside the ship. The HS Contractor shall empty the containers or barges when full and shall assure their continuous availability for trash disposal.

3.2.4. For ships at anchorage, the HS Contractor shall remove trash at the times agreed to by the HS Contractor and Supply Officer.

3.2.5. For trash collection at anchorage, the trash barge shall be available 24 hours a day (where not contrary to law or port regulation) with suitable self-fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.2.6. For trash collection by barge, the HS Contractor shall provide trash barges/scows (with tug service if barge is not self-propelled) for ships at anchorage. The barges shall be completely empty at time of arrival at the ship. In situations where an empty barge is not available, the contractor shall provide a system to measure the volume of trash deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of the trash. All trash barges/scows shall be properly fendered to prevent damages to U.S. Government vessels. The HS Contractor shall have ready access to sufficient barges and equipment to support at least two (2) ships at anchorage simultaneously. The barge's crew shall be entirely responsible for the tending of lines and for barge's security. The movement of trash from the ship to the barge shall be performed with care by the ship's sailors and in the manner ensuring the safety of the HS Contractor's crew and barges. Any instances of unsafe practices shall be brought to the attention of the ship's Commanding Officer, to ensure that corrective and preventive action is taken.

3.2.7. In instances of bad weather or emergency where the ship must depart on short notice, the HS Contractor shall remove barges within four hours of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the HS Contractor at least four (4) hours in advance for the barge pick-up at no additional cost to the U.S. Government.

3.2.8. The HS Contractor shall submit, as an attachment to the invoices, a document that certifies the quantity collected and the name of the disposal plant where the trash will be disposed. The HS Contractor is also responsible to follow any environmental regulations required by each country. The HS Contractor is required to keep all disposal certificates and shall make them available to FISC Yokosuka upon request.

3.2.9. Whether at anchor or pierside, U.S. Government personnel will dump the trash on the barges or in the containers.

3.2.10. Any spillage of refuse in the course of the removal operations shall be cleaned up immediately by the HS Contractor. Refuse containers, when used and when emptied, shall be returned to their original position with the lids (if any) replaced thereon.

3.2.11. The HS Contractor shall be paid based on the ACTUAL CUBIC METERS of trash removed. The HS Contractor shall be entitled to bill for 60 CM where the actual volume of trash removal is less than 60 CM (per order).

3.2.12. Where trash is required to be segregated, the Ordering Activity shall be required to segregate the material at the time of disposal. The HS Contractor shall be responsible for providing separate containers for each vessel, clearly marked with the required categories and for informing the Ordering Activity, upon arrival, that segregation is required. If the Ordering Activity does not segregate trash as required, the HS Contractor shall inform the Ordering Activity and Logistic Support Representative (LSR) prior to departure and bill for the cost of trash segregation within 48 hours after the vessel's departure.

3.3. FLEET LANDING (LLIN XX03)

3.3.1. When ordered by the ship, the HS Contractor shall furnish services/supplies for the fleet landing area. The following is a list of the basic supplies and services that a ship may need. It doesn't cover all the services that may be ordered by a ship for fleet landing.

3.3.2. FLEET LANDING. The HS Contractor shall provide the sub-line items specified in this Line Item and shall provide a unit price for each sub-line item. The unit price shall be per day for each item. Mobilization/demobilization charges shall be included in sub-line item price. The Fleet Landing LOT consists of the following:

3.3.2.1. One (1), 40-feet refrigerator unit or two, 20-feet refrigerator units, with required power to operate the units.

3.3.2.2. PORTABLE TOILET UNIT SERVICES. The unit price shall be for a single commode and one (1) urinal. The daily rate shall include pumping and cleaning as many times as necessary to ensure clean, sanitary condition and providing all chemicals, cleaning products and toilet paper. The HS Contractor shall check toilet facilities at least every six (6) hours to ensure cleanliness.

3.3.2.3. PORTABLE ELECTRIC GENERATORS. The HS Contractor shall provide a portable, gasoline powered, electric generator capable of supplying power to portable lighting and miscellaneous portable electrical equipment (radios, stereos, hand tools, etc.). Generator shall be at least 5KW with circuit breaker protector. Daily rate includes fuel, oil, and necessary consumables to operate the generator, transportation, set-up, dismantling and labor.

3.3.2.4. Chairs (each per day)

3.3.2.5. Long tables - approximately 2 meters in length (each per day)

3.3.3. Any other supplies, services or quantities of supplies and services other than those listed above shall be provided in accordance with the procedures set forth in LINE ITEM XX19.

3.4. BROWS (LLIN XX04)

3.4.1. Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The HS Contractor shall provide the brows specified in the schedule as ordered by the ship. A range of brow sizes is provided in each of the sub lot line items of lot line item XX04. All brows provided by port authorities, host nation, or US Government shall be billed at cost as port tariff items. Mobilization, demobilization, setup and placement shall be included in the proposed unit price of all XX04 sub lot line items. In cases where brows are provided by port authorities, host nation, or US Government free of charge, at reduced cost, or for mobilization/demobilization costs only; these costs will be reimbursed without additional fees or markup.

3.4.1.1. Due to the height difference between the submarine deck and pier, the HS Contractor provided submarine brow (must afford personnel a smooth and safe transit when entering or exiting the submarine deck). The submarine brow must be capable of supporting shore power cables without damaging the cable.

3.4.1.2. The HS Contractor shall be entitled to bill for 4 hours of usage under this line item when actual usage is less than 4 hours (per order). Billing for brows shall be calculated up until the scheduled time of departure. Discrepancies, if any, between the number of hours billed at the pre-sailing visit and the actual number of hours used shall be invoiced and paid in accordance with the procedures in OC-1, Invoices and Payments. The order of priority of usage in paragraph 2.7 applies.

3.4.2. MOBILE CRANE SERVICES (LLIN XX04)

3.4.2.1. The HS Contractor shall provide mobile crane services (shore crane) with operator(s). The HS Contractor shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HS Contractor shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each mobile crane ordered. Crane services under this Line Item are for land cranes only.

3.4.2.2. Crane services under this Line Item are for land cranes only. Floating cranes are to be provided and billed under Line Item XX20 procedures if required.

3.4.3. FORKLIFT SERVICES (LLIN XX04)

3.4.3.1. The HS Contractor shall provide forklift services with operator(s). The HS Contractor shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. Upon the Supply Officer's request, the HS Contractor shall provide information concerning forklift/lifting capacity. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The forklifts shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HS Contractor shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each forklift ordered.

3.5. SHIP MOVEMENT SERVICES – PILOTS, TUGS AND LINEHANDLERS (LLIN XX05)

3.5.1. The HS Contractor shall arrange pilots, tugs, and line handlers as ordered. The HS Contractor shall coordinate with port authorities, as necessary, to ensure that the services are available at the times requested. It should be noted that the port authority or other authorized sources provide these services, and are, therefore, to be priced in accordance with current tariff rates.

3.5.2. The HS Contractor shall provide tugs to bring ships to and from berthing locations. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

3.5.3. Only if pilots, tugs, or line handlers are not available through the port authority, the HS Contractor shall use commercially available sources.

3.6. WATER FERRY/TAXI SERVICE (LLIN XX06)

3.6.1. The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the fleet landing. At the commencement of service, the HS Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule. The HS Contractor shall provide water taxi service when the vessel is expected to be at anchorage for twenty-four (24) hours or more. Water taxi service shall be always available, with the exception of inclement weather, during the two (2) one-hour meal breaks and during refueling. At the commencement of service, the HS Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule.

3.6.2. The hourly rate for taxi water service shall include a minimum of two (2) qualified operators (a driver and one other operator), any other helpers or crew members required by local authorities, all insurance, fuel, holiday surcharges, overtime, and other operating expenses. Operator qualifications are set forth in paragraph 3.16.15 below.

3.6.3. Service begins when the first water taxi is alongside the designated pick-up point and ends when the last passenger disembarks from the water taxi at the designated drop-off point as ordered by the ship. However, when required to arrive early for inspection as a force protection measure, service begins at time of inspection. The HS Contractor shall be entitled to a six (6) hour minimum rental fee in cases where actual usage is less than 6 hours (per order).

3.6.4. Cancellation. The Ordering Activity will notify the HS Contractor at least forty-eight (48) hours in advance for cancellation of service. If the service is cancelled with less than forty-eight (48) hours notice, the Ordering Activity shall be responsible for cancellation costs unless cancellation is required due to adverse weather conditions (described in paragraph 3.16.13 below). A cancellation fee shall not be assessed in the event service is cancelled with less than 48 hours notice due to adverse weather conditions.

3.6.5. If the HS Contractor cannot provide the size of water taxi ordered, the HS Contractor shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event the ship will be charged for the size of the water taxi ordered. For example, if one (1) 250-pax water taxi is

ordered and is not available, then two (2) 125-pax water taxis shall be provided for the rate of one (1) 250-pax water taxi, if acceptable to the Ordering Officer.

3.6.6. The HS Contractor shall ensure that the water taxi is in sound mechanical condition and meets all safety standards required by local laws and regulations to preclude breakdown and injury. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of the port or the country in which the port is located. Apart from compliance with local laws and regulations, the HS Contractor shall meet all additional requirements as set forth throughout the PWS. Water taxi shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, and fitted for service required. Further, water taxi shall be in a clean condition when presented for service and shall be free of debris. The water taxi shall be sufficiently clean so as not to soil passengers, their clothing, or possessions with dirt, grease, oil, or other matter. If the water taxi does not meet the requirements of this paragraph as determined by the Ordering Officer, the U.S. Government shall have the right to reject the water taxi for performance of services.

3.6.7. The HS Contractor shall ensure that all water taxis are fully licensed, registered, and insured, including adequate liability insurance, in accordance with local laws and regulations.

3.6.8. Each water taxi shall be equipped with at least one clean and serviceable life jacket for each passenger and crewmember, and all jackets shall be stowed in a readily accessible place.

3.6.9. All water taxis used by the HS Contractor shall provide overhead covering.

3.6.10. Before the commencement of any services under this contract, the HS Contractor shall make the water taxi available to the Ordering Vessel's Commanding Officer or designated representative for inspection.

3.6.11. The following information shall be conspicuously posted in English and the language of the country in which the port is located:

a. Current operator's/captain's license.
b. Passenger/weight capacity limits notice.
c. Location of life jackets and other life saving equipment.
d. Location of all exits indicated in large letters.
e. Emergency procedures.

3.6.12. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

3.6.13. 'Adverse weather' conditions are weather conditions in which operations of water taxis are unsafe for passengers and shall be determined by the Commanding Officer, Command Duty Officer, Operations Officer, Officer of the Deck, or local port authority. Operation of the water taxi shall be in a safe and seaworthy manner. Operation of water taxis is not allowed under adverse weather conditions.

3.6.14. Consumption of alcoholic beverages shall not be permitted aboard the water taxi.

3.6.15. Operator Qualifications: All personnel or employees of the HS Contractor operating water taxis, shall have all certification required and issued by the law of the country in which the port is located for the operation of the type, class, or size of water taxi being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the water taxis are to be operated to ensure the water taxis are operated in a safe and seaworthy manner. At least one operator on each boat must speak English. The HS Contractor is required to provide a minimum of two (2) qualified operators for each water taxi at all times.

3.6.16. Security: During the term of this contract, the ship(s) to be serviced will provide adequate and sufficient security personnel for maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the ship's Commanding Officer or designated

representative. When such naval personnel are embarked in a HS Contractor-operated water taxi, he will be responsible for the good order and discipline of naval personnel.

3.6.17. In the event of a water taxi breakdown, immediately prior to, or during a trip, the HS Contractor shall immediately provide a replacement water taxi that complies in all respects with this contract, at no additional cost to the U.S. Government. If a water taxi is not operable when required under this contract, the HS Contractor shall immediately provide at no additional expense to the U.S. Government, a replacement water taxi which complies in all respects with this contract.

3.6.18. Any personal articles or items found on the water taxi after completion of each trip shall be turned over to the ship's Security Officer or his direct representative.

3.6.19. To verify a claim by the HS Contractor for any damage or destruction caused by the U.S. Government, it shall be the responsibility of the HS Contractor to ensure that the water taxi is jointly inspected before and after each trip by the HS Contractor and an authorized representative of the U.S. Government.

3.6.20. When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

3.6.21. In the event the U.S. Government rejects a water taxi, the U.S. Government shall not be liable for any costs the HS Contractor incurs in presenting said water taxi for inspection.

3.6.22. The HS Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for U.S. Government review and inspection.

3.7. GENERAL CHARTER & HIRE ITEMS (LLIN XX07)

3.7.1. YOKOHAMA OR COMPARABLE TYPE FENDERS (LLIN XX07)

3.7.1.1. The HS Contractor shall furnish Yokohama or comparable type fenders for all classes of ships in accordance with the Schedule of Supplies and Services. Fender size is not specified as this is a performance based service. Fenders provided shall be appropriate and safe for the class of ship and pier configuration combination (eg. all ship classes shall be billed under LINE ITEM XX07AA). The fenders quoted for each sub lot line item shall be safe and useable for the intended class of ship at all locations specified by the lot. In the schedule there is a sub lot line item (SUBLINE ITEM) for a daily rental fee PER Yokohama or comparable type fender, and there is another SUBLINE ITEM for all costs associated with installation, and removal of one fender, as well as round trip costs associated with transport of the fender from another port, if required.

3.7.1.2. Rental is on a daily (24-hour) basis, per fender. Installation, removal, and transportation are charged as a "lot" per fender. The HS Contractor shall be responsible for securing the fenders to the pier.

3.7.1.3. The HS Contractor shall provide fenders with a minimum of two (2) mooring lines.

3.7.2. CAMELS, BREASTING, AND FENDERING BARGES (LLIN XX07)

3.7.2.1. HS Contractor shall furnish camels in accordance with the Schedule of Supplies and Services. The camels shall be flat surface platforms to be placed alongside the pier and sufficiently capable of breasting the ship away from the pier or from other ships.

3.7.2.2. The HS Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.7.2.3. Breasting barge size is not specified as this is a performance-based service. The HS Contractor is responsible, as part of its understanding of the requirement, for determining the appropriate barge size for each combination of vessel class and berthing configurations required at each lot. Barges provided shall be appropriate and safe for the class of ship and pier configuration combination (eg. all class II vessels shall be billed under LINE ITEM XX07AI). The barges quoted for each sub lot line item shall be safe and useable for the intended class of ship at all locations specified by the lot. In the schedule there is a sub contract line item (SUBLINE ITEM) for a daily rental fee for the barge, and there is another SUBLINE ITEM for all costs associated with installation, and removal of the barge, as well as round trip costs associated with transport of the barge from another port, if required.

3.7.2.4. Rental is on a daily (24-hour) basis, per barge. Installation, removal, and transportation are charged as a "lot" per barge.

3.7.3. LANDING BARGES

3.7.3.1. The landing barges shall be flat surface barges for positioning at the stern or side of the vessel to serve as a loading/unloading platform for water taxi personnel or cargo; they shall not interfere with the operations of the ships' elevators or other equipment. Although landing barges are primarily used for class IV and V vessels, they may be ordered for use with any class vessel.

3.7.3.2. The daily rate for the barges that are available locally must include all costs for mobilization and demobilization, installation and de-installation to include tugs if barges are not motorized. If barges are not available locally and the HS Contractor is required to transport them from one port to another port (including return) there will be a separate charge for transportation for each barge (to be approved by the FISC Contracting Officer prior to mobilization).

3.7.4. OILY WASTE REMOVAL (TRUCK AND BARGE)

3.7.4.1. Oily Waste is defined as any liquid petroleum product mixed with wastewater and/or oil in any amounts, which, if discharged overboard, would cause or show sheen on the water. The HS Contractor shall dispose of any combination of oily waste and grey water as oily waste.

3.7.4.2. Oily Waste is measured by Cubic Meter (1CM = 264.2 Gallons). The HS Contractor shall submit, as an attachment to the invoices for disposal services, a document verifying the quantity collected and the name of the disposal plant where the oily waste have been or will be disposed.

3.7.4.3. The HS Contractor shall comply with the environmental requirements of each country where oily waste is disposed and shall be liable for any costs incurred as a result of the HS Contractor's failure to comply with such requirements. The HS Contractor shall keep all disposal certificates and shall make them available to the Contracting Officer upon request. If the ship concurs with the volume, the ship will pay for the entire amount.

3.7.4.4. Oily Waste Removal involves the collection of Oil and Aggregate Water generated by the ships. The requiring vessel will pump this waste into HS Contractor-provided tanks or barges. The HS Contractor shall provide all equipment and facilities required to remove oily waste, including hoses and connections compatible with the ship being serviced. The HS Contractor shall provide hoses of sufficient length from equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

3.7.4.5. In all cases when a ship orders oily waste disposal services, the HS Contractor shall invoice and will be paid the for a minimum daily quantity of 60 CM for providing the disposal services, even if the oily waste quantity pumped and disposed that day is less than the 60 CM minimum quantity.

3.7.4.6. In the event the HS Contractor subcontracts oily waste disposal, the HS Contractor shall be liable for any costs incurred as a result of the disposal operator's failure to comply with local requirements.

3.7.4.7. The HS Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed. The Government reserves the right to independently verify the volume of discharge using certified flow measuring devices. The Government reserves the right to request a written statement from the HS Contractor describing the method of measurement used to determine the amount of Oily Waste removed from the vessel.

3.7.4.8. When removal is done via barge, the HS Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

3.7.5. INTERPRETER SERVICES

3.7.5.1. The HS Contractor shall provide interpreter services when ordered. The interpreter shall be fluent in both spoken and written local language and English.

3.7.6. PRATIQUE

3.7.6.1. The HS Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

3.7.7. STEVEDORE SERVICES

3.7.7.1. The HS Contractor shall provide stevedores for general labor. Billing shall be at the hourly rate for worker.

3.8. COLLECTION, HOLDING AND TRANSFER (CHT) (LLIN XX08)

3.8.1. The HS Contractor is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships throughout the area covered by this contract. The HS Contractor shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The HS Contractor shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence upon ship's arrival whether, at anchor or pierside. The HS Contractor shall pre-position CHT barges, when necessary, in accordance with force protection or other requirements.

3.8.2. The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

3.8.3. The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

3.8.4. The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT. The Government reserves the right to use its own metering device to verify measurement of sewage discharge. Invoices submitted for payment for this service shall contain a statement describing the method used in determining liquid quantities offloaded from the ship.

3.8.5. The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

3.8.6. The HS Contractor shall properly dispose of all sewage. CHT collection, removal and disposal shall be priced based on the following conditions:

i. (XX08AA) – CHT BY TRUCK: The husbanding HS Contractor shall provide services when the visiting ship is at pierside.

ii. (XX08AB) – CHT BY BARGE: The HS Contractor shall provide services when the visiting ship is at anchorage or the port authority has issued a directive stating that service must be performed by barge or the barge has been ordered by the ship. The HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.8.7. The CHT service shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the U.S. Government. In those limited number of cases where this is not possible, the contractor shall provide a system to measure the volume of sewage deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT.

3.8.8. The HS Contractor will be guaranteed a minimum daily quantity of 60 cubic meters for providing these services even if the actual cubic meters of CHT removed is lower than 60 cubic meters. Note: 264.2 gallons = 1 CM (cubic meter).

3.8.9. The Government reserves the right to independently verify the actual volume of CHT discharged using a certified flow measuring device.

3.8.10. The HS Contractor shall request the ship's personnel to verify all removal figures at time of CHT collection. The HS Contractor shall follow any environmental regulations required by each country. If the ship concurs with the volume, the ship will pay for the entire amount. If the ship contests the volume, the ship will pay for the amount it actually believes was pumped or 60 cubic meters, whichever is greater. The HS Contractor shall submit a request to FISC for the difference, accompanied by disposal certificates. FISC will investigate and arrange for payment of any additional amounts that are determined to be due.

3.8.11. The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the HS Contractor's report in writing. The HS Contractor is also responsible to keep all disposal certificates and shall make them available to Contracting Officer upon request.

3.9. FRESH POTABLE WATER (LLIN XX09)

3.9.1. Potable water is defined as fresh drinking water of a quality not less than that prescribed in:

3.9.2. Code of Federal Regulations Title 21, Volume 2, Part 165.110 (21CFR165).

3.9.2.1. These documents are incorporated by reference with the same force and effect as if they were given in full text. Full text may be accessed electronically at these websites: http://www.epa.gov/OGWDW and http://www.tdh.state.tx.us/bfds. The HS Contractor shall be responsible for identifying and providing water from a source that meets U.S. Government requirements. The U.S. Government reserves the right to accept deliveries of potable waters that do not comply with above specifications, and to bring the water up to specification standards through chlorination.

3.9.2.2. The HS Contractor shall provide for the delivery of fresh potable water to the ships as ordered. The HS Contractor shall be paid for the amount of water ordered by the vessel. The barges, tankers or trucks and equipment used for transfer, storage and transportation of potable water shall not be used for cargo other than potable water, and must be equipped with independent pipe systems and working, certified metering devices.

3.9.2.3. Source of Water. Water deliveries are to be made from sources that meet the requirements of paragraph 3.5.2.1 above. If the water source does not meet the requirements of potable water, the HS Contractor shall be required to provide water from an alternate approved source at no increase in the contract price.

3.9.3. The HS Contractor shall be paid based on the ACTUAL METRIC TONS of potable water received on the ship. The Government reserves the right to use its own metering device to verify measurement of potable water delivered to the vessel.

3.9.4. If potable water delivery is via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position water Barges, when necessary, in accordance with Force protection or other requirements. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.10. SHIP'S UTILITY SERVICES (LLIN XX10)

3.10.1. SHORE STEAM

3.10.1.1. The HS Contractor shall provide shore steam to the ship. This sub lot line item is performance-based. Shore steam provided to the ship may be provided by any means (boiler or generator) so long as the pressure of steam delivered to the vessel is approximately 100 PSI (standard commercial pressure) and of acceptable quality for the vessel. Pricing for provision of shore steam shall be on a TBD basis and should include the boiler or generator, fuel for the generator, mobilization/demobilization, hoses, and adapters appropriate to the vessel type, and water (where required) for the generator or boiler. This item shall be billed on a daily basis.

3.10.2. OIL BOOMS

3.10.2.1. The HS Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom. Billing for LINE ITEM XX10AA & XX10AB shall be per meter. For example, a 300-meter oil boom would be billed at 300 meters per day.

3.10.2.2. Oil Booms are intended to act as a precautionary measure in case of inadvertent leakage from equipment otherwise in sound operating equipment. Oil booms are also intended to mitigate the environmental damages that may otherwise result from inadvertent leakage. The HS Contractor shall notify the Ordering Activity, upon receipt of a LOGREQ request, if deployment of an oil boom at the proposed mooring location is contrary to host nation or port authority regulation so that the order for the oil boom service can be cancelled. Cleanup and disposal of oil is a port authority function. If the HS Contractor incurs charges for these services, they shall be billed as port tariff items on a reimbursable basis.

3.10.3. SHORE POWER (INCLUDES CABLES, CONNECTION, FUEL, AND OPERATORS) 450-480V, 60 HZ

3.10.3.1. The HS Contractor shall provide shore power to the ship using a port-provided, permanent connection system or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels. The HS Contractor shall provide all cables and make all power connections between the generator and ship. The availability of shore power shall be in accordance with the schedule established by the ship.

3.10.3.2. Sub Lot Line Items XX10AC through XX10AG are to be used only if/when shore power provided by port authorities is, for any reason, not available or inadequate.

3.11. LAND TRANSPORTATION SERVICES (BUS AND VEHICLE) (LLIN XX11)

3.11.1. GENERAL REQUIREMENTS:

3.11.1.1. All drivers must be fully qualified and possess valid driving licenses. Drivers shall be familiar with local area and conversant in English. All vehicles shall be registered, licensed and insured (including adequate passenger liability insurance). The HS Contractor is responsible for delivering all cargo and personnel to the correct location on schedule.

3.11.1.2. The HS Contractor shall provide vehicles that have been properly maintained and serviced. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government shall have the right to reject the vehicle for performance of services. The HS Contractor shall ensure that each vehicle is jointly inspected before and after a trip by the HS Contractor and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

3.11.1.3. If a vehicle is not operable when required under this contract, the HS Contractor shall provide, at no additional expense to the U.S. Government, a replacement vehicle within two (2) hours that complies in all respects with this contract.

3.11.2 BUS SERVICE

3.11.2.1. The HS Contractor shall provide air-conditioned bus services on an hourly rate basis and bill under LINE ITEM XX11AA. The hourly rate shall include one driver or operator, any additional helpers or crew required by local authorities, all insurance, fuel, holiday surcharges, overtime, and all other operating expenses. Any tolls for long distance trips (over 50 kilometer radius) will be reimbursed at cost.

3.11.2.2. The HS Contractor shall ensure that the bus is in sound mechanical condition and meets all safety standards required by local laws and regulations. Further, the bus shall be in a clean condition when presented for service and shall be free of debris. The bus shall be sufficiently clean so as not to soil passengers, their clothing or possessions with dirt, grease, oil, or other matter.

3.11.2.3. In the event of a bus breakdown, the HS Contractor shall provide within two hours, at no additional expense to the U.S. Government, a replacement bus complying in all respects with this contract.

3.11.2.4. Any personal articles or items found on the bus after completion of each trip shall be turned over to the ship's Ordering Officer.

3.11.2.5. The HS Contractor shall be responsible for ensuring that the HS Contractor and an authorized representative of the U.S. Government jointly inspect before and after a trip each bus. The U.S. Government will not consider any claim for damage to a bus, which has not been inspected.

3.11.2.6. The minimum bus capacity shall be 40 passengers.

3.11.2.7. A minimum daily price of four (4) continuous hours shall apply for each bus ordered less any time associated with bus breakdown or getting lost.

3.11.2.8. Drivers must be familiar with the area, have an appropriate driver license, and speak English. In the event the driver is unable to speak English, the contractor shall furnish an English speaking rider on the bus.

3.11.3. VEHICLE RENTAL SERVICE

3.11.3.1. Vehicle Specifications, Maintenance, and Malfunctions

3.11.3.1.1. The HS Contractor shall furnish “new” air-conditioned vehicles (i.e., not more than five years old), in good order and condition and otherwise in full compliance with best commercial practices and local laws and regulations.

3.11.3.1.2. Sedans or SUVs shall have a minimum capacity of four (4) passengers and 1600cc engine.

3.11.3.1.3. In the event a “new” vehicle is not available in certain countries, the contractor shall contact the Contracting Officer to request a waiver from the requirement and provide background information as to why a waiver would be appropriate. The Contracting Officer will consider, and grant or refuse, the request. Vehicles shall be priced on a daily rate, except as noted below. They shall be equipped with front and back seat belts, an emergency triangle, spare tire, jack and complete set of tools for changing a flat tire, as well as any other equipment required by local authorities. Upon initial rental, the gasoline tank shall be full. The prices for vehicles rented are based upon an assumption that the vehicles will be returned with an empty tank of gas. Therefore ships will be charged for a full tank of gasoline at the time of rental. There shall be no surcharge applied to the commercial price of the fuel. Vehicles can be returned with any amount of gasoline. Ships shall not be responsible for returning the vehicle with a full tank of fuel, and the HS Contractor shall not be obligated to credit the ship for the remaining fuel.

3.11.3.1.4. The HS Contractor shall provide vehicles that have been properly maintained and serviced, including all motor oils, lubricants, antifreeze, coolants and other fluids such as windshield washer fluid, and be responsible for all emergency repairs and services.

3.11.3.1.5. Should any vehicle break down while in the U.S. Government’s possession, the HS Contractor shall replace it with another vehicle of the same or larger size as quickly as possible, but in any case no more than two (2) hours later. The replacement shall take place either at the point of breakdown or at the HS Contractor's office closest to that point; whichever is more convenient for the U.S. Government. All repair or replacement costs, including transportation, shall be at the HS Contractor's expense. The U.S. Government shall be credited an hourly rate, pro-rated on the daily rate, for the rental cost between breakdown and vehicle replacement.

3.11.3.2. Substitution of Vehicles

3.11.3.2.1. If the HS Contractor does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the HS Contractor shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a Group B car is ordered but unavailable, and if no other Group B vehicle is available, the HS Contractor shall furnish a higher group vehicle at the price listed for the Group B vehicle originally ordered.

3.11.3.2.2. In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

3.11.3.3. General Description of Vehicle Types

3.11.3.3.1. Medium-size Sedan (Group “B”): 2 - 4 doors; 4 - 5 passenger capacity; air conditioning; minimum 1600 cc engine sedan.

3.11.3.3.2. Passenger Van (Group “M”): 9-passenger capacity; air conditioning; minimum 2000cc engine.

3.11.3.3.3. Executive Sedan with Driver (Group “Y”): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan. This group requires an executive sedan and shall be provided with a driver. Drivers must be familiar with local area, and must speak English. Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. No individual driver

shall be required to drive more than 8 hours. Drivers must not have been driving within the previous 8 hours. Rentals less than 24 hours will be charged on an hourly pro-rata basis, based on the daily rate, with the HS Contractor entitled to a minimum charge of 4 hours. The HS Contractor shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations by the provided driver. The daily rate shall be inclusive of all necessary equipment, licensed drivers, all liability insurance as required by local law, holiday and overtime costs, fuel, all other operating expenses, and all other incidentals. The U.S. Government will reimburse the HS Contractor for additional costs in two cases: for highway tolls, and for the driver's overnight accommodation up to $120.00 or equivalent local currency, when required by U.S. Government business such as travel to another city, and upon presentation of an original invoice (using the online pricing application).

3.11.3.3.4. 15-Passenger Buses with Driver (Group "Z"): All requirements concerning the rental of a vehicle with the driver described above in the "Executive Sedan with Driver" shall apply to this paragraph also.

3.11.3.4. Insurance and Liability.

3.11.3.4.1. The prices for vehicle rental services, as set forth in the schedule, shall be subject to the conditions below.

3.11.3.4.2. The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cause, except where the loss or damage is caused by the willful and wanton negligence of the U.S. Government employee.

3.11.3.4.3. The HS Contractor and any Subcontractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, resulting from the fault, negligence, or wrongful act or omission of the HS Contractor, its subcontractors, its agents, or employees.

3.11.3.4.4. The HS Contractor shall provide and maintain at its expense, all vehicle operator's insurance required by the law of the country in which the vehicle is to be operated. All necessary insurance certificates shall be provided with the rental vehicle. Such insurance shall include all coverage required by law for bodily injury, collision, and property damage liability. The HS Contractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, within the required policy limits, arising out of or in connection with the rental or use by the U.S. Government, its agents or its employees of any vehicle under this contract.

3.11.3.5. Traffic Violations and Fines. Each vehicle operator shall be responsible for payment of fines and legal costs incurred as a consequence of the violations of traffic laws or regulations.

3.11.3.6. Mileage and Deposit Charges. There are no mileage or deposit charges for the vehicles rented under this contract for all mileage travelled within a 250 kilometer radius of the ship berth (or departure point on the pier if ship is at anchor). Outstation charges, surcharges, or additional mileage rates shall not be assessed for travel within the 250 kilometer radius as the vehicle is rented on a daily basis with usage in accordance with the ordering activity's needs. The HS Contractor shall be entitled to an additional half days' rental fee at the daily rate for each day in which vehicle trips are required beyond the 250 kilometer radius described above.

3.11.3.7. Time Periods of Rental. Rental time shall begin once the vehicle and driver are available for use alongside the Ordering Activity. The daily rate is defined as 24 consecutive hours. No individual driver shall be required to drive more than 8 hours straight. Drivers must not have been driving within the previous 8 hours.

3.11.4. TRUCK LIGHT

3.11.4.1. The HS Contractor shall provide covered, lockable trucks with a driver to load/off load cargo and mail. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and offloading.

3.11.4.2. The HS Contractor shall be responsible for security and prevent loss/damage/destruction of cargo and mail.

3.11.4.3. The HS Contractor shall return all items left in rental vehicles to the ship's Ordering Officer.

3.11.4.4. The HS Contractor shall obtain written acknowledgement of vehicle service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

3.11.4.5. The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cost, except where the loss or damage is cost by the willful and wanton negligence of the U.S. Government employee.

3.11.4.6. Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. The daily rate is defined as 24 consecutive hours. No individual driver shall be required to drive more than eight (8) hours. Drivers must not have been driving within the previous eight (8) hours. Rentals less than 24 hours will be charged on an hourly pro-rata basis, based on the daily rate, with the HS Contractor entitled to a minimum charge of four (4) hours. The HS Contractor shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations. The daily rate shall be inclusive of all necessary equipment, licensed drivers, all liability insurance as required by local law, holiday and overtime costs, fuel, all other operating expenses, and all other incidentals.

3.11.4.7. The HS Contractor shall provide vehicle service with qualified drivers for official government business related to port visits.

3.11.4.8. The HS Contractor shall provide one-way transfer vehicles with drivers to transfer cargo between a designated pick-up point and a specified destination within a 250 kilometer radius of the ship berth (or departure point on the pier if ship is at anchor). Outstation charges, surcharges, or additional mileage rates shall not be assessed for travel within the 250 kilometer radius as the vehicle is rented on a daily basis with usage in accordance with the ordering activity's needs. The HS Contractor shall be entitled to an additional half days' rental fee at the daily rate for each day in which vehicle trips are required beyond the 250 kilometer radius described above.

3.11.4.9. The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

3.11.4.10. The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

3.11.4.11. If the unit of issue is by "Day", then the rental period shall constitutes 24 hours.

3.12. TELEPHONE SERVICES AND COMMUNICATION EQUIPMENT (LLIN XX12)

3.12.1. Cellular Telephone Services (XX12AC): Daily charges shall be inclusive of delivery, removal, provision of 110V to 220V transformers, adapters and extra batteries. Activation, auto roaming, and long distance accounts shall be included under XX12AC. The HS Contractor shall have readily available a minimum of 10 cellular telephones at a given time. Each mobile phone provided shall include an operating manual/instruction with published rates for usage. Airtime for mobile phones shall be included under XX12AD. Usage charges associated with mobile phones (XX12AD) will be the actual charges computed in accordance with the local or national tariff.

3.12.2. SIM cards with prepaid airtime shall be provided where the ship or operating unit has mobile phones and desires only SIM cards for use in the specific port area. SIM cards provided under LINE ITEM XX12AF shall include activation of the SIM card. HS Contractors shall not be obligated to provide quantities of sub lot line item XX12AF in excess of quantities permitted by host nation law or regulation.

3.13. FORCE PROTECTION BARRIERS, PERSONNEL AND SUPPLIES (LLIN XX13, XX14, XX15)

3.13.1. Only the ship's Commanding Officer, the ship's Supply Officer, or the FISC Contracting Officer is authorized to order Force Protection (FP) services under this contract. If any other activity or individual attempts to order FP services (e.g., NCIS, DAO, etc), the Husbanding Service (HS) Contractor is required to immediately inform the ship and receive a proper order prior to beginning performance of these services.

3.13.2. The HS Contractor is responsible for providing or coordinating listed FP services as part of their Husbanding Services under Lot Line Item XX01. The HS Contractor shall develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, host nation agencies, and U.S. Embassy security staff. If the host nation is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time.

3.13.3. The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer. The HS Contractor shall not add any requirements without prior approval.

3.13.4. The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The FISC Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

3.13.5. FP is considered a combination of practices and procedures, including the use of specific material, equipment, and personnel, having the objective of improving security to personnel and ships while in port. FP services or supplies may be provided by the host nation at no cost or may be billed at the public tariff rate. The HS Contractor is required to verify what services will be provided by the host nation. For the services that cannot be provided by the host nation, the HS Contractor is required to arrange these services by obtaining them from commercial sources at the prices indicated in the pricing schedule.

3.13.6. The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

3.13.7. The HS Contractor shall provide as many services identified below as ordered by the ship or FISC Contracting Officer. These services do not include other related services not listed, but may be required and separately ordered to attain a higher level of security in a port.

3.13.8. Personnel providing force protection services must be responsive to instructions from the ship. This does not authorize force protection personnel to violate any local regulations, any Port Authority ordinances, or local decrees. The equipment and material used for the force protection services will be inspected by the ship's force to ascertain that they meet force protection requirements.

3.13.9. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

3.13.10. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

3.13.11. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

3.13.12. Background Checks: The HS Contractor shall conduct security background checks on employees and subcontractor employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers. The HS Contractor shall issue photo identification badges to its personnel and ensure subcontractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing. In addition, the HS Contractor will be required to provide vetting services for third party contractors such as DESC contractors.

3.13.13. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

3.13.14. Inspections: The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

3.13.15. Stand-Off Distances:

3.13.15.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

3.13.15.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

3.13.15.3. Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

i. Sign Specifications:
1. Language: Must be in the local language(s) as well as English.
2. Wording: Must state "Restricted Area, Do Not Enter"
3. Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
4. Color: Yellow or white with black lettering
5. Visibility: Must be highly visible from a distance of 400 feet (125 meters)
6. Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

3.13.16. The unit price for force protection services shall include all costs associated with providing transportation, mobilization/installation and demobilization/de-installation, or arranging the requested services below unless the transportation, mobilization/installation and demobilization/de-installation is identified as a separate Lot Line item

number. The HS Contractor's invoice shall set forth the unit of issue identified for each service, total quantity ordered for each service, unit price, and the total price.

3.13.17. The force protection services that the ships may order are:

3.13.17.1. Jersey-type security barriers and CONEX box barriers capable of stopping a vehicle (automobile). (Price per meter per day)

(i) Concrete barriers

(ii) Water filled barriers (completely filled with water). Price must include water.

(iii) CONEX box barriers.

Mobilization, installation and demobilization will be billed under a separate lot line item number.

3.13.17.2. Unarmed security guard to control vehicle and personnel access to pier. (Price per guard per hour). Must be English speaking, and equipped with own handheld radio (not ship's radio) to communicate with ship. Duties and responsibilities will be coordinated with the ship upon arrival.

3.13.17.3. Floating Line of Demarcation (LOD) at pierside, equipped with anchors and lighting (for night visibility). (Price per meter per day) The floating LOD must be anchored at least 30 meters from ship. Oil booms are acceptable. Mobilization, installation and demobilization will be billed under a separate lot line item number.

3.13.17.4. Unarmed and manned waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities. Continuous coverage is required for the period of performance ordered by the ship or by the Contracting Officer. (Price per patrol craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

3.13.17.5. Unarmed and manned motorized patrol craft, approximately 5-10 meters in length, with own radio to communicate with ship and local authorities, to escort ship from pilot pickup point to mooring location. (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

3.13.17.6. Unarmed and manned waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities, on call (available within 15 minutes). (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

3.13.17.7. Tire-shredding strips, equipped with metal spikes, to be placed across the entry to pier access. (Price per one strip per day) Must be capable of disabling a vehicle, which drives over the strips in the wrong direction. Strips must be at least one meter in length.

3.13.17.8. Metal pedestrian-control fences. (Price per 2x2 meters fence per day) Must be at least two (2) meters high, two (2) meters wide, and sturdy enough to withstand wind and other inclement weather.

3.13.17.9. Signs in host nation language. Signs shall be at least one (1) meter long and a half (1/2) meter wide, with lettering at least 10 cm high. (Price per sign per day). Each sign is to read: "Controlled area. Unauthorized entry prohibited." Signs shall be legible, on a sturdy material that will not fade, run, or be ruined due to inclement weather (plastic material preferable). Signs shall also be written in fluorescent paint/material or be lighted, so they can be seen at night. Signs shall have some type of securing means on them, such as a hole punched in each corner, to use wire to secure sign to fence.

3.13.17.10. Portable fluorescent lighting capable of illuminating 300 meters by 100-meter area. (Price per portable unit per day). The HS Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port's installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

3.13.17.11. Weather resistant guard shacks, capable of holding at least two persons. Guard shack shall be enclosed, and shall have, at a minimum, one door and one window. Please indicate guard shack measurements. (Price per unit per day).

3.13.17.12 Hand held metal detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition (Price per unit per day)

3.13.17.13. Walk-through metal detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

3.13.17.14. Trained metal detector operators. (Price per hour per operator). Operators shall search host nationals and host national vehicles. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

3.13.17.15. Hand held explosives detectors, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day).

3.13.17.16. Walk-through explosive detector, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

3.13.17.17. Trained explosives detector operators, (Price per hour per operator). Operators shall search host nationals and host national vehicles. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

3.13.17.18. X-ray baggage scanning machines, similar to those used in commercial airports. Must be certified by the local certifying entity and in good working condition. (Price per unit per day)

3.13.17.19. Trained X-ray baggage scanning operators (Price per hour per operator). Operators shall search host national baggage. Operators must have proper authorization/certification to conduct searches, and be in an official uniform. Operators must also have their own handheld radio to contact ship or local authorities.

3.13.17.20. Explosives disposal-trained diving services capable of inspecting pier before ship arrival. Must have obtained all applicable licenses and/or certifications from host nation prior to diving. (Price per hour)

3.13.17.21. Battery operated bullhorns, new batteries included. (Price per unit per day)

3.13.17.22. Sturdy tables with dimensions of at least two (2) meters long and one (1) meter wide, with four folding chairs. (Price per unit per day)

3.13.17.23. Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and open on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

3.13.17.24. Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and closed on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

3.13.17.25. 800 MHz radios. Must be in excellent condition, and battery operated, with batteries included. (Price per unit per day)

3.16. AIRPORT/CARGO & MATERIAL HANDLING (PORT HANDLING COSTS) (LLIN XX16)

3.16.1. PAINT FLOAT

3.13.1.1. The paint float shall be no less than 5M in length but, in all cases, large enough to provide a safe and stable working platform for the occupants. Scaffolding may be of any height less than 3.5M from the deck, so as to provide a working platform at least 4M from the waterline. The paint float shall be equipped with suitable self-fendering to prevent damage to the ship. The price of these fenders shall be included in the quoted price of the paint float. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge. Rails shall be no less than 1M from the working platform. The working platform shall be equipped with anchor points for harnessing. The Ordering Activity shall be responsible for providing safety harnesses, for obtaining permission from local authorities prior to all work on the paint float, and for cleanup/disposal of all hazardous material generated or released outside the paint float. The HS Contractor shall notify the Ordering Activity of local regulatory requirements concerning paint floats, assist the Ordering Activity in submitting requests and passing required documentation to the local authority where permission is required to work on the paint float, and arrange for required cleaning of the paint float upon return. The ordering activity is responsible for securing the paint float from the time custody has been transferred to them until returned to the HS Contractor or the ship departs, whichever is earlier.

3.16.2. MATERIAL HANDLING (UP TO 150 LBS)

3.16.2.1. The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

3.16.2.2. The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

3.16.2.3. Shipping documents shall be labeled "SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

3.16.2.4. The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

3.16.2.5. The HS Contractor shall receive the package from the ship and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

3.16.2.6. The HS Contractor shall deliver the package to the ship the day of arrival in port or the following morning. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative.

3.16.2.7. The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

3.16.3. MANLIFT (WITHOUT OPERATOR)

3.16.3.1. The HS Contractor shall provide a manlift (without operator) and a full fuel tank. The HS Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning. The HS Contractor shall conduct training on safety and operating procedures for ship personnel. The HS Contractor shall maintain documentation of ship personnel acknowledgement of the training.

3.17. PROVISIONS (LLIN XX17)

3.17.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

3.17.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

3.17.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

3.17.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

3.17.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items.

3.23. COST REPORTING (LLIN XX23)

3.23.1. All billing and cost reporting shall be made in the units specified in the respective Lot Line Items.

3.23.2. The HS Contractor shall enter and report ALL expenditures under this contract, regardless of customer or ordering activity, into LogSSR.

3.23.3. The pre-arrival cost estimate is part of the Cost Reporting Line Item.

3.23.4. LogSSR Reporting(XX23AA)

The Contractor shall fully participate in the use of the Logistics Support Services Repository (LogSSR) web-based system. LogSSR replaces all previously used reporting processes such as legacy web-based systems like Cost Reporting and Forecasting Tool (CRAFT).
Upon award, the Contractor shall utilize the LogSSR to submit all reports and documentation related to the ship's visit. LogSSR can be accessed through the NAVSUP One Supply website at https://www.navsup.navy.mil/onesupply, redirected through www.navsup.navy.mil/logssr or directly at the official website of https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(1) LogSSR access and input.

(a) At the start of the contract period of performance, the Contractor shall enter the final itemized port cost information directly into the LogSSR database (Actual Cost Report) and email all corresponding documentation (Pre-arrival Cost Estimate Report, final invoices, and supporting documentation required by the contract). External Certification Authority Public Key Infrastructure (ECA PKI) is not required for entry, but no access to the contractor's information is accessible unless obtaining an ECA PKI.

(b) Contractors can obtain access to their submissions by obtaining an ECA PKI per the NAVSUP One Supply guidelines and requesting access through the website. Information can be obtained through the LogSSR website at https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(2) LogSSR functionality.

(a) This system is designed to gather all reports and documentation related to the ship's visit, beginning with the Pre-arrival Cost Estimate to the Actual Cost Report. All supporting documentation will be submitted by email to navsup_hq_logssr@navy.mil in PDF format (Adobe Acrobat) when the port visit information is entered into LogSSR. Although the pre-arrival cost estimate is a separate reporting requirement, a copy of this report shall also be submitted as part of the Actual Cost Report documentation described in paragraph (b) below. The Documentation is discussed below:

(b) Actual Cost Report:

(1) The Contractor shall create the Actual Cost Report in the LogSSR website directly, within seven calendar days from completion of the ship's visit . The contractor shall also send a copy of the order (i.e. SF 1155 or 1449), a copy of any Pre-arrival Cost Estimates, a copy of the logreq, and all the contractor's invoices and supporting documentation required by the contract as PDF files to theLogSSR email address of navsup_hq_logssr@navy.mil and to the email address specified at the time of contract award for each region concurrent with the creation of the Actual Cost Report in LogSSR.. The Contractor shall identify the line items as actual or estimated. This option is for those line items where the Contractor has not received the actual invoice before the ship leaves port, i.e. telephone bills. The Contractor shall include all port costs paid by each ship for which the Contractor provides husbanding services. The term "port costs" includes all supplies or services identified in the section of the contract titled, SUPPLIES/SERVICES AND PRICES, supplies or services furnished under another FISC contract, and any other charge paid by the ship during the port visit.

(2) For ships that do not have payment capabilities, the Contractor shall send the signed DD Form 1155, invoices and the additional documents required clearly indicating that a payment is pending to the and to the email address specified at the time of contract award for each region and to the LogSSR email address of navsup_hq_logssr@navy.mil.

(3) Any changes to an Actual Cost Report (i.e. finalize the charges made on an estimated amount) shall be forwarded by e-mail to and to the email address husbanding@fe.navy.mil and to navsup_hq_logssr@navy.mil email account as PDF file within seven calendar days of the change. The FISC Detachment Singapore contracting office will update changes to the LogSSR.

(4) The Actual Cost Report and supporting documentation will be visible in the LogSSR website by the government personnel with validation authority. Final reports of an HS Contractor representative can be accessed through the website only by obtaining an ECA PKI that will provide access only to the HS Contractor's submitted information.

3.23.5. Pre-arrival Cost Estimate Report (XX23AB)

(1) The Contractor shall prepare a Pre-arrival Cost Estimate Report in response to all orders issued to the Contractor by any method identified under "ISSUANCE OF ORDER" in Contract Terms and Conditions – Commercial Items. The orders will be provided to the Contractor by ships, activities and individuals identified in the

contract. The Pre-arrival Cost Estimate will include estimated prices for all items ordered. It will not be sufficient to simply state that the estimated price is "per FISC contract" or "per Port Tariff". The Contractor shall utilize Pre-arrival Cost Estimate Report format included in Exhibit B.

(2) The Contractor shall send the Pre-arrival Cost Estimate Report by email to the requiring customers authorized to use this contract and to the and to the email address husbanding@fe.navy.mil within 48 hours after receipt of the LOGREQ/order. In the situation where the Contractor receives the logreq with less than 48 hours prior to the arrival of the ship, the Contractor shall make every effort possible to provide the cost estimate prior to the ship's arrival, but in no case, more than 48 hours after receipt of the LOGREQ.

(3) Any changes to the Pre-arrival Cost Estimate Report shall be forwarded by email to the requiring customers authorized to use this contract and to the email address husbanding@fe.navy.mil.

(4) These estimates shall be provided to any other requiring customers authorized to use this contract based on the customer's request.

(5) In addition to the pre-arrival cost estimate, the Contractor shall provide any additional information and respond to the activity authorized to act on behalf of the ship, such as the Port Services office or the DAO.

NOTE: Before submission of reports or any other data to the FISC Contracting Office via electronic transmission or any other data media, the Contractor shall scan all documents with current anti-virus software to ensure computer virus free transmission. The LogSSR server scans all reports for computer viruses before inclusion in the databases. Any reports received containing computer viruses will be immediately returned to the Contractor.

CONTRACT TERMS AND CONDITIONS
ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) ORAL ORDERS (Indefinite Delivery Contracts) (SUP 5252.216 9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) WRITTEN ORDERS (Indefinite Delivery Contracts) (SUP 5252.216 9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(d) PROVISION FOR WOOD PRODUCTS SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56□C(133□F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(e) AGENCY PROTESTS

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

(f) SPS CONSOLIDATED SERVER TIME ZONE (Jun 2006) (NAVSUP)

All interested parties are hereby advised that the date and time for the Contracting Officer signature and the release of this contractual document are based on US Central Time Zone. All other dates and times are based on local time.

To calculate your time in relation to US Central Time Zone, vendors may visit the following url:
http://www.timeanddate.com/worldclock/converter.html

Disclaimer: this site is not owned or maintained by the U.S. Government and therefore isn't warranted to be correct. This URL is provided as a convenience only and is not intended to preclude use of other time conversion devices.

(g) MINIMUM AND MAXIMUM QUANTITIES

As referred to in paragraph (b) of the "Indefinite Quantity" clause of this contract, the contract minimum quantity is a total of $20,000 worth of orders at the contract unit price(s). The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order(s)/delivery order(s) immediately upon award of this contract. The maximum quantity is $6,000,000 of orders per year at the contract unit prices.

(h) OC-1, INVOICES & PAYMENTS

(a) Invoice Content

The Contractor shall submit to the ordering officer an invoice that lists all the expenses incurred by the ship during the port visit. The contractor's invoice shall list items priced under this contract and include subcontractor invoices for all other items not priced in the contract. All invoices submitted shall have all supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by ship's personnel, with a legible signature and printed name and rank, port tariff invoices, invoices for items not pre-priced in the contract, and any other documentation that the supplies/services have been delivered and accepted) and must be submitted in accordance with the paragraph below. All items listed on the invoices must be completely detailed (i.e., broken down) for quantity, contract unit of issue, unit price, etc. No lump sum amount will be accepted. Invoices for volume-based services (e.g. CHT and potable water) shall include a statement describing the method used in determining the liquid quantities on-loaded and/or off-loaded from the vessel.

The Contractor has the responsibility to keep copies of all documentation submitted to the ship for each visit for all supplies and services rendered and in the quantities invoiced. The Contractor shall keep a copy of all such documentation in one place that will be indicated to the Contracting Officer at the time of contract award. FISC Yokosuka and its detachments contracting personnel may examine these files at any time during the performance of this contract.

The invoices must be easily identifiable as original (i.e. original signature or stamped as ORIGINAL). If an electronic invoice is authorized, the Contractor must certify on the invoice that it is the first time that the invoice is submitted. If the original invoice has been lost, a copy of the invoice may be submitted. This invoice must be marked as "DUPLICATE COPY" and a signed and dated statement with a contractor's stamp must be made on the duplicate invoice confirming that payment has not been received.

Each invoice must include—

(1) Name and address of the Contractor;
(2) Invoice number and date issued;
(3) Contract number, Contract Line Item Number, Lot Line Item and , if applicable, the Order Number;
(4) Description, quantity, unit of measure, unit price and extended price of the items delivered;
(5) If appropriate, the shipping number and date of shipment including the bill of lading number and weight of shipment if shipped on a Government bill of lading;
(6) Terms of any prompt payment discount offered;
(7) Name and address of the official to whom payment is to be sent;
(8) Name, title, and phone number of the person to be notified in the event of a defective invoice;

(9) Supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by the ship's personnel, with a legible signature and printed name and rank, and any other documentation that the supplies/services have been delivered and accepted);
(10) The invoice must be correct and complete and without handwritten figures.
(11) Electronic funds transfer (EFT) information.

The Contractor shall include EFT banking information on the invoice only if required elsewhere in this contract.

If EFT banking information is not required to be on the invoice, in order for the invoice to be a proper invoice, the Contractor shall have submitted correct EFT banking information in accordance with the applicable solicitation provision, contract clause (e.g. FAR 52.232-33, Payment by Electronic Funds Transfer – Central Contractor Registration), or applicable agency procedures.

EFT banking information is not required if the Government waived the requirement to pay by EFT.

Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) prompt payment regulations at 5 CFR Part 1315.

If an item is not included on the original invoice, a supplemental invoice shall be issued with the same number followed by alpha suffix (e.g. Invoice No. 0001/03-A). The same requirements for submittal of the original invoice apply to the supplemental invoice.

If an invoice for an item is not available prior to the ship's departure (e.g. cell phone charges, port tariff items, port dues, etc.), the item shall be listed on the invoice with the words "TO BE DETERMINED (TBD)". Once the invoice has been received and the exact amount is known, the Contractor shall issue a supplemental invoice (with all supporting documentation attached) as "FINAL" for the final payment. TBD invoices shall not be paid until a 'FINAL' invoice is submitted.

It is the Contractor's responsibility to verify with port authorities and concessionaires that there are no pending charges prior to the ship's departure. This is to avoid any possible future invoices that may be submitted for unknown services to the U.S. Government.

When preparing an invoice the term "Miscellaneous" or any similar type description should be avoided. If this is not possible and the Contractor must use the term "Miscellaneous" when submitting an invoice, the Contractor shall provide a detailed list of items purchased and item prices on the invoice.

Invoices not in compliance with these instructions are not considered to be proper invoices and may be rejected.

(b) Invoice Submission

The invoice must be submitted to the listed activities in the following order:

(1) To the ship's Supply Officer or his designated representative one day prior to its sailing date. In the event the Contractor is unable to present any invoice to the ordering ship for payment prior to the departure of the ship, the Contractor shall submit invoices and attempt to obtain payment at the ship's next port of call.

(2) If unsuccessful, to the Contracting Officer. In the event the Contractor is unable to present any invoice to the ordering ship prior to its departure, the invoice must be promptly submitted to the Contracting Officer for payment through DFAS Yokota. In no case should the invoice be submitted beyond 90 days after the ship's departure from the port. The Disbursing Officer will annotate the date the invoices are received for the purpose of calculating any interest due. An exception to the 90-day limit will be given only for charges made by the port authorities or concessionaires, or the host nation authorities, including military authorities. It is the Contractor's responsibility to verify that there are no pending charges and to obtain the invoices from these authorities no later than six months after the ship's departure.

(3) Alternatively, whenever a non-Navy ordering authority orders services under the contract, the Contractor shall submit invoices and all supporting documents to that ordering activity.

(c) Payment of Invoices

Payments under this contract will be made in accordance with the clause FAR 52.232-33 Payment by Electronic Funds Transfer – Central Contractor Registration (Oct 2003).

Payment will be made after delivery and acceptance of supplies or performance and acceptance of services.

"Acceptance" means the act of an authorized representative of the Government by which the Government, for itself or as an agent of another, assumes ownership of existing identified supplies tendered or approves specific services rendered as partial or complete performance of the contract (from FAR 46.101 Definitions).

Bill payment shall be disbursed through one of the following methods, check, purchase card, submission of invoices to a Defense Finance and Accounting Command (DFAS) via regular mail or electronically through Wide Area Work Flow (WAWF).

The Contractor shall present to the ordering officer or SUPPO all pricing that is firm and finalized one-day prior to the ship's sailing or the ordering activity departure. At that time, the Contractor shall relay any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for these functions shall be the ordering officer or the ordering officer's designated representative. In addition, the Contractor shall present all documentation and invoices from other Contractors subject to provision of services under this contract.

The Contractor shall obtain a signed delivery order (DD 1155) to verify that the services were received and that charges presented in the port visit cost reporting program are correct for payment. This may be accomplished via email from the Ordering Officer or the SUPPO of the ship. The ordering officer shall pay for all supplies and services accepted during the period of performance by one of the aforementioned methods of payment.

In the absence of a delivery order, forward invoices and all documentation regarding inspection and acceptance of supplies and services by the ship's representative with appropriate accounting data to the Administrative Contracting Office.

(d) The Government will not make direct payments of VAT to the host nation nor will it withhold taxes, including VAT, from invoices for orders that are submitted to the husbanding services contractor by the Government. Payment of appropriate taxes required as part of conducting business in the specific country at which a port visit takes place are a responsibility of the husbanding services contractor. Offerors are further directed to FAR 52.229-6, Taxes-Foreign Fixed-Price Contracts (JUN 2003), which is included in the solicitation.

EXHIBITS AND ATTACHMENTS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A.	Schedule of Supplies and Services
B.	Pre-Arrival Cost Estimate Report

ATTACHMENT NO.	
1.	Classification of Ships
2.	Refuse Definitions
3.	Security Guard Operations
4	Water Taxi Specifications
5.	Floating Line of Demarcation
6.	Performance Work Statement (PWS) for Force Protection
7.	Picket Boat Operations & Specifications
8.	Request for Sanitary Inspection
9.	Quality Assurance Provisions (including Appendices A & B)
10.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A – SCHEDULE OF SUPPLIES AND SERVICES
Exhibit A (ELINs) Schedule of Supplies and Services.

Separate Excel spreadsheet is attached. Complete all unit prices in U.S. Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer to verify the formula when evaluating prices.

EXHIBIT B – PRE-ARRIVAL COST ESTIMATE REPORT
Separate Excel spreadsheet is attached. This is the format that the government requires Contractor to submit within 48 hours after receipt of the LOGREQ/order.

CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-LLINs.

ATTACHMENT 3
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

        2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive

alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 4
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of the BIMET regions. Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by the respective government for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 5.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 5
FLOATING LINE OF DEMARCATION OR BUOY SYSTEM FLD SPECIFICATIONS

The following are Floating Line of Demarcation (FLD) or Buoy System FLD Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

3.1. Continuous Line FLD – If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

3.1.2. Specifications:

3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual

reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 6
PERFORMANCE WORK STATEMENT (PWS) FOR FORCE PROTECTION

LLIN XX13, XX14 AND XX15 - FORCE PROTECTION SERVICES AND SUPPLIES

(a) Only the ship's Commanding Officer, the ship's Supply Officer, or the FISC Det Singapore Contracting Officer is authorized to order Force Protection (FP) services under this contract. If any other activity or individual attempts to order FP services (e.g., NCIS, DAO, etc), the Husbanding Service (HS) Contractor is required to immediately inform the ship and receive a proper order prior to beginning performance of these services.

(b) The HS Contractor is responsible for providing or coordinating listed FP services as part of their Husbanding Services under Lot Line Item XX01 and XX02. The HS Contractor shall develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, host nation agencies, and U.S. Embassy security staff. If the host nation is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time.

(c) The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer. The HS Contractor shall not add any requirements without prior approval.

(d) The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Det Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The FISC Det Singapore Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

(e) FP is considered a combination of practices and procedures, including the use of specific material, equipment, and personnel, having the objective of improving security to personnel and ships while in port. FP services or supplies may be provided by the host nation at no cost or may be billed at the public tariff rate. The HS Contractor is required to verify what services will be provided by the host nation. For the services that cannot be provided by the host nation, the HS Contractor is required to arrange these services by obtaining them from commercial sources at the prices indicated in the pricing schedule.

(f) The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

(g) The HS Contractor shall provide as many services identified below as ordered by the ship or FISC Det Singapore Contracting Officer. These services do not include other related services not listed, but may be required and separately ordered to attain a higher level of security in a port.

(h) Personnel providing force protection services must be responsive to instructions from the ship. This does not authorize force protection personnel to violate any local regulations, any Port Authority ordinances, or local decrees. The equipment and material used for the force protection services will be inspected by the ship's force to ascertain that they meet force protection requirements.

(i) Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

(j) Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

(k) Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

(l) Background Checks: The HS Contractor shall conduct security background checks on employees and subcontractor employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers. The HS Contractor shall issue photo identification badges to its personnel and ensure subcontractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing. In addition, the HS Contractor will be required to provide vetting services for third party contractors such as DESC contractors.

(m) Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

(n) Inspections: The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

(o) Stand-Off Distances:

Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

Sign Specifications:
- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

(p) The unit price for force protection services shall include all costs associated with providing transportation, mobilization/installation and demobilization/de-installation, or arranging the requested services below unless the transportation, mobilization/installation and demobilization/de-installation is identified as a separate Lot Line item number. The HS Contractor's invoice shall set forth the unit of issue identified for each service, total quantity ordered for each service, unit price, and the total price.

(q) The force protection services that the ships may order are:

(1) CONEX box barriers capable of stopping a vehicle (automobile). (Price per meter per day)

(i) CONEX box barriers.

Mobilization, installation and demobilization will be billed under a separate contract line item number.

The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

The barriers may be of different design and material as long as they are approved by the FP personnel. Empty 20 ft or 40 ft shipping containers may be used . Availability will determine the requested type of barrier. A combination of barriers may also be used.

A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

A personnel entry point must be established through the barriers. Barriers may also be used to seal off secondary Port gates. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

(2) Armed or unarmed security guard to control vehicle and personnel access to pier. (Price per guard per hour) Must be English speaking, and equipped with own handheld radio (not ship's radio) to communicate with ship. Duties and responsibilities will be coordinated with the ship upon arrival.

The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas. The HS Contractor shall comply with Attachment 3 for security guard operations.

(3) Floating Line of Demarcation (FLD) at pierside, equipped with anchors and lighting (for night visibility). (Price per meter per day) The floating FLD must be anchored at least 30 meters from ship. Oil booms are acceptable. Mobilization, installation and demobilization will be billed under a separate contract line item number.

The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone. The HS Contractor shall comply with the specification of the FLD in Attachment 5.

(4) Unarmed and manned picket boat or waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities. Continuous coverage is required for the period of performance ordered by the ship or by the Contracting Officer. (Price per patrol craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone. The HS Contractor shall comply with Attachment 7 for picket boat operations and specifications.

(5) Unarmed and manned motorized patrol craft, approximately 5-10 meters in length, with own radio to communicate with ship and local authorities, to escort ship from pilot pickup point to mooring location. (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(6) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and closed on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(7) Dive and Vetting: The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities. The pier will be vetted prior to the ship's arrival. To the maximum extent practicable the HS Contractor shall inspect all watercraft at least 400 feet (125 meters) from the ship. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in picket boats. (Per team per hour, minimum four (4) hours)

ATTACHMENT 7
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate Lot Line Item in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 8
REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32°F and 41°F (0°C and 5°C). Frozen products shall be delivered at 0°F (-18°C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32°F and 41°F (0°C and 5°C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32°F and 50°F (0°C and 10°C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35°F and 55 °F (2°C and 12°C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 9 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)

Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

	ATP (RLU) Counts	Aerobic Plate Count (APC)	Coliform Count	
Environmental swab		100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeast and Mold count
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)

Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]		
Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		

Silver [3]	None Detectable

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	

Campylobacter jejuni	Zero (0) Tolerance[1]

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries.	All other bakery products, including: Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry.

	Pies.	Cookies, unfilled.
	Soft pretzels.	Crackers.
	Won ton wrappers.	Cupcakes, unfilled.
	Filled bakery items.	Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.
		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically:	All other dietary and specialty preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish products.	Baby formula, canned.
	Pickled eggs.	Chips, nacho or potato.
	Frozen dinners.	Creamer, coffee, imitation (non-dairy).
	Pudding novelties, frozen or chilled.	
	Tofu.	Dips.
		Nacho cheese, canned.
		Nutri-why.
		Popcorn.
		Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including:
		Salad dressings.
		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages, including:
	Ice.	
	Bottled water.	Dry ice.
		Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment

number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.

3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products*.
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

QUALITY ASSURANCE SURVEILLANCE PLAN
(QASP)

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Det Singapore will use in evaluating contractor performance under the contract including but not limited to evaluating pre-arrival estimate and port visit cost reporting of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the pre-arrival estimate and port visit cost reporting performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will establish policies and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with the capability to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor contractor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (CO) is responsible for monitoring contract compliance, performing contract administration, and the resolution of any differences between the observations documented by the requiring activity, and the contractor's performance. The CO is responsible for monitoring the contractor's quality assurance program through the QASP (See below)

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

2.3 The contracting officer's representative will be identified to the contractor at the time an order is issued. The CO will also have the responsibility for completing QA monitoring forms (refer to Attachments 10b and 10c) used to document the evaluation of the contractor's reporting and price performance.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED
The contractor shall provide husbanding service support in accordance with the PWS

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and self-assessments from the contractor and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 10c.

4.3 The acceptable quality levels (AQL) located in Attachment 10a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls. The Government will evaluate the total number of ship visits on a quarterly basis to determine if the contractor has met the goals assigned in the QASP.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes from the pre-arrival cost estimate, which is substantiated by the customer and contractor prior to the submission of the final invoices, finally communicated to the contracting officer via the customer service survey form and LOGSSR Reporting Data.

5.2 The Government's QA monitoring, accomplished by the CO, will be reported using the monitoring forms in Attachments 10b and 10c. The forms, when completed, will communicate the customer and COR evaluation of the contractor's performance to the contracting officer.

5.2.1 The CO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited in this QASP to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives (See Attachment 10a) should performance not meet the AQL's.

6.2 The CO will randomly select port visits to evaluate to analyze contractor performance. Within 30 days following the end of each selected order's performance period, the CO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 10b and 10c) will become part of the QA documentation.

6.3 The CO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The CO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the CO as often as required or per the contractor's request. The agenda of the reviews may discuss:
Performance measured by the metrics and trends
Issues and concerns of both parties
Recommendations made by the CO based on contractor information
Issues arising from independent reviews and inspections

6.4 The CO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the CO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. **Notifications**. Consistent with FAR Part 12, the CO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. **Incentive (Negative).** The Contracting Officer will negotiate consideration in instances where the HSP fails to meet performance requirements.
3. **Termination**. If the CO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the CO shall issue a notice of termination, consistent with FAR Part 12.

ATTACHMENT 10a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit pre-arrival cost estimate to ship and Contracting Officer within 48 hours after receipt of LOGREQ (PWS Paragraph 3.15)	95%	E-mails receipts, files review, quarterly, random, observations, complaints	The KO will negotiate consideration in instances where the HSP fails to meet performance requirements.
	Submit final LogSSR cost reports to the NAVSUP LogSSR email address and the Contracting Officer within seven (7) days of each ship's departure (PWS Paragraph 3.15)	95%	E-mail receipts, files review, quarterly, random, complaints	The KO will negotiate consideration in instances where the HSP fails to meet performance requirements.
	LogSSR submittals are accurate and complete	95%	Files review, periodic, quarterly, random, observations, complaints	The KO will negotiate consideration in instances where the HSP fails to meet performance requirements.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION SF 1449 - CONTINUATION SHEET

The following have been modified:

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting ports identified in the lots at Exhibit A.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Lot Line Item Numbers (LLINs).

2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is $20,000.00 of orders. The minimum guarantee applies to the base year period only. The maximum quantity is $20,000,000 of orders per year.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Other Authorized Users are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel conducting business related to a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships.

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband ten (10) ships at one time among the ports identified in the lots at Exhibit A.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The HS

Contractor, as part of its understanding of the requirement, is expected to understand and be familiar with items that are available through HN and Port Authorities.

9. LONG TERM SHIP VISITS

9.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10. UNIQUE/PARTICULAR SITUATIONS:

10.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days' rate for the following days.)

10.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days' rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.
- SUBGROUP SEVEN Authorized Ordering Officers.

13.2. Advance Notice Period for Orders: The HS Contractor shall perform all orders that are issued within the minimum order lead time annotated for each lot in Exhibit A. If orders are issued with less than the required minimum order lead time prior to the start of performance, the HS Contractor shall use its best efforts to provide the required supplies and services in accordance with the order's delivery schedule but shall promptly inform the government if it will not be able to meet the delivery schedule.

13.3. Substitutions: Substitution of ordered LLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted LLINs shall only be charged at a rate not to exceed that of the originally ordered LLIN. An example would be if a 20-passenger bus was ordered, but was not available and the HS Contractor substituted two, 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order or portion of an order is cancelled prior to the number of days specified for the 'Port Minimum Order Lead Time' for each lot in the Exhibit A schedules, the U.S. Government will not be liable for any charges. For any order, or portion of an order, not cancelled prior to the number of days specified for the 'Port Minimum Order Lead Time' for each lot in the Exhibit A schedules, the Ordering activity shall be responsible for any termination costs in accordance with paragraph (h) entitled "Terminal for the Government's Convenience" of the clause entitled "Contract Terms and Conditions – Commercial Items". Any disagreements shall be subject to the Disputes clause of the contract.

13.4.2. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 10.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if

such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the LLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate LLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot, and utilities.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. When the unit of issue is 'DY' and a partial day of service is required, the contractor shall be entitled to bill for one day of service for the partial day of service. For example, if service is provided for 26 hours, the contractor is entitled to bill for 2 days of service at the daily rate. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs).

20. Management Services - Husbanding LLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services LLIN, the Government shall order at least the initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- BARGE: Barges are flat-bottomed displacement ships used for carrying or storing cargo, for separation between vessels and other structures, or as a work platform. Barges may or may not be self-propelled

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CONTRACTING OFFICER (CO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order): A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Fender sizes are specified in the Exhibit A sub-lot line items.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- LLIN: Lot Line Item Number (LLIN). A separate line item for each service or supply required in the contract.

- LLIN NUMBERING: LLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a LLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example LLIN XX11 for Force Protection could be divided into XX11AA for Security Guards and XX11AB Tent, and so forth)

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis
Title of Individual:	Executive Group Chairman/President
Mailing Address:	15D Pandan Road
	Singapore 609266
Tel No:	(65) 6268-5300
Fax No:	(65) 6268-6689
Mobile:	(65) 9798-3155
E-mail address:	leonard@glennmarinegroup.com

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
X	D. OTHER (Specify type of modification and authority) 52.212-4(c) Changes

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

Modification Control Number: nyssnk011111310

1. This modification is issued to update the contract price schedule for Port Klang to convert the following pre-priced supplies and services to port tariff items:

Brow, Mobile Crane services, Forklifts, Fenders, Camels/Breasting/Fendering Barges, CHT, Conex Box Barrier, Floating Barrier/Lines of Demarcation, unarmed motorized patrol craft and Dive/Vetting Services.

2. For the items addressed above, the Contractor agrees to refund the difference between the current prices in the price schedule and the prices that follow from application of the port tariffs for any of the supplies and services for which the Malaysian Government subsequently establishes that Port Klang Cruise Centre does not have legal authority under Malaysian law as of or after the modification's effective date to establish port tariffs.

3. As a result of this modification, the total estimated price is decreased by $111,120.00 from $1,595,753.00 to a new estimated total price of $1,484,633.00.

4. All other terms and conditions remain unchanged.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting ports identified in the lots at Exhibit A.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).
2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is $50,000.00 of orders. The minimum guarantee applies to the base year period only. The maximum quantity is $3,000,000 of orders per year.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months with an option period of six (6) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 24 months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Other Authorized Users are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel

conducting business related to a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships.

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband eight (8) ships at one time among the ports identified in the lots at Exhibit A.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The HS Contractor, as part of its understanding of the requirement, is expected to understand and be familiar with items that are available through HN and Port Authorities.

9. LONG TERM SHIP VISITS

9.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10. UNIQUE/PARTICULAR SITUATIONS:

10.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days' rate for the following days.)

10.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days' rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.

13.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passenger bus was ordered, but was not available and the HS Contractor substituted two, 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS.”

13.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government’s Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

13.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government’s damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot, and utilities.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs).

20. Management Services - Husbanding CLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services CLIN, the Government shall order at least the initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package

PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- BARGE: Barges are flat-bottomed displacement ships used for carrying or storing cargo, for separation between vessels and other structures, or as a work platform. Barges may or may not be self-propelled

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Security Guards and XX11AB Tent, and so forth)

- CONTRACTING OFFICER (CO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order): A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

_____

Tel No: _____

Fax No: _____

Mobile: _____

E-mail address: _____

PERFORMANCE WORK STATEMENT

1. LOTS: The contract is sub-divided into Lots. Lots may be for individual ports or they may include several ports under one Lot. For this contract, the following Lots apply:

- Lot 3 – Puerto Princesa
- Lot 4 – Cebu

2. PRICING.

2.1 Except for Port Tariffs, unit prices for all contract items described below shall be inclusive of all necessary equipment, licensed operators, all liability insurance as required by local law, holiday and overtime costs, customs clearances, and fuel and operating expenses.

2.2 Fixed Prices are required in the Pricing Schedule except where Port Tariff (PT) prices, To Be Determined (TBD) prices, or Not Separately Priced (NSP) have been identified. Unless otherwise provided, these Fixed Prices shall also include performance at night, overtime, Saturdays, Sundays, and Holidays; and services performed under heavy rain, other inclement weather, or service to tankers and ships carrying explosives. These requirements do not include performance during cyclones or typhoons except where ships are required to depart in advance of cyclones or typhoons as part of a typhoon or cyclone evasion plan. They also include all operating expenses including tugs, barges, trucks, personnel, and customs clearances and any other charges unless specifically exempted by the Government.

2.3 Port Tariffs will apply to those services which are based on Port Tariff rates established and controlled by Port Authorities. English translated copies of the Port Tariffs must be submitted to the Supply Officer of the ship entering a specific Port.

2.4 Fees for Husbanding Services cover regular and overtime labor of contractor personnel supporting the ships plus indirect expenses, including all management, overhead and office expenses. The husbanding fees also include costs for arranging supplies and services described herein and include costs associated with attendance at periodic meetings and pre-deployment briefings. The husbanding fees represent total compensation for the contractor except for supplies and services with Fixed Prices.

2.5 Purchase Card Surcharge. The U.S. Government reserves the right to make payment by purchase card. All purchase card surcharges will be identified as a separate entry on each invoice. The Government will reimburse administrative surcharges, if any, for use of the Purchase Card at a rate not to exceed 5% of the purchase price for the underlying service.

2.6 If items are made available free of charge or at less than the quoted price by the Government, host nation, or port authority, only mobilization/demobilization charges, not to exceed the quoted unit price, may be charged. If, for any reason, an item that would otherwise be provided by the Host Nation, Government, or port authority is not available, that item shall be provided by the HSP at the unit price quoted in Exhibit A.

2.7 Order of Priority of Usage: The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or, if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. Where the reasonable cost of mobilization/demobilization for U.S. Government owned equipment exceeds the quoted price of the sub lot line item it is intended to replace, the HS Contractor shall use the least cost alternative to meet the requirement. If, for any reason, an item that would otherwise be provided by the Government, host nation, or port authority is not available, that item shall be provided by the HS Contractor at the price quoted in the Exhibit A pricing schedules.

3. CONTRACT LINE ITEMS.

3.1 FIRST AND SUBSEQUENT DAY HUSBANDING SERVICES (ANCHORAGE AND PIERSIDE) (CLINS XX01 and XX02)

3.1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 3.1.1.6 and 3.1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 3.1.1.6 below) is addressed at paragraph 19.2 of the Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 3.1.1.8. Except when the facts detailed in paragraph 3.1.1.8 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

3.1.1.1. The HS Contractor shall communicate with the ship and FISC Detachment Singapore to coordinate requirements.

3.1.1.2. The HS Contractor shall order requested services and supplies.

3.1.1.3. LOGREQ Initial Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore a LOGSSR cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the LOGSSR spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and FISC Detachment Singapore Contracting Office within two (2) working days after receipt of the LOGREQ, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs. The LOGREQ, when submitted by, under authority of, or on behalf of an AGR, is an order for pre-priced items under this contract. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

3.1.1.4. These estimates shall be provided for all authorized users including US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

3.1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

3.1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

3.1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

3.1.1.8. The HS Contractor shall assist the ship's Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship's advance party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship's advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

3.1.2. POST-ARRIVAL HUSBANDING DUTIES

3.1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location, either at pierside or at anchorage.

3.1.2.2. The HS Contractor shall install all ordered equipment upon the ship's arrival. This equipment includes but is not limited to fenders, curb caps, steps, and telephones.

3.1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

3.1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

3.1.2.5. The HS Contractor shall provide the SUPPO upon ship's arrival a copy of the Exhibit A of the contract, the Performance Work Statement, and applicable port tariffs.

3.1.2.6. Laundry Services:

3.1.2.6.1. The HS Contractor shall arrange for laundry and dry cleaning services to be available for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure. If the ship requires laundry or dry cleaning services, such services will be ordered from the laundry and dry cleaning vendor by an AGR.

3.1.2.7. Interpreter Services:

3.1.2.7.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

3.1.2.8. Mail Delivery Services: The HS Contractor shall provide daily mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

3.1.2.9. Morale Welfare and Recreation (MWR) Services:

3.1.2.9.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

3.1.2.9.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

3.1.2.10. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders from an AGR, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s).

3.1.2.11. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms.

3.1.2.12. The HS Contractor shall facilitate the ship's timely departure.

3.1.2.12.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

3.1.2.12.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

3.1.2.12.3. The HS Contractor shall remove all provided equipment.

3.1.2.13 UNOFFICIAL REQUIREMENTS OR PERSONAL REQUESTS:

3.1.2.13.1 The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under auspices of this contract.

3.1.3. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract as further described in the contract section titled "Invoices and Payments".

3.1.4. LogSSR Report: Prepare and submit an "Actual Cost Report" in accordance with PWS paragraph 3.15.

3.2 TRASH REMOVAL (CLIN XX03)

3.2.1 Trash removal service is the collection and disposal of refuse (i.e., trash) including liquid, semi-liquid, or solid garbage. Refuse does not include explosives and incendiary waste, or waste contaminated by medical and radiological processes.

3.2.2 The HS Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse. The HS Contractor shall provide dedicated refuse bins to the ship. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins. The HS Contractor shall immediately clean up any spilled refuse. The HS Contractor shall properly dispose of all collected refuse.

3.2.3 For ships at pier side, the HS Contractor shall place containers or trucks within twenty-five (25) meters of the ship or as permitted by port regulation, or barges alongside the ship. The HS Contractor shall empty the containers or barges when full and shall assure their continuous availability for trash disposal.

3.2.4 For ships at anchorage, the HS Contractor shall remove trash at the times agreed to by the HS Contractor and Supply Officer. The frequency of removal shall be as follows:

SHIP CLASS	DAILY FREQUENCY
I, IA, IB	1
II	2
III	3
IV and V	Continuously Via Dedicated Barge when permitted

3.2.5 For trash collection at anchorage, the trash barge shall be available 24 hours a day (where not contrary to law or port regulation) with suitable self-fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.2.6 For trash collection by barge, the HS Contractor shall provide trash barges/scows (with tug service if barge is not self-propelled) for ships at anchorage. The barges shall be completely empty at time of arrival at the ship. In situations where an empty barge is not available, the contractor shall provide a system to measure the volume of trash deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro

rata" share of the trash. All trash barges/scows shall be properly fendered to prevent damages to U.S. Government vessels. The HS Contractor shall have ready access to sufficient barges and equipment to support at least two (2) ships at anchorage simultaneously. The barge's crew shall be entirely responsible for the tending of lines and for barge's security. The movement of trash from the ship to the barge shall be performed with care by the ship's sailors and in the manner ensuring the safety of the HS Contractor's crew and barges. Any instances of unsafe practices shall be brought to the attention of the ship's Commanding Officer, to ensure that corrective and preventive action is taken.

3.2.7 In instances of bad weather or emergency where the ship must depart on short notice, the HS Contractor shall remove barges within four hours of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the HS Contractor at least four (4) hours in advance for the barge pick-up at no additional cost to the U.S. Government.

3.2.8 The HS Contractor shall submit, as an attachment to the invoices, a document that certifies the quantity collected and the name of the disposal plant where the trash will be disposed. The HS Contractor is also responsible to follow any environmental regulations required by each country. The HS Contractor is required to keep all disposal certificates and shall make them available to FISC Yokosuka upon request.

3.2.9 Whether at anchor or pierside, U.S. Government personnel will dump the trash on the barges or in the containers.

3.2.10 Any spillage of refuse in the course of the removal operations shall be cleaned up immediately by the HS Contractor. Refuse containers, when used and when emptied, shall be returned to their original position with the lids (if any) replaced thereon.

3.2.11 The HS Contractor shall be paid based on the ACTUAL CUBIC METERS of trash removed. The HS Contractor shall be entitled to bill for 60 CM where the actual volume of trash removal is less than 60 CM (per order).

3.2.12 Where trash is required to be segregated, the Ordering Activity shall be required to segregate the material at the time of disposal. The HSP shall be responsible for providing separate containers for each vessel, clearly marked with the required categories and for informing the Ordering Activity, upon arrival, that segregation is required. If the Ordering Activity does not segregate trash as required, the HSP shall inform the Ordering Activity and Logistic Support Representative (LSR) prior to departure and bill for the cost of trash segregation within 48 hours after the vessel's departure.

3.3 COLLECTION, HOLDING AND TRANSFER (CHT) (CLIN XX04)

3.3.1 The HS Contractor is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships throughout the area covered by this contract. The HS Contractor shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The HS Contractor shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence upon ship's arrival whether, at anchor or pierside. The HS Contractor shall pre-position CHT barges, when necessary, in accordance with force protection or other requirements.

3.3.2 The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

3.3.3 The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

3.3.4 The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT. The Government reserves the right to use its own metering device to verify measurement of sewage discharge. Invoices submitted for payment for this service shall contain a statement describing the method used in determining liquid quantities offloaded from the ship.

3.3.5 The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

3.3.6 The HS Contractor shall properly dispose of all sewage. CHT collection, removal and disposal shall be priced based on the following conditions:

i. (XX04AA) – CHT BY TRUCK: The husbanding HS Contractor shall provide services when the visiting ship is at pierside.

ii. (XX04AB) – CHT BY BARGE: The HS Contractor shall provide services when the visiting ship is at anchorage or the port authority has issued a directive stating that service must be performed by barge or the barge has been ordered by the ship. The HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.3.7 The CHT service shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the U.S. Government. In those limited number of cases where this is not possible, the contractor shall provide a system to measure the volume of sewage deposited in the barge by the U.S. Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT.

3.3.8 The HS Contractor will be guaranteed a minimum daily quantity of 60 cubic meters for providing these services even if the actual cubic meters of CHT removed is lower than 60 cubic meters. Note: 264.2 gallons = 1 CM (cubic meter).

3.3.9 The Government reserves the right to independently verify the actual volume of CHT discharged using a certified flow measuring device.

3.3.10 The HS Contractor shall request the ship's personnel to verify all removal figures at time of CHT collection. The HS Contractor shall follow any environmental regulations required by each country. If the ship concurs with the volume, the ship will pay for the entire amount. If the ship contests the volume, the ship will pay for the amount it actually believes was pumped or 60 cubic meters, whichever is greater. The HS Contractor shall submit a request to FISC for the difference, accompanied by disposal certificates. FISC will investigate and arrange for payment of any additional amounts that are determined to be due.

3.3.11 The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the HS Contractor's report in writing. The HS Contractor is also responsible to keep all disposal certificates and shall make them available to Contracting Officer upon request.

3.4 YOKOHAMA OR COMPARABLE TYPE FENDERS (CLIN XX05)

3.4.1 The HS Contractor shall furnish Yokohama or comparable type fenders for all classes of ships in accordance with the Schedule of Supplies and Services. Fender size is not specified as this is a performance based service. Fenders provided shall be appropriate and safe for the class of ship and pier configuration combination (eg. all class II vessels shall be billed under LINE ITEM XX05AB). The fenders quoted for each sub lot line item shall be safe and useable for the intended class of ship at all locations specified by the lot. In the schedule there is a sub contract

line item (SUBLINE ITEM) for a daily rental fee PER Yokohama or comparable type fender, and there is another SUBLINE ITEM for all costs associated with installation, and removal of one fender, as well as round trip costs associated with transport of the fender from another port, if required.

3.4.2 Rental is on a daily (24-hour) basis, per fender. Installation, removal, and transportation are charged as a "lot" per fender. The HS Contractor shall be responsible for securing the fenders to the pier.

3.4.3 The HS Contractor shall provide fenders with a minimum of two (2) mooring lines.

3.4.4 Sub lot line item XX05AG is applicable only to submarine fenders. Sub lot line item XX05AA shall be used for all other class 1 vessels. Recognizing that mobilization/demobilization costs for submarine fenders (XX05AG) vary significantly from those of other type fenders, transportation charges for submarine fenders shall not be subject to the quoted transportation charges of XX05AF. Instead, all transportation, storage, setup, mobilization and demobilization charges associated with submarine fenders (XX05AG) shall be included in the quoted price of this sub lot line item.

3.5 FRESH POTABLE WATER (CLIN XX06)

3.5.1 Potable water is defined as fresh drinking water of a quality not less than that prescribed in:

3.5.2 Code of Federal Regulations Title 21, Volume 2, Part 165.110 (21CFR165).

3.5.2.1 These documents are incorporated by reference with the same force and effect as if they were given in full text. Full text may be accessed electronically at these websites: http://www.epa.gov/OGWDW and http://www.tdh.state.tx.us/bfds. The HS Contractor shall be responsible for identifying and providing water from a source that meets U.S. Government requirements. The U.S. Government reserves the right to accept deliveries of potable waters that do not comply with above specifications, and to bring the water up to specification standards through chlorination.

3.5.2.2 The HS Contractor shall provide for the delivery of fresh potable water to the ships as ordered. The HS Contractor shall be paid for the amount of water ordered by the vessel. The barges, tankers or trucks and equipment used for transfer, storage and transportation of potable water shall not be used for cargo other than potable water, and must be equipped with independent pipe systems and working, certified metering devices.

3.5.2.3 Source of Water. Water deliveries are to be made from sources that meet the requirements of paragraph 3.5.2.1 above. If the water source does not meet the requirements of potable water, the HS Contractor shall be required to provide water from an alternate approved source at no increase in the contract price.

3.5.3 The HS Contractor shall be paid based on the ACTUAL METRIC TONS of potable water received on the ship. The Government reserves the right to use its own metering device to verify measurement of potable water delivered to the vessel.

3.5.4 If potable water delivery is via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship. The HS Contractor shall pre-position water Barges, when necessary, in accordance with Force protection or other requirements. If sea state, weather, or other conditions require any additional fendering between the barge and the ordering vessel to supplement the barge's self-fendering system so as to prevent damage to the vessel, the additional fendering shall be provided by the HS Contractor at no additional charge.

3.6 PILOTS (CLIN XX07), TUGS (CLIN XX08), LINEHANDLERS (CLIN XX09)

3.6.1 The HS Contractor shall arrange pilots, tugs, and line handlers as ordered. The HS Contractor shall coordinate with port authorities, as necessary, to ensure that the services are available at the times requested. It should be noted that the port authority or other authorized sources provide these services, and are, therefore, to be priced in accordance with current tariff rates.

3.6.2 The HS Contractor shall provide tugs to bring ships to and from berthing locations. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

3.6.3 Only if pilots, tugs, or line handlers are not available through the port authority, the HS Contractor shall use commercially available sources.

3.7 TRANSPORTATION SERVICE (BUS AND VEHICLE) (CLIN XX10)

3.7.1 GENERAL REQUIREMENTS :

3.7.1.1 All drivers must be fully qualified and possess valid driving licenses. Drivers shall be familiar with local area and conversant in English. All vehicles shall be registered, licensed and insured (including adequate passenger liability insurance). The HS Contractor is responsible for delivering all cargo and personnel to the correct location on schedule.

3.7.1.2 The HS Contractor shall provide vehicles that have been properly maintained and serviced. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government shall have the right to reject the vehicle for performance of services. The HS Contractor shall ensure that each vehicle is jointly inspected before and after a trip by the HS Contractor and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

3.7.1.3 If a vehicle is not operable when required under this contract, the HS Contractor shall provide, at no additional expense to the U.S. Government, a replacement vehicle within two (2) hours that complies in all respects with this contract.

3.7.2 BUS SERVICE

3.7.2.1 The HS Contractor shall provide air-conditioned bus services on an hourly rate basis and bill under LINE ITEM XX10AA. The hourly rate shall include one driver or operator, any additional helpers or crew required by local authorities, all insurance, fuel, holiday surcharges, overtime, and all other operating expenses. Any tolls for long distance trips (over 50 kilometer radius) will be reimbursed at cost.

3.7.2.2 The HS Contractor shall ensure that the bus is in sound mechanical condition and meets all safety standards required by local laws and regulations. Further, the bus shall be in a clean condition when presented for service and shall be free of debris. The bus shall be sufficiently clean so as not to soil passengers, their clothing or possessions with dirt, grease, oil, or other matter.

3.7.2.3 In the event of a bus breakdown, the HS Contractor shall provide within two hours, at no additional expense to the U.S. Government, a replacement bus complying in all respects with this contract.

3.7.2.4 Any personal articles or items found on the bus after completion of each trip shall be turned over to the ship's Ordering Officer.

3.7.2.5 The HS Contractor shall be responsible for ensuring that the HS Contractor and an authorized representative of the U.S. Government jointly inspect before and after a trip each bus. The U.S. Government will not consider any claim for damage to a bus, which has not been inspected.

3.5.2.6 The minimum bus capacity shall be 40 passengers.

3.5.2.7 A minimum daily price of four (4) continuous hours shall apply for each bus ordered less any time associated with bus breakdown or getting lost.

3.5.2.8 Drivers must be familiar with the area, have an appropriate driver license, and speak English. In the event the driver is unable to speak English, the contractor shall furnish an English speaking rider on the bus.

3.7.3 VEHICLE RENTAL SERVICE

3.7.3.1 Vehicle Specifications, Maintenance, and Malfunctions

3.7.3.1.1 The HS Contractor shall furnish "new" air-conditioned vehicles (i.e., not more than five years old), in good order and condition and otherwise in full compliance with best commercial practices and local laws and regulations.

3.7.3.1.2 Sedans or SUVs shall have a minimum capacity of four (4) passengers and 1600cc engine.

3.7.3.1.3 In the event a "new" vehicle is not available in certain countries, the contractor shall contact the Contracting Officer to request a waiver from the requirement and provide background information as to why a waiver would be appropriate. The Contracting Officer will consider, and grant or refuse, the request. Vehicles shall be priced on a daily rate, except as noted below. They shall be equipped with front and back seat belts, an emergency triangle, spare tire, jack and complete set of tools for changing a flat tire, as well as any other equipment required by local authorities. Upon initial rental, the gasoline tank shall be full. The prices for vehicles rented are based upon an assumption that the vehicles will be returned with an empty tank of gas. Therefore ships will be charged for a full tank of gasoline at the time of rental. There shall be no surcharge applied to the commercial price of the fuel. Vehicles can be returned with any amount of gasoline. Ships shall not be responsible for returning the vehicle with a full tank of fuel, and the HS Contractor shall not be obligated to credit the ship for the remaining fuel.

3.7.3.1.4 The HS Contractor shall provide vehicles that have been properly maintained and serviced, including all motor oils, lubricants, antifreeze, coolants and other fluids such as windshield washer fluid, and be responsible for all emergency repairs and services.

3.7.3.1.5 Should any vehicle break down while in the U.S. Government's possession, the HS Contractor shall replace it with another vehicle of the same or larger size as quickly as possible, but in any case no more than two (2) hours later. The replacement shall take place either at the point of breakdown or at the HS Contractor's office closest to that point; whichever is more convenient for the U.S. Government. All repair or replacement costs, including transportation, shall be at the HS Contractor's expense. The U.S. Government shall be credited an hourly rate, pro-rated on the daily rate, for the rental cost between breakdown and vehicle replacement.

3.7.3.2 Substitution of Vehicles

3.7.3.2.1 If the HS Contractor does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the HS Contractor shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a Group B car is ordered but unavailable, and if no other Group B vehicle is available, the HS Contractor shall furnish a higher group vehicle at the price listed for the Group B vehicle originally ordered.

3.7.3.2.2 In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

3.7.3.3 General Description of Vehicle Types

3.7.3.3.1 Medium-size Sedan (Group "B"): 2 - 4 doors; 4 - 5 passenger capacity; air conditioning; minimum 1600 cc engine sedan.

3.7.3.3.2 Passenger Van (Group “M”): 9-passenger capacity; air conditioning; minimum 2000cc engine.

3.7.3.3.3 Executive Sedan with Driver (Group “Y”): 4 doors; 5-passenger capacity; air conditioning; minimum 1600 cc engine sedan. This group requires an executive sedan and shall be provided with a driver. Drivers must be familiar with local area, and must speak English. Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. No individual driver shall be required to drive more than 8 hours. Drivers must not have been driving within the previous 8 hours. Rentals less than 24 hours will be charged on an hourly pro-rata basis, based on the daily rate, with the HS Contractor entitled to a minimum charge of 4 hours. The HS Contractor shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations by the provided driver. The daily rate shall be inclusive of all necessary equipment, licensed drivers, all liability insurance as required by local law, holiday and overtime costs, fuel, all other operating expenses, and all other incidentals. The U.S. Government will reimburse the HS Contractor for additional costs in two cases: for highway tolls, and for the driver’s overnight accommodation up to $120.00 or equivalent local currency, when required by U.S. Government business such as travel to another city, and upon presentation of an original invoice (using the online pricing application).

3.7.3.3.4 15-Passenger Buses with Driver (Group “Z”): All requirements concerning the rental of a vehicle with the driver described above in the “Executive Sedan with Driver” shall apply to this paragraph also.

3.7.3.4 Insurance and Liability.

3.7.3.4.1 The prices for vehicle rental services, as set forth in the schedule, shall be subject to the conditions below.

3.7.3.4.2 The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cause, except where the loss or damage is caused by the willful and wanton negligence of the U.S. Government employee.

3.7.3.4.3 The HS Contractor and any Subcontractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, resulting from the fault, negligence, or wrongful act or omission of the HS Contractor, its subcontractors, its agents, or employees.

3.7.3.4.4 The HS Contractor shall provide and maintain at its expense, all vehicle operator's insurance required by the law of the country in which the vehicle is to be operated. All necessary insurance certificates shall be provided with the rental vehicle. Such insurance shall include all coverage required by law for bodily injury, collision, and property damage liability. The HS Contractor shall be liable for, and shall indemnify and hold harmless the U.S. Government, its agents, and its employees against all actions or claims for loss of or damage to property or the injury or death of persons, within the required policy limits, arising out of or in connection with the rental or use by the U.S. Government, its agents or its employees of any vehicle under this contract.

3.7.3.5 Traffic Violations and Fines. Each vehicle operator shall be responsible for payment of fines and legal costs incurred as a consequence of the violations of traffic laws or regulations.

3.7.3.6 Mileage and Deposit Charges. There are no mileage or deposit charges for the vehicles rented under this contract for all mileage travelled within a 250 kilometer radius of the ship berth (or departure point on the pier if ship is at anchor). Outstation charges, surcharges, or additional mileage rates shall not be assessed for travel within the 250 kilometer radius as the vehicle is rented on a daily basis with usage in accordance with the ordering activity’s needs. The HS Contractor shall be entitled to an additional half days’ rental fee at the daily rate for each day in which vehicle trips are required beyond the 250 kilometer radius described above.

3.7.3.7 Time Periods of Rental. Rental time shall begin once the vehicle and driver are available for use alongside the Ordering Activity. The daily rate is defined as 24 consecutive hours. No individual driver shall be required to drive more than 8 hours straight. Drivers must not have been driving within the previous 8 hours.

3.7.4 LIGHT TRUCKS (LOT LINE ITEM XX11AI)

3.7.4.1 The HS Contractor shall provide covered, lockable trucks with a driver to load/off load cargo and mail. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and offloading.

3.7.4.2 The HS Contractor shall be responsible for security and prevent loss/damage/destruction of cargo and mail.

3.7.4.3 The HS Contractor shall return all items left in rental vehicles to the ship's Ordering Officer.

3.7.4.4 The HS Contractor shall obtain written acknowledgement of vehicle service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

3.7.4.5 The U.S. Government shall not be liable for loss or damage to rented vehicles in any amount regardless of the cost, except where the loss or damage is cost by the willful and wanton negligence of the U.S. Government employee.

3.7.4.6 Rental time shall begin once the vehicle and driver arrive at the requested location, and after the driver has notified the ship's personnel of his arrival. The daily rate is defined as 24 consecutive hours. No individual driver shall be required to drive more than eight (8) hours. Drivers must not have been driving within the previous eight (8) hours. Rentals less than 24 hours will be charged on an hourly pro-rata basis, based on the daily rate, with the HS Contractor entitled to a minimum charge of four (4) hours. The HS Contractor shall be responsible for payment of any fines and legal costs incurred as a consequence of the violations of traffic laws or regulations. The daily rate shall be inclusive of all necessary equipment, licensed drivers, all liability insurance as required by local law, holiday and overtime costs, fuel, all other operating expenses, and all other incidentals.

3.7.4.7 The HS Contractor shall provide vehicle service with qualified drivers for official government business related to port visits.

3.7.4.8 The HS Contractor shall provide one-way transfer vehicles with drivers to transfer cargo between a designated pick-up point and a specified destination within a 250 kilometer radius of the ship berth (or departure point on the pier if ship is at anchor). Outstation charges, surcharges, or additional mileage rates shall not be assessed for travel within the 250 kilometer radius as the vehicle is rented on a daily basis with usage in accordance with the ordering activity's needs. The HS Contractor shall be entitled to an additional half days' rental fee at the daily rate for each day in which vehicle trips are required beyond the 250 kilometer radius described above.

3.7.4.9 The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

3.7.4.10 The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

3.7.4.11 If the unit of issue is by "Day", then the rental period shall constitutes 24 hours.

3.8 FORCE PROTECTION SUPPLIES AND SERVICES (CLIN XX11)

3.8.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security

staff. If the HN is supplying FP assets and/or services at no cost or HN rate, the HS Contractor must verify that they are available and are scheduled to show up on time. When the HS Contractor obtains a FP supply or service from the port or local government-type organization and the price of that item is set by a published price list, the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor pays for the item, whichever is less. The HS Contractor shall provide supporting documents from the HN for verification to the Supply Officer. The HS Contractor shall not follow directions of the ship's Security Officer or Advanced Party FP Officer that vary from these contract requirements without first confirming that direction with the AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 3.8.4 below.

3.8.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

3.8.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

3.8.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to readily identify personnel while they are working.

3.8.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on its employees and the employees of its subcontractors with local or national police departments or other government organizations. The HS Contractor shall not use employees or employees of a subcontractor if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

3.8.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

3.8.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

3.8.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

3.8.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

3.8.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

3.8.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

3.8.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

3.8.1.6. Stand-Off Distances:

3.8.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

3.8.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

3.8.1.7. Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. To define the scope of this requirement, FP signage must be placed at intervals not to exceed every 200 ft. on the perimeter of the visiting ship. Specific locations where the signs are to be posted are at the discretion of each ship. Provision of these signs is a cost to be included in the management services fee.

3.8.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

3.8.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state “Restricted Area, Do Not Enter”
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

3.8.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor’s written policy shall describe the required measures to protect ship schedule information.

3.8.2 Security Guards Services (CLIN XX11)

3.8.2.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

3.8.2.2. The HS Contractor shall comply with Attachment 3 for security guard operations.

3.8.2.3. All security guards shall be armed.

3.8.3. Beach Guard Office or Tent

3.8.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship’s personnel while performing security checks on personnel, baggage, and vehicles.

3.8.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO2 fire extinguisher shall be provided and kept fully charged.

3.8.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language providing notice about the security checks that will be conducted in the immediate area.

3.8.4. Deleted

3.8.5. Non-Contract FP Measures: The HS Contractor is prohibited from providing any FP measures that are not included in this contract, whether requested by the ship or recommended by its contractor, unless approval is obtained in advance from the FISC Detachment Singapore Contracting Office. As part of its request for approval, the HS Contractor must explain what the added FP service will include and its understanding of why it has been requested. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made by FISC Detachment Singapore Office, then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

3.8.6. See Attachment 3,5,6 & 7 for additional force protection requirements.

3.9 MATERIAL HANDLING (UP TO 150 LBS) (CLIN XX12)

3.9.1 The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

3.9.2 The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

3.9.3 Shipping documents shall be labeled "SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

3.9.4 The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

3.9.5 The HS Contractor shall receive the package from the ship and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

3.9.6 The HS Contractor shall deliver the package to the ship the day of arrival in port or the following morning. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative.

3.9.7 The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or as otherwise directed by the ship.

3.10 BROWS (CLIN XX13)

3.10.1 Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The HS Contractor shall provide the brows specified in the schedule as ordered by the ship. A range of brow sizes is provided in each of the sub lot line items of lot line item XX13. All brows provided by port authorities, host nation, or US Government shall be billed at cost as port tariff items. Mobilization, demobilization, setup and placement shall be included in the proposed unit price of all XX13 sub lot line items. In cases where brows are provided by port authorities, host nation, or US Government free of charge, at reduced cost, or for mobilization/demobilization costs only; these costs will be reimbursed without additional fees or markup.

3.10.2 Due to the height difference between the submarine deck and pier, the HS Contractor provided submarine brow (must afford personnel a smooth and safe transit when entering or exiting the submarine deck. The submarine brow must be capable of supporting shore power cables without damaging the cable.

3.10.3 The HS Contractor shall be entitled to bill for 4 hours of usage under this line item when actual usage is less than 4 hours (per order). Billing for brows shall be calculated up until the scheduled time of departure. Discrepancies, if any, between the number of hours billed at the pre-sailing visit and the actual number of hours used shall be invoiced and paid in accordance with the procedures in OC-1, Invoices and Payments. The order of priority of usage in paragraph 2.7 applies.

3.11 MOBILE CRANE SERVICES (CLIN XX14)

3.11.1 The HS Contractor shall provide mobile crane services (shore crane) with operator(s). The HS Contractor shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HS Contractor shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each mobile crane ordered. Crane services under this Line Item are for land cranes only.

3.12 FORKLIFT SERVICES (CLIN XX15)

3.12.1 The HS Contractor shall provide forklift services with operator(s). The HS Contractor shall co-ordinate with local Port Authorities, as necessary, to ensure that the services are available as required and at the times requested. Upon the Supply Officer's request, the HS Contractor shall provide information concerning forklift/lifting capacity. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The forklifts shall be suitable for their intended use and shall be operated with due care and within all operating safety limits. The HS Contractor shall be entitled to invoice and be paid a minimum daily price of four (4) continuous hours for each forklift ordered.

3.13 TELEPHONE SERVICES AND COMMUNICATION EQUIPMENT (CLIN XX16)

3.13.1 Cellular Telephone Services (XX16AA): Daily charges shall be inclusive of delivery, removal, provision of 110V to 220V transformers, adapters and extra batteries. Activation, auto roaming, and long distance accounts shall be included under XX16AA. The HS Contractor shall have readily available a minimum of 10 cellular telephones at a given time. Each mobile phone provided shall include an operating manual/instruction with published rates for usage. Airtime for mobile phones shall be included under XX16AB. Usage charges associated with mobile phones (XX16AB) will be the actual charges computed in accordance with the local or national tariff.

3.13.2 SIM cards with prepaid airtime shall be provided where the ship or operating unit has mobile phones and desires only SIM cards for use in the specific port area. SIM cards provided under LINE ITEM XX16AC shall include activation of the SIM card. HS Contractors shall not be obligated to provide quantities of sub lot line item XX16AC in excess of quantities permitted by host nation law or regulation.

3.14 PORT TARIFFS NOT OTHERWISE SPECIFIED (CLIN XX17)

3.14.1 Port tariffs (PT) billable under XX17 include all PT items for which a specific sub-line item is not specified in the Exhibit A.

3.14.2 The HS Contractor shall also provide all original documents with any invoices for port tariff items which have been provided to the ship for certification by the ship's Supply Officer prior to departure. Invoices for port tariff items not available prior to the ship's departure shall be presented for payment in accordance with OC-1.

3.15 COST REPORTING (CLIN XX18)

3.15.1 All billing and cost reporting shall be made in the units specified in the respective contract Line Items.
3.15.2 The HS Contractor shall enter and report ALL expenditures under this contract, regardless of customer or ordering activity, into LogSSR.
3.15.3 The pre-arrival cost estimate is part of the Cost Reporting Line Item.

3.15.4 LogSSR Reporting(XX18AA)
The Contractor shall fully participate in the use of the Logistics Support Services Repository (LogSSR) web-based system. LogSSR replaces all previously used reporting processes such as legacy web-based systems like Cost Reporting and Forecasting Tool (CRAFT).
Upon award, the Contractor shall utilize the LogSSR to submit all reports and documentation related to the ship's visit. LogSSR can be accessed through the NAVSUP One Supply website at https://www.navsup.navy.mil/onesupply, redirected through www.navsup.navy.mil/logssr or directly at the official website of https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(1) LogSSR access and input.

(a) At the start of the contract period of performance, the Contractor shall enter the final itemized port cost information directly into the LogSSR database (Actual Cost Report) and email all corresponding documentation (Initial Cost Estimate Report, final invoices, and supporting documentation required by the contract). External Certification Authority Public Key Infrastructure (ECA PKI) is not required for entry, but no access to the contractor's information is accessible unless obtaining an ECA PKI.

(b) Contractors can obtain access to their submissions by obtaining an ECA PKI per the NAVSUP One Supply guidelines and requesting access through the website. Information can be obtained through the LogSSR website at https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(2) LogSSR functionality.

(a) This system is designed to gather all reports and documentation related to the ship's visit, beginning with the Initial Cost Estimate (referred to in this solicitation as the 'pre-arrival cost estimate') to the Actual Cost Report. All supporting documentation will be submitted by email to navsup_hq_logssr@navy.mil in PDF format (Adobe Acrobat) when the port visit information is entered into LogSSR. Although the pre-arrival cost estimate is a separate reporting requirement, a copy of this report shall also be submitted as part of the Actual Cost Report documentation described in paragraph (b) below. The Documentation is discussed below:

(b) Actual Cost Report:

(1) The Contractor shall create the Actual Cost Report in the LogSSR website directly, within seven calendar days from completion of the ship's visit . The contractor shall also send a copy of the order (i.e. SF 1155 or 1449), a copy of any Initial Cost Estimates, a copy of the logreq, and all the contractor's invoices and supporting documentation required by the contract as PDF files to theLogSSR email address of navsup_hq_logssr@navy.mil and to the email address specified at the time of contract award for each region concurrent with the creation of the Actual Cost Report in LogSSR.. The Contractor shall identify the line items as actual or estimated. This option is for those line items where the Contractor has not received the actual invoice before the ship leaves port, i.e. telephone bills. The Contractor shall include all port costs paid by each ship for which the Contractor provides husbanding services. The term "port costs" includes all supplies or services identified in the section of the contract titled,

SUPPLIES/SERVICES AND PRICES, supplies or services furnished under another FISC contract, and any other charge paid by the ship during the port visit.

(2) For ships that do not have payment capabilities, the Contractor shall send the signed DD Form 1155, invoices and the additional documents required clearly indicating that a payment is pending to the and to the email address specified at the time of contract award for each region and to the LogSSR email address of navsup_hq_logssr@navy.mil.

(3) Any changes to an Actual Cost Report (i.e. finalize the charges made on an estimated amount) shall be forwarded by e-mail to and to the email address specified at the time of contract award for each region and to navsup_hq_logssr@navy.mil email account as PDF file within seven calendar days of the change. The FISC Detachment Singapore contracting office will update changes to the LogSSR.

(4) The Actual Cost Report and supporting documentation will be visible in the LogSSR website by the government personnel with validation authority. Final reports of an HSP representative can be accessed through the website only by obtaining an ECA PKI that will provide access only to the HSP's submitted information.

3.15.5 Pre-arrival Cost Estimate Report (XX18AB)

(1) The Contractor shall prepare an Initial Cost Estimate Report (referred to in this solicitation as the 'pre-arrival cost estimate') in response to all orders issued to the Contractor by any method identified under "ISSUANCE OF ORDER" in Contract Terms and Conditions – Commercial Items. The orders will be provided to the Contractor by ships, activities and individuals identified in the contract. The Initial Cost Estimate will include estimated prices for all items ordered. It will not be sufficient to simply state that the estimated price is "per FISC contract" or "per Port Tariff". The Contractor shall utilize Pre-arrival Cost Estimate Report format included in Exhibit B.

(2) The Contractor shall send the Initial Cost Estimate Report by email to the requiring customers authorized to use this contract and to the and to the email address specified at the time of contract award for each region within 48 hours after receipt of the LOGREQ/order. In the situation where the Contractor receives the logreq with less than two working days prior to the arrival of the ship, the Contractor shall make every effort possible to provide the cost estimate prior to the ship's arrival, but in no case, more than 48 hours after receipt of the LOGREQ.

(3) Any changes to an Initial Cost Estimate Report shall be forwarded by email to the requiring customers authorized to use this contract and to the email address specified at the time of contract award for each region .

(4) These estimates shall be provided to any other requiring customers authorized to use this contract based on the customer's request.

(5) In addition to the initial cost estimate, the Contractor shall provide any additional information and respond to the activity authorized to act on behalf of the ship, such as the Port Services office or the DAO.

NOTE: Before submission of reports or any other data to the FISC Contracting Office via electronic transmission or any other data media, the Contractor shall scan all documents with current anti-virus software to ensure computer virus free transmission. The LogSSR server scans all reports for computer viruses before inclusion in the databases. Any reports received containing computer viruses will be immediately returned to the Contractor.

3.16 WATER FERRY/TAXI SERVICE (CLIN XX19)

3.16.1 The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the fleet landing. At the commencement of service, the HS Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule. The HS Contractor shall provide water taxi service when the vessel is expected to be at anchorage for twenty-four (24) hours or more. Water taxi service shall be always available, with the exception of inclement weather, during the two (2) one-hour meal breaks and during refueling. At the

commencement of service, the HS Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule.

3.16.2 The hourly rate for taxi water service shall include a minimum of two (2) qualified operators (a driver and one other operator), any other helpers or crew members required by local authorities, all insurance, fuel, holiday surcharges, overtime, and other operating expenses. Operator qualifications are set forth in paragraph 3.16.15 below.

3.16.3 Service begins when the first water taxi is alongside the designated pick-up point and ends when the last passenger disembarks from the water taxi at the designated drop-off point as ordered by the ship. However, when required to arrive early for inspection as a force protection measure, service begins at time of inspection. The HS Contractor shall be entitled to a six (6) hour minimum rental fee in cases where actual usage is less than 6 hours (per order).

3.16.4 Cancellation. The Ordering Activity will notify the HS Contractor at least forty-eight (48) hours in advance for cancellation of service. If the service is cancelled with less than forty-eight (48) hours notice, the Ordering Activity shall be responsible for cancellation costs unless cancellation is required due to adverse weather conditions (described in paragraph 3.16.13 below). A cancellation fee shall not be assessed in the event service is cancelled with less than 48 hours notice due to adverse weather conditions.

3.16.5 If the HS Contractor cannot provide the size of water taxi ordered, the HS Contractor shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event the ship will be charged for the size of the water taxi ordered. For example, if one (1) 250-pax water taxi is ordered and is not available, then two (2) 125-pax water taxis shall be provided for the rate of one (1) 250-pax water taxi, if acceptable to the Ordering Officer.

3.16.6 The HS Contractor shall ensure that the water taxi is in sound mechanical condition and meets all safety standards required by local laws and regulations to preclude breakdown and injury. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of the port or the country in which the port is located. Apart from compliance with local laws and regulations, the HS Contractor shall meet all additional requirements as set forth throughout the PWS. Water taxi shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, and fitted for service required. Further, water taxi shall be in a clean condition when presented for service and shall be free of debris. The water taxi shall be sufficiently clean so as not to soil passengers, their clothing, or possessions with dirt, grease, oil, or other matter. If the water taxi does not meet the requirements of this paragraph as determined by the Ordering Officer, the U.S. Government shall have the right to reject the water taxi for performance of services.

3.16.7 The HS Contractor shall ensure that all water taxis are fully licensed, registered, and insured, including adequate liability insurance, in accordance with local laws and regulations.

3.16.8 Each water taxi shall be equipped with at least one clean and serviceable life jacket for each passenger and crewmember, and all jackets shall be stowed in a readily accessible place.

3.16.9 All water taxis used by the HS Contractor shall provide overhead covering.

3.16.10 Before the commencement of any services under this contract, the HS Contractor shall make the water taxi available to the Ordering Vessel's Commanding Officer or designated representative for inspection.

3.16.11 The following information shall be conspicuously posted in English and the language of the country in which the port is located:

a. Current operator's/captain's license.
b. Passenger/weight capacity limits notice.
c. Location of life jackets and other life saving equipment.

d. Location of all exits indicated in large letters.
e. Emergency procedures.

3.16.12 Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

3.16.13 'Adverse weather' conditions are weather conditions in which operations of water taxis are unsafe for passengers and shall be determined by the Commanding Officer, Command Duty Officer, Operations Officer, Officer of the Deck, or local port authority. Operation of the water taxi shall be in a safe and seaworthy manner. Operation of water taxis is not allowed under adverse weather conditions.

3.16.14 Consumption of alcoholic beverages shall not be permitted aboard the water taxi.

3.16.15 Operator Qualifications: All personnel or employees of the HS Contractor operating water taxis, shall have all certification required and issued by the law of the country in which the port is located for the operation of the type, class, or size of water taxi being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the water taxis are to be operated to ensure the water taxis are operated in a safe and seaworthy manner. At least one operator on each boat must speak English. The HS Contractor is required to provide a minimum of two (2) qualified operators for each water taxi at all times.

3.16.16 Security: During the term of this contract, the ship(s) to be serviced will provide adequate and sufficient security personnel for maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the ship's Commanding Officer or designated representative. When such naval personnel are embarked in a HS Contractor-operated water taxi, he will be responsible for the good order and discipline of naval personnel.

3.16.17 In the event of a water taxi breakdown, immediately prior to, or during a trip, the HS Contractor shall immediately provide a replacement water taxi that complies in all respects with this contract, at no additional cost to the U.S. Government. If a water taxi is not operable when required under this contract, the HS Contractor shall immediately provide at no additional expense to the U.S. Government, a replacement water taxi which complies in all respects with this contract.

3.16.18 Any personal articles or items found on the water taxi after completion of each trip shall be turned over to the ship's Security Officer or his direct representative.

3.16.19 To verify a claim by the HS Contractor for any damage or destruction caused by the U.S. Government, it shall be the responsibility of the HS Contractor to ensure that the water taxi is jointly inspected before and after each trip by the HS Contractor and an authorized representative of the U.S. Government.

3.16.20 When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

3.16.21 In the event the U.S. Government rejects a water taxi, the U.S. Government shall not be liable for any costs the HS Contractor incurs in presenting said water taxi for inspection.

3.16.22 The HS Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for U.S. Government review and inspection.

3.17. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

3.17.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

3.17.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

3.17.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

3.17.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

3.17.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items.

CONTRACT TERMS AND CONDITIONS
ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) ORAL ORDERS (Indefinite Delivery Contracts) (SUP 5252.216 9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) WRITTEN ORDERS (Indefinite Delivery Contracts) (SUP 5252.216 9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;

(8) Any other pertinent information.

(c) AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(d) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. ‘Pinewood nematode’ as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56□C(133□F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(e) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the “Contracting Officer” or “Chief of the Contracting Office”.

SPS CONSOLIDATED SERVER TIME ZONE (Jun 2006) (NAVSUP)

All interested parties are hereby advised that the date and time for the Contracting Officer signature and the release of this contractual document are based on US Central Time Zone. All other dates and times are based on local time.

To calculate your time in relation to US Central Time Zone, vendors may visit the following url:
http://www.timeanddate.com/worldclock/converter.html

SUP 5252.243-9400 AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (JAN 1992)

(a) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(b) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(c) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and telephone number of the Contracting Officer is:

Address: Contracting Department (Code 250)
FISC Detachment Singapore
PSA Sembawang Road
Deptford Road Bldg 7-4
Singapore 759657
Telephone: (65) 6750-2481

CLAUSES INCORPORATED BY FULL TEXT

52.204-7 CENTRAL CONTRACTOR REGISTRATION (APR 2008)

(a) Definitions. As used in this clause--

Central Contractor Registration (CCR) database means the primary Government repository for Contractor information required for the conduct of business with the Government.

Data Universal Numbering System (DUNS) number means the 9-digit number assigned by Dun and Bradstreet, Inc. (D&B) to identify unique business entities.

Data Universal Numbering System +4 (DUNS+4) number means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional CCR records for identifying alternative Electronic Funds Transfer (EFT) accounts (see the FAR at Subpart 32.11) for the same parent concern.

Registered in the CCR database means that--

(1) The Contractor has entered all mandatory information, including the DUNS number or the DUNS+4 number, into the CCR database; and

(2) The Government has validated all mandatory data fields, to include validation of the Taxpayer Identification Number (TIN) with the Internal Revenue Service (IRS), and has marked the record ``Active". The Contractor will be required to provide consent for TIN validation to the Government as a part of the CCR registration process.

(b)(1) By submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the CCR database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.

(2) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation “DUNS” or “DUNS +4” followed by the DUNS or DUNS +4 number that identifies the offeror's name and address exactly as stated in the offer. The DUNS number will be used by the Contracting Officer to verify that the offeror is registered in the CCR database.

(c) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number--

(i) Via the Internet at http://fedgov.dnb.com/webform or if the offeror does not have internet access, it may call Dun and Bradstreet at 1-866-705-5711 if located within the United States; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office. The offeror should indicate that it is an offeror for a U.S. Government contract when contacting the local Dun and Bradstreet office.

(2) The offeror should be prepared to provide the following information:

(i) Company legal business.

(ii) Tradestyle, doing business, or other name by which your entity is commonly recognized.

(iii) Company Physical Street Address, City, State, and Zip Code.

(iv) Company Mailing Address, City, State and Zip Code (if separate from physical).

(v) Company Telephone Number.

(vi) Date the company was started.

(vii) Number of employees at your location.

(viii) Chief executive officer/key manager.

(ix) Line of business (industry).

(x) Company Headquarters name and address (reporting relationship within your entity).

(d) If the Offeror does not become registered in the CCR database in the time prescribed by the Contracting Officer, the Contracting Officer will proceed to award to the next otherwise successful registered Offeror.

(e) Processing time, which normally takes 48 hours, should be taken into consideration when registering. Offerors who are not registered should consider applying for registration immediately upon receipt of this solicitation.

(f) The Contractor is responsible for the accuracy and completeness of the data within the CCR database, and for any liability resulting from the Government's reliance on inaccurate or incomplete data. To remain registered in the CCR database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the CCR database to ensure it is current, accurate and complete. Updating information in the CCR does not alter the terms and conditions of this contract and is not a substitute for a properly executed contractual document.

(g)(1)(i) If a Contractor has legally changed its business name, “doing business as” name, or division name (whichever is shown on the contract), or has transferred the assets used in performing the contract, but has not completed the necessary requirements regarding novation and change-of-name agreements in Subpart 42.12, the Contractor shall provide the responsible Contracting Officer a minimum of one business day's written notification of its intention to (A) change the name in the CCR database; (B) comply with the requirements of Subpart 42.12 of the FAR; and (C) agree in writing to the timeline and procedures specified by the responsible Contracting Officer. The Contractor must provide with the notification sufficient documentation to support the legally changed name.

(ii) If the Contractor fails to comply with the requirements of paragraph (g)(1)(i) of this clause, or fails to perform the agreement at paragraph (g)(1)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the CCR information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the “Suspension of Payment” paragraph of the electronic funds transfer (EFT) clause of this contract.

(2) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the CCR record to reflect an assignee for the purpose of assignment of claims (see FAR Subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the CCR database. Information provided to the Contractor's CCR record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the “Suspension of payment” paragraph of the EFT clause of this contract.

(h) Offerors and Contractors may obtain information on registration and annual confirmation requirements via the internet at http://www.ccr.gov or by calling 1-888-227-2423, or 269-961-5757.

(End of clause)

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (FEB 2010)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (Aug 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(2) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(3) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.203-13, Contractor Code of Business Ethics and Conduct (DEC 2008)(Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note)).

___ (39) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332)

___ (40) 52.232-36, Payment by Third Party (FEB 2010) (31 U.S.C. 3332).

___ (41) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (42)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

___ (ii) Alternate I (APR 2003) of 52.247-64.

____

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.)

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

____ (7) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations (Mar 2009) (Pub. L. 110-247).

____ (8) 52.237-11, Accepting and Dispensing of $1 Coin (SEP 2008)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in this paragraph (e)(1)in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause—

(i) 52.203-13, Contractor Code of Business Ethics and Conduct (DEC 2008) (Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note).

(ii) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(iii) Reserved.

(iv) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(v) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(vi) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(vii) Reserved.

(viii) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (AUG 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(x) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(xi) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

(xii) 52.222-54, Employment Eligibility Verification (JAN 2009).

(xiii) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations. (MAR 2009) (Pub. L. 110-247). Flow down required in accordance with paragraph (e) of FAR clause 52.226-6.

(xiv) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from 1 Sep 2010through 31 Aug 2011.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than $3,000.00 , the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for among the ports identified in the lots at Exhibit A. The HS Contractor is not obligated to honor:

(1) Any order for a combination of items in excess of the maximum quantity for the applicable performance period of this contract; or

(2) A series of orders within 30 days that together call for quantities exceeding the quantities identified in the pricing schedule by more than 200 percent (200%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the effective period of the contract.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before contract expires.

(End of clause)

52.217-9 OPTION TO EXTEND THE TERM OF THE CONTRACT (MAR 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 15 days; provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 30 days before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed 24 months.
(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses http://acquisition.gov/comp/far/index.html
DFAR Clauses http://www.acq.osd.mil/dpap/dars/dfars/index.htm

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (NOV 2009)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X__ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___252.203-7000, Requirements Relating to Compensation of Former DoD Officials (JAN 2009) (Section 847 of Pub. L. 110-181).

(2) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(3) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(4) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (AUG 2008) (15 U.S.C. 637 note).

(5) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JAN 2009) (41 U.S.C. 10a-10d, E.O. 10582).

(6) ____ 252.225-7008, Restriction on Acquisition of Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(7) ____ 252.225-7009, Restriction on Acquisition of Certain Articles Containing Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(8) ____ 252.225-7012, Preference for Certain Domestic Commodities (DEC 2008) (10 U.S.C. 2533a).

(9) ____ 252.225-7015, Restriction on Acquisition of Hand or Measuring Tools (JUN 2005) (10 U.S.C. 2533a).

(10) ____ 252.225-7016, Restriction on Acquisition of Ball and Roller Bearings (MAR 2006) (Section 8065 of Public Law 107-117 and the same restriction in subsequent DoD appropriations acts).

(11) ____ 252.225-7021, Trade Agreements (NOV 2009) (19 U.S.C. 2501-2518 and 19 U.S.C. 3301 note).

(12) ____ 252.225-7027, Restriction on Contingent Fees for Foreign Military Sales (APR 2003) (22 U.S.C. 2779).

(13) ____ 252.225-7028, Exclusionary Policies and Practices of Foreign Governments (APR 2003) (22 U.S.C. 2755).

(14)(i) ____ 252.225-7036, Buy American Act--Free Trade Agreements--Balance of Payments Program (JUL 2009) (41 U.S.C. 10a-10d and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (JUL 2009) of 252.225-7036.

(15) ____ 252.225-7038, Restriction on Acquisition of Air Circuit Breakers (JUN 2005) (10 U.S.C. 2534(a)(3)).

(16) ____ 252.226-7001, Utilization of Indian Organizations, Indian-Owned Economic Enterprises, and Native Hawaiian Small Business Concerns (SEP 2004) (Section 8021 of Public Law 107-248 and similar sections in subsequent DoD appropriations acts).

(17) ____ 252.227-7015, Technical Data--Commercial Items (NOV 1995) (10 U.S.C. 2320).

(18) ____ 252.227-7037, Validation of Restrictive Markings on Technical Data (SEP 1999) (10 U.S.C. 2321).

(19) ____ 252.232-7003, Electronic Submission of Payment Requests and Receiving Reports (MAR 2008) (10 U.S.C. 2227).

(20) ____ 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(21) __X__ 252.243-7002, Requests for Equitable Adjustment (MAR 1998) (10 U.S.C. 2410).

(22)____ 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(23)(i) ____ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ____ Alternate I (MAR 2000) of 252.247-7023.

(iii) ____ Alternate II (MAR 2000) of 252.247-7023.

(iv) ____ Alternate III (MAY 2002) of 252.247-7023.

(24) ____ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(2) 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

INVOICES & PAYMENTS
(a) Invoice Content

The Contractor shall submit to the ordering officer an invoice that lists all the expenses incurred by the ship during the port visit. The contractor's invoice shall list items priced under this contract and include subcontractor invoices for all other items not priced in the contract. All invoices submitted shall have all supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by ship's personnel, with a legible signature and printed name and rank, port tariff invoices, invoices for items not pre-priced in the contract, and any other documentation that the supplies/services have been delivered and accepted) and must be submitted in accordance with the paragraph below. All items listed on the invoices must be completely detailed (i.e., broken down) for quantity, contract unit of issue, unit price, etc. No lump sum amount will be accepted. Invoices for volume-based services (e.g. CHT and potable water) shall include a statement describing the method used in determining the liquid quantities on-loade and/or off-loaded from the vessel.

The Contractor has the responsibility to keep copies of all documentation submitted to the ship for each visit for all supplies and services rendered and in the quantities invoiced. The Contractor shall keep a copy of all such documentation in one place that will be indicated to the Contracting Officer at the time of contract award. FISC Yokosuka and its detachments contracting personnel may examine these files at any time during the performance of this contract.

The invoices must be easily identifiable as original (i.e. original signature or stamped as ORIGINAL). If an electronic invoice is authorized, the Contractor must certify on the invoice that it is the first time that the invoice is submitted. If the original invoice has been lost, a copy of the invoice may be submitted. This invoice must be marked as "DUPLICATE COPY" and a signed and dated statement with a contractor's stamp must be made on the duplicate invoice confirming that payment has not been received.

Each invoice must include—

(1) Name and address of the Contractor;
(2) Invoice number and date issued;
(3) Contract number, Contract Line Item Number, Lot Line Item and , if applicable, the Order Number;
(4) Description, quantity, unit of measure, unit price and extended price of the items delivered;
(5) If appropriate, the shipping number and date of shipment including the bill of lading number and weight of shipment if shipped on a Government bill of lading;
(6) Terms of any prompt payment discount offered;
(7) Name and address of the official to whom payment is to be sent;
(8) Name, title, and phone number of the person to be notified in the event of a defective invoice;
(9) Supporting documentation (i.e. trash and CHT certificates, delivery tickets signed by the ship's personnel, with a legible signature and printed name and rank, and any other documentation that the supplies/services have been delivered and accepted);
(10) The invoice must be correct and complete and without handwritten figures.
(11) Electronic funds transfer (EFT) information.

The Contractor shall include EFT banking information on the invoice only if required elsewhere in this contract.

If EFT banking information is not required to be on the invoice, in order for the invoice to be a proper invoice, the Contractor shall have submitted correct EFT banking information in accordance with the applicable solicitation provision, contract clause (e.g. FAR 52.232-33, Payment by Electronic Funds Transfer – Central Contractor Registration), or applicable agency procedures.

EFT banking information is not required if the Government waived the requirement to pay by EFT.

Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) prompt payment regulations at 5 CFR Part 1315.

If an item is not included on the original invoice, a supplemental invoice shall be issued with the same number followed by alpha suffix (e.g. Invoice No. 0001/03-A). The same requirements for submittal of the original invoice apply to the supplemental invoice.

If an invoice for an item is not available prior to the ship's departure (e.g. cell phone charges, port tariff items, port dues, etc.), the item shall be listed on the invoice with the words "TO BE DETERMINED (TBD)". Once the invoice has been received and the exact amount is known, the Contractor shall issue a supplemental invoice (with all supporting documentation attached) as "FINAL" for the final payment. TBD invoices shall not be paid until a 'FINAL' invoice is submitted.

It is the Contractor's responsibility to verify with port authorities and concessionaires that there are no pending charges prior to the ship's departure. This is to avoid any possible future invoices that may be submitted for unknown services to the U.S. Government.

When preparing an invoice the term "Miscellaneous" or any similar type description should be avoided. If this is not possible and the Contractor must use the term "Miscellaneous" when submitting an invoice, the Contractor shall provide a detailed list of items purchased and item prices on the invoice.

Invoices not in compliance with these instructions are not considered to be proper invoices and may be rejected.

(b) Invoice Submission

The invoice must be submitted to the listed activities in the following order:

(1) To the ship's Supply Officer or his designated representative one day prior to its sailing date. In the event the Contractor is unable to present any invoice to the ordering ship for payment prior to the departure of the ship, the Contractor shall submit invoices and attempt to obtain payment at the ship's next port of call.

(2) If unsuccessful, to the Contracting Officer. In the event the Contractor is unable to present any invoice to the ordering ship prior to its departure, the invoice must be promptly submitted to the Contracting Officer for payment through DFAS Yokota. In no case should the invoice be submitted beyond 90 days after the ship's departure from the port. The Disbursing Officer will annotate the date the invoices are received for the purpose of calculating any interest due. An exception to the 90-day limit will be given only for charges made by the port authorities or concessionaires, or the host nation authorities, including military authorities. It is the Contractor's responsibility to verify that there are no pending charges and to obtain the invoices from these authorities no later than six months after the ship's departure.

(3) Alternatively, whenever a non-Navy ordering authority orders services under the contract, the Contractor shall submit invoices and all supporting documents to that ordering activity.

(c) Payment of Invoices

Payments under this contract will be made in accordance with the clause FAR 52.232-33 Payment by Electronic Funds Transfer – Central Contractor Registration (Oct 2003).

Payment will be made after delivery and acceptance of supplies or performance and acceptance of services.

"Acceptance" means the act of an authorized representative of the Government by which the Government, for itself or as an agent of another, assumes ownership of existing identified supplies tendered or approves specific services rendered as partial or complete performance of the contract (from FAR 46.101 Definitions).

Bill payment shall be disbursed through one of the following methods, check, purchase card, submission of invoices to a Defense Finance and Accounting Command (DFAS) via regular mail or electronically through Wide Area Work Flow (WAWF).

The Contractor shall present to the ordering officer or SUPPO all pricing that is firm and finalized one-day prior to the ship's sailing or the ordering activity departure. At that time, the Contractor shall relay any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for these functions shall be the ordering officer or the ordering officer's designated representative. In addition, the Contractor shall present all documentation and invoices from other Contractors subject to provision of services under this contract.

The Contractor shall obtain a signed delivery order (DD 1155) to verify that the services were received and that charges presented in the port visit cost reporting program are correct for payment. This may be accomplished via email from the Ordering Officer or the SUPPO of the ship. The ordering officer shall pay for all supplies and services accepted during the period of performance by one of the aforementioned methods of payment.

In the absence of a delivery order, forward invoices and all documentation regarding inspection and acceptance of supplies and services by the ship's representative with appropriate accounting data to the Administrative Contracting Office.

(d) The Government will not make direct payments of VAT to the host nation nor will it withhold taxes, including VAT, from invoices for orders that are submitted to the husbanding services contractor by the Government. Payment of appropriate taxes required as part of conducting business in the specific country at which a port visit takes place are a responsibility of the husbanding services contractor. Offerors are further directed to FAR 52.229-6, Taxes-Foreign Fixed-Price Contracts (JUN 2003), which is included in the solicitation.

EXHIBITS AND ATTACHMENTS
EXHIBITS AND ATTACHMENTS

Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A.	Schedule of Supplies and Services
B.	Pre-Arrival Cost Estimate Report

ATTACHMENT NO.	
1.	Classification of Ships
2.	Refuse Definitions
3.	Security Guard Operations
4	Water Taxi Specifications
5.	Floating Line of Demarcation
6.	Performance Work Statement (PWS) for Force Protection
7.	Picket Boat Operations & Specifications
8.	Request for Sanitary Inspection
9.	Quality Assurance Provisions (including Appendices A & B)
10.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A – SCHEDULE OF SUPPLIES AND SERVICES
Exhibit A (ELINs) Schedule of Supplies and Services.

Separate Excel spreadsheet is attached. Complete all unit prices in U.S. Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer to verify the formula when evaluating prices.

EXHIBIT B – PRE-ARRIVAL COST ESTIMATE REPORT
Separate Excel spreadsheet is attached. This is the format that the government requires Contractor to submit within 48 hours after receipt of the LOGREQ/order.

CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

        2.6.1. Uniform as provided by contractor or authorities;

        2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 4
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of Philippines. Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by the Republic of Philippines for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 5.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 5
FLOATING LINE OF DEMARCATION OR BUOY SYSTEM FLD SPECIFICATIONS

The following are Floating Line of Demarcation (FLD) or Buoy System FLD Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

3.1. Continuous Line FLD – If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

3.1.2. Specifications:

3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 6
PERFORMANCE WORK STATEMENT (PWS) FOR FORCE PROTECTION

CLIN XX11 - FORCE PROTECTION SERVICES AND SUPPLIES

(a) Only the ship's Commanding Officer, the ship's Supply Officer, or the FISC Det Singapore Contracting Officer is authorized to order Force Protection (FP) services under this contract. If any other activity or individual attempts to order FP services (e.g., NCIS, DAO, etc), the Husbanding Service (HS) Contractor is required to immediately inform the ship and receive a proper order prior to beginning performance of these services.

(b) The HS Contractor is responsible for providing or coordinating listed FP services as part of their Husbanding Services under Lot Line Item XX01 and XX02. The HS Contractor shall develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, host nation agencies, and U.S. Embassy security staff. If the host nation is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time.

(c) The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer. The HS Contractor shall not add any requirements without prior approval.

(d) The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Det Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The FISC Det Singapore Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

(e) FP is considered a combination of practices and procedures, including the use of specific material, equipment, and personnel, having the objective of improving security to personnel and ships while in port. FP services or supplies may be provided by the host nation at no cost or may be billed at the public tariff rate. The HS Contractor is required to verify what services will be provided by the host nation. For the services that cannot be provided by the host nation, the HS Contractor is required to arrange these services by obtaining them from commercial sources at the prices indicated in the pricing schedule.

(f) The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

(g) The HS Contractor shall provide as many services identified below as ordered by the ship or FISC Det Singapore Contracting Officer. These services do not include other related services not listed, but may be required and separately ordered to attain a higher level of security in a port.

(h) Personnel providing force protection services must be responsive to instructions from the ship. This does not authorize force protection personnel to violate any local regulations, any Port Authority ordinances, or local decrees. The equipment and material used for the force protection services will be inspected by the ship's force to ascertain that they meet force protection requirements.

(i) Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

(j) Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

(k) Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

(l) Background Checks: The HS Contractor shall conduct security background checks on employees and subcontractor employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers. The HS Contractor shall issue photo identification badges to its personnel and ensure subcontractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing. In addition, the HS Contractor will be required to provide vetting services for third party contractors such as DESC contractors.

(m) Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

(n) Inspections: The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

(o) Stand-Off Distances:

Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

Sign Specifications:
- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

(p) The unit price for force protection services shall include all costs associated with providing transportation, mobilization/installation and demobilization/de-installation, or arranging the requested services below unless the transportation, mobilization/installation and demobilization/de-installation is identified as a separate Lot Line item number. The HS Contractor's invoice shall set forth the unit of issue identified for each service, total quantity ordered for each service, unit price, and the total price.

(q) The force protection services that the ships may order are:

(1) CONEX box barriers capable of stopping a vehicle (automobile). (Price per meter per day)

(i) CCONEX box barriers.

Mobilization, installation and demobilization will be billed under a separate contract line item number.

The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

The barriers may be of different design and material as long as they are approved by the FP personnel. Empty 20 ft or 40 ft shipping containers may be used . Availability will determine the requested type of barrier. A combination of barriers may also be used.

A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

A personnel entry point must be established through the barriers. Barriers may also be used to seal off secondary Port gates. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

(2) Armed or unarmed security guard to control vehicle and personnel access to pier. (Price per guard per hour) Must be English speaking, and equipped with own handheld radio (not ship's radio) to communicate with ship. Duties and responsibilities will be coordinated with the ship upon arrival.

The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas. The HS Contractor shall comply with Attachment 3 for security guard operations.

(3) Floating Line of Demarcation (FLD) at pierside, equipped with anchors and lighting (for night visibility). (Price per meter per day) The floating FLD must be anchored at least 30 meters from ship. Oil booms are acceptable. Mobilization, installation and demobilization will be billed under a separate contract line item number.

The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone. The HS Contractor shall comply with the specification of the FLD in Attachment 5.

(4) Unarmed and manned picket boat or waterborne patrol (motorized patrol craft, approximately 5-10 meters in length), with own radio to communicate with ship and local authorities. Continuous coverage is required for the period of performance ordered by the ship or by the Contracting Officer. (Price per patrol craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone. The HS Contractor shall comply with Attachment 7 for picket boat operations and specifications.

(5) Unarmed and manned motorized patrol craft, approximately 5-10 meters in length, with own radio to communicate with ship and local authorities, to escort ship from pilot pickup point to mooring location. (Price per craft per hour) Duties and responsibilities will be coordinated with the ship upon arrival. If the period of performance ordered by the ship is less than 4 continuous hours, the HS Contractor is entitled to a minimum daily amount of four (4) continuous hours for each patrol craft ordered.

(6) Tents or awnings to shelter personnel conducting inspections and/or designated medical area. Must be at least three (3) meters by three (3) meters, and closed on all sides. Must be anchored down and strong enough to withstand inclement weather. (Price per unit per day)

(7) Dive and Vetting: The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities. The pier will be vetted prior to the ship's arrival. To the maximum extent practicable the HS Contractor shall inspect all watercraft at least 400 feet (125 meters) from the ship. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in picket boats. (Per team per hour, minimum four (4) hours)

ATTACHMENT 7
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate Lot Line Item in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32°F and 41°F (0°C and 5°C). Frozen products shall be delivered at 0°F (-18°C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32°F and 41°F (0°C and 5°C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32°F and 50°F (0°C and 10°C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35°F and 55 °F (2°C and 12°C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 9 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)

Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk		10 per gram		
Cottage cheese		10 per gram		10 per gram
Cream, sour cultured		10 per gram		10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled		10 per gram		
Yogurt, frozen, plain		10 per gram		
Yogurt, frozen, flavored		20 per gram		
Yogurt, soft serve mix		10 per gram		

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

	Aerobic Plate Count (APC)	Coliform Count	
ATP (RLU) Counts			
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeast and Mold count
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)

Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]		
Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		

Silver [3]	None Detectable

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork		Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance
Cheese, soft and hard		Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Pasteurized, liquid, frozen or Dried egg		Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Pizza topping (meat & cheese)		Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Dried meats sticks, jerky [1]		Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	

Campylobacter jejuni	Zero (0) Tolerance[1]

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries.	All other bakery products, including: Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry.

	Pies.	Cookies, unfilled.
	Soft pretzels.	Crackers.
	Won ton wrappers.	Cupcakes, unfilled.
	Filled bakery items.	Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.
		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically:	All other dietary and specialty preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish products.	Baby formula, canned.
	Pickled eggs.	Chips, nacho or potato.
	Frozen dinners.	Creamer, coffee, imitation (non-dairy).
	Pudding novelties, frozen or chilled.	
	Tofu.	Dips.
		Nacho cheese, canned.
		Nutri-why.
		Popcorn.
		Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including:
		Salad dressings.
		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages, including:
	Ice.	
	Bottled water.	Dry ice.
		Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment

number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.

3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products*.
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Det Singapore will use in evaluating contractor performance under the contract including but not limited to evaluating pre-arrival estimate and port visit cost reporting of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the pre-arrival estimate and port visit cost reporting performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will establish policies and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with the capability to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor contractor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those

decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (CO) is responsible for monitoring contract compliance, performing contract administration, and the resolution of any differences between the observations documented by the requiring activity, and the contractor's performance. The CO is responsible for monitoring the contractor's quality assurance program through the QASP (See below)

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

2.3 The contracting officer's representative will be identified to the contractor at the time an order is issued. The CO will also have the responsibility for completing QA monitoring forms (refer to Attachments 10b and 10c) used to document the evaluation of the contractor's reporting and price performance.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED
The contractor shall provide husbanding service support in accordance with the PWS

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and self-assessments from the contractor and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 10c.

4.3 The acceptable quality levels (AQL) located in Attachment 10a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls. The Government will evaluate the total number of ship visits on a quarterly basis to determine if the contractor has met the goals assigned in the QASP.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes from the pre-arrival cost estimate, which is substantiated by the customer and contractor prior to the submission of the final invoices, finally communicated to the contracting officer via the customer service survey form and LOGSSR Reporting Data.

5.2 The Government's QA monitoring, accomplished by the CO, will be reported using the monitoring forms in Attachments 10b and 10c. The forms, when completed, will communicate the customer and COR evaluation of the contractor's performance to the contracting officer.

5.2.1 The CO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited in this QASP to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives (See Attachment 10a) should performance not meet the AQL's.

6.2 The CO will randomly select port visits to evaluate to analyze contractor performance. Within 30 days following the end of each selected order's performance period, the CO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 10b and 10c) will become part of the QA documentation.

6.3 The CO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The CO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the CO as often as required or per the contractor's request. The agenda of the reviews may discuss:
Performance measured by the metrics and trends
Issues and concerns of both parties
Recommendations made by the CO based on contractor information
Issues arising from independent reviews and inspections

6.4 The CO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the CO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. **Notifications**. Consistent with FAR Part 12, the CO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. **Deductions**. The Government has the right to deduct a specified fee for failure to meet performance standards. The amount is identified in the Performance Requirements Summary (PRS) of Attachment 5a.
3. **Termination**. If the CO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the CO shall issue a notice of termination, consistent with FAR Part 12.

ATTACHMENT 10a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit pre-arrival cost estimate to ship and Contracting Officer within 48 hours after receipt of LOGREQ (PWS Paragraph 3.15)	95%	E-mails receipts, files review, quarterly, random, observations, complaints	Contractor may be required to provide consideration, based on damage to the Government, for failing to meet the AQL.
	Submit final LogSSR cost reports to the NAVSUP LogSSR email address and the Contracting Officer within seven (7) days of each ship's departure (PWS Paragraph 3.15)	95%	E-mail receipts, files review, quarterly, random, complaints	Contractor may be required to provide consideration, based on damage to the Government, for failing to meet the AQL.
	LogSSR submittals are accurate and complete	95%	Files review, periodic, quarterly, random, observations, complaints	Contractor may be required to provide consideration, based on damage to the Government, for failing to meet the AQL.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION SF 1449 - CONTINUATION SHEET

The following have been modified:

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting ports identified in the lots at Exhibit A.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).
2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is $50,000.00 of orders. The minimum guarantee applies to the base year period only. The maximum quantity is $3,000,000 of orders per year.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Other Authorized Users are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel conducting business related to a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships.

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband eight (8) ships at one time among the ports identified in the lots at Exhibit A.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The HS Contractor, as part of its understanding of the requirement, is expected to understand and be familiar with items that are available through HN and Port Authorities.

9. LONG TERM SHIP VISITS

9.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10. UNIQUE/PARTICULAR SITUATIONS:

10.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days' rate for the following days.)

10.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days' rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.
- SUBGROUP SEVEN Authorized Ordering Officers

13.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passenger bus was

ordered, but was not available and the HS Contractor substituted two, 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

13.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

13.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if

such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot, and utilities.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs).

20. Management Services - Husbanding CLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services CLIN, the Government shall order at least the initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- BARGE: Barges are flat-bottomed displacement ships used for carrying or storing cargo, for separation between vessels and other structures, or as a work platform. Barges may or may not be self-propelled

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Security Guards and XX11AB Tent, and so forth)

- CONTRACTING OFFICER (CO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order): A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis
Title of Individual:	Executive Group Chairman, President
Mailing Address:	15D Pandan Road Singapore 609266
Tel No:	(65) 6268-5300
Fax No:	(65) 6262 6689
Mobile:	(65) 978 3155
E-mail address:	leonard@glennmarinegroup.com

To:

DELIVERY DATE	QUANTITY	SHIP TO ADDRESS	UIC
POP 01-SEP-2010 TO 31-AUG-2011	N/A	N/A FOB: Destination	

The following have been modified:

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting ports identified in the lots at Exhibit A.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).
2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is $50,000.00 of orders. The minimum guarantee applies to the base year period only. The maximum quantity is $3,000,000 of orders per year.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Other Authorized Users are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel conducting business related to a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships.

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband eight (8) ships at one time among the ports identified in the lots at Exhibit A.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The HS Contractor, as part of its understanding of the requirement, is expected to understand and be familiar with items that are available through HN and Port Authorities.

9. LONG TERM SHIP VISITS

9.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10. UNIQUE/PARTICULAR SITUATIONS:

10.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management

Services will be charged at the first day rate for Tuesday, followed by the subsequent days' rate for the following days.)

10.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days' rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.

13.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passenger bus was ordered, but was not available and the HS Contractor substituted two, 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

13.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

13.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot, and utilities.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs).

20. Management Services - Husbanding CLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services CLIN, the Government shall order at least the

initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- BARGE: Barges are flat-bottomed displacement ships used for carrying or storing cargo, for separation between vessels and other structures, or as a work platform. Barges may or may not be self-propelled

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Security Guards and XX11AB Tent, and so forth)

- CONTRACTING OFFICER (CO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order): A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis
Title of Individual:	Executive Group Chairman, President
Mailing Address:	15D Pandan Road Singapore 609266
Tel No:	(65) 6268-5300

Section SF 1449 - CONTINUATION SHEET

OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting within the Hong Kong port area (see definition).

2. SCOPE

2.1. This contract is for Husbanding Services (HS) as further defined at paragraph 2.2 below. It is to provide services and supplies that are required by the ships while they are in port.

2.2. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.3. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price IDIQ contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is set at a total of $20,000 worth of orders at the contract unit price (s). The minimum guarantee applies to the base year period only. The maximum quantity is $2,000,000.00 of orders per year at the contract unit prices.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months with an option period of twelve (12) months and also includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 30 months.

5. CONTRACT USERS - Authorized Users - U.S. Navy ships visiting locations covered under this contract are authorized to use this contract for husbanding supplies and services listed on Exhibit A. For purposes of this paragraph, a U.S. Navy ship is any naval vessel, craft, ship, or service craft included within the scope of subparagraphs 2 and 4 of Article 0406, United States Navy Regulations, 1990. Authorized ships are Military Sealift Command ships (USNS), U.S. Coast Guard (USCG) ships, U.S. Army ships, U.S. Government personnel conducting business separate from that of a ship visit in locations under this contract and Department of Defense (DoD) Chartered ships

6. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for Hong Kong.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies found in the schedule are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

10. LONG TERM SHIP VISITS

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day

management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

10.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

12. OTHER PERSONNEL - Other U.S. personnel (e.g. Logistics Support Teams, advance force protection teams)conducting business in support of a specific ship visit at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO.
- Military Sealift Command Officers designated in writing as ordering officers.
- Orders may be issued orally, by facsimile or by e-mail.

13.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengers bus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

13.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

13.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore, FISC Detachment Hong Kong, and Logistic Support Representative.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 6.

15.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts,

or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession that is reasonably determined to have been caused by its fault. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs, including but not limited to all items identified in paragraph 19.2.1 – 19.2.5

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall take place only after a price has been agreed upon in advance by the Contractor and an AGR.

19.2.5. All Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor paid for the supply or service, whichever is less. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items include, but are not limited to fleet landing, pilot utilities and port tariffs.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations or available for required inspections. Travel time to the location of performance shall not be charged. For the purpose of this contract, 1 hour is 60 minutes and 1 day is 24 hours from the start of the service. For example, service provided from 1800 until 1800 the next day is considered 1 (one) day of service. In cases where the ship is scheduled to arrive at a designated time and does not arrive until a later time, services shall be considered available at the time designated in the ordering LOGREQ.

19.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

20. Management Services - Husbanding CLINs. If the Government requires any Pre-Arrival Husbanding Duties, as those tasks are further defined in the Management Services CLIN, the Government shall order at least the initial day of Management Services and one subsequent day of Management Services. Payment for these two days of Management Services shall satisfy the Government's payment obligation for any Pre-Arrival Husbanding Duties.

21. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day

22. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any pre-priced supply or service.

- CALENDAR DAY. A calendar day is defined as the time period beginning at 0000 hr and ending at 2359 hr.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: 1 day is 24 hours from the start of the service

- Delivery Order (D.O./Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HONG KONG PORT AREA: Hong Kong Harbor is centered at approximately 22°18'N 114°08'E. The central part of the harbor is located between the north side of Hong Kong Island and Kowloon on the southern end of the Chinese mainland. The busy harbor is large, and it is oriented generally east-west. Approximately eight nmi separates the northern ends of the three main access channels to the harbor, Tathong Channel on the east side of Hong Kong Island, and East/West Lamma Channels on the west side of the island. The narrowest part of the harbor exists across the Hung Hom Fairway between Hong Kong Island and the southern tip of Kowloon, a distance of approximately 0.65 nmi (1.15 km). Berthing or anchoring at any established anchorage within this port area is considered a location within the Hong Kong port area

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBANDING: To provide all supplies and services required during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

23. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual: _____
Title of Individual: _____
Mailing Address: _____
_____
Tel No: _____
Fax No: _____
Mobile: _____
E-mail address: _____

PERFORMANCE WORK STATEMENT
PERFORMANCE WORK STATEMENT(PWS)
TASKS: The HS Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 1.1.6 and 1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 1.1.6 below) is addressed at paragraph 19.2 of the Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 1.1.8. Except when the facts detailed in paragraph 1.1.8 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

1.1.1. The HS Contractor shall communicate with the ship and FISC Detachment Singapore, and FISC Detachment Hong Kong to coordinate requirements.

1.1.2. The HS Contractor shall order requested services and supplies.

1.1.3. LOGREQ Initial Cost Estimate - The HS Contractor shall furnish to each ship, FISC Detachment Singapore and FISC Detachment Hong Kong Contracting Office a LOGSSR cost estimate in response to the receipt of a ship's

Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the LOGSSR spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ that are pre-priced in the contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship, FISC Detachment Singapore Contracting Office and FISC Detachment Hong Kong Contracting Office, within two (2) working days after receipt of the LOGREQ, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs. The LOGREQ, when submitted by, under authority of, or on behalf of an AGR, is an order for pre-priced items under this contract. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

1.1.4. These estimates shall be provided for all authorized users including US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The HS Contractor shall assist the ship’s Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship’s advance party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship’s advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location.

1.2.2. The HS Contractor shall install all ordered equipment upon the ship’s arrival. This equipment includes but is not limited to fenders, curb caps, steps, and telephones.

1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

1.2.5. The HS Contractor shall provide the SUPPO upon ship’s arrival a copy of the Exhibit A of the contract, the Performance Work Statement , and applicable port tariffs.

1.2.6. Laundry Services:

1.2.6.1. The HS Contractor shall arrange for laundry and dry cleaning services to be available for the ship. Service will be available for the ship’s laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure. If the ship requires laundry or dry cleaning services, such services will be ordered from the laundry and dry cleaning vendor by an AGR.

1.2.7. Interpreter Services:

1.2.7.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8. Mail Delivery Services: The HS Contractor shall provide daily mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.9. Morale Welfare and Recreation (MWR) Services:

1.2.9.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

1.2.9.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.10. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders from an AGR, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s).

1.2.11. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms. The HS Contractor shall contact the FISC Detachment Hong Kong prior to the start of each port visit to ascertain how many personnel will require assistance.

1.2.12. The HS Contractor shall facilitate the ship's timely departure.

1.2.12.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.12.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.12.3. The HS Contractor shall remove all provided equipment.

1.2.13 ACQUIRING ITEMS NOT FOUND IN CONTRACT SCHEDULE:

1.2.13.1 The Contracting officer (s) of FISC Detachment Hong Kong will assist the ship in obtaining all requirements not included in the contract's Schedule of Supplies and Services (Exhibit A). The Government does not foresee specific instances where items not listed in the contract schedule will be required. Specific requirements are not foreseeable because requirements are not definitized until shortly before the actual visit and are unknown at this time. To clarify, no item not included in the contract schedule shall be acquired without the consent of the FISC Detachment Hong Kong Contracting Officer. The FISC Detachment Hong Kong Contracting officer may request the Contractor to arrange an item or service not included in the contract schedule.

1.2.13.2 The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under auspices of this contract.

1.3. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract as further described in the contract section titled “Invoices and Payments”.

1.4. LogSSR Report: Prepare and submit an “Actual Cost Report” in accordance with Exhibit C.

2. BREASTING AND FENDERING BARGE (CLIN XX03)

2.1. The HS Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

2.2. The HS Contractor shall place additional fenders between the breasting barge and the ship when requested.

2.3. The HS Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX04)

3.1. The HS Contractor shall collect, remove , and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

3.2. The HS Contractor shall collect, remove and dispose the Collection Holding Transfer (CHT) bacteriological/chemicals liquids from the ship in HS Contractor provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

3.3. The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

3.4. The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

3.5. When collection of CHT is done via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

3.6. The HS Contractor shall properly dispose of all sewage in accordance with OVERVIEW of the contract section, paragraph 15, Standards for Professional Services. The HS Contractor shall discharge all CHT collected from the ship to the Hong Kong SAR Government designated discharging location. The prices for CLINs 0004AA, 0004AB, 0004AC, 1004AA, 1004AB and 1004AC on the contract’s Exhibit A shall be understood to require all the Collection Holding Transfer Sewage Removal and Disposal services described under this Performance Work Statement paragraph 3 but for the actual disposal/discharge costs. The disposal/discharge costs will be separately paid as a port tariff item.

3.7. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

4. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX05)

4.1. The HS Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

4.2. The HS Contractor shall provide each mobile phone with a HK$50 pre-paid international calling card for official use. Additional top-up cards shall be provided to the AGR when requested. The location for the delivery of the cards will be at either FISC Detachment Hong Kong or at the visiting ship; at the discretion of the AGR. Cards may be requested at any time prior to or during the port visit and shall be delivered within 4 hours if requested in other than the ordering LOGREQ.

5. FENDERS (CLIN XX06) - The HS Contractor shall provide Yokohama-type fenders suitable for the visiting ship class and characteristics with a minimum of two (2) mooring lines.

5.1 The HS Contractor shall provide camels as fenders for the ship.

6. FORCE PROTECTION (CLIN XX07)

6.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets and/or services at no cost or HN rate, the HS Contractor must verify that they are available and are scheduled to show up on time. When the HS Contractor obtains a FP supply or service from the port or local government-type organization and the price of that item is set by a published price list, the HS Contractor shall be reimbursed for the published price of the item or the price the HS Contractor pays for the item, whichever is less. The HS Contractor shall provide supporting documents from the HN for verification to the Supply Officer. The HS Contractor shall not follow directions of the ship's Security Officer or Advanced Party FP Officer that vary from these contract requirements without first confirming that direction with the AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 6.2 below.

6.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

6.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

6.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to readily identify personnel while they are working.

6.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on its employees and the employees of its subcontractors with local or national police departments or other government organizations. The HS Contractor shall not use employees or employees of a subcontractor if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

6.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

6.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

6.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

6.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

6.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

6.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

6.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

6.1.6. Stand-Off Distances:

6.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

6.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship..

6.1.7. Warning Signs: The HS Contractor shall provide FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen. To define the scope of this requirement, FP signage must be placed at intervals not to exceed every 200 ft. on the perimeter of the visiting ship. Specific locations where the signs are to be posted are at the discretion of each ship. Provision of these signs is a cost to be included in the management services fee.

6.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

6.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

6.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

6.2. Non-Contract FP Measures: The HS Contractor is prohibited from providing any FP measures that are not included in this contract, whether requested by the ship or recommended by its contractor, unless approval is obtained in advance from the FISC Detachment Hong Kong Contracting Office or FISC Detachment Singapore Contracting Office. As part of its request for approval, the HS Contractor must explain what the added FP service will include and its understanding of why it has been requested. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made by FISC Detachment Hong Kong Office or FISC Detachment Singapore Office, then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

6.3. Beach Guard Office or Tent (CLIN XX07AA)

6.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship's personnel while performing security checks on personnel, baggage, and vehicles.

6.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher shall be provided and kept fully charged.

6.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language providing notice about the security checks that will be conducted in the immediate area.

6.4. Dive and Vetting Operations (CLIN XX07AB)

6.4.1. The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

6.4.2. The pier will be vetted prior to the ship's arrival.

6.4.3. To the maximum extent practicable the HS Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship..

6.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

6.4.5. The HS Contractor shall provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

6.5. Picket Boats (CLIN XX07AC)

6.5.1. The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

6.5.2. The HS Contractor shall comply with Attachment 3 for picket boat operations and specifications.

6.6 Security Guards Services (CLIN XX07AD)

6.6.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

6.6.2. The HS Contractor shall comply with Attachment 4 for security guard operations.

6.6.3. All security guards shall be armed.

7. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX08)

7.1. The HS Contractor shall remove and dispose of garbage and trash from the ship.

7.2. The HS Contractor shall provide dedicated refuse bins to the ship.

7.3. If collection is done by sea, the HS Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

7.4. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins.

7.5. The HS Contractor shall immediately clean up any spilled refuse.

7.6. The HS Contractor shall properly dispose of all collected refuse.

8. TRANSPORTATION VEHICLES (CLIN XX09)

8.1. The HS Contractor shall provide vehicle service with qualified drivers for official government business.

8.2. The HS Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

8.3. The HS Contractor shall provide drivers who can speak and understand English clearly.

8.4. The HS Contractor shall provide only vehicles with air conditioning.

8.5. The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

8.6. The HS Contractor shall return all items left in any transportation provided by HS Contractor to the ship's SUPPO or to FISC Detachment Hong Kong if the ship has departed.

8.7. The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

8.8. If the unit of issue is by “Day”, then the rental period shall constitutes 24 hours. The daily rate shall begin when service is made to the ship and not by calendar day.

8.9 4 hours minimum rental fee in cases where actual usage is less than 6 hours.

9. WATER TAXIS (CLIN XX11)

9.1. The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 5 – Water Taxi Specifications.

9.2. The HS Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Hong Kong.

9.3. The HS Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

9.4 6 hours minimum rental fee in cases where actual usage is less than 6 hours.

10. TUGS (CLIN XX10)

10.1. The HS Contractor shall provide tugs to bring ships to and from berthing locations.

10.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

10.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

10.4. If tugs are not available through the port authority, the HS Contractor shall use commercially available tugs.

11. PORT TARIFF (CLIN XX11)

10.1 Port tariff (PT) include but is not limited to Fleet Landing, CHT disposal and Pilot services that are provided by the port of Hong Kong.

10.2 The HS Contractor shall also provide all original documents with any invoices for port tariff items which have been provided to the ship for certification by the ship's Supply Officer prior to departure.

CLAUSES INCORPORATED BY REFERE
CLAUSES INCORPORATED BY REFERENCE

52.202-1	Definitions	JUL 2004
52.212-4	Contract Terms and Conditions--Commercial Items	SEP 2005
52.229-6	Taxes--Foreign Fixed-Price Contracts	JUN 2003
52.232-33	Payment by Electronic Funds Transfer--Central Contractor Registration	OCT 2003
52.232-36	Payment by Third Party	MAY 1999

ADDITIONAL CLAUSES
ADDITIONAL CONTRACT TERMS AND CONDITIONS.

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (3) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(d) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(e) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2009)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(2) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.203-13, Contractor Code of Business Ethics and Conduct (DEC 2008)(Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note)).

___ (3) 52.203-15, Whistleblower Protections under the American Recovery and Reinvestment Act of 2009 (MAR 2009) (Section 1553 of Pub. L. 111-5). (Applies to contracts funded by the American Recovery and Reinvestment Act of 2009.)

__(4) 52.204-11, American Recovery and Reinvestment Act—Reporting Requirements (MAR 2009) (Pub. L. 111-5).

___ (5) 52.219-3, Notice of Total HUBZone Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (6) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (7) [Reserved].

___ (8)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (9)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (iii) Alternate II (MAR 2004) of 52.219-7.

___ (10) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637 (d)(2) and (3)).

___ (11)(i) 52.219-9, Small Business Subcontracting Plan (APR 2008) (15 U.S.C. 637(d)(4)).

___ (ii) Alternate I (OCT 2001) of 52.219-9

___ (iii) Alternate II (OCT 2001) of 52.219-9.

___ (12) 52.219-14, Limitations on Subcontracting (DEC 1996) (15 U.S.C. 637(a)(14)).

___ (13) 52.219-16, Liquidated Damages--Subcontracting Plan (JAN 1999) (15 U.S.C. 637(d)(4)(F)(i)).

___ (14)(i) 52.219-23, Notice of Price Evaluation Adjustment for Small Disadvantaged Business Concerns (OCT 2008) (10 U.S.C. 2323) (if the offeror elects to waive the adjustment, it shall so indicate in its offer).

___ (ii) Alternate I (JUNE 2003) of 52.219-23.

___ (15) 52.219-25, Small Disadvantaged Business Participation Program--Disadvantaged Status and Reporting (APR 2008) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (16) 52.219-26, Small Disadvantaged Business Participation Program--Incentive Subcontracting (OCT 2000) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (17) 52.219-27, Notice of Total Service-Disabled Veteran-Owned Small Business Set-Aside (MAY 2004) (U.S.C. 657 f).

___ (18) 52.219-28, Post Award Small Business Program Rerepresentation (APR 2009) (15 U.S.C. 632(a)(2)).

___ (19) 52.222-3, Convict Labor (JUNE 2003) (E.O. 11755).

_X__ (20) 52.222-19, Child Labor--Cooperation with Authorities and Remedies (AUG 2009) (E.O. 13126).

___ (21) 52.222-21, Prohibition of Segregated Facilities (FEB 1999).

___ (22) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

___ (23) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of theVietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (24) 52.222-36, Affirmative Action for Workers with Disabilities (JUN 1998) (29 U.S.C. 793).

___ (25) 52.222-37, Employment Reports on Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (26) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

___ (27) 52.222-54, Employment Eligibility Verification (JAN 2009). (Executive Order 12989). (Not applicable to the acquisition of commercially available off-the-shelf items or certain other types of commercial items as prescribed in 22.1803.)

___ (28)(i) 52.223-9, Estimate of Percentage of Recovered Material Content for EPA-Designated Items (MAY 2008) (42 U.S.C. 6962(c)(3)(A)(ii)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (29) 52.223-15, Energy Efficiency in Energy-Consuming Products (DEC 2007) (42 U.S.C. 8259b) .

___ (30)(i) 52.223-16, IEEE 1680 Standard for the Environmental Assessment of Personal Computer Products (DEC 2007) (E.O. 13423).

___ (ii) Alternate I (DEC 2007) of 52.223-16.

___ (31) 52.225-1, Buy American Act--Supplies (JUNE 2003) (41 U.S.C. 10a-10d).

___ (32)(i) 52.225-3, Buy American Act--Free Trade Agreements--Israeli Trade Act (JUN 2009) (41 U.S.C. 10a-10d, 19 U.S.C. 3301 note, 19 U.S.C. 2112 note, 19 U.S.C. 3805 note, Pub. L. 108-77, 108-78, 108-286, 108-302, 109-53, 109-169, 109-283, and 110-138).

___ (ii) Alternate I (JAN 2004) of 52.225-3.

___ (iii) Alternate II (JAN 2004) of 52.225-3.

___ (33) 52.225-5, Trade Agreements (AUG 2009) (19 U.S.C. 2501, et seq., 19 U.S.C. 3301 note).

___ (34) 52.225-13, Restrictions on Certain Foreign Purchases (JUN 2008) (E.O.'s, proclamations, and statutes administered by the Office of Foreign Assets Control of the Department of the Treasury).

___ (35) 52.226-4, Notice of Disaster or Emergency Area Set-Aside (Nov 2007) (42 U.S.C. 5150).

___ (36) 52.226-5, Restrictions on Subcontracting Outside Disaster or Emergency Area (Nov 2007) (42 U.S.C. 5150).

___ (37) 52.232-29, Terms for Financing of Purchases of Commercial Items (FEB 2002) (41 U.S.C. 255(f), 10 U.S.C. 2307(f))

___ (38) 52.232-30, Installment Payments for Commercial Items (OCT 1995) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).

___ (39) 52.232-33, Payment by Electronic Funds Transfer--Central Contractor Registration (OCT 2003) (31 U.S.C. 3332).

___ (40) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332)

___ (41) 52.232-36, Payment by Third Party (MAY 1999) (31 U.S.C. 3332).

___ (42) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (43)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

____ (ii) Alternate I (APR 2003) of 52.247-64.

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.)

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

____ (7) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations (Mar 2009) (Pub. L. 110-247).

____ (8) 52.237-11, Accepting and Dispensing of $1 Coin (SEP 2008)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in this paragraph (e)(1)in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause—

(i) 52.203-13, Contractor Code of Business Ethics and Conduct (DEC 2008) (Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note).

(ii) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(iii) Reserved.

(iv) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(v) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(vi) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(vii) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

(viii) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (AUG 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(x) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(xi) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

(xii) 52.222-54, Employment Eligibility Verification (JAN 2009).

(xiii) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations. (MAR 2009) (Pub. L. 110-247). Flow down required in accordance with paragraph (e) of FAR clause 52.226-6.

(xiv) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from 1 Dec 2009 through 30 Nov 2010.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than $20,000, the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for Hong Kong.

(1) Any order for a single item in excess of the maximum quantity for that item which is identified in the pricing schedule, Exhibit A, of this contract.

(2) Any order for a combination of items in excess of the maximum quantity for the applicable performance period

of this contract; or

(3) A series of orders from the same ordering office within 180 days that together call for quantities exceeding the maximum quantities indentified in the pricing schedule by more than 200 percent (200%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the effective period of the contract.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before contract expires.

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses http://acquisition.gov/comp/far/index.html
DFAR Clauses http://www.acq.osd.mil/dpap/dars/dfars/index.htm

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (JUL 2009)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X_ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___252.203-7000, Requirements Relating to Compensation of Former DoD Officials (JAN 2009) (Section 847 of Pub. L. 110-181).

(2) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(3) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(4) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (AUG 2008) (15 U.S.C. 637 note).

(5) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JAN 2009) (41 U.S.C. 10a-10d, E.O. 10582).

(6) ____ 252.225-7008, Restriction on Acquisition of Specialty Metals (JUL 2009) (10 U.S.C. 2533b).

(24) ____ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(2) 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

INVOICES AND PAYMENTS

1. The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices in accordance with Performance Work Statement, paragraph 1.3 Pre-Sailing Visit. At that time, the HS Contractor shall present an invoice that is divided into two sections. ³ Pre-Priced CLINS ₂ and ³ Port Tariff CLINS₂ .

a. Pre-Priced CLINs. The following shall be included as part of the invoice:

(i) Verification by the AGR that pre-priced goods and services were received (receiving report or equivalent)

(ii) Notification of any changes in volume or quantity between what was ordered via the LOGREQ and Pre-arrival estimate and the amount delivered or performed.

(iii) In the instance of goods not yet delivered or services not yet performed but scheduled prior to the ship's departure, a statement by the HS Contractor that arrangements for the supplies and/or services have been made and will be performed.

b. Port Tariff CLINs. The following shall be included as part of the invoice:

(i) Verification by the AGR that the Port Tariff goods and services were received (receiving report or equivalent)

(ii) Notification of any changes in volume or quantity between what was ordered via the LOGREQ and Pre-arrival cost estimate and the amount delivered or performed.

(iii) In the instance of goods not yet delivered or services not yet performed but scheduled prior to the ship's departure, a statement by the HS Contractor that arrangements for the supplies and/or services have been made and will be performed.

(iv) Invoice from the Port Authority (or other provider of the port tariff supply or service) to the HS Contractor showing the amount that the HS Contractor paid (or has been billed) for the PT supplies or services.

(v) If an invoice from the Port Authority (or other provider of the port tariff supply or service) is not available, the HS Contractor will provide an affirmative statement that the price on the invoice to the Government is the amount the HS Contractor expects to pay for the port tariff supply or service and does not include any separate allowance for additional costs or profit to the HS Contractor. The statement shall additionally explain when the HS Contractor expects to receive the invoice, shall agree to provide a copy of the invoice from the Port Authority (or other provider of the port tariff supply or service) to the Government not more than four weeks after receipt of the invoice but in no instance later than four (4) months after conclusion of the port visit, and shall agree to adjust the payment amount if the final bill from the Port Authority (or other provider of the port tariff supply or service) differs from the expected amount.

(vi) Agreement by the HS Contractor that it will reimburse the Government for the full amount of any payment that the Government makes for an entry on the invoice for payment of a port tariff supply or service and for which the HS Contractor does not provide a supporting invoice from the Port Authority (or other provider of the port tariff supply or service) or other acceptable substantiation within four months of the conclusion of the port visit.

2. The payment will be made by the ship prior to departure from the port. If payment is unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S.

Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction. The Government will not reimburse a credit card surcharge for an amount greater than 3 percent of the invoice amount. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices (and their associated required supplementary materials as described above) that are presented to the ship shall be provided to FISC Det Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

LIST OF ATTACHMENTS AND EXHIBITS

EXHIBITS AND ATTACHMENTS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A.	Schedule of Supplies and Services
B.	Port Tariff
C.	Cost Reporting - LogSSR Report
D.	Historical Data

ATTACHMENT NO.

1.	Classification of Ships
2.	Refuse Definitions
3.	Picket Boat Operations & Specifications
4.	Security Guard Operations
5.	Water Taxi Specifications
6.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A – SCHEDULE OF SUPPLIES AND SERVICES
Exhibit A (ELINs) Schedule of Supplies and Services.

Separate Excel spreadsheet is attached. Complete all unit prices in U.S. Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer to verify the formula when evaluating prices.

EXHIBIT B – PORT TARIFF ITEMS
The Excel spreadsheet provides estimates of port tariff rates only.

EXHIBIT C - COST REPORTING Logistics Support Services Repository (LogSSR)

The Contractor is responsible for fully participating in the deployment of the Logistics Support Services Repository (LogSSR) web-based system that replaces the legacy web-based Cost Reporting and Forecasting Tool (CRAFT).

Upon award, the Contractor will utilize the LogSSR for data input and entry of all invoices supporting the husbanding contract. LogSSR can be accessed through the NAVSUP One Supply website at https://www.navsup.navy.mil/onesupply or directly at https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

(a) LogSSR: This system is necessary to prepare all reports related to the ship's visit, derived from the LOGREQ's initial cost estimate and actual cost reports as described below:

(i) LOGREQ Initial Cost Estimate**:**

(1) The Contractor shall provide each ship a cost estimate in response to all orders issued to the Contractor by any method identified under "ISSUANCE OF ORDER" in Contract Terms and Conditions – Commercial Items. The orders will be provided to the Contractor by ships, activities and individuals identified in the contract. The cost estimate will include estimated prices for all items ordered. It will not be sufficient to simply say that the estimated price is "per FISC contract" or "per Port Tariff". The cost estimate shall be provided to the ship and the FISC Contracting Office within two (2) working days after receipt of the order and shall include the date time group of the LOGREQ that initiated the order. The cost estimate shall provide details of any anticipated "additional" costs as well as details of any potential cost savings or cost avoidance recommendations. In the situation where the Contractor receives the order with less than two (2) working days prior to the arrival of the ship, the Contractor shall make every effort possible to provide the cost estimate prior to the ship's arrival, but in no event after two (2) days after receipt of the LOGREQ. The Contractor shall be charged an amount equal to one (1) days' daily management fee at the subsequent days rate for cost estimate reports received more than two (2) working days after receipt of the LOGREQ.

(2) The Contractor shall send their cost estimates in PDF format (Adobe Acrobat), to the LogSSR email address of **navsup_hq_logssr@navy.mil** and to the Contracting Officer for inclusion in the LogSSR database. This submission should be sent with the final cost information.

(3) These estimates shall be provided to the requiring customers authorized to use this contract.

(4) In addition to the LOGREQ initial cost estimate, the Contractor shall provide any additional information and respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services office or the DAO.

(ii) Actual Cost Report:

(1) The Contractor shall furnish an Actual Cost Report, or invoice, covering all port costs paid by each ship for which the Contractor provides husbanding services. The term "port costs" includes all supplies or services identified in the section of the contract titled, SUPPLIES/SERVICES AND PRICES, supplies or services furnished under another FISC contract, and any other charge paid by the ship during the port visit. The report should include the ship's signature for acceptance and annotate any payment

document numbers as applicable.

(2) The Contractor shall forward the Actual Cost Reports in PDF format via email to the Contracting Officer and the **navsup_hq_logssr@navy.mil** email address for inclusion in the LogSSR database. The Contractor shall deliver the reports to the FISC Contracting Office within seven (7) calendar days from the completion of the ship's visit. The Contractor shall be charged an amount equal to one (1) days' daily management fee at the subsequent days rate for Actual Cost Reports received more than seven (7) calendar days after receipt of the LOGREQ.

The cost information shall be entered and submitted into the LogSSR website directly by the husbanding service provider. The Contracting Office will use the email copies to validate the entry submission.

(3) Any changes to an Actual Cost Report shall be forwarded to the FISC Contracting Office and navsup_hq_logssr@navy.mil email account within seven (7) calendar days of the change. For instance, if a ship departs port without paying all or part of a bill, the Contractor will identify the line items not paid.

(4) These final reports shall be provided for all ships visiting ports covered by the contract.

NOTE: Before submission of reports or any other data to the FISC Contracting Office via electronic transmission or any other data media, the Contractor shall scan with current anti-virus software all documents to ensure computer virus free transmission. The LogSSR server scans all reports for computer viruses before inclusion in the databases. Any reports sent containing any computer viruses would be returned immediately to the Contractor.

(b) LogSSR access and input.

(i) Upon award, the Contractor must enter final port cost information directly into the LogSSR database and email all corresponding documentation (initial cost estimate, final invoices, accompanying data). External Certification Authority Public Key Infrastructure (ECA PKI) is not required for entry, but no access to the contractor's information is accessible unless obtaining an ECA PKI.

(ii) Contractors can obtain access to their submissions only by obtaining an ECA PKI per the NAVSUP One Supply guidelines and requesting access through the website. Information can be obtained through the LogSSR website at https://www.navsup.navy.mil/portal/page/portal/logssr/index.jsp.

EXHIBIT D – HISTORICAL DATA

The Excel spreadsheet provides historical data for reference only.

CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3

PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

    7.1. Licensed for commercial operations by local country Department of Transportation.

    7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

    7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

    7.4. If a deckhand crewmember is required, only qualified personnel are used.

    7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

    7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 4

SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the

ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 5
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (Hong Kong). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (Hong Kong) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 5.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the

deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Det Singapore will use in evaluating contractor performance under the contract including but not limited to evaluating pre-arrival estimate and port visit cost reporting of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the pre-arrival estimate and port visit cost reporting performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will establish policies and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with the capability to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor contractor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those

decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (CO) is responsible for monitoring contract compliance, performing contract administration, and the resolution of any differences between the observations documented by the requiring activity, and the contractor's performance. The CO is responsible for monitoring the contractors quality assurance program through the QASP (See below)

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

2.3 The contracting officers representative will be identified to the contractor at the time an order is issued. The CO will also have the responsibility for completing QA monitoring forms (refer to Attachments 6b and 6c) used to document the evaluation of the contractor's reporting and price performance.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED
The contractor shall provide husbanding service support in accordance with the PWS

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and self-assessments from the contractor and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 6c.

4.3 The acceptable quality levels (AQL) located in Attachment 6a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls. The Government will evaluate the total number of ship visits on a quarterly basis to determine if the contractor has met the goals assigned in the QASP.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes from the pre-arrival cost estimate, which is substantiated by the customer and contractor prior to the submission of the final invoices, finally communicated to the contracting officer via the customer service survey form and LOGSSR Reporting Data.

5.2 The Government's QA monitoring, accomplished by the CO, will be reported using the monitoring forms in Attachments 6b and 6c. The forms, when completed, will communicate the customer and COR evaluation of the contractor's performance to the contracting officer.

5.2.1 The CO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited in this QASP to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives (See Attachment 6a) should performance not meet the AQL's.

6.2 The CO will randomly select port visits to evaluate to analyze contractor performance. Within 30 days following the end of each selected order's performance period, the CO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 6b and 6c) will become part of the QA documentation.

6.3 The CO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The CO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the CO as often as required or per the contractor's request. The agenda of the reviews may discuss:
Performance measured by the metrics and trends
Issues and concerns of both parties
Recommendations made by the CO based on contractor information
Issues arising from independent reviews and inspections

6.4 The CO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the CO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. **Notifications**. Consistent with FAR Part 12, the CO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. **Deductions**. The Government has the right to deduct a specified fee for failure to meet performance standards. The amount is identified in the Performance Requirements Summary (PRS) of Attachment 6a.
3. **Termination**. If the CO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the CO shall issue a notice of termination, consistent with FAR Part 12.

ATTACHMENT 6a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit pre-arrival cost estimate to ship and Contracting Officer within two working days after receipt of LOGREQ (PWS Paragraph 11.1)	95%	E-mails receipts, files review, quarterly, random, observations, complaints	Deduction of $500 for each documented instance where performance falls below the AQL and the report is submitted late and documentation in the contractor's past performance record
	Submit final LogSSR cost reports to the NAVSUP LogSSR email address and the Contracting Officer within seven (7) days of each ship's departure (PWS Paragraph 11.2)	95%	E-mail receipts, files review, quarterly, random, complaints	Deduction of $500 for each documented instance where performance falls below the AQL and the report is submitted late and documentation in the contractor's past performance record
	LogSSR submittals are accurate and complete	95%	Files review, periodic, quarterly, random, observations, complaints	Deduction of $500 and require contractor to take corrective action to correct inaccurate/incomplete reports and documentation in the contractor's past performance record

INSTRUCTIONS TO OFFERORS

1. Instructions for Submission of offers.

(a) Submission of offers. Submit signed and dated offers to the office specified in this solicitation at or before the exact time specified in this solicitation. Acknowledgement of amendments to the solicitation must also be provided in a timely manner as set forth in this section. Offer may be submitted by email addressed to (b)(6), (b)(7)(C) at (b)(6), (b)(7)(C)@fe.navy.mil or by facsimile. Information concerning facsimile proposals is below at paragraph (h). Offers must be submitted on the SF 1449 to include the following:

(1) Discount Terms: Complete block 12 on the SF-1449 if any discount terms are offered.

(2) Company Information: Complete block 17a on the SF1449 by providing the Offerors complete mailing address. Also, complete and sign Block 30.

(3) DUNS and NCAGE Numbers: Offerors must provide their DUNS and NCAGE Code numbers in block 17a of the SF-1449. See paragraph e & f below for details regarding DUNS and NCAGE Code numbers.

(4) CCR Registration. The Offeror must provide proof of CCR registration when submitting their offer, by providing a copy of the printed "completed" CCR page from the CCR website. Additional information regarding CCR registration is contained in paragraph g.

(5) Schedule of Supplies or Services (CLINs) spreadsheet from Exhibit A of the solicitation: The offeror must insert their proposed price for each CLIN and SUBCLIN items.

(6) Offeror Representative Information: The Offeror is required to provided their representative information as listed in Overview of the Contract, paragraph 22 to include: Name of Individual, Title of individual, mailing address, telephone number, fax number, mobile phone number, and email address.

(7) Offeror Representations and Certifications: The Offeror is required to complete and submit Offeror representations and Certifications at FAR 52-212-3 OFFEROR REPRESENTATIONS, CERTIFICATIONS—COMMERCIAL ITEMS (MAY 2008) ALTERNATE I (APR 2002), and DFARS 252.212-7000 OFFEROR REPRESENTATIONS AND CERTIFICATIONS – COMMERCIAL ITEMS (JUN 2005) which are located in Section K of the solicitation. All items must be appropriately checked or marked as Not Applicable (N/A).

(8) Technical Proposal and Evaluation: The Offeror must address the following three (3) areas in its Antiterrorism/Force Protection Plan:

8.1 Protection of Ship Schedule Information: Identify how the offeror shall secure US Navy (USN) ship visit information (both paper based and electronic); the routine number and type of personnel with access to the information; and the offeror's company policy regarding dissemination of USN ship visit information.

8.2 Security Screening of Contractor and Subcontractor Employees: Explain the offeror's company policy and processes to screen, for security purposes, prospective employees and to periodically check current employees who might be granted access on and around USN vessels. Offerors shall indicate, as part of their submission, the specific screening method(s) to be utilized on subcontractor personnel who might be granted access on and around USN vessels. The specific screening method(s) shall be identified and whether based on Internet search, screening of databases, communications with local law enforcement authorities, port security requirements, reference checks, personal interviews, credit checks, etc.

8.3 Contractor/Subcontractor Identification: The offeror shall identify how contractor and subcontractor personnel will be recognizable to ship's personnel. This may be accomplished by a combination of picture ID, badges, uniforms, access lists, etc. The offeror shall also identify how

support vehicles/vessels will be marked so that they are readily identifiable to ATFP/ship's personnel.

NOTE: The offeror shall submit a summarized ATFP plan that covers each of the above three areas. The summarized ATFP plan shall address each of the three areas set out above in a total of not more than three (3) pages. Each of the three pages shall have margins of one (1) inch or greater on all four sides of the page. Text shall be displayed in not smaller than font size 10. The pages shall be 8-1/2" x 11" or A4 size. Any attachments or enclosures to the three-page plan will count as part of the allowable three (3) pages. If an offeror submits an ATFP plan in excess of three (3) pages, only the first three (3) pages will be read and considered for purposes of determining technical acceptability.

(9) Past Performance Information (PPI) and Evaluation:

9.1 The offeror shall provide past performance information on directly-related or similar contracts it has held within the last three (3) years. These contracts should have been of similar size and scope to the requirements included in this solicitation. The offeror will explain why its past performance work is relevant to this solicitation. The Government will give greater consideration to the contracts which are more relevant to husbanding services requirements included in this solicitation.

9.2 The offeror may submit information on up to six contracts it has performed in the last three years that are similar in size and scope to the Government's requirements under this solicitation.

9.3 The offeror shall provide the following information for each contract:

A. Contract Title and Number
B. Year(s) Contract In-Effect.
C. Dollar Value.
D. Location(s) of Performance.
E. Customer Contact Information to Include:

Company or Government Agency Name
Point of Contact Name
Current Phone Number and Email Address

9.4 The past performance information submitted by an offeror shall not total more than six pages. Each of the six pages shall have margins of one (1) inch or greater on all four sides of the page. Text shall be displayed in not smaller than font size 10. The pages shall be 8-1/2" x 11" or A4 size. Any attachments or enclosures to the six pages will count as part of the allowable six pages. If an offeror submits past performance information in excess of six pages, only the first six pages will be considered.

9.5 The Government will evaluate the offeror's past performance by considering the subfactor described below to determine the degree in which the offeror demonstrates its ability to meet the requirements of the solicitation. Evaluation of past performance will be a subjective assessment based on consideration of all relevant facts and circumstances.

A. Size and Scope: The Government will evaluate the offeror's past performance to determine if the offeror has performed similar work of the size and scope that will be required under the proposed contract.

B. Quality: The Government will evaluate the offeror's past performance to determine if the offeror has complied with contract requirements in terms of standards of good workmanship and service.

C. Timeliness of Performance: The Government will evaluate the offeror's past performance to determine if the offeror has complied with contract delivery schedules.

D. Customer Satisfaction: The client's satisfaction with the final product/service.

(b) Period for acceptance of offers. The offeror agrees to hold the prices in its offer firm for 60 calendar days from the date specified for receipt of offers, unless another time period is specified in an amendment to the solicitation.

(c) Completion and Submission to the Government

The completion and submission to the Government of the above items will constitute an offer (proposal) and will indicate the offeror's unconditional assent to the terms and conditions in this solicitation and in any listed attachments. Offerors are cautioned to consult with the contracting officer before submitting an offer that takes exception to any term or conditions of this solicitation. The Government reserves the right to permit offerors to revise their proposals.

(d) Contract award. The Government reserves the right to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(e) 52.212-1 (Data Universal Numbering System (DUNS) Number: DUNS number registration is required for performance under this contract. Contractors must include a DUNS number validated by Dun & Bradstreet when submitting their proposals. Visit the Dun & Bradstreet Homepage at http://www.dnb.com/us/ to find your country's Dun & Bradstreet web page.

(f) CAGE and NCAGE Code Registration: The CAGE Code is a five-position alphanumeric code that identifies contractors doing business with the Federal Government, NATO member nations, and other foreign governments. The CAGE Code is used to support a variety of mechanized systems throughout the government and provides for a standardized method of identifying a given facility at a specific location. Foreign registrants in CCR must have a NATO Commercial and Governmental Entity (NCAGE) Code assigned. Contractors must include validated NCAGE information when submitting their proposals. If your organization does not already have an NCAGE assigned, for most countries you can obtain one by connecting to http://www.dlis.dla.mil/Forms/Form_AC135.asp.

(g) Central Contractor Registration (CCR): A vendor must be registered in the DoD Central Contractor Registration Database (CCR) prior to award of this contract. Vendors must register on a one-time basis, and annually confirm accuracy and completeness of registration information. In order to register for CCR, contractors require a Commercial and Government Entity (CAGE) Code or NATO CAGE Code (foreign contractors) as well as a Data Universal Numbering System (DUNS) number. Although foreign contractors performing outside the U.S. are exempt from mandatory registration in CCR, FISC Det Singapore requires contractors to register in CCR. Contractors must include validated CCR information when submitting their proposals. For detailed information regarding CCR, visit the CCR homepage: http://www.ccr.gov

(h) FACSIMILE PROPOSALS(FAR 52.215-5) (OCT 1997)

i. Definition. Facsimile proposal, as used in this provision, means a proposal, revision or modification of a proposal, or withdrawal of a proposal that is transmitted to and received by the Government via facsimile machine.

ii. Offerors may submit facsimile proposals as responses to this solicitation. Facsimile proposals are subject to the same rules as paper proposals.

iii. The telephone number for receiving facsimile equipment is: 65-6-750-2639

iv. If any portion of a facsimile proposal received by the Contracting Officer is unreadable to the degree that conformance to the essential requirements of the solicitation cannot be ascertained from the document-

(a) The Contracting Officer immediately shall notify the offeror and permit the offeror to resubmit the proposal;

(b) The method and time for resubmission shall be prescribed by the Contracting Officer after consultation with the offeror; and

(c) The resubmission shall be considered as if it were received at the date and time of the original unreadable submission for the purpose of determining timeliness, provided the offeror complies with the time and format requirements for resubmission prescribed by the Contracting Officer.

AWARD CRITERIA
EVALUATION AND AWARD

1. The Government will award a contract to the responsible offeror who submits the lowest price, technically acceptable offer with acceptable or neutral past performance. To be eligible for an award, the offeror's technical proposal (i.e. Antiterrorism/Force Protection (ATFP) plan) must be determined acceptable and past performance must be acceptable or neutral based on the evaluation provisions set forth below.

(a) Technical Evaluation: The summarized Antiterrorism/Force Protection (ATFP) plan will be evaluated as follows:

ACCEPTABLE: The offeror has submitted a technical proposal that adequately explains how it will meet the requirements in the PWS to protect ship schedule information, conduct a security screening of contractor and subcontractor employees, and ensure that contractor and subcontractor personnel are recognizable by ship personnel. Recognizing that the technical proposal is a summarized ATFP, the technical proposal must provide sufficient detail so that a reviewer can reasonably determine that the submitter understands the PWS requirements in each of the three areas and has described procedures to ensure that the requirements will be satisfied.

UNACCEPTABLE: The offeror submitted a technical proposal that fails to meet the acceptable standard described above.

(b) Past Performance Evaluation: Offeror's past performance will be rated as "acceptable" or "unacceptable". The Contracting Officer will evaluate the past performance. If no past performance information is available for an offeror, the offeror will be given a "neutral" rating. The government may contact an offeror's references concerning the past performance information. Offerors whose past performance information is rated either "acceptable" or "neutral" will be considered for award. Offerors whose past performance is rated "unacceptable" will not be considered for award.

i. Each offeror's performance will be considered under existing and prior contracts for similar services. Information obtained from references listed in proposals, other customers known to the Government, and other sources of useful and relevant information may be considered.

ii An "unacceptable" rating will be given to the offeror who is, or within the past three years has been, seriously deficient in contract performance, unless the Contracting Officer determines that the circumstances were properly beyond the offeror's control or that the offeror took appropriate corrective action. Seriously deficient denotes a situation where performance did not meet some material contractual requirement that was unlikely to be resolved in a timely manner.

iii In case no past performance history is available, the contractor will be given a neutral rating for past performance. If past performance records submitted by an offeror are insufficient or not relevant to the requirement, the offeror will be given a "neutral" rating.

(c) Price Factor: The Government, through price analyses, will evaluate price(s) offered in response to the solicitation.

i. The Offeror shall complete and provide the Pricing/Fee Schedule contained in Exhibit A of the solicitation. Offerors are required to enter all unit and total prices for the Base Period and Option Period CLINs/SUBCLINs.

ii. The Government will only evaluate prices for proposals having **"acceptable"** technical proposals and past performance. Proposals that are determined to have "**unacceptable"** technical proposals or past performance will not be evaluated for price.

iii. Price analysis will be performed to evaluate the price proposals to determine whether they are fair and reasonable and balanced. Price analysis will be performed in accordance with FAR 15 and also comparison of proposed prices received in response to the solicitation.

iv. The Government may determine that an offer is unacceptable if any CLIN or SUBCLIN extended line item price is not included in the proposal.

(d) Contract Award: Through the above evaluation, the Government will award a contract resulting from this solicitation to the responsible offeror who submits the lowest total price, technically acceptable offer with acceptable or neutral past performance.

Single Award For All Items (JAN 1999) (NAVSUP): Due to the interrelationship of supplies and/or services to be provided hereunder, the Government reserves the right to make a single award to the offeror whose offer is considered in the best interest of the Government, price and other factors considered. Therefore, offerors proposing less than the entire requirement may be determined to be unacceptable.

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to husband U.S. Navy ships visiting Brunei, Indonesia, Malaysia and East Timor.

2. SCOPE

2.1. This contract is for Husbanding Services (HS). It is to provide services and supplies requested by the ships while in port.

2.2. The contract may be subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract:

Lot A – the port of Muara, Brunei
Lot B – the port of Bali, Indonesia
Lot C – the port of Jakarta, Indonesia
Lot D – the port of Surabaya, Indonesia
Lot E – the port of Kota Kinabalu, Malaysia
Lot F – the port of Kuantan, Malaysia
Lot G – the port of Lumut, Malaysia
Lot H – the port of Penang, Malaysia
Lot J – the port of Port Klang, Malaysia
Lot K - all other ports of Brunei, Indonesia and Malaysia (BIM).
Lot L – all ports of East Timor
Lot M – OOTW for all locations of BIMET

2.3. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

4. DURATION OF CONTRACT - This contract is for 11 months commencing 03 Nov 2009 through 30 Sep 2010.

5. CONTRACT USERS

5.1. Mandatory Users - U.S. Navy ships visiting locations covered under this contract are required to use this contract if HSs are requested (with the exceptions noted below).

5.2. Optional Users - The following types of U.S.ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (USNS)
- U.S. Coast Guard (USCG) Ships
- U.S. Army Ships
- Department of Defense (DOD) Chartered Ships
- U.S. Government personnel conducting business in locations under this contract.

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously husband a maximum of fifteen ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. RESERVED - MILITARY SEALIFT COMMAND (MSC)

10. RESERVED - SHIPYARDS

11. OTHER PERSONNEL – Other U.S personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Fees. These orders do not involve continuous management husbanding services and are for items such as vehicles and phones.

12. CORRESPONDENCE IN ENGLISH - All correspondence will be in English.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and

licensed in their relevant area.

13.2. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.3. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.4. The Contractor will ensure that subcontractors comply with these requirements.

13.5. The Contractor is reminded that it must comply with all applicable laws and regulations pertaining to Ethics and Standards of Conduct. The Contractor shall refrain from providing gratuities, upgrades, entertainment, food, parties and any other prohibited item.

14. HEIGHTENED VIGILANCE - The contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

15. CONTRACTOR PROVIDED EQUIPMENT - All vehicles, watercraft, and equipment provided under this contract must be in sound mechanical condition, be in compliance with local laws, meet all local safety standards, and have all required current certifications and insurance.

16. RESERVED - GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM)

17. CONTRACT PRICING

17.1. Contract Currency – All contract prices are in United States Dollars (US$).

17.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of all costs.

17.3. Port Tariff (PT) or other controlled prices - (Exhibit B - Port Tariffs) Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

17.4. Prices are all inclusive

17.4.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.4.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes transportation of equipment and charges for the use of cranes or forklifts for placement of equipment on or off ships.

17.4.3. Repositioning equipment. All repositioning of equipment shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.4.4. Local government taxes are included in the unit cost when applicable.

17.5. Time Calculations. Several services are based on hourly or daily rates. Time will begin being measured once the equipment is along side the vessel and capable of operations or is in staging areas as required by port operations.

18. ORDERING ITEMS ON CONTRACT

18.1. Authorized Ordering. Only Authorized Government Representatives (AGRs) can place orders against this contract. AGRs for this contract are;

- Warranted ship Supply Officers (SUPPOs) of the ship visiting the port.
- FISC Logistics Support Center (LSC) personnel authorized to issue Logistics Requirements (LOGREQs)
- Any FISC Yokosuka (including Sites/Detachments) warranted Contracting Officer or their authorized representative.

18.2. Written Orders. All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Orders should be given as soon as possible but no later than 48 hours prior to ship arrival.

18.3. Oral Orders. AGR oral orders are authorized for less than $100,000.00. Written confirmation of the oral order must be provided to the Contractor within ten (10) working days.

18.4. LOGREQ Orders. Issuance of a LOGREQ shall constitute placement of an order. The AGR will need to confirm the LOGREQ order with a Task or Delivery Order prior to invoicing.

18.5. Short Notice Orders. Occasionally, there may be short notice orders of less than 24 hours which the Contractor should support if possible. If the Contractor cannot support these requirements then AGR may solicit other companies to perform the work.

18.6. Method of Ordering. Orders may be issued by phone, facsimile or by E-mail.

19. ORDERING NON-CONTRACT ITEMS

19.1 Non-Contract items may be requested using standard procurement procedures. Once requested, the contractor will assist in obtaining the item.

19.2. The contractor will provide a separate invoice for all Non-Contract Items and will include supporting documentation to the ship SUPPO for payment. Specifically, a Written Order with fund cite, sufficient dollar amount, and government acknowledgement of services performed.

20. CANCELLATIONS

20.1. Orders may be cancelled orally or in writing. Oral cancellations will be followed-up with a written confirmation to the Contactor within ten (10) working days.

20.2. An order may be cancelled 24 hours before the start of the service or delivery of the supply item and the government will not be liable for any charges. For an order not cancelled at least twenty-four (24) hours in advance, the AGR is responsible for cancellation costs to be negotiated under the "Termination for the Government's Convenience" (FAR 52.212-4 (1)) section included in this contract. In all cases, the HS contractor is responsible for mitigating any damage or termination costs incurred because of the cancellation.

20.3. In extreme cases where an order was cancelled 24 hours in advance but the contractor incurred costs because the item had to be ordered early due to a long lead time, then the Contractor may request reimbursement of those costs. This will also be negotiated under the FAR 52.212-4 (1) clause.

21. PAYMENTS

21.1. The ship SUPPO or Disbursing Officer will pay all bills prior to ship departure with the exceptions listed below.

21.2. The Contractor shall prepare the invoice with supporting documentation for contract items and present it to the ship SUPPO with sufficient time prior to departure to allow payment. The Contractor will estimate usage for PT or To Be Determined (TBD) items if not known. The ship will pay the invoice using a U.S. Treasury check, cash, or credit card.

21.3. Credit Cards - The contractor must accept the U.S. Government Commercial Purchase Card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPR is MasterCard.

21.4. In some cases, such as where the ship had to depart early or bills came in after the ship departed, NRCC Singapore will pay unpaid invoices (for U.S. Navy ships only). However, it is the Contractor's responsibility to ensure that the proper information is on the invoice and supporting documentation is provided. The Contractor must contact the ship to get missing information.

22. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

BN	Bin
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
JB	Job
LO	Lot
MTON	Million Ton
NSP	Not Separately Priced
PK	Packet
PT	Port Tariff
TBD	To Be Determined
TP	Trip

23.DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the period of the contract. The base period is zero (0). (For example a base

period would be 0XXX.) The second digit indicates the Lot number. (For example Lot 1 would be XAXX, Lot II would be XBXX). The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB for Dive & Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract, place an order, or obligate funds.

- DAY: A calendar day.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GARBAGE: See Attachment 2 - Refuse Definitions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL: Items fully transferred to the Contractor’s control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. U.S. Navy is usually exempt from Government Taxes.

- HOST NATION: The country which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION:

    -- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.
    -- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- "RESERVED": An item not used in this contract.

- RUBBISH: See Attachment 2 – Refuse Definitions.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

- TRASH**:** See Attachment 2 – Refuse Definitions.

24. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual: Mr. Leonard G. Francis

Title of Individual: Executive Group Chairman/President

Mailing Address: 15D Pandan Road

Tel No. (Work): (65) 62685300

Fax No. (Work): (65) 62707240

Mobile: (65) 97983155

E-mail address: Leonard@glennmarinegroup.com; glenncom@glennmarinegroup.com

STATEMENT OF WORK

TASKS: The Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall start communicating with the ship upon confirmation of ship's arrival and receipt of LOGREQ to coordinate requirements. The Contractor shall info copy FISC DETACHMENT SINGAPORE LSC all communications between the ship and themselves.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. The contractor shall furnish to each ship and FISC Det Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether prepriced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship within 24 hours after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs.

1.1.3. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.4. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché' at the U. S. Defense Attaché Office.

1.1.5. For Brunei and East Timor, specifically, the Contractor shall provide inputs for LOGREQ reply to FISC DETACHMENT SINGAPORE LSC within 24 hours after receipt of LOGREQ but no later than 24 hours prior to the ships arrival.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements. For example, the HS Contractor would coordinate Provisioning contractors delivery dates, times, forklifts, cranes, stevedores, inspections, or any other item needed for them to perform their work at the berth.

1.1.8. The Contractor shall assist the ship's Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide a copy of The Schedule and SOW to the SUPPO.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. Moneychangers: The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services: The Contractor shall provide interpreter services using personnel fluent in both the local language and English.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers this Port location then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. The Contractor shall continue to coordinate with other US government contractors in performing their required services after ships arrival. This includes passing orders and coordinating delivery requirements. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor.

1.2.12. The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the ship prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship personnel accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.3.1. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.3.2. Copies of all invoices presented to the ship shall be provided to the Contracting Officer, FISC Det Singapore, withing five working days from the departure of the visiting vessel.

1.3.3. The Contractor shall also provide any invoices for all port tariff items based on Contractor's best estimate for certification by the Ship's Supply Officer. The ship shall provide payment for the port tariff items to the Contractor based on the estimate along with their payment for other port services provided and received during the port visit.

1.3.4. In the event of overpayment by the ship to the contractor, based on cost overestimation, the contractor shall remit advice of credit /refund actions through the Contracting Officer to assist in the completion of the port visit reconciliation.

1.4 ARRANGING SUPPLIES AND SERVICES

1.4.1. When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall issue appropriate contractual documents and courtesy copy to FISC Det Singapore Contracting Officer. The Contractor shall deliver to the vendor the Supply Officer's or FISC Det Singapore Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FFV, Bread and Eggs) the contractor shall use the SOWs furnished herein when arranging supplies and services.

1.4.2. In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Det Singapore Contracting Officer during the ship visit or no later than 5 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in the Overview of Contract, paragraph 13, Standards for Professional Services; sub-paragraph 13.1.

1.5. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.5.1. When requested by the ship, the husbanding contractor shall assist in arranging for the timely provision of FFV, Bread and Eggs and other subsistence items. FFV shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. Bread and Eggs must be from approved sources and must be in accordance with Quality Assurance Provisions in Attachment 9. The husbanding services contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.5.2. In all cases where the total cost of FFV and subsistence items received by a ship exceeds $10,000.00 for a port visit, the contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Det Singapore Contracting Officer within 5 (five) days after the visit. The report shall provide a breakdown of the FFV and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the contractor shall provide copies of all quotes obtained.

1.5.3. The husbanding contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Corps. A listing of approved sources is available via the U.S. Army Veterinary Command (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection can be obtained from FISC Det Singapore. The U.S. Army Veterinary Command requires 90 days advance notice to arrange for inspection of new facilities.

1.5.4. Husbanding contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the contractor recommend or offer for acceptance subsistence items from non-approved sources.

2. RESERVED (Not to be used.)

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place fenders between the breasting barge and the ship.

3.3. The Contractor shall provide a barge to use as a fender or as part of a fendering system between the ship and the pier or between other ships. The barge shall have a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)- The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

5. CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to Contractor provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable fendering to prevent damage to vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage.

7.3. The Contractor shall provide activation, long distance accounts, and airtime for land and mobile hand phones.

8. CRANE (CLIN XX08) **-** The Contractor shall provide cranes with operators, required assistant personnel, and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09)

9.1. The Contractor shall provide pier and wharf usage for the ports of Indonesia.

9.2. The contracting officer or any authorized Government official otherwise having authority to order supplies and services under the contract has no authority to order Dockage and Wharfage space under the contract at ports in Malaysia or Brunei. This restriction of authority applies regardless of whether the Dockage and Wharfage space is ordered under a specific contract line item or through the contract's provisions for ordering otherwise unspecified supplies and services. The Husbanding Service Contractor shall not be reimbursed, paid, or otherwise compensated for any costs associated with or resulting from any order for Dockage and Wharfage space for a port in Malaysia or Brunei.

9.3. The contracting officer or an authorized government official may direct the Husbanding Service Contractor to request that the appropriate local authority provide Dockage and Wharfage space at a port in Malaysia or Brunei for the U.S. Government's use at no cost to the U.S. Government. If the Husbanding Service Contractor receives a response that the requested Dockage and Wharfage space is available for use by the U.S. Government at no cost to the U.S. Government, the Husbanding Service Contractor shall reserve or otherwise arrange for use of the space and notify the contracting officer or authorized

government official that directed the Husbanding Service Contractor to submit the request. If the Husbanding Service Contractor receives a negative response from the cognizant authority, thereby indicating that there is a cost or expense associated with use of the space by the U.S. Government, the Husbanding Service Contractor shall notify the contracting officer or authorized government official that directed the Husbanding Service Contractor to submit the request. The Husbanding Service Contractor shall perform the tasks included in this paragraph (9.3) as part of its responsibilities under the Management Services CLIN.

10. FENDERS (CLIN XX10) **-** The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11)

11.1. The Contractor shall provide a Fleet Landing site at designated piers in Indonesia. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct FP operations.

11.2. The contracting officer or any authorized Government official otherwise having authority to order supplies and services under the contract has no authority to order Fleet Landing space under the contract at ports in Malaysia or Brunei. This restriction of authority applies regardless of whether the Fleet Landing space is ordered under a specific contract line item or through the contract's provisions for ordering otherwise unspecified supplies and services. The Husbanding Service Contractor shall not be reimbursed, paid, or otherwise compensated for any costs associated with or resulting from any order for Fleet Landing space for a port in Malaysia or Brunei.

11.3. The contracting officer or an authorized government official may direct the Husbanding Service Contractor to request that the appropriate local authority provide Fleet Landing space at a port in Malaysia or Brunei for the U.S. Government's use at no cost to the U.S. Government. If the Husbanding Service Contractor receives a response that the requested Fleet Landing space is available for use by the U.S. Government at no cost to the U.S. Government, the Husbanding Service Contractor shall reserve or otherwise arrange for use of the space and notify the contracting officer or authorized government official that directed the Husbanding Service Contractor to submit the request. If the Husbanding Service Contractor receives a negative response from the cognizant authority, thereby indicating that there is a cost or expense associated with use of the space by the U.S. Government, the Husbanding Service Contractor shall notify the contracting officer or authorized government official that directed the Husbanding Service Contractor to submit the request. The Husbanding Service Contractor shall perform the tasks included in this paragraph (11.3) as part of its responsibilities under the Management Services CLIN.

12. FORCE PROTECTION (CLIN XX12)

12.1. General: (CLINs XX01 & XX02) The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchor. The contractor must coordinate all aspects of FP planning with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.2.1. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be

standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.2.2. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.3. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.3.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.3.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.3.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.4. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.5. Stand-Off Distances:

12.1.5.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.5.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.6. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.6.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.6.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC DETACHMENT SINGAPORE KO. The Contractor must explain what the FP service will entail and why it is being required. The KO will coordinate this requirement with appropriate FP personnel at FISC DETACHMENT SINGAPORE, COMLOGWESTPAC and the U.S. Embassy. Once a decision is made then the contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of 5 people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions. The office or tent shall be well lighted and identified for its intended use. The contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 lb, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. Floating Perimeter (CLIN XX12AC, XX12AD, AND XX12AE)

12.5.1. General:

12.5.1.1. The Contractor shall provide a Floating Perimeter (FPM) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FPM is to establish a visual reference final

demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FPM is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.1.2. The size of the perimeter will depend on the class of ship. Pierside, the FPM should be positioned 400 feet (125 meters) fore and aft of the ship and 400 feet (125 meters) out into the water from the ship. If sufficient space is not available then the perimeter will be positioned as far as possible from the ship. At anchorage, the FPM will be positioned 400 feet (125 meters) outside the swing radius of the ship.

12.5.2. Floating Perimeter Continuous Line (CLIN XX12AC) - The Contractor shall provide a Continuous Line FPM in accordance with Attachment 3 – Floating Perimeter.

12.5.3. Floating Perimeter Buoy System (CLIN XX12AD and XX12AE) - The Contractor shall provide a Buoy System FPM in accordance with Attachment 3 – Floating Perimeter.

12.6. RESERVED – (Perimeter Fencing) (CLIN XX12AF)

12.7. Physical Security Barriers (CLIN XX12AG THRU XX12AK)

12.7.1. The contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ships arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AL)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations.

12.9. RESERVED – (Portable Latrine) (CLIN XX12AM)

12.10. Portable Lighting (CLIN XX12AN)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards on Picket Boats (CLIN XX12AP)

12.11.1. The Contractor shall provide security guards to patrol in picket boats.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.12. Security Guards Pierside (CLIN XX12AQ) -

12.12.1. The Contractor shall provide security guards Pierside to ensure only authorized personnel, vehicles, and material are allowed into restricted areas.

12.12.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.13. Two Way Radios (CLIN XX12AR) The Contractor shall provide two way radio sets capable of communicating with the ship to designated individuals.

13. FORKLIFT (CLIN XX13) **-** The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available then the HS contractor may provide the fuel through local companies.

14.2. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.3. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.4. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.5. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.6. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. RESERVED – (LINESBOATS) (CLIN XX16)

17. LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. RESERVED – (MANLIFT) (CLIN XX18)

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. Material Handling

19.5.1. Packages under 150 lbs (68.18 kl) will normally be priority airmailed via a government contract called WWX utilizing FEDEX, UPS, or DHL companies. The WWX contractor will bring the package into the country, clear customs, and deliver to the HS Contractor. The package might also be sent by regular airmail or by ship whereby the Contractor will have to clear the package through customs.

19.5.2. Packages over 150 lbs (68.18 kl) up to 20 tons will be sent via any commercial means but not by WWX. The Contractor will have to clear the package through customs.

19.5.3. The Contractor shall receive the package from the carrier and clear it through customs if other than WWX. Any damages must be noted prior to acceptance.

19.5.4. The Contractor shall store the package so that it will not be damaged.

19.5.5. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative.

19.5.6. The Contractor shall deliver the package to the ship after arrival in port.

19.5.7. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

20. RESERVED – (MISCELLANEOUS) (CLIN XX20)

21. RESERVED – (OIL BOOMS) (CLIN XX21)

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship duty engineer shall verify in writing the amount removed.

22.4. The contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with suitable fendering to prevent damage to the ship and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

23. PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the intake hose of the requesting ship in accordance with Attachment 7 – Potable Water Specifications.

26. RESERVED – (PRATIQUE) (CLIN XX26)

27. RESERVED – (REEFER CONTAINER) (CLIN XX27)

28. RESERVED – (SHORE POWER) (CLIN XX28)

29. RESERVED – (SHORE STEAM) (CLIN XX29)

30. RESERVED – (STEVEDORES) (CLIN XX30)

31. RESERVED – (TENT WITH EQUIPMENT FOR SPECIAL EVENTS) (CLIN XX31)

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with drivers for official government business.

32.3. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.4. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.5. The Contractor shall provide drivers who can speak and understand English clearly.

32.6. The Contractor shall provide only vehicles with air conditioning.

32.7. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.8. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC DETACHMENT SINGAPORE LSC if the ship has departed.

32.9. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 8 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit C – CRAFT Report.

35.2. The report shall be submitted to the FISC DETACHMENT SINGAPORE Contracting Officer or designated representative within five working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW) AND CONTINGENCY EXERCISE/ LOGISTIC SUPPORT FEES (LOT 3) (CLIN XX36)

36.1. Operations Other Than War (OOTW), sometimes referred to as "contingencies", are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

36.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise."

36.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

36.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO's).

36.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

36.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
36.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
36.5.3. current innoculation records
36.5.4. possess a valid up-to-date passport.

36.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The POC or his representative is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each support location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor's Husbanding fees and CLINS shall apply.

36.8. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. The Contractor may be required to support multiple operations at the same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.9. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

37. OOTW COST REPORT (CLIN XX37)

37.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit C – CRAFT.

37.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

38. NON-CONTRACT ITEMS (CLIN XX38) – Items ordered under this CLIN shall be the cost for non-contract line items.

EXHIBITS AND ATTACHMENTS

Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
FLOATING PERIMETER SPECIFICATIONS

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

    3.1. Continuous Line FLD - If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

        3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

        3.1.2. Specifications:

            3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

            3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

            3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

    3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

        3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 4
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.11. Have minimum one meter high guardrails for security guard use.

7.12. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 5
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 26
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fu without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of t inspection authority.

Minimum Requirements for Purchases of Commercial Distillate Fuels ((Navy) Marine Gas Oil) for Bunkers

The following minimum requirements have been established for use when buying fuel (gas oil - 100% distillate) from commercial sources when F76 is not available. Marine Gas Oil is not acceptable as cargo fuel on Navy Oilers.

TEST	**METHOD**	**REQUIREMENTS**
1. Cetane Number	ASTM D 613	45 min
or		
Cetane Index	ASTM D 976	45 min

Note: A cetane index of 41 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exce of 338ºC. A cetane number of 40 or above, but less than 45, is acceptable provided the 90% Distillation Point does no maximum of 338 °C.

2. Appearance @ 21ºC or ambient ter (whichever higher)	Visual	Clear & Bright
or		
Water and Sediment	ASTM D 2709	0.05% max
3. Distillation. 90% Point	ASTM D 86	375ºC max

4. Flash Point	ASTM D 93	60ºC min
5. Pour Point	ASTM D 97	Report
6. Cloud Point	ASTM D 2500	-1.1ºC (30 °F)
7. Viscosity @ 40ºC	ASTM D 455	1.7 - 4.5 CST
8. Color	ASTM D 1500	3 max
9. Gravity	ASTM D 1298, D 287	Record
10. Carbon Residue	ASTM D 524	0.35% max
11. Ash	ASTM D 482	0.01% max
12. Sulfur	ASTM D 129, D 1552 D2622	1.00% max
13. Copper Corrosion	ASTM D 130	3 max

C16.23-2 COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC JAN 1998)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST	METHOD	REQUIREMENTS
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min

NOTE: A Cetane Number of 40 minimum, or a Cetane Index of 41 minimum, is acceptable provided the 90 Percent Distillation Point does not exceed a maximum of 338^{O}C.

2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min

NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.

5.	Cloud Point	ASTM D 2500	-1.1^{O}C (30^{O}F) max.

NOTE: Cloud Point results will be evaluated based upon bunkering location.

6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cst
7.	Color	ASTM D 1500	3 max.

NOTE FOR DOMESTIC ITEMS: This Color test requirement is deleted if red dye has been added in compliance with U.S. Environmental Protection Agency or Internal Revenue Service regulations; however, the resulting fuel/dye blend must have a r tint. It shall not be visually brown or darker in appearance.

8.	Density @ 15^{O}C	ASTM D 1298	876 kg/m^{3} max.

9.	Carbon Residue on 10% bottoms	ASTM D 524 ASTM D 189	0.35 mass % max.
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur	ASTM D 4294, ASTM D 1552, or ASTM D 2622	1.0 mass % max.
12.	Corrosion	ASTM D 130	3 max.
13.	Distillate Fuel (fuel shall contain no residual)	None	100%

C36 FUEL OIL, INTERMEDIATE, GRADES RMB-10 (IFO 60)/RME-25 (IFO 180)/RMG-35 (IFO 380) (DESC MAY 199

Product shall conform to ISO 8217:1996 or ASTM D 2069-91. Product conforming to ASTM D 2069-91 shall meet the following additional requirements:

REQUIREMENTS	**GRADE RMB-10 (IFO 60)**	**GRADE RME-25 (IFO-180)**	**GRADE RMG-35 (IFO 380)**	**GRADE TEST METHOD**
Density @15°C, kg/m^3, max	981.0	991.0	991.0	ISO 3675/12185
Aluminum plus silicon, mg/kg, max	80	80	80	ISO 10478
Total Sediment, potential, %(m/m), max	0.10	0.10	0.10	ISO 10307-2

ATTACHMENT 7
POTABLE WATER SPECIFICATIONS

The following are Potable Water specifications used for this contract.

NATIONAL PRIMARY DRINKING WATER REGULATIONS (NPDWR) BUREAU OF MEDICINE AND SURGERY (BUMED) TREATED WATER QUALITY STANDARDS /ENVIRONMENTAL PROTECTION AGENCY

CONTAMINANT	*MCLG (mg/L)* [1]	*MCL (mg/L)*	*AL (mg/L* [2]*)*
ASBESTOS	7 million fibers/L longer that 10 micrometers	7 million fibers/L longer than 10 micrometers	
ARSENIC		0.05	
BARIUM	2	2	
CADMIUM	0.005	0.005	
CHROMIUM	0.1	0.1	
COPPER	1.3		1.3 [3]
LEAD	0	0.015[4]

NITRITE (AS N)	1	1	
Total NITRATE and Nitrite (as N)	10	10	
SELENIUM	0.05	0.05	
FLUORIDE	4	4	

(1) Maximum contaminant level goal (MCLG). The maximum level of a contaminant in drinking water at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MCLGs are no enforceable health goals.

(2) Action level (AL). Concentrations of lead or copper in water that determine, in some cases, whether a water system must install corrosion control treatment, monitor source water, replace lead service lines, and undertake a public education program.

(3) The copper action level is exceeded if the concentration of copper in more than 10 percent of tap water samples properly collected during any monitoring period is greater than 1.3 mg/L (i.e., if the "90th percentile" copper level is greater that 1.3 mg/L).

(4) The lead action level is exceeded if the concentration of lead in more that 10 percent of tap water samples properly collected during any monitoring period is greater that 0.015 mg/L (i.e., if the "90th percentile" lead level is greater than 0.015 mg/L).

Contaminant levels for volatile organic chemicals (VOCs) (effective 01 January 1993)

TOTAL TRIHALOMETHANES (THE SUM OF THE CONCENTRATIONS OF BROMODICHLOROMETHANE, DIBROMOCHLOROMETHANE, TRIBROMOMETHANE (BROMOFORM), AND TRICHLOROMETHANE (CHLOROFORM)		0.10[(1)]

Note:

(1) The MCL for total trihalomethanes applies only to water systems serving 10,000 or more individuals and which add a disinfectant to the water. For systems serving less than 10,000 individuals, individual States or BUMED (in overseas locations) may adopt an effective date for the MCL.

Microorganisms	MCLG[1] (mg/L)[2]	MCL or TT[1] (mg/L)[2]
Cryptosporidium	as of 01/01/02: 0	as of 01/01/02: TT [3]
Giardia lamblia	0	TT[3]
Heterotrophic plate count	n/a	TT[3]
Legionella	0	TT[3]
Total Coliforms (including fecal coliform and *E. Coli*)	zero	5.0%[4]
Turbidity	n/a	TT[3]
Viruses (enteric)	zero	TT[3]

Note:
[1] Definitions:
Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to MCLGs as feasible using the best available treatment technology and taking cost into consideration. MCLs are enforceable standards.
Maximum Contaminant Level Goal (MCLG) - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety and are non-enforceable public health goals.
Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
Treatment Technique - A required process intended to reduce the level of a contaminant in drinking water.
[2] Units are in milligrams per liter (mg/L) unless otherwise noted. Milligrams per liter are equivalent to parts per million.

[3] EPA's surface water treatment rules require systems using surface water or ground water under the direct influence of surface water to (1) disinfect their water, and (2) filter their water or meet criteria for avoiding filtration so that the following contaminants are controlled at the following levels:

- *Cryptosporidium:* (as of January 1, 2002) 99% removal/inactivation
- *Giardia lamblia:* 99.9% removal/inactivation
- Viruses: 99.99% removal/inactivation
- *Legionella:* No limit, but EPA believes that if *Giardia* and viruses are removed/inactivated, *Legionella* will also be controlled.
- Turbidity: At no time can turbidity (cloudiness of water) go above 5 nephelolometric turbidity units (NTU); systems that filter must ensure that the turbidity go no higher than 1 NTU (0.5 NTU for conventional or direct filtration) in at least 95% of the daily samples in any month. As of January 1, 2002, turbidity may never exceed 1 NTU, and must not exceed 0.3 NTU in 95% of daily samples in any month.
- HPC: No more than 500 bacterial colonies per milliliter.

[4] No more than 5.0% samples total coliform-positive in a month. (For water systems that collect fewer than 40 routine samples per month, no more than one sample can be total coliform-positive). Every sample that has total coliforms must be analyzed for fecal coliforms. There may not be any fecal coliforms or *E. coli*.

[5] Fecal coliform and *E. coli* are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Disease-causing microbes (pathogens) in these wastes can cause diarrhea, cramps, nausea, headaches, or other symptoms. These pathogens may pose a special health risk for infants, young children, and people with severely compromised immune systems.

Coliform Bacteria

a. The MCL for coliform bacteria (also called total coliforms) is based on the presence or absence of total coliforms in a sample rather than on an estimate of coliform density.

b. The MCL for potable water systems analyzing at least 40 samples each month: No more than 5.0 percent of the monthly samples may be total coliform-positive.

c. The MCL for systems analyzing fewer than 40 samples each month: No more than one sample each month may be total coliform-positive.

d. Monitoring and Analytical Requirements

(1) Public water systems must collect total coliform samples at sites which are representative of water through the distribution system. Sampling must be accomplished according to a written sampling plan. The monitoring frequency and number of routine samples required for total coliform monitoring are based on the population served by the system and the type of water source, i.e., groundwater, surface water, etc. Sampling requirements for the Navy public water system apply.

(2) The standard sample volume for microbiological analyses must be 100 milliliters.

(3) Approved methods of microbiological analysis include the Auto analysis Coliert System, also called the Minimum Media ONPG-MUG (MMO-MUG) Test; the Presence-Absence (PA) Coliform Test; the Multiple-Tube Fermentation (MTF) Technique; and the Membrane Filter (MF) Technique. A step-by-step microbiological test procedure for shipboard use applies.

e. Repeat Monitoring

(1) A set of three repeat samples for each total coliform-positive routine sample must be collected. One repeat sample must be collected from the same tap as the original total coliform-positive sample, the other repeat samples must be collected from within five service connections of the original total coliform-positive sample. At least one sample must be upstream and the other downstream. These repeat samples must be collected within 24 hours of being notified of the positive result of the original sample, unless the Contracting Officer on a case-by-case basis waives this requirement.

(2) If a total coliform-positive sample is at the end of the distribution system, or one service connection away from the end of the distribution system, the Contracting Officer may waive the requirement to collect at least one sample upstream or downstream of the original positive sampling site.

(3) If total coliforms are detected in any repeat sample, the system must collect another set of repeat samples, as before.

(4) If any routine or repeat sample is total coliform-positive, it must also be analyzed to determine if fecal coliforms are present, except that the system may test for E. coli in lieu of fecal coliforms, or E. coli testing on total coliform-positive samples if the system treats every total coliform-positive sample as fecal coliform positive or E. coli positive and complies with all requirements which apply when a sample is fecal coliform-positive.

Turbidity: The MCL for turbidity applies to both community water systems and non community water systems using surface water sources in whole or in part. The MCL for turbidity in drinking water measured at representative entry points to the distribution system is:

a. One turbidity unit for monthly average (5 turbidity units monthly may apply at Contracting Officer option).

b. Five turbidity units (maximum) average for 2 consecutive days.

The MCL for Radiological Contaminants are:
Gross alpha particle activity including radium 226 but excluding
radon and uranium . . . . . 15 pCi/L
Beta particles and photon emitters ……4 millirems / year
Combined radium 226 and radium 228 . . . . . .5 pCi/L
Tritium . . . . . 20,000 pCi/L
Strontium-90. . . . . 8 pCi/L

Uranium …….. 30ug/L

Note: Screening indicators have been established for radiological contaminants. Gross Alpha present at less than or equal to 5 pCi/L, as an indicator, eliminates the need to analyze for radium 226 and 228. Gross beta present at less than or equal to 8 pCi/L, as an indicator, eliminates the need to analyze for tritium and strontium-90.

Sodium and Corrosivity. No MCLs have been published; however, monitoring is required.

National Secondary Drinking Water Regulations (NSDWR) The Secondary Maximum Contaminant Levels (MCLs)

CONTAMINANT	MCL (mg/L)
ALUMINUM	0.05 TO 0.02
CHLORIDE	250
COLOR	15 COLOR UNITS
COPPER	1
CORROSIVITY	NONCORROSIVE
FLUORIDE	2
FOAMING AGENTS	0.5
IRON	0.3
MANGANESE	0.05
ODOR	3 THRESHOLD ODOR NUMBER
PH	6.5 - 8.5
SILVER	0.10
SULFATE	250
TOTAL DISSOLVED SOLIDS (TDS)	500
ZINC	5

Note: The contaminants covered by this regulation are those that may adversely affect the aesthetic quality of the drinking water. These secondary levels represent goals for drinking water quality but are not Federally enforceable.

(3) The reception, handling, storage, and delivery of potable water to ship's water systems shall be carried out under completely sanitary conditions.

(4) For pierside berthing, delivery shall be made by hose from the pier whenever possible. If barge service is deemed necessary, the Contractor shall ascertain from the ship's Supply Officer the exact amount needed prior to making delivery.

(5) The Contractor shall make deliveries during normal working hours, unless otherwise approved by the ship's Supply Officer or his/her authorized representative.

(6) All equipment, trucks and barges used by the Contractor in performance of these services shall be subject to inspection and test by an authorized representative of the U.S. Government as the Contracting Officer may specify. Final inspection/acceptance shall be subject to approval by the ship's Chief Engineer or his/her authorized representative. The U.S. Government inspectors shall be entitled to inspect the equipment, trucks, and barges at all reasonable times, as often as they may deem necessary, and at such reasonable place or places as the U.S. Government may specify.

(7) The Contractor shall, without cost to the U.S. Government, furnish the necessary personnel and facilities to conduct such test and examination of samples of water and barges used hereunder as the Government inspector may designate, to determine the extent or possibility of contamination of such water, equipment, and barges. The Contractor may, at its option and cost, have the tests conducted by a recognized Sanitary Inspector provided that the performance of the tests and examinations by such Sanitary Inspection has been approved in advance and in writing by the U.S. Government Inspector.

(8) All tests and examinations, whether performed by or on behalf of the Contractor, shall be conducted in the presence of the U.S. Government Inspector.

(9) The Contractor agrees to furnish such reports and execute such forms as the U.S. Government may require in connection with services performed under this contract and further agrees that requests for such reports and execution of such forms will be executed promptly.

ATTACHMENT 8
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (Philippines). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (Philippines) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the

deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 9
QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32^{o}F-41^{o}F (0^{o}C-5^{o}C) for chilled and 0^{o}F (-18^{o}C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 12 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55^o to 65^oF(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.

Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley

Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products		0 per ml (See notes 6&7)	0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products		20,000 per ml	10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts		50,000 per gram	20 per gram	
Ice cream products, vanilla and plain flavored		50,000 per gram	10 per gram	
Frozen dessert mix:				
Vanilla flavor		50,000 per gram	10 per gram	10 per gram
other flavors		50,000 per gram	20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:
1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

	Aerobic Plate Count (APC)	Coliform Count	
ATP (RLU) Counts			
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.

3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeast and Mold count
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.

4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M

Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]

Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]

Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram

Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu

Counts[2]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram	
Staphylococcus aureus	100 per gram	1000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]	Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice

Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries. Pies. Soft pretzels. Won ton wrappers. Filled bakery items.	All other bakery products, including: Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry. Cookies, unfilled. Crackers. Cupcakes, unfilled. Dough, frozen or chilled. Dumplings, frozen. English muffins.

		Flour. Fruitcakes. Melba toast. Muffins Pancake batter, frozen. Pancake/waffle mix. Pasta, dry (noodles). Pizza crust. Taco shells. Toaster pastries. Pie crusts, unfilled. Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically: Fish, meat, poultry, dairy, egg, and shellfish products. Pickled eggs. Frozen dinners. Pudding novelties, frozen or chilled. Tofu.	All other dietary and specialty preparations, including: Baby formula, canned. Chips, nacho or potato. Creamer, coffee, imitation (non-dairy). Dips. Nacho cheese, canned. Nutri-why. Popcorn. Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including: Salad dressings. Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically: Ice. Bottled water.	All other nonalcoholic beverages, including: Dry ice. Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish

products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products*.

4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

CLAUSES INCORPORATED BY FULL TEXT

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses http://acquisition.gov/comp/far/index.html
DFAR Clauses http://www.acq.osd.mil/dpap/dars/dfars/index.htm

(End of clause)

CLAUSES INCORPORATED BY REFERENCE

52.202-1	Definitions	JUL 2004
52.204-7	Central Contractor Registration	APR 2008
52.212-4	Contract Terms and Conditions--Commercial Items	MAR 2009
52.229-6	Taxes--Foreign Fixed-Price Contracts	JUN 2003
52.232-33	Payment by Electronic Funds Transfer--Central Contractor Registration	OCT 2003
52.232-36	Payment by Third Party	MAY 1999

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2009)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (Aug 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(2) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(3) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.203-13, Contractor Code of Business Ethics and Conduct (DEC 2008)(Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note)).

___ (3) 52.203-15, Whistleblower Protections under the American Recovery and Reinvestment Act of 2009 (MAR 2009) (Section 1553 of Pub. L. 111-5). (Applies to contracts funded by the American Recovery and Reinvestment Act of 2009.)

__(4) 52.204-11, American Recovery and Reinvestment Act—Reporting Requirements (MAR 2009) (Pub. L. 111-5).

___ (5) 52.219-3, Notice of Total HUBZone Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (6) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (7) [Reserved].

___ (8)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (9)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (iii) Alternate II (MAR 2004) of 52.219-7.

___ (10) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637 (d)(2) and (3)).

___ (11)(i) 52.219-9, Small Business Subcontracting Plan (APR 2008) (15 U.S.C. 637(d)(4)).

___ (ii) Alternate I (OCT 2001) of 52.219-9

___ (iii) Alternate II (OCT 2001) of 52.219-9.

___ (12) 52.219-14, Limitations on Subcontracting (DEC 1996) (15 U.S.C. 637(a)(14)).

___ (13) 52.219-16, Liquidated Damages--Subcontracting Plan (JAN 1999) (15 U.S.C. 637(d)(4)(F)(i)).

___ (14)(i) 52.219-23, Notice of Price Evaluation Adjustment for Small Disadvantaged Business Concerns (OCT 2008) (10 U.S.C. 2323) (if the offeror elects to waive the adjustment, it shall so indicate in its offer).

___ (ii) Alternate I (JUNE 2003) of 52.219-23.

___ (15) 52.219-25, Small Disadvantaged Business Participation Program--Disadvantaged Status and Reporting (APR 2008) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (16) 52.219-26, Small Disadvantaged Business Participation Program--Incentive Subcontracting (OCT 2000) (Pub. L. 103-355, section 7102, and 10 U.S.C. 2323).

___ (17) 52.219-27, Notice of Total Service-Disabled Veteran-Owned Small Business Set-Aside (MAY 2004) (U.S.C. 657 f).

___ (18) 52.219-28, Post Award Small Business Program Rerepresentation (APR 2009) (15 U.S.C. 632(a)(2)).

___ (19) 52.222-3, Convict Labor (JUNE 2003) (E.O. 11755).

_X__ (20) 52.222-19, Child Labor--Cooperation with Authorities and Remedies (AUG 2009) (E.O. 13126).

___ (21) 52.222-21, Prohibition of Segregated Facilities (FEB 1999).

___ (22) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

___ (23) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of theVietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (24) 52.222-36, Affirmative Action for Workers with Disabilities (JUN 1998) (29 U.S.C. 793).

___ (25) 52.222-37, Employment Reports on Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

___ (26) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

___ (27) 52.222-54, Employment Eligibility Verification (JAN 2009). (Executive Order 12989). (Not applicable to the acquisition of commercially available off-the-shelf items or certain other types of commercial items as prescribed in 22.1803.)

___ (28)(i) 52.223-9, Estimate of Percentage of Recovered Material Content for EPA-Designated Items (MAY 2008) (42 U.S.C. 6962(c)(3)(A)(ii)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (ii) Alternate I (MAY 2008) of 52.223-9 (42 U.S.C. 6962(i)(2)(c)). (Not applicable to the acquisition of commercially available off-the-shelf items.)

___ (29) 52.223-15, Energy Efficiency in Energy-Consuming Products (DEC 2007) (42 U.S.C. 8259b) .

___ (30)(i) 52.223-16, IEEE 1680 Standard for the Environmental Assessment of Personal Computer Products (DEC 2007) (E.O. 13423).

___ (ii) Alternate I (DEC 2007) of 52.223-16.

___ (31) 52.225-1, Buy American Act--Supplies (JUNE 2003) (41 U.S.C. 10a-10d).

___ (32)(i) 52.225-3, Buy American Act--Free Trade Agreements--Israeli Trade Act (JUN 2009) (41 U.S.C. 10a-10d, 19 U.S.C. 3301 note, 19 U.S.C. 2112 note, 19 U.S.C. 3805 note, Pub. L. 108-77, 108-78, 108-286, 108-302, 109-53, 109-169, 109-283, and 110-138).

___ (ii) Alternate I (JAN 2004) of 52.225-3.

___ (iii) Alternate II (JAN 2004) of 52.225-3.

___ (33) 52.225-5, Trade Agreements (AUG 2009) (19 U.S.C. 2501, et seq., 19 U.S.C. 3301 note).

___ (34) 52.225-13, Restrictions on Certain Foreign Purchases (JUN 2008) (E.O.'s, proclamations, and statutes administered by the Office of Foreign Assets Control of the Department of the Treasury).

___ (35) 52.226-4, Notice of Disaster or Emergency Area Set-Aside (Nov 2007) (42 U.S.C. 5150).

___ (36) 52.226-5, Restrictions on Subcontracting Outside Disaster or Emergency Area (Nov 2007) (42 U.S.C. 5150).

___ (37) 52.232-29, Terms for Financing of Purchases of Commercial Items (FEB 2002) (41 U.S.C. 255(f), 10 U.S.C. 2307(f))

___ (38) 52.232-30, Installment Payments for Commercial Items (OCT 1995) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).

___ (39) 52.232-33, Payment by Electronic Funds Transfer--Central Contractor Registration (OCT 2003) (31 U.S.C. 3332).

___ (40) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332)

___ (41) 52.232-36, Payment by Third Party (MAY 1999) (31 U.S.C. 3332).

___ (42) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (43)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

____ (ii) Alternate I (APR 2003) of 52.247-64.

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (SEP 2009) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.)

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

____ (7) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations (Mar 2009) (Pub. L. 110-247).

____ (8) 52.237-11, Accepting and Dispensing of $1 Coin (SEP 2008)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in this paragraph (e)(1)in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause—

(i) 52.203-13, Contractor Code of Business Ethics and Conduct (DEC 2008) (Pub. L. 110-252, Title VI, Chapter 1 (41 U.S.C. 251 note).

(ii) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(iii) Reserved.

(iv) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(v) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(vi) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(vii) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

(viii) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-50, Combating Trafficking in Persons (FEB 2009) (22 U.S.C. 7104(g)).

Alternate I (AUG 2007) of 52.222-50 (22 U.S.C. 7104(g)).

(x) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(xi) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (FEB 2009) (41 U.S.C. 351, et seq.).

(xii) 52.222-54, Employment Eligibility Verification (JAN 2009).

(xiii) 52.226-6, Promoting Excess Food Donation to Nonprofit Organizations. (MAR 2009) (Pub. L. 110-247). Flow down required in accordance with paragraph (e) of FAR clause 52.226-6.

(xiv) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award through final day of the contract.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-21 Requirements. (OCT 1995) -- ALTERNATE I (APR 1984)

(a) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Delivery-Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(c) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirements for supplies and services specified in the Schedule that exceed the quantities that the activity may itself furnish within its own capabilities.

(d) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(e) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(f) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days from the expiry date of the contract.

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (JUL 2009)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X__ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___252.203-7000, Requirements Relating to Compensation of Former DoD Officials (JAN 2009) (Section 847 of Pub. L. 110-181).

(23)(i) ____ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ____ Alternate I (MAR 2000) of 252.247-7023.

(iii) ____ Alternate II (MAR 2000) of 252.247-7023.

(iv) ____ Alternate III (MAY 2002) of 252.247-7023.

(24) ____ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(2) 252.247-7003, Pass-Through of Motor Carrier Fuel Surcharge Adjustment to the Cost Bearer (JUL 2009) (Section 884 of Public Law 110-417).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of

the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

SUP 5252.216-9402 ORAL ORDERS

(a) ORAL ORDERS (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) WRITTEN ORDERS (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be

made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(d) PROVISION FOR WOOD PRODUCTS SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

Section B - Supplies or Services and Prices

SECTION B1 OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting South Asia and Islands in the Indian Ocean. For purposes of this contract, "South Asia and Islands in the Indian Ocean" is defined as a the geographic area encompassed by the lots described below at paragraph 2.3.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in South Asia and all Islands in the Indian Ocean. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 is for Management Fee for all ports in India, Sri Lanka, Bangladesh, Myanmar, Mauritius including Mascarene Islands and Maldives, Lot 2 is for Chennai, Lot 3 is for Mumbai, Lot 4 is for Vasco Da Gama, GOA, Lot 5 is for Visakhapatnam, Lot 6 is for Port Louis, Mauritius and Lot 7 is for Operations Other Than War (OOTW) for all locations in India, Sri Lanka, Bangladesh, Myanmar, Maldives and Port Louis, Mauritius including Mascarene Islands.

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite-Delivery-Indefinite-Quantity contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is set at a total of $20,000 worth of orders at the contract unit price (s) or as guaranteed minimum if no orders are issued. The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order (s) / delivery order (s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months. The period of time within which the Government may order performance varies by lot. See section F for additional details.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for South Asia and the Islands in the Indian Ocean.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services. For example U.S. Government personnel attending conferences, training and seminars where hotel transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event.

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as “Reserved” or “TBD”) in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The

HS Contractor shall use its best reasonable effort to deliver supplies or services marked "Reserved" or "TBD" in accordance with an order's delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the "Reserved" or "TBD" item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR which could be the SUPPO or FISC Detachment Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 10.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services - Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O./Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water. HS Contractor

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

_____

_____

Tel No: _____

Fax No: _____

Mobile: _____

E-mail address: _____

Section C - Descriptions and Specifications

PERFORMANCE WORK STATEMENT
TASKS: The HS Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 1.1.6 and 1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 1.1.6 below is addressed at paragraph 17.2.3 of the Section B1 Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 1.1.8. Except when the facts detailed in paragraph 1.1.18 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

1.1.1. The HS Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The HS Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract, Reserved or TDB items, or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs. The portion of the LOGREQ that covers items that are pre-priced in the contract, when submitted by, under authority of, or on behalf of an AGR, is an order under this contract. Orders for Reserved, TBD, or non-contract items will be finalized once the AGR and HS Contractor agree on a price as described at Section B1, paragraph 11.2. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

1.1.4. These estimates shall be provided for all US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The HS Contractor shall assist the ship's Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship's advance party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship's advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location.

1.2.2. The HS Contractor shall install all ordered equipment upon the ship's arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

1.2.5. The HS Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and Performance Work Statement (PWS), applicable port tariffs and current prices for frequently ordered services such as laundry services.

1.2.6. Money Exchange Services:

1.2.6.1. The HS Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. The HS Contractor shall maintain adequate records justifying its basis for determining the Official Exchange Rate and shall make those records available to the AGR upon request. This Official Exchange Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The HS Contractor shall arrange for authorized moneychangers to exchange U.S. dollars for ship personnel into local currency. Money Exchange services shall be made available onboard ship to crewmembers at least two hours daily with buy-back service on the day before the ship's departure. The moneychangers may include a commission of not more than plus or minus 1.5% difference from the Official Exchange Rate described above.

1.2.7. Laundry Services:

1.2.7.1. The HS Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The HS Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The HS Contractor shall provide all interpreter services to assist the Supply Officer to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract in support of the ship's visit. This limited set of interpretor services is required under the Management Services CLIN and is separate from the interpretor services required under CLIN XX19.

1.2.9. Mail Delivery Services: The HS Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Morale Welfare and Recreation (MWR) Services:

1.2.10.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms. The HS Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The HS Contractor shall facilitate the ship's timely departure.

1.2.13.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The HS Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

1.3.1. Purchase order to be issued to a vendor other than the HS Contractor for additional supplies and services. When a requirement exist for supplies or services that are not included on the Schedule of Supplies and Services as price, reserved, or TBD, the HS Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the HS Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall make the acquisition selection decision and issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The ship's Supply Officer shall normally issue a purchase order to the selected vendor rather than issuing an order to the HS Contractor that requires the HS Contractor to provide the supplies or services. The HS Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The HS Contractor shall facilitate receipt of the items by the ship. The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under auspices of this contract. The HS Contractor shall use the specifications for FF&V, Bread, and Eggs that are included as part of this contract when when arranging for those supplies.

1.3.2. Supplies and services to be provided by the HS Contractor. In the event the above process cannot be followed by the ship's Supply Officer, and the ship's Supply Officer orders the additional supplies and services from the HS Contractor, the HS Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the HS Contractor shall provide information on the

results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rationale for decision. Any communication concerning non pre-priced items to be acquired under this subparagraph will not be considered an order until the HS Contractor and the AGR have agreed on a price for the supplies or services. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or not later than 7 days after the ship's departure from the visited port. The HS Contractor's record of promoting competition as required by this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service.

1.3.3. Purchasing procedures. Not later than 60 days after contract award, the HS Contractor shall submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

1.4.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

1.4.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items. .

1.5. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in

U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction up to three (3) percent. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The HS Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The HS Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The HS Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF MANAGEMENT FEE (First Day and Subsequent Days) AND OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (First Day and Subsequent Days)(LOT 13) (CLIN XX34) and (CLINXX35)

2.1 CLINs XX34 and XX35 authorize the Government to order Management Services in support of Operations Other Than War. Recognizing that the specific Management Services that may be required will likely vary depending on the particulars of the individual Operation Other Than War, the CLINs are priced on a per person/per day basis. At the time the Government orders services under the CLINs it will provide the HS Contractor a detailed list of tasks that the HS Contractor shall perform. The tasks shall be within the scope of the tasks further described below. The HS Contractor shall use its best efforts to fully perform the set of tasks within the limitation of the number of persons/number of days of service ordered by the Government. The HS Contractor shall promptly notify the Government if it believes that it will be unable to fully perform the specified tasks because the Government has not ordered sufficient services under these CLINs.

2.2. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.3. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.4. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.5. If the Government has need of Management Services in support of an Operation Other Than War for disaster relief response it will order Management Services under CLIN XX34. If the Government has a need of Management Services in support of an Operation Other Than War for other purposes, it will order Management Services under CLIN XX35.

2.6. The HS Contractor shall furnish personnel who are familiar with the manner in which the U.S. Navy operates, speak the local language that is normally used at the site of the OOTW, and speak and read English. The HS Contractor shall ensure that the personnel provided under these CLINs arrive at the OOTW site by the date and time specified in the order. The Government may require that personnel arrive as soon as 24 hours after the order is issued. The First Day and Subsequent Day Management Fee rates shall include any costs for the HS Contractor employees to

travel to and from the OOTW site, and the costs of food and lodging for the HS Contractor while at the OOTW site. HS Contractor employees will not normally be provided meals or lodging at U.S. Government expense nor will they typically be entitled to Government-furnished lodging and meals on a reimbursable basis.

2.7. For each increment of one person for one day that the Government orders, the HS Contractor shall provide one qualified employee to work on tasks identified at the time the order is issued for a period of at least 12 hours per day. The HS Contractor employee will normally perform those tasks at the OOTW site. The HS Contractor shall provide the Government a Point of Contact for questions and issues that arise in connection with the tasks identified at the time the order is issued who can be contacted during the portion of the 24-hour day that the HS Contractor's employee is not at the OOTW site.

2.8. These are not personal services CLINs. HS Contractor employees performing services under these CLINs will perform the tasks identified by the Government at the time the order is issued. The HS Contractor employees performing the services are under the supervision and direction of the HS Contractor. Should the Government have concerns with the manner in which the tasks are being performed or have a need to modify the tasks, it shall contact the HS Contractor.

2.9. Services that may be required under this CLIN include, but are not limited to, providing interpreter support, providing expertise on locally-sensitive cultural issues, liaison with local political and police authorities, and providing technical assistance in acquiring necessary supplies and services. A sample list of the type supplies and services that the Government may require assistance in acquiring is attached at Exhibit D. The HS Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the HS Contractor shall make every effort to locate at least three sources. As with the Management Services CLINs for Husbanding Services, the Government may also direct the HS Contractor to acquire necessary supplies and services under these OOTW CLINs that the Government requires.

2.10. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, these CLINs will apply. If a similar Management Service is ordered for delivery in the port vicinity and the requirement is received from the ship or a contingent on the ship, the HS Contractor's Husbanding fees and CLINS shall apply.

2.11. If an advance party arrives in a country for OOTW and requires services under these CLINs prior to the start of the OOTW event, the HS Contractor shall be compensated for the services provided at the subsequent day rates for these CLINs. The HS Contractor is not required to provide any services to an advance party under these OOTW CLINs without first receiving an order for such services from an AGR. The HS Contractor may be required to support multiple operations at the same time, or a single operation at multiple locations, the HS Contractor may bill for each operation/location for which the HS Contractor's services are ordered.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The HS Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The HS Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The HS Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The HS Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the HS Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX05)

5.1. The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

5.2. The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

5.3. The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

5.4. The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

5.5. When collection of CHT is done via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

5.6. The HS Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

5.7. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

6. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX06)

6.1. The HS Contractor shall arrange for landlines to be installed aboard the ship.

6.2. The HS Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

6.3. The HS Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

6.4. The HS Contractor shall provide commercial telephone services and sale of phone cards for personal use by crewmembers.

6.5. The HS Contractor shall provide pre-paid International Calling Cards for official use.

7. CRANE (CLIN XX07) - The HS Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the HS Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The HS Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

8. DOCKAGE AND WHARFAGE (CLIN XX08) - The HS Contractor shall provide pier and wharf usage.

9. FENDERS (CLIN XX09) - The HS Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

9.1 The HS Contractor shall provide camels as fenders for the ship.

10. FLEET LANDING (CLIN XX10) - The HS Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The HS Contractor shall ensure that this area is kept clean during the ship visit in port.

11. FORCE PROTECTION (CLIN XX11)

11.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time. The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 11.2 below.

11.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

11.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

11.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

11.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

11.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

11.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

11.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

11.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

11.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

11.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

11.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

11.1.6. Stand-Off Distances:

11.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.r.

11.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship..

11.1.7. Warning Signs: The HS Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

11.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

11.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state “Restricted Area, Do Not Enter”
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

11.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor’s written policy shall describe the required measures to protect ship schedule information.

11.2. Non-Contract FP Measures: The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The Contracting Officer will coordinate this requirement with the ship’s FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

11.3. Beach Guard Office or Tent (CLIN XX11AA)

11.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship’s personnel while performing security checks on personnel, baggage, and vehicles.

11.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that

there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher shall be provided and kept fully charged.

11.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

11.4. Dive and Vetting Operations (CLIN XX11AB)

11.4.1. The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

11.4.2. The pier will be vetted prior to the ship's arrival.

11.4.3. To the maximum extent practicable the HS Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship..

11.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

11.4.5. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

11.5. Floating Line of Demarcation (CLINs XX11AC through XX11AE)

11.5.1. The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone.

11.5.2. The HS Contractor shall comply with the specification of the FLD in Attachment 3.

11.6. Perimeter Fencing (CLIN XX11AF)

11.6.1. The HS Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the HS Contractor will provide portable chain link fencing with vehicle and walk up entrances.

11.6.2. The perimeter fence provided by the HS Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point: Entry available for vehicles and personnel.

11.7. Physical Security Barriers (CLIN XX11AF through XX11AJ)

11.7.1. The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to

keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

11.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

11.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

11.7.4. A personnel entry point must be established through the barriers.

11.7.5. Barriers may also be used to seal off secondary Port gates.

11.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

11.8. Picket Boats (CLIN XX11AK)

11.8.1. The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

11.8.2. The HS Contractor shall comply with Attachment 4 for picket boat operations and specifications.

11.9. Portable Lighting (CLIN XX11AL)

11.9.1. The HS Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port's installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

11.9.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

11.10. Security Guards Services (CLINs XX11AM through XX11AQ)

11.10.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

11.10.2. The HS Contractor shall comply with Attachment 5 for security guard operations.

11.10.3. Security guards shall be armed or unarmed in accordance with Exhibit A, Schedule of Supplies and Services.

11.11. Two Way Radios (CLIN XX11AR) - The HS Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

11.12. Hand Held Explosive Detectors (CLIN XX11AS) - The HS Contractor shall provide hand held explosive detectors capable of detecting explosives.

11.13. Hand Held Wand Metal Detectors (CLIN XX11AT) - The HS Contractor shall provide hand held metal detectors capable of detecting metal.

11.14. Walk Thru X-Ray & Metal Detector (CLIN XX11AU) - The HS Contractor shall provide a walk thru X-ray & metal detector capable of detecting metal.

11.15. X-ray Baggage Scanning Machine airport-type (CLIN XX11AV And CLIN XX11AW) – The HS Contractor shall provide an X-ray baggage scanning machine capable of X-raying hand carried luggage and bags to determine its contents. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

11.16. Under Carriage Vehicle Scanner (CLIN XX12AX) – The HS Contractor shall provide an under carriage vehicle scanner to scan vehicle undercarriages.

12. FORKLIFT WITH OPERATOR (CLIN XX12) - The HS Contractor shall provide forklifts with operators for loading and unloading operations.

13. FUEL (CLIN XX13)

13.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the HS Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

13.2. If a ship requires the HS Contractor to provide fuel, the Husbanding HS Contractor shall contact the bunkering HS Contractor or HN source. If the HN or bunkering HS Contractor can provide the fuel within the time needed, the HS Contractor shall so inform the ship. However, if the HN or US Government bunkering Contractor cannot deliver the fuel when required by the ship, the HS Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the HS Contractor arrange for fuel delivery.

13.3. The HS Contractor shall only charge fuel at the daily commercial fuel rate established by the port or local authorities. The HS Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

13.4. The HS Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

13.5. The HS Contractor shall provide a fuel barge or truck to transport fuel to the ship.

13.6. The HS Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

13.7. The HS Contractor shall load the ordered fuel and transport to the ship. The HS Contractor shall transfer the fuel from the fuel barge or truck to the ship. The HS Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

13.8. The HS Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

13.9. In recognition of the fact that fuel is sold by weight (metric tons) and by volume (gallons or litres), the HS Contractor shall ensure all United States ships are provided with a fuel invoice and the appropriate customs certification demonstrating the quantity of fuel provided in metric tons and in gallons or liters.

13.10. Excess Fuel Procedures: If the ship does not offload all of the fuel ordered, the HS Contractor shall store the excess fuel and diligently attempt to sell it as soon as practicable. The HS Contractor shall receive a storage fee for up to three (3) days. The HS Contractor shall receive a fuel disposal fee on a reimbursable basis upon presentation of vendor invoice for disposal services.

14. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX14)

14.1. The HS Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse.

14.2. The HS Contractor shall provide dedicated refuse bins to the ship.

14.3. If collection is done by sea, the HS Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

14.4. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins.

14.5. The HS Contractor shall immediately clean up any spilled refuse.

14.6. The HS Contractor shall properly dispose of all collected refuse.

15. LINESBOATS (CLIN XX15) - The HS Contractor shall provide Linesboats to assist in docking line handling operations.

16. LINE HANDLERS (CLIN XX16)

16.1. The HS Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier. One "Job" covers both securing and unsecuring the mooring lines.

16.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

17. MANLIFT (WITH OPERATOR) (CLIN XX17)

17.1. The HS Contractor shall provide a manlift with operator and a full fuel tank.

17.2. The HS Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

17.3. The HS Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The HS Contractor shall maintain documentation of ship personnel acknowledgement of the training.

18. MATERIAL HANDLING (CLIN XX18)

18.1. The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

18.1.1. The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

18.1.2. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

18.1.3. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

18.2. The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

18.3. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

18.4. The HS Contractor shall use forklifts and cranes from The Schedule.

18.5. The HS Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

18.6. The HS Contractor shall deliver the package to the shp after arrival in port or the following morning.

18.7. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

18.8. The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

18.9. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

19. MISCELLANEOUS (CLIN XX19)

19.1. INTERPRETER SERVICES (CLIN XX19AA) - The HS Contractor shall provide all interpreter services as ordered by the SUPPO. The interpreter shall be fluent in both spoken and written local language and English.

19.2. PORTABLE LATRINES (CLIN XX19AB)

19.2.1. The HS Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

19.2.2. The HS Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

19.2.3. The HS Contractor shall restock toilet paper, hand soap, and paper towels daily.

19.2.4. The HS Contractor shall clean latrines twice daily.

19.3. LOGISTIC SUPPORT TO GOVERNMENT TEAMS (CLIN XX19AC)

19.3.1. Government teams conduct surveys in a variety of ports in the Western Pacific theater. The Government may require the assistance of the HS Contractor in the ports to be surveyed. The HS Contractor shall provide estimated costs to the AGR and subject to approval by the AGR. The AGR shall provide DD Form 1155 or SF 1449 to the HS Contractor in support of this survey.

19.3.2. The HS Contractor shall assign an individual to participate in and assist with logistical arrangements for a team that will perform the survey. This team may visit a variety of ports in advance of ships' visits to assess the force protection levels of the port and to perform related functions. The HS Contractor's assistance shall include providing logistical support as requested by the Government, coordinating access and interviews with local officials, local husbanding services, and support HS Contractors, coordinating necessary translation services for the team, and assisting in the development of a final assessment report.

19.3.3. The HS Contractor shall invoice port surveys at the subsequent day husbanding fee for a Class I ship in the port. In addition, the HS Contractor shall be reimbursed for economy class air transportation and daily per diem rate that includes lodging, meals and other related expenses. The per diem rates shall be those set forth in the Joint Travel Regulations (JTR) at http://perdiem.hqda.pentagon.mil/perdiem/ .

19.3.4. Other expenses related to the service(s) and anticipated by the HS Contractor will be invoiced and reimbursed at cost. The HS Contractor shall submit all receipts, invoices or other valid documents to support the incurred expenses. The HS Contractor shall not pay for hotels, meals, rental vehicles, telephone expenses and any other expenses that the Government team members may incur and for which they can be reimbursed under their Government travel orders.

20. OIL BOOMS (CLIN XX20)

20.1. The HS Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

20.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

20.3. The HS Contractor shall dispose all oil waste caught in the Oil Boom.

21. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX21)

21.1. The HS Contractor shall remove oily waste and aggregate water from the ship.

21.2. The HS Contractor shall pump oily waste and aggregate water from the ship to HS Contractor provided equipment.

21.3. The HS Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

21.4. The HS Contractor shall provide hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

21.5. When removal is done via barge, the HS Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

21.6. The HS Contractor shall properly dispose of all oily waste and aggregate water.

21.7. The HS Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

22. PAINT FLOAT (CLIN XX22)

22.1. The HS Contractor shall provide paint floats to hold personnel painting the ship.

22.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

22.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

23. PILOTS (CLIN XX23) - The HS Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

24. POTABLE WATER (CLIN XX24) - The HS Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

25. PRATIQUE (CLIN XX25) - The HS Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

26. SHORE POWER (CLIN XX26)

26.1. The HS Contractor shall provide shore power to the ship using

26.1.1. Port provided permanent connection system.

26.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

26.2 The HS Contractor shall provide all cables and make all power connections between the generator and ship.

26.3. The availability of shore power shall be in accordance with the schedule established by the ship.

27. SHORE STEAM (CLIN XX27) – The HS Contractor shall provide shore steam to the ship.

28. STEVEDORE SERVICES (CLIN XX28) - The HS Contractor shall provide stevedores and supervisors for general labor.

29. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX29)

29.1. The HS Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

29.2. The HS Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

30. TRANSPORTATION VEHICLES (CLIN XX30)

30.1. The HS Contractor shall provide vehicle service with qualified drivers for official government business.

30.2. The HS Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

30.3. The HS Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

30.4. The HS Contractor shall provide drivers who can speak and understand English clearly.

30.5. The HS Contractor shall provide only vehicles with air conditioning.

30.6. The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

30.7. The HS Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

30.8. The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

30.9. If the unit of issue is by “Day”, then the rental period shall constitutes 12 hours.

31. TUGS (CLIN XX31)

31.1. The HS Contractor shall provide tugs to bring ships to and from berthing locations.

31.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

31.3.Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

31.4. If tugs are not available through the port authority, the HS Contractor shall use commercially available tugs.

32. WATER TAXIS (CLIN XX32)

32.1. The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

32.2. The HS Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

32.3. The HS Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

33. CRAFT REPORT (CLIN XX33)

33.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit C - CRAFT.

33.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each ship's departure.

34. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF – MANAGEMENT FEE (CLINXX34) and OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (CLIN XX35). See Paragraph 2 above

35. OOTW COST REPORT (CLIN XX35)

35.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each OOTW event, showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit C – CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each OOTW events' completion.

Section D - Packaging and Marking

SECTION D
Per individual delivery order

Section E - Inspection and Acceptance

INSPECTION AND ACCEPTANCE TERMS

Supplies/services will be inspected/accepted at:

CLIN	INSPECT AT	INSPECT BY	ACCEPT AT	ACCEPT BY
0001	N/A	N/A	N/A	Government
0002	Destination	Government	Destination	Government
9000	N/A	N/A	N/A	Government

Section F - Deliveries or Performance

DELIVERIES OR PERFORMANCE

1.0 Period of Contract: Period of contract for the purpose of issuing task orders shall be as follow:

Period of Performance for the following Lots commences on 1 Dec 08 and ending 30 Nov 09:

Lot 1, Management Fee for all ports in India, Sri Lanka, Bangladesh, Myanmar, Mauritius including Mascarene Islands and Maldives, Lot 2 - Chennai, Lot 3 - Mumbai, Lot 4 – Vasco Da Gama, GOA, Lot 5 - Visakhapatnam, Lot 6 – Port Louis, Mauritius and Lot 7 - Operations Other Than War (OOTW)

2.0 Place of Performance: The husbanding services required under this contract shall be performed at the following countries and ports:

All Ports in India, Sri Lanka, Bangladesh, Myanmar, Mauritius including Mascarene Islands and Maldives including Operations Other Than War (OOTW).

DELIVERY INFORMATION

Section G - Contract Administration Data

ACCOUNTING AND APPROPRIATION DATA

AA: Funds shall be made available upon issuance of a Task Order
AMOUNT: $0.00
CIN 00000000000000000000000000000000: $0.00

INVOICES AND PAYMENTS

1. The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

2. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction. The Government will not reimburse a credit card surcharge for an amount greater than 3 percent of the invoice payment. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices presented to the ship shall be provided to FISC Det Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

Section I - Contract Clauses

ADDITIONAL CLAUSES
ADDITIONAL CONTRACT TERMS AND CONDITIONS.

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(d) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(e) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (MAY 2008)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(2) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.219-3, Notice of HUBZone Small Business Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (3) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (4) [Removed].

___ (5)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (6)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (iii) Alternate II (MAR 2004) of 52.219-7.

____ (ii) Alternate I (APR 2003) of 52.247-64.

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (NOV 2006) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (February 2002) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (7) 52.237-11, Accepting and Dispensing of $1 Coin (AUG 2007)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vi) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

(vi) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(vii) 52.222-50, Combating Trafficking in Persons (AUG 2007) (22 U.S.C. 7104(g)). Flow down required in accordance with paragraph (f) of FAR clause 52.222-50.

(viii) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(x) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

CLAUSES INCORPORATED BY FULL TEXT

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued as described at Section F, paragraph 1.0.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than $5,000 , the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The Contractor is not obligated to honor:
(1) any order for services in support of more than three (3) vessels in a single port at the same time or any order to husband in excess of eight (8) ships in the geographic area covered by this contract. The three vessel mix shall be definied as one (1) Class V or below, and two (2) Class II or below in any single port; or

(2) Any order for a single item in excess of the maximum quantity for that item which is identified in the pricing schedule, Exhibit A, of this contract.

(3) Any order for a combination of items in excess of the maximum quantity for the applicable performance period of this contract; or

(4) A series of orders from the same ordering office within 120 days that together call for quantities exceeding the maximum quantities indetified in the pricing schedule by more than 200 percent (200%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one (1) day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the conclusion of the contract term in which the order is issued.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance

hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before the contract expires.

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (SEP 2005)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

__X__ 52.203-3 Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

____252.247-7024 Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (Federal Acquisition Regulation 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

252.225-7014 Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).

252.237-7019 Training for Contractor Personnel Interacting with Detainees (SEP 2005) (Section 1092 of Pub. L. 108-375).

252.247-7023 Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

252.247-7024 Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.225-7042 AUTHORIZATION TO PERFORM (APR 2003)

The offeror represents that it has been duly authorized to operate and to do business in the country or countries in which the contract is to be performed.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

See Section B2 – Exhibit A (ELINs) Schedule of Supplies and Services.

Separate Excel spreadsheet is attached. Complete all unit prices in U.S. Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer to verify the formula when evaluating prices.

EXHIBIT B – PORT TARIFF ITEMS
The Excel spreadsheet provides estimates of port tariff rates only.

EXHIBIT C – CRAFT REPORT
The CRAFT report must be submitted within seven (7) days upon completion of a ship visit. Copies of certified invoices shall be forwarded to the Contracting Officer.

EXHIBIT D
EXHIBIT D – OPERATIONS OTHER THAN WAR (OOTW) SAMPLE PROVISIONS
The listing under this Excel spreadsheet is a sample for information purposes only. No Pricing is required.

Class V					
CV 63& 67	38 (11.6)	1,073 (327)	130 (40)	82,000	5,624
CVN 65	39 (11.9)	1,123 (342)	133 (40.5)	89,600	5,900
CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

GLOSSARY OF TERMS AND ABBREVIATIONS

AGOS	RESEARCH SHIP
AGSS	RESEARCH SUBMARINE
AOE	FAST COMBAT SUPPORT SHIP

WMEC	MEDIUM ENDURANCE CUTTER

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

『Refuse』 includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

『Garbage』 means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

『Ashes』 means the residue from burned wood, coal, coke, and other combustible material.

『Debris』 means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

『Rubbish』 means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

『Combustible Rubbish』 which can be burned readily in an incinerator or burning pit.

『Noncombustible Rubbish』 which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

『Receptacles』 or **『Containers』** means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

CLAUSES INCORPORATED BY FULL TEXT

ATTACHMENT 3
FLOATING LINE OF DEMARCATION SPECIFICATIONS (CLIN XX11XX)

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

    3.1. Continuous Line FLD - If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

        3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

        3.1.2. Specifications:

            3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

            3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

            3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

    3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

        3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 4

PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

    7.1. Licensed for commercial operations by local country Department of Transportation.

    7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

    7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

    7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 5

SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through local police officials.

1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi.

Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 6

FUEL SPECIFICATIONS

The following are the Fuel Specifications for this contract:

SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	**Requirement**	**Text Method**
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/

Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

2. COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC MAY 2002)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min
	NOTE: If the Cetane number is reported, the reported value shall apply to the base fuel without Cetane improving additives.		
2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min
	NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.		
5.	Cloud Point	ASTM D 2500	-1.1^{O}C (30^{O}F) max.
	NOTE: Cloud Point results will be evaluated based upon bunkering location.		
6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cSt
7.	Color 4	ASTM D 1500	3 max.
	NOTE for deliveries outside the United States, the offerors must submit information on the composition, color and desired concentration of any dye to be used in order to obtain approval.		
8.	Density @ 15^{O}C	ASTM D 1298	876 kg/m^{3} max.
9.	Carbon Residue on 10% bottoms 5	ASTM D 524	0.35 mass % max.
	NOTE: For carbon residue on 10% bottoms, ASTM D 189 is an acceptable alternate method.		
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur 6	ASTM D 4294	1.0 mass % max.
	NOTE: For total sulfur content, ASTM D 1552 and ASTM D 2622 are acceptable alternate methods.		
12.	Corrosion	ASTM D 130	3 max.
13.	Composition Distillate Fuel (fuel shall contain no residual)	None	100%

3. FUEL OIL, INTERMEDIATE, GRADES RME-25 (IFO 180 AND RMG-35 (IFO 380) (DESC JUN 2004)

a. Product shall conform to ISO 8217:1996.

b. ALTERNATE TEST METHODS. The test methods below can also be used to determine the following requirements:

REQUIREMENTS TEST METHOD

1. Density @15^{o}C, kg/m^{3} ASTM D 4052
2. Carbon Residue ASTM D 4530
3. Vanadium, mg/kg ASTM D 5863
4. Aluminum plus silicon, mg/kg ASTM D 5184

c. SULFUR. Starting My 19, 2005, the sulfur limit for RME-25 (IFO 180) purchased under the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, maximum.

d. A. FOR THE BULK PROGRAM, RME-25 (IFO 180) purchased under the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, maximum. (DESC 52.246-9FFE).

ATTACHMENT 7
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (Philippines). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (Philippines) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 8
REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked

between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 9 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS

(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes

Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity

Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]				
Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)

Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)	0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk		10 per gram	
Cottage cheese		10 per gram	10 per gram
Cream, sour cultured		10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml	10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram	20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram	10 per gram	
Frozen dessert mix:			
Vanilla flavor	50,000 per gram	10 per gram	10 per gram
other flavors	50,000 per gram	20 per gram	10 per gram
Yogurt, chilled		10 per gram	
Yogurt, frozen, plain		10 per gram	
Yogurt, frozen, flavored		20 per gram	
Yogurt, soft serve mix		10 per gram	

Notes:
1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

	Aerobic Plate Count (APC)	Coliform Count	ATP (RLU) Counts
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish

Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen

Product(s)	Standard Plate Count (SPC) [3] m	M	Coliform count	Combined Yeast and Mold count
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]

Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]		
Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".

5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]					
Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g		Zero (0) Tolerance
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g		Zero (0) Tolerance
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g		Zero (0) Tolerance
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g		Zero (0) Tolerance
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g		Zero (0) Tolerance

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]		
Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class

(*Note 1)	Listing Required	Listing Not Required
8905	All fish, meat, poultry, and shellfish, including:	Crabs, live.
(*Notes 2, 3)	Buffalo meat.	Crawfish, live.
	Fish, canned.	Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged.
	Fish, fresh or fresh smoked, modified atmospheric packaged.	Lobster, live.
	Fish, fresh or frozen, packaged.	Shrimp, fresh or frozen, whole or head off.
	Herring, pickled.	
	Quail.	
	Rabbits.	
	Salmon, smoked.	
	Squid.	
8910	All dairy foods and eggs, including:	Chocolate drink mix, non-dairy.
(*Notes 4, 5)	Cream, sterilized.	Powdered dairy mixes.
	Creamer, coffee, dairy.	Toppings, non-dairy.
	Dairy soft serve mixes.	
	Desserts/puddings, frozen.	
	Egg nog, canned.	
	Egg substitutes.	
	Italian ices.	
	Topping, real cream.	
	Yogurt, fresh or frozen.	
8915	All pre-cut pre-packaged minimum processed fresh	All unprocessed fruits and
(*Note 7, 8)	fruits and vegetables.	vegetables.
	Kimchee.	Olives.
	Mushrooms, whole and sliced.	Fruit juices and nectars, shelf stable
	Salads, non-meat, with or without dressing (not USDA listed).	or frozen concentrate.
	Vegetable sprouts.	
	Fruit juices and nectars, refrigerated.	
8920	Bakery and cereal products (baked and unbaked, fresh	All other bakery products, including:
(*Notes 6, 9)	and frozen), specifically:	Bagels.
	Croissants.	Batter mix, dry.
	Doughnuts	Biscuits, canned.
	Egg roll wrappers.	Breads, rolls, and buns.
	Flour and corn tortillas.	Cake mix, dry.
	Wet pasta (noodles).	Cakes, unfilled.
	Pastries.	Cookie mix, chilled or dry.
	Pies.	Cookies, unfilled.
	Soft pretzels.	Crackers.
	Won ton wrappers.	Cupcakes, unfilled.
	Filled bakery items.	Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.

		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940	Dietary foods and specialty preparations,	All other dietary and specialty
(*Notes 2, 3, 4, 5, 10)	specifically:	preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish products.	Baby formula, canned.
	Pickled eggs.	Chips, nacho or potato.
	Frozen dinners.	Creamer, coffee, imitation (non-
	Pudding novelties, frozen or chilled.	dairy).
	Tofu.	Dips.
		Nacho cheese, canned.
		Nutri-why.
		Popcorn.
		Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including:
		Salad dressings.
		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages,
	Ice.	including:
	Bottled water.	Dry ice.
		Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970	MRE food composite packages	Non-MRE composite food packages.
(*Note 2)		
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products.*
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs.* Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.

6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

ATTACHMENT 10

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

Husbanding Services
For
South Asia and Islands in the Indian Ocean

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Detachment Singapore will use in evaluating port visit cost reporting and non-contract item pricing performance of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the port visit cost reporting and non-contracting pricing performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will set forth the staffing and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with processes to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (KO) is responsible for monitoring contract compliance and contract administration; and resolving any differences between the observations documented by the requiring activity, and the contractor's performance. The KO will also have the responsibility for completing QA monitoring forms (refer to Attachments 10b and 10c) used to document the evaluation of the contractor's reporting and price performance.

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED

The contractor shall provide husbanding service support in accordance with the PWS. The reporting and non-contract item pricing performance standards are identified in the PWS. The acceptable level of performance is also described in the PWS.

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 10c.

4.3 The acceptable quality levels (AQL) located in Attachment 10a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes. Port visit cost reporting and non-contract item pricing performance standards are expressed in the PWS and measured by the required performance metrics in Attachment 10a.

5.2 The Government's QA monitoring, accomplished by the KO, will be reported using the monitoring forms in Attachments 10b and 10c. The forms, when completed, will document the KO's understanding of the contractor's performance under the contract to ensure that the PWS requirements are being met.

5.2.1 The KO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives should performance not meet the AQL.

6.2 Within 30 days following the end of each order's performance period, the KO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 10b) will become part of the QA documentation.

6.3 The KO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The KO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the KO as often as required or per the contractor's request. The agenda of the reviews may discuss:

- Performance measured by the metrics and trends
- Issues and concerns of both parties
- Recommendations made by the KO based on contractor information
- Issues arising from independent reviews and inspections

6.4 The KO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the KO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. Notifications. Consistent with FAR Part 12, the KO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. Deductions. The Government has the right to deduct a specified dollar for failure to meet performance standards. The amount is identified in the Performance Requirements Summary (PRS) of Attachment 10a.
3. Termination. If the KO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the KO shall issue a notice of termination, consistent with FAR Part 12.

ATTACHMENT10a. Performance Reporting Summary (PRS)
ATTACHMENT10b. Quality Assurance Monitoring Form
ATTACHMENT10c. Quality Assurance Monitoring Form – Customer Complaint Investigation

ATTACHMENT 10 a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit CRAFT cost estimate to ship and Contracting Officer within two working days after receipt of LOGREQ (PWS Paragraph 1.1.3)	95%	E-mails receipts, files review, periodic, random, observations, complaints	$100 deduction for each documented instance when an estimate is submitted late and documentation in the contractor's past performance record
	Submit final CRAFT cost reports to the Contracting Officer within seven (7) working days of each ship's departure (PWS Paragraph 33.2)	95%	E-mail receipts, files review, random, complaints	$100 deduction for each documented instance when the report is submitted late and documentation in the contractor's past performance record
	CRAFT submittals are accurate and complete	95%	Files review, periodic, random, observations, complaints	Require contractor to take corrective action to correct inaccurate/incomplete reports and documentation in the contractor's past performance record
Pricing for Non-Contract Items	For non-contract items in excess of $3,000, the contractor provided the Contracting Officer information of the results of competition conducted for non-contract item pricing no later than seven (7) days after the ship's departure (PWS Paragraph 1.3.2)	95%	E-mail receipts, files review, periodic, random, complaints, observations	$100 deduction for each documented instance when results are submitted late and documentation in the contractor's past performance record
	The contractor has adequately documented fair and reasonable pricing for non-contract items over $3,000	90%	Files review, periodic, random, complaints, observations	Documentation in the contractor's past performance record

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION B - SUPPLIES OR SERVICES AND PRICES

The following have been modified:
SECTION B1 OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting South Asia and Islands in the Indian Ocean. For purposes of this contract, "South Asia and Islands in the Indian Ocean" is defined as a the geographic area encompassed by the lots described below at paragraph 2.3.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in South Asia and all Islands in the Indian Ocean. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 is for Management Fee for all ports in India, Sri Lanka, Bangladesh, Myanmar and Maldives, Lot 2 is for Chennai, Lot 3 is for Mumbai, Lot 4 is for Vasco Da Gama, GOA, Lot 5 is for Visakhapatnam, Lot 6 , Port Louis, Mauritius - deleted and Lot 7 is for Operations Other Than War (OOTW) for all locations in India, Sri Lanka, Bangladesh, Myanmar and Maldives.

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite-Delivery-Indefinite-Quantity contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is set at a total of $20,000 worth of orders at the contract unit price (s) or as guaranteed minimum if no orders are issued. The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order (s) / delivery order (s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months. The period of time within which the Government may order performance varies by lot. See section F for additional details.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for South Asia and the Islands in the Indian Ocean.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services. For example U.S. Government personnel attending conferences, training and seminars where hotel transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event.

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.
- Any MSC warranted Ordering Officer or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as "Reserved" or "TBD") in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The HS Contractor shall use its best reasonable effort to deliver supplies or services marked "Reserved" or "TBD" in accordance with an order's delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the "Reserved" or "TBD" item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR which could be the SUPPO or FISC Detachment Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 10.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services - Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War

PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O./Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are

implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water. HS Contractor

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

_____

_____

Tel No: _____

Fax No: _____

Mobile: _____

E-mail address: _____

SECTION F - DELIVERIES OR PERFORMANCE

The following have been modified:

DELIVERIES OR PERFORMANCE

1.0 Period of Contract: Period of contract for the purpose of issuing task orders shall be as follow:

Period of Performance for the following Lots commences on 1 Dec 08 and ending 30 Nov 09:

Lot 1, Management Fee for all ports in India, Sri Lanka, Bangladesh, Myanmar and Maldives, Lot 2 - Chennai, Lot 3 - Mumbai, Lot 4 – Vasco Da Gama, GOA, Lot 5 - Visakhapatnam, Lot 6 – Port Louis, Mauritius is deleted and Lot 7 - Operations Other Than War (OOTW)

2.0 Place of Performance: The husbanding services required under this contract shall be performed at the following countries and ports:

All Ports in India, Sri Lanka, Bangladesh, Myanmar and Maldives including Operations Other Than War (OOTW).

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION B - SUPPLIES OR SERVICES AND PRICES

The following have been modified:
SECTION B1 OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting South Asia and Islands in the Indian Ocean. For purposes of this contract, "South Asia and Islands in the Indian Ocean" is defined as a the geographic area encompassed by the lots described below at paragraph 2.3.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in South Asia and all Islands in the Indian Ocean. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 is for Management Fee for all ports in India, Sri Lanka, Bangladesh, Myanmar, Mauritius including Mascarene Islands and Maldives, Lot 2 is for Chennai, Lot 3 is for Mumbai, Lot 4 is for Vasco Da Gama, GOA, Lot 5 is for Visakhapatnam, Lot 6 is for Port Louis, Mauritius and Lot 7 is for Operations Other Than War (OOTW) for all locations in India, Sri Lanka, Bangladesh, Myanmar, Maldives and Port Louis, Mauritius including Mascarene Islands.

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite-Delivery-Indefinite-Quantity contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is set at a total of $20,000 worth of orders at the contract unit price (s) or as guaranteed minimum if no orders are issued. The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order (s) / delivery order (s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months. The period of time within which the Government may order performance varies by lot. See section F for additional details.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for South Asia and the Islands in the Indian Ocean.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services. For example U.S. Government personnel attending conferences, training and seminars where hotel transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event.

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.
- Any MSC warranted Ordering Officer or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as "Reserved" or "TBD") in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The HS Contractor shall use its best reasonable effort to deliver supplies or services marked "Reserved" or "TBD" in accordance with an order's delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the "Reserved" or "TBD" item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR which could be the SUPPO or FISC Detachment Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 10.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services - Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War

PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O./Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are

implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water. HS Contractor

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

_____

_____

Tel No: _____

Fax No: _____

Mobile: _____

E-mail address: _____

SECTION C - DESCRIPTIONS AND SPECIFICATIONS

The following have been modified:
PERFORMANCE WORK STATEMENT
TASKS: The HS Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 1.1.6 and 1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 1.1.6 below is addressed at paragraph 17.2.3 of the Section B1 Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 1.1.8. Except when the facts detailed in paragraph 1.1.18 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

1.1.1. The HS Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The HS Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract, Reserved or TDB items, or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs. The portion of the LOGREQ that covers items that are pre-priced in the contract, when submitted by, under authority of, or on behalf of an AGR, is an order under this contract. Orders for Reserved, TBD, or non-contract items will be finalized once the AGR and HS Contractor agree on a price as described at Section B1, paragraph 11.2. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

1.1.4. These estimates shall be provided for all US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The HS Contractor shall assist the ship's Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship's advance party or to

expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship's advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location.

1.2.2. The HS Contractor shall install all ordered equipment upon the ship's arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

1.2.5. The HS Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and Performance Work Statement (PWS), applicable port tariffs and current prices for frequently ordered services such as laundry services.

1.2.6. Money Exchange Services:

1.2.6.1. The HS Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. The HS Contractor shall maintain adequate records justifying its basis for determining the Official Exchange Rate and shall make those records available to the AGR upon request. This Official Exchange Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The HS Contractor shall arrange for authorized moneychangers to exchange U.S. dollars for ship personnel into local currency. Money Exchange services shall be made available onboard ship to crewmembers at least two hours daily with buy-back service on the day before the ship's departure. The moneychangers may include a commission of not more than plus or minus 1.5% difference from the Official Exchange Rate described above.

1.2.7. Laundry Services:

1.2.7.1. The HS Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The HS Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The HS Contractor shall provide all interpreter services to assist the Supply Officer to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract in support of the ship's visit. This limited set of interpretor services is required under the Management Services CLIN and is separate from the interpretor services required under CLIN XX19.

1.2.9. Mail Delivery Services: The HS Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Morale Welfare and Recreation (MWR) Services:

1.2.10.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms. The HS Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The HS Contractor shall facilitate the ship's timely departure.

1.2.13.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The HS Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

1.3.1. Purchase order to be issued to a vendor other than the HS Contractor for additional supplies and services. When a requirement exist for supplies or services that are not included on the Schedule of Supplies and Services as price, reserved, or TBD, the HS Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the HS Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall make the acquisition selection decision and issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The ship's Supply Officer shall normally issue a purchase order to the selected vendor rather than issuing an order to the HS Contractor that requires the HS Contractor to provide the supplies or services. The HS Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The HS Contractor shall facilitate receipt of the items by the ship. The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under

auspices of this contract. The HS Contractor shall use the specifications for FF&V, Bread, and Eggs that are included as part of this contract when when arranging for those supplies.

1.3.2. Supplies and services to be provided by the HS Contractor. In the event the above process cannot be followed by the ship's Supply Officer, and the ship's Supply Officer orders the additional supplies and services from the HS Contractor, the HS Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the HS Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rationale for decision. Any communication concerning non pre-priced items to be acquired under this subparagraph will not be considered an order until the HS Contractor and the AGR have agreed on a price for the supplies or services. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or not later than 7 days after the ship's departure from the visited port. The HS Contractor's record of promoting competition as required by this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service.

1.3.3. Purchasing procedures. Not later than 60 days after contract award, the HS Contractor shall submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

1.4.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

1.4.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items. .

1.5. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The

HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction up to three (3) percent. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The HS Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The HS Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The HS Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF MANAGEMENT FEE (First Day and Subsequent Days) AND OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (First Day and Subsequent Days)(LOT 13) (CLIN XX34) and (CLINXX35)

2.1 CLINs XX34 and XX35 authorize the Government to order Management Services in support of Operations Other Than War. Recognizing that the specific Management Services that may be required will likely vary depending on the particulars of the individual Operation Other Than War, the CLINs are priced on a per person/per day basis. At the time the Government orders services under the CLINs it will provide the HS Contractor a detailed list of tasks that the HS Contractor shall perform. The tasks shall be within the scope of the tasks further described below. The HS Contractor shall use its best efforts to fully perform the set of tasks within the limitation of the number of persons/number of days of service ordered by the Government. The HS Contractor shall promptly notify the Government if it believes that it will be unable to fully perform the specified tasks because the Government has not ordered sufficient services under these CLINs.

2.2. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.3. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.4. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.5. If the Government has need of Management Services in support of an Operation Other Than War for disaster relief response it will order Management Services under CLIN XX34. If the Government has a need of Management

Services in support of an Operation Other Than War for other purposes, it will order Management Services under CLIN XX35.

2.6. The HS Contractor shall furnish personnel who are familiar with the manner in which the U.S. Navy operates, speak the local language that is normally used at the site of the OOTW, and speak and read English. The HS Contractor shall ensure that the personnel provided under these CLINs arrive at the OOTW site by the date and time specified in the order. The Government may require that personnel arrive as soon as 24 hours after the order is issued. The First Day and Subsequent Day Management Fee rates shall include any costs for the HS Contractor employees to travel to and from the OOTW site, and the costs of food and lodging for the HS Contractor while at the OOTW site. HS Contractor employees will not normally be provided meals or lodging at U.S. Government expense nor will they typically be entitled to Government-furnished lodging and meals on a reimbursable basis.

2.7. For each increment of one person for one day that the Government orders, the HS Contractor shall provide one qualified employee to work on tasks identified at the time the order is issued for a period of at least 12 hours per day. The HS Contractor employee will normally perform those tasks at the OOTW site. The HS Contractor shall provide the Government a Point of Contact for questions and issues that arise in connection with the tasks identified at the time the order is issued who can be contacted during the portion of the 24-hour day that the HS Contractor's employee is not at the OOTW site.

2.8. These are not personal services CLINs. HS Contractor employees performing services under these CLINs will perform the tasks identified by the Government at the time the order is issued. The HS Contractor employees performing the services are under the supervision and direction of the HS Contractor. Should the Government have concerns with the manner in which the tasks are being performed or have a need to modify the tasks, it shall contact the HS Contractor.

2.9. Services that may be required under this CLIN include, but are not limited to, providing interpreter support, providing expertise on locally-sensitive cultural issues, liaison with local political and police authorities, and providing technical assistance in acquiring necessary supplies and services. A sample list of the type supplies and services that the Government may require assistance in acquiring is attached at Exhibit D. The HS Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the HS Contractor shall make every effort to locate at least three sources. As with the Management Services CLINs for Husbanding Services, the Government may also direct the HS Contractor to acquire necessary supplies and services under these OOTW CLINs that the Government requires.

2.10. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, these CLINs will apply. If a similar Management Service is ordered for delivery in the port vicinity and the requirement is received from the ship or a contingent on the ship, the HS Contractor's Husbanding fees and CLINS shall apply.

2.11. If an advance party arrives in a country for OOTW and requires services under these CLINs prior to the start of the OOTW event, the HS Contractor shall be compensated for the services provided at the subsequent day rates for these CLINs. The HS Contractor is not required to provide any services to an advance party under these OOTW CLINs without first receiving an order for such services from an AGR. The HS Contractor may be required to support multiple operations at the same time, or a single operation at multiple locations, the HS Contractor may bill for each operation/location for which the HS Contractor's services are ordered.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The HS Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The HS Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The HS Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The HS Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the HS Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX05)

5.1. The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

5.2. The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

5.3. The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

5.4. The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

5.5. When collection of CHT is done via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

5.6. The HS Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

5.7. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

6. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX06)

6.1. The HS Contractor shall arrange for landlines to be installed aboard the ship.

6.2. The HS Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

6.3. The HS Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

6.4. The HS Contractor shall provide commercial telephone services and sale of phone cards for personal use by crewmembers.

6.5. The HS Contractor shall provide pre-paid International Calling Cards for official use.

7. CRANE (CLIN XX07) - The HS Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the HS

Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The HS Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

8. DOCKAGE AND WHARFAGE (CLIN XX08) - The HS Contractor shall provide pier and wharf usage.

9. FENDERS (CLIN XX09) - The HS Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

9.1 The HS Contractor shall provide camels as fenders for the ship.

10. FLEET LANDING (CLIN XX10) - The HS Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The HS Contractor shall ensure that this area is kept clean during the ship visit in port.

11. FORCE PROTECTION (CLIN XX11)

11.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time. The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 11.2 below.

11.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

11.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

11.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

11.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

11.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

11.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

11.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

11.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

11.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

11.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

11.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

11.1.6. Stand-Off Distances:

11.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.r.

11.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship..

11.1.7. Warning Signs: The HS Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

11.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

11.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

11.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

11.2. Non-Contract FP Measures: The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

11.3. Beach Guard Office or Tent (CLIN XX11AA)

11.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship's personnel while performing security checks on personnel, baggage, and vehicles.

11.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher shall be provided and kept fully charged.

11.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

11.4. Dive and Vetting Operations (CLIN XX11AB)

11.4.1. The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

11.4.2. The pier will be vetted prior to the ship's arrival.

11.4.3. To the maximum extent practicable the HS Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship..

11.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

11.4.5. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

11.5. Floating Line of Demarcation (CLINs XX11AC through XX11AE)

11.5.1. The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone.

11.5.2. The HS Contractor shall comply with the specification of the FLD in Attachment 3.

11.6. Perimeter Fencing (CLIN XX11AF)

11.6.1. The HS Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the HS Contractor will provide portable chain link fencing with vehicle and walk up entrances.

11.6.2. The perimeter fence provided by the HS Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material

Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point: Entry available for vehicles and personnel.

11.7. Physical Security Barriers (CLIN XX11AF through XX11AJ)

11.7.1. The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

11.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

11.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

11.7.4. A personnel entry point must be established through the barriers.

11.7.5. Barriers may also be used to seal off secondary Port gates.

11.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

11.8. Picket Boats (CLIN XX11AK)

11.8.1. The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

11.8.2. The HS Contractor shall comply with Attachment 4 for picket boat operations and specifications.

11.9. Portable Lighting (CLIN XX11AL)

11.9.1. The HS Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port's installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

11.9.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

11.10. Security Guards Services (CLINs XX11AM through XX11AQ)

11.10.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

11.10.2. The HS Contractor shall comply with Attachment 5 for security guard operations.

11.10.3. Security guards shall be armed or unarmed in accordance with Exhibit A, Schedule of Supplies and Services.

11.11. Two Way Radios (CLIN XX11AR) - The HS Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

11.12. Hand Held Explosive Detectors (CLIN XX11AS) - The HS Contractor shall provide hand held explosive detectors capable of detecting explosives.

11.13. Hand Held Wand Metal Detectors (CLIN XX11AT) - The HS Contractor shall provide hand held metal detectors capable of detecting metal.

11.14. Walk Thru X-Ray & Metal Detector (CLIN XX11AU) - The HS Contractor shall provide a walk thru X-ray & metal detector capable of detecting metal.

11.15. X-ray Baggage Scanning Machine airport-type (CLIN XX11AV And CLIN XX11AW) – The HS Contractor shall provide an X-ray baggage scanning machine capable of X-raying hand carried luggage and bags to determine its contents. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

11.16. Under Carriage Vehicle Scanner (CLIN XX12AX) – The HS Contractor shall provide an under carriage vehicle scanner to scan vehicle undercarriages.

12. FORKLIFT WITH OPERATOR (CLIN XX12) - The HS Contractor shall provide forklifts with operators for loading and unloading operations.

13. FUEL (CLIN XX13)

13.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the HS Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

13.2. If a ship requires the HS Contractor to provide fuel, the Husbanding HS Contractor shall contact the bunkering HS Contractor or HN source. If the HN or bunkering HS Contractor can provide the fuel within the time needed, the HS Contractor shall so inform the ship. However, if the HN or US Government bunkering Contractor cannot deliver the fuel when required by the ship, the HS Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the HS Contractor arrange for fuel delivery.

13.3. The HS Contractor shall only charge fuel at the daily commercial fuel rate established by the port or local authorities. The HS Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

13.4. The HS Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

13.5. The HS Contractor shall provide a fuel barge or truck to transport fuel to the ship.

13.6. The HS Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

13.7. The HS Contractor shall load the ordered fuel and transport to the ship. The HS Contractor shall transfer the fuel from the fuel barge or truck to the ship. The HS Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

13.8. The HS Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

13.9. In recognition of the fact that fuel is sold by weight (metric tons) and by volume (gallons or litres), the HS Contractor shall ensure all United States ships are provided with a fuel invoice and the appropriate customs certification demonstrating the quantity of fuel provided in metric tons and in gallons or liters.

13.10. Excess Fuel Procedures: If the ship does not offload all of the fuel ordered, the HS Contractor shall store the excess fuel and diligently attempt to sell it as soon as practicable. The HS Contractor shall receive a storage fee for up to three (3) days. The HS Contractor shall receive a fuel disposal fee on a reimbursable basis upon presentation of vendor invoice for disposal services.

14. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX14)

14.1. The HS Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse.

14.2. The HS Contractor shall provide dedicated refuse bins to the ship.

14.3. If collection is done by sea, the HS Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

14.4. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins.

14.5. The HS Contractor shall immediately clean up any spilled refuse.

14.6. The HS Contractor shall properly dispose of all collected refuse.

15. LINESBOATS (CLIN XX15) - The HS Contractor shall provide Linesboats to assist in docking line handling operations.

16. LINE HANDLERS (CLIN XX16)

16.1. The HS Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier. One "Job" covers both securing and unsecuring the mooring lines.

16.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

17. MANLIFT (WITH OPERATOR) (CLIN XX17)

17.1. The HS Contractor shall provide a manlift with operator and a full fuel tank.

17.2. The HS Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

17.3. The HS Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The HS Contractor shall maintain documentation of ship personnel acknowledgement of the training.

18. MATERIAL HANDLING (CLIN XX18)

18.1. The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

18.1.1. The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

18.1.2. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

18.1.3. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

18.2. The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

18.3. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

18.4. The HS Contractor shall use forklifts and cranes from The Schedule.

18.5. The HS Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

18.6. The HS Contractor shall deliver the package to the shp after arrival in port or the following morning.

18.7. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

18.8. The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

18.9. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

19. MISCELLANEOUS (CLIN XX19)

19.1. INTERPRETER SERVICES (CLIN XX19AA) - The HS Contractor shall provide all interpreter services as ordered by the SUPPO. The interpreter shall be fluent in both spoken and written local language and English.

19.2. PORTABLE LATRINES (CLIN XX19AB)

19.2.1. The HS Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

19.2.2. The HS Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

19.2.3. The HS Contractor shall restock toilet paper, hand soap, and paper towels daily.

19.2.4. The HS Contractor shall clean latrines twice daily.

19.3. LOGISTIC SUPPORT TO GOVERNMENT TEAMS (CLIN XX19AC)

19.3.1. Government teams conduct surveys in a variety of ports in the Western Pacific theater. The Government may require the assistance of the HS Contractor in the ports to be surveyed. The HS Contractor shall provide estimated costs to the AGR and subject to approval by the AGR. The AGR shall provide DD Form 1155 or SF 1449 to the HS Contractor in support of this survey.

19.3.2. The HS Contractor shall assign an individual to participate in and assist with logistical arrangements for a team that will perform the survey. This team may visit a variety of ports in advance of ships' visits to assess the force protection levels of the port and to perform related functions. The HS Contractor's assistance shall include

providing logistical support as requested by the Government, coordinating access and interviews with local officials, local husbanding services, and support HS Contractors, coordinating necessary translation services for the team, and assisting in the development of a final assessment report.

19.3.3. The HS Contractor shall invoice port surveys at the subsequent day husbanding fee for a Class I ship in the port. In addition, the HS Contractor shall be reimbursed for economy class air transportation and daily per diem rate that includes lodging, meals and other related expenses. The per diem rates shall be those set forth in the Joint Travel Regulations (JTR) at http://perdiem.hqda.pentagon.mil/perdiem/ .

19.3.4. Other expenses related to the service(s) and anticipated by the HS Contractor will be invoiced and reimbursed at cost. The HS Contractor shall submit all receipts, invoices or other valid documents to support the incurred expenses. The HS Contractor shall not pay for hotels, meals, rental vehicles, telephone expenses and any other expenses that the Government team members may incur and for which they can be reimbursed under their Government travel orders.

20. OIL BOOMS (CLIN XX20)

20.1. The HS Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

20.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

20.3. The HS Contractor shall dispose all oil waste caught in the Oil Boom.

21. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX21)

21.1. The HS Contractor shall remove oily waste and aggregate water from the ship.

21.2. The HS Contractor shall pump oily waste and aggregate water from the ship to HS Contractor provided equipment.

21.3. The HS Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

21.4. The HS Contractor shall provide hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

21.5. When removal is done via barge, the HS Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

21.6. The HS Contractor shall properly dispose of all oily waste and aggregate water.

21.7. The HS Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

22. PAINT FLOAT (CLIN XX22)

22.1. The HS Contractor shall provide paint floats to hold personnel painting the ship.

22.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

22.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

23. PILOTS (CLIN XX23) - The HS Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

24. POTABLE WATER (CLIN XX24) - The HS Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

25. PRATIQUE (CLIN XX25) - The HS Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

26. SHORE POWER (CLIN XX26)

26.1. The HS Contractor shall provide shore power to the ship using

26.1.1. Port provided permanent connection system.

26.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

26.2 The HS Contractor shall provide all cables and make all power connections between the generator and ship.

26.3. The availability of shore power shall be in accordance with the schedule established by the ship.

27. SHORE STEAM (CLIN XX27) – The HS Contractor shall provide shore steam to the ship.

28. STEVEDORE SERVICES (CLIN XX28) - The HS Contractor shall provide stevedores and supervisors for general labor.

29. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX29)

29.1. The HS Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

29.2. The HS Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

30. TRANSPORTATION VEHICLES (CLIN XX30)

30.1. The HS Contractor shall provide vehicle service with qualified drivers for official government business.

30.2. The HS Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

30.3. The HS Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

30.4. The HS Contractor shall provide drivers who can speak and understand English clearly.

30.5. The HS Contractor shall provide only vehicles with air conditioning.

30.6. The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

30.7. The HS Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

30.8. The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

30.9. If the unit of issue is by "Day", then the rental period shall constitutes 12 hours.

31. TUGS (CLIN XX31)

31.1. The HS Contractor shall provide tugs to bring ships to and from berthing locations.

31.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

31.3.Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

31.4. If tugs are not available through the port authority, the HS Contractor shall use commercially available tugs.

32. WATER TAXIS (CLIN XX32)

32.1. The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

32.2. The HS Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

32.3. The HS Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

33. CRAFT REPORT (CLIN XX33)

33.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit C - CRAFT.

33.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each ship's departure.

34. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF – MANAGEMENT FEE (CLINXX34) and OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (CLIN XX35). See Paragraph 2 above

35. OOTW COST REPORT (CLIN XX35)

35.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each OOTW event, showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit C – CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each OOTW events' completion.

(End of Summary of Changes)

BASIS FOR MAXIMUM QUANTITIES

The maximum quantities established herein were derived based on historical data, market research, customer projections and contracting officer port knowledge. Information concerning port visits for the 12-month period ending 31 Dec 07 by USS vessels to ports covered by this contract is at Exhibit E, Historical Craft Data.

OVERVIEW OF CONTRACT

SECTION B1 OVERVIEW

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting the Pacific Islands. For purposes of this contract, “Pacific Islands” is defined as the geographic area encompassed by the lots described below at paragraph 2.3.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in the Pacific Islands. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, the following Lots apply:

2.3.1. Lot 1 is for Majuro, Marshall Islands

2.3.2. Lot 2 is Noumea, New Caledonia
2.3.3. Lot 3 is Madang, Papua New Guinea
2.3.4. Lot 4 is Honiara, Solomon Islands
2.3.5. Lot 5 is Nuku Alofa, Tonga
2.3.6. Lot 6 is Funafuti, Tuvalu
2.3.7. Lot 7 is Port Vila, Vanuatu
2.3.8. Lot 8 is Koror, Palau
2.3.9. Lot 9 is Management Fees for all other ports of Marshall Islands, New Caledonia, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Vanuatu, Palau, Fiji, Kiribati, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories).
2.3.10. Lot 10 is Operations Other Than War (OOTW) for all locations in Marshall Islands, New Caledonia, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Vanuatu, Palau, Fiji, Kiribati, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories).

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite Delivery Indefinite Quantity (IDIQ) contract. The HS Contractor agrees to furnish the services or supplies at the fixed prices listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES – The contract minimum quantity referred to in paragraph (b) of FAR 52.216-22 Clause entitled “Indefinite Quantity” of this contract, is set at a total of $20,000 worth of orders at the contract unit price(s) or as guaranteed minimum if no orders are issued. The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order(s)/delivery order(s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months. The period of time within which the Government may order performance varies by lot. See section F for additional details.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for the Pacific Islands.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services. For example U.S. Government personnel attending conferences, training and seminars where hotel, transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event.

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as “Reserved” or “TBD”) in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The HS Contractor shall use its best reasonable effort to deliver supplies or services marked “Reserved” or “TBD” in accordance with an order’s delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the “Reserved” or “TBD” item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall

support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR, which could be the SUPPO, or FISC Det. Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services - Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O./Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

    - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water. HS Contractor

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Mr. Leonard G. Francis
Title of Individual:	Executive Group Chairman/President
Mailing Address:	15D Pandan Road Singapore 609266
Tel No:	(65) 62685300
Fax No:	(65) 62707240
Mobile:	(65) 9798-3155
E-mail address:	Leonard@glennmarinegroup.com; glenncom@glennmarinegroup.com

Section C - Descriptions and Specifications

PERFORMANCE WORK STATEMENT
TASKS: The HS Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraph 1.1.6 and 1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 1.1.6 below) is addressed at paragraph 17.2 of the Section B1 Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 1.1.8. Except when the facts detailed in paragraph 1.1.18 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

1.1.1. The HS Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The HS Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract, Reserved or TBD items, or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs. The portion of the LOGREQ that covers items that are pre-priced in the contract, when submitted by, under authority of, or on behalf of an AGR, is an order under this contract. Orders for Reserved, TBD, or non-contract items will be finalized once the AGR and HS Contractor agree on a price as described at Section B1, paragraph 11.2. Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

1.1.4. These estimates shall be provided for all US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The HS Contractor shall assist the ship's Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship's advance party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship's advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit) and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location.

1.2.2. The HS Contractor shall install all ordered equipment upon the ship's arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

1.2.5. The HS Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and Performance Work Statement (PWS), applicable port tariffs and current prices for frequently ordered services such as laundry services.

1.2.6. Money Exchange Services:

1.2.6.1. The HS Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. The HS Contractor shall maintain adequate records justifying its basis for determining the Official Exchange Rate and shall make those records available to the AGR upon request. This Official Exchange Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The HS Contractor shall arrange for authorized moneychangers to exchange U.S. dollars for ship personnel into local currency. Money Exchange services shall be made available onboard ship to crewmembers at least two hours daily with buy-back service on the day before the ship's departure. The moneychangers may include a commission of not more than plus or minus 1.5% difference from the Official Exchange Rate described above.

1.2.7. Laundry Services:

1.2.7.1. The HS Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The HS Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The HS Contractor shall provide all interpreter services to assist the Supply Officer to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract in support of the ship's visit. This limited set of interpretor services is required under the Management Services CLIN and is separate from the interpretor services required under CLIN XX19.

1.2.9. Mail Delivery Services: The HS Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Morale Welfare and Recreation (MWR) Services:

1.2.10.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms. The HS Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The HS Contractor shall facilitate the ship's timely departure.

1.2.13.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The HS Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

1.3.1. Purchase order to be issued to a vendor other than the HS Contractor for additional supplies and services. When a requirement exist for supplies or services that are not included on the Schedule of Supplies and Services as priced, reserved, or TBD, the HS Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the HS Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall make the acquisition selection decision and issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The ship's Supply Officer shall normally issue a purchase order to the selected vendor rather than issuing an order to the HS Contractor that requires the HS Contractor to provide the supplies or services. The HS Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The HS Contractor shall facilitate receipt of the items by the ship. The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under

auspices of this contract. The HS Contractor shall use the specifications for FF&V, Bread, and Eggs that are included as part of this contract when arranging for those supplies.

1.3.2. Supplies and services to be provided by the HS Contractor. In the event the above process cannot be followed by the ship's Supply Officer, and the ship's Supply Officer orders the additional supplies and services from the HS Contractor, the HS Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the HS Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rationale for decision. Any communication concerning non pre-priced items to be acquired under this subparagraph will not be considered an order until the HS Contractor and the AGR have agreed on a price for the supplies or services. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or not later than 7 days after the ship's departure from the visited port. The HS Contractor's record of promoting competition as required by this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 13, Standards for Professional Service.

1.3.3. Purchasing procedures. Not later than 60 days after contract award, the HS Contractor shall submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

1.4.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

1.4.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 7.

1.4.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 8 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items.

1.5. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction up to three (3) percent. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The HS Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The HS Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The HS Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF MANAGEMENT FEE (First Day and Subsequent Days) AND OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (First Day and Subsequent Days)(LOT 12) (CLIN XX34) and (CLINXX35)

2.1 CLINs XX34 and XX35 authorize the Government to order Management Services in support of Operations Other Than War. Recognizing that the specific Management Services that may be required will likely vary depending on the particulars of the individual Operation Other Than War, the CLINs are priced on a per person/per day basis. At the time the Government orders services under the CLINs it will provide the HS Contractor a detailed list of tasks that the HS Contractor shall perform. The tasks shall be within the scope of the tasks further described below. The HS Contractor shall use its best efforts to fully perform the set of tasks within the limitation of the number of persons/number of days of service ordered by the Government. The HS Contractor shall promptly notify the Government if it believes that it will be unable to fully perform the specified tasks because the Government has not ordered sufficient services under these CLINs.

2.2. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.3. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.4. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.5. If the Government has need of Management Services in support of an Operation Other Than War for disaster relief response it will order Management Services under CLIN XX34. If the Government has a need of Management Services in support of an Operation Other Than War for other purposes, it will order Management Services under CLIN XX35.

2.6. The HS Contractor shall furnish personnel who are familiar with the manner in which the U.S. Navy operates, speak the local language that is normally used at the site of the OOTW, and speak and read English. The HS Contractor shall ensure that the personnel provided under these CLINs arrive at the OOTW site by the date and time specified in the order. The Government may require that personnel arrive as soon as 24 hours after the order is issued. The First Day and Subsequent Day Management Fee rates shall include any costs for the HS Contractor employees to travel to and from the OOTW site, and the costs of food and lodging for the HS Contractor while at the OOTW site. HS Contractor employees will not normally be provided meals or lodging at U.S. Government expense nor will they typically be entitled to Government-furnished lodging and meals on a reimbursable basis.

2.7. For each increment of one person for one day that the Government orders, the HS Contractor shall provide one qualified employee to work on tasks identified at the time the order is issued for a period of at least 12 hours per day. The HS Contractor employee will normally perform those tasks at the OOTW site. The HS Contractor shall provide the Government a Point of Contact for questions and issues that arise in connection with the tasks identified at the time the order is issued who can be contacted during the portion of the 24-hour day that the HS Contractor's employee is not at the OOTW site.

2.8. These are not personal services CLINs. HS Contractor employees performing services under these CLINs will perform the tasks identified by the Government at the time the order is issued. The HS Contractor employees performing the services are under the supervision and direction of the HS Contractor. Should the Government have concerns with the manner in which the tasks are being performed or have a need to modify the tasks, it shall contact the HS Contractor.

2.9. Services that may be required under this CLIN include, but are not limited to, providing interpreter support, providing expertise on locally-sensitive cultural issues, liaison with local political and police authorities, and providing technical assistance in acquiring necessary supplies and services. A sample list of the type supplies and services that the Government may require assistance in acquiring is attached at Exhibit D. The HS Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the HS Contractor shall make every effort to locate at least three sources. As with the Management Services CLINs for Husbanding Services, the Government may also direct the HS Contractor to acquire necessary supplies and services under these OOTW CLINs that the Government requires.

2.10. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, these CLINs will apply. If a similar Management Service is ordered for delivery in the port vicinity and the requirement is received from the ship or a contingent on the ship, the HS Contractor's Husbanding fees and CLINS shall apply.

2.11. If an advance party arrives in a country for OOTW and requires services under these CLINs prior to the start of the OOTW event, the HS Contractor shall be compensated for the services provided at the subsequent day rates for these CLINs. The HS Contractor is not required to provide any services to an advance party under these OOTW CLINs without first receiving an order for such services from an AGR. The HS Contractor may be required to support multiple operations at the same time, or a single operation at multiple locations, the HS Contractor may bill for each operation/location for which the HS Contractor's services are ordered.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The HS Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The HS Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The HS Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The HS Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the HS Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX05)

5.1. The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

5.2. The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

5.3. The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

5.4. The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

5.5. When collection of CHT is done via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

5.6. The HS Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 13, Standards for Professional Services.

5.7. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

5.8. The Order will be modified at the conclusion of the visit to reflect the actual quantity of sewage removed from the ship. The modified quantity will be priced at the unit price established in the contract (or, for reserved items, at the unit price established in the order).

6. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX06)

6.1. The HS Contractor shall arrange for landlines to be installed aboard the ship.

6.2. The HS Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

6.3. The HS Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

6.4. The HS Contractor shall provide commercial telephone services and sale of phone cards for personal use by crewmembers.

6.5. The HS Contractor shall provide pre-paid International Calling Cards for official use.

7. CRANE (CLIN XX07) - The HS Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the HS Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The HS Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

8. DOCKAGE AND WHARFAGE (CLIN XX08) - The HS Contractor shall provide pier and wharf usage.

9. FENDERS (CLIN XX09) - The HS Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

9.1 The HS Contractor shall provide camels as fenders for the ship.

10. FLEET LANDING (CLIN XX10) - The HS Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The HS Contractor shall ensure that this area is kept clean during the ship visit in port.

11. FORCE PROTECTION (CLIN XX11)

11.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time. The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 11.2 below.

11.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

11.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

11.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

11.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on employees with local or national police departments or other government organizations. The HS Contractor shall not use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

11.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

11.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

11.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

11.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

11.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

11.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

11.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

11.1.6. Stand-Off Distances:

11.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

11.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

11.1.7. Warning Signs: The HS Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

11.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

11.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering

- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

11.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

11.2. Non-Contract FP Measures: The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

11.3. Beach Guard Office or Tent (CLIN XX11AA)

11.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship's personnel while performing security checks on personnel, baggage, and vehicles.

11.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher shall be provided and kept fully charged.

11.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

11.4. Dive and Vetting Operations (CLIN XX11AB)

11.4.1. The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

11.4.2. The pier will be vetted prior to the ship's arrival.

11.4.3. To the maximum extent practicable the HS Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship..

11.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

11.4.5. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

11.5. Floating Line of Demarcation (CLINs XX11AC through XX11AE)

11.5.1. The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone.

11.5.2. The HS Contractor shall comply with the specification of the FLD in Attachment 2.

11.6. Perimeter Fencing (CLIN XX11AF)

11.6.1. The HS Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the HS Contractor will provide portable chain link fencing with vehicle and walk up entrances.

11.6.2. The perimeter fence provided by the HS Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point: Entry available for vehicles and personnel.

11.7. Physical Security Barriers (CLIN XX11AG through XX11AJ)

11.7.1. The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

11.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

11.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

11.7.4. A personnel entry point must be established through the barriers.

11.7.5. Barriers may also be used to seal off secondary Port gates.

11.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

11.8. Picket Boats (CLIN XX11AK)

11.8.1. The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

11.8.2. The HS Contractor shall comply with Attachment 3 for picket boat operations and specifications.

11.9. Portable Lighting (CLIN XX11AL)

11.9.1. The HS Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port's installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

11.9.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

11.10. Security Guards Services (CLINs XX11AM through XX11AQ)

11.10.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

11.10.2. The HS Contractor shall comply with Attachment 4 for security guard operations.

11.10.3. Security guards shall be armed or unarmed in accordance with Exh A, Schedule of Supplies and services.

11.11. Two Way Radios (CLIN XX11AR) - The HS Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

11.12. Hand Held Explosive Detectors (CLIN XX11AS) - The HS Contractor shall provide hand held explosive detectors capable of detecting explosives.

11.13. Hand Held Wand Metal Detectors (CLIN XX11AT) - The HS Contractor shall provide hand held metal detectors capable of detecting metal.

11.14. Walk Thru X-Ray & Metal Detector (CLIN XX11AU) - The HS Contractor shall provide a walk thru X-ray & metal detector capable of detecting metal.

11.15. X-ray Baggage Scanning Machine airport-type (CLIN XX11AV And CLIN XX11AW) – The HS Contractor shall provide an X-ray baggage scanning machine capable of X-raying hand carried luggage and bags to determine its contents. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

11.16. Under Carriage Vehicle Scanner (CLIN XX12AX) – The HS Contractor shall provide an under carriage vehicle scanner to scan vehicle undercarriages.

12. FORKLIFT WITH OPERATOR (CLIN XX12) - The HS Contractor shall provide forklifts with operators for loading and unloading operations.

13. FUEL (CLIN XX13)

13.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the HS Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

13.2. If a ship requires the HS Contractor to provide fuel, the Husbanding HS Contractor shall contact the bunkering HS Contractor or HN source. If the HN or bunkering HS Contractor can provide the fuel within the time needed, the HS Contractor shall so inform the ship. However, if the HN or US Government bunkering Contractor cannot deliver

the fuel when required by the ship, the HS Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the HS Contractor arrange for fuel delivery.

13.3. The HS Contractor shall only charge fuel at the daily commercial fuel rate established by the port or local authorities. The HS Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

13.4. The HS Contractor shall provide fuel in accordance with Attachment 5 – Fuel Specifications.

13.5. The HS Contractor shall provide a fuel barge or truck to transport fuel to the ship.

13.6. The HS Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

13.7. The HS Contractor shall load the ordered fuel and transport to the ship. The HS Contractor shall transfer the fuel from the fuel barge or truck to the ship. The HS Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

13.8. The HS Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

13.9. In recognition of the fact that fuel is sold by weight (metric tons) and by volume (gallons or litres), the HS Contractor shall ensure all United States ships are provided with a fuel invoice and the appropriate customs certification demonstrating the quantity of fuel provided in metric tons and in gallons or liters.

13.10. Excess Fuel Procedures: If the ship does not offload all of the fuel ordered, the HS Contractor shall store the excess fuel and diligently attempt to sell it as soon as practicable. The HS Contractor shall receive a storage fee for up to three (3) days. The HS Contractor shall receive a fuel disposal fee on a reimbursable basis upon presentation of vendor invoice for disposal services.

14. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX14)

14.1. The HS Contractor shall remove and dispose of “refuse” from the ship and areas surrounding trash bins, as well as any spilled refuse.

14.2. The HS Contractor shall provide dedicated refuse bins to the ship.

14.3. If collection is done by sea, the HS Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

14.4. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins.

14.5. The HS Contractor shall immediately clean up any spilled refuse.

14.6. The HS Contractor shall properly dispose of all collected refuse.

15. LINESBOATS (CLIN XX15) - The HS Contractor shall provide Linesboats to assist in docking line handling operations.

16. LINE HANDLERS (CLIN XX16)

16.1. The HS Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier. One "Job" covers both securing and unsecuring the mooring lines.

16.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

17. MANLIFT (WITH OPERATOR) (CLIN XX17)

17.1. The HS Contractor shall provide a manlift with operator and a full fuel tank.

17.2. The HS Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

17.3. The HS Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The HS Contractor shall maintain documentation of ship personnel acknowledgement of the training.

18. MATERIAL HANDLING (CLIN XX18)

18.1. The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

18.1.1. The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

18.1.2. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

18.1.3. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

18.2. The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

18.3. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

18.4. The HS Contractor shall use forklifts and cranes from The Schedule.

18.5. The HS Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

18.6. The HS Contractor shall deliver the package to the shp after arrival in port or the following morning.

18.7. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

18.8. The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

18.9. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

19. MISCELLANEOUS (CLIN XX19)

19.1. INTERPRETER SERVICES (CLIN XX19AA) - The HS Contractor shall provide all interpreter services as ordered by the SUPPO. The interpreter shall be fluent in both spoken and written local language and English.

19.2. PORTABLE LATRINES (CLIN XX19AB)

19.2.1. The HS Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

19.2.2. The HS Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

19.2.3. The HS Contractor shall restock toilet paper, hand soap, and paper towels daily.

19.2.4. The HS Contractor shall clean latrines twice daily.

19.3. LOGISTIC SUPPORT TO GOVERNMENT TEAMS (CLIN XX19AC)

19.3.1. Government teams conduct surveys in a variety of ports in the Western Pacific theater. The Government may require the assistance of the HS Contractor in the ports to be surveyed. The HS Contractor shall provide estimated costs to the AGR and subject to approval by the AGR. The AGR shall provide funding DD Form 1155 or SF1449 to the HS Contractor in support of this survey.

19.3.2. The HS Contractor shall assign an individual to participate in and assist with logistical arrangements for a team that will perform the survey. This team may visit a variety of ports in advance of ships' visits to assess the force protection levels of the port and to perform related functions. The HS Contractor's assistance shall include providing logistical support as requested by the Government, coordinating access and interviews with local officials, local husbanding services, and support HS Contractors, coordinating necessary translation services for the team, and assisting in the development of a final assessment report.

19.3.3. The HS Contractor shall invoice port surveys at the subsequent day husbanding fee for a Class I ship in the port. In addition, the HS Contractor shall be reimbursed for economy class air transportation and daily per diem rate that includes lodging, meals and other related expenses. The per diem rates shall be those set forth in the Joint Travel Regulations (JTR) at http://perdiem.hqda.pentagon.mil/perdiem/ .

19.3.4. Other expenses related to the service(s) and anticipated by the HS Contractor will be invoiced and reimbursed at cost. The HS Contractor shall submit all receipts, invoices or other valid documents to support the incurred expenses. The HS Contractor shall not pay for hotels, meals, rental vehicles, telephone expenses and any other expenses that the Government team members may incur and for which they can be reimbursed under their Government travel orders.

20. OIL BOOMS (CLIN XX20)

20.1. The HS Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

20.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

20.3. The HS Contractor shall dispose all oil waste caught in the Oil Boom.

21. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX21)

21.1. The HS Contractor shall remove oily waste and aggregate water from the ship.

21.2. The HS Contractor shall pump oily waste and aggregate water from the ship to HS Contractor provided equipment.

21.3. The HS Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

21.4. The HS Contractor shall provide hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

21.5. When removal is done via barge, the HS Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

21.6. The HS Contractor shall properly dispose of all oily waste and aggregate water.

21.7. The HS Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

22. PAINT FLOAT (CLIN XX22)

22.1. The HS Contractor shall provide paint floats to hold personnel painting the ship.

22.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

22.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

23. PILOTS (CLIN XX23) - The HS Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

24. POTABLE WATER (CLIN XX24)

24.1. The HS Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

24.2. The Order will be modified at the conclusion of the visit to reflect the actual quantity of potable water that was provided to and accepted by the ship. The modified quantity will be priced at the unit price established in the contract (or, for reserved items, at the unit price established in the order).

25. PRATIQUE (CLIN XX25) - The HS Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

26. SHORE POWER (CLIN XX26)

26.1. The HS Contractor shall provide shore power to the ship using

26.1.1. Port provided permanent connection system.

26.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

26.2 The HS Contractor shall provide all cables and make all power connections between the generator and ship.

26.3. The availability of shore power shall be in accordance with the schedule established by the ship.

27. SHORE STEAM (CLIN XX27) – The HS Contractor shall provide shore steam to the ship.

28. STEVEDORE SERVICES (CLIN XX28) - The HS Contractor shall provide stevedores and supervisors for general labor.

29. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX29)

29.1. The HS Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

29.2. The HS Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

30. TRANSPORTATION VEHICLES (CLIN XX30)

30.1. The HS Contractor shall provide vehicle service with qualified drivers for official government business.

30.2. The HS Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

30.3. The HS Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

30.4. The HS Contractor shall provide drivers who can speak and understand English clearly.

30.5. The HS Contractor shall provide only vehicles with air conditioning.

30.6. The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

30.7. The HS Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

30.8. The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

30.9. If the unit of issue is by “Day”, then the rental period shall constitutes 12 hours.

31. TUGS (CLIN XX31)

31.1. The HS Contractor shall provide tugs to bring ships to and from berthing locations.

31.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

31.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

31.4. If tugs are not available through the port authority, the HS Contractor shall use commercially available tugs.

32. WATER TAXIS (CLIN XX32)

32.1. The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 6 – Water Taxi Specifications.

32.2. The HS Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

32.3. The HS Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

33. CRAFT REPORT (CLIN XX33)

33.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit C - CRAFT.

33.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each ship's departure.

34. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF – MANAGEMENT FEE (CLINXX34) and OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (CLIN XX35). See Paragraph 2 above

36. OOTW COST REPORT (CLIN XX36)

36.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each OOTW event, showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit C – CRAFT.

36.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each OOTW events' completion.

DELIVERIES OR PERFORMANCE

1.0. Period of Contract: Period of contract for the purpose of issuing task orders shall be as follows:

a. Period of Performance for the following Lots commences on date of award and ending 30 Nov 09:

Lot 1 – Majuro, Marshall Island
Lot 2 – Noumea, New Caledonia
Lot 3 – Madang, Papua New Guinea
Lot 4 – Honiara, Solomon Islands
Lot 5 – Nuku Alofa, Tonga
Lot 6 – Funafuti, Tuvalu
Lot 7 – Port Vila, Vanuatu
Lot 09 – Management Fees for all other ports of Marshall Islands, New Caledonia, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Vanuatu, Fiji, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories)
Lot 10 – Operations Other Than War (OOTW) for all locations in the Pacific Islands

b. Period of Performance for Lot 8 – All ports of Palau commences on 01 Jan 09 and ending 30 Nov 09.

c. Period of Performance for Lot 9 – All ports of Kiribati commences on 20 Dec 08 and ending 30 Nov 09.

2.0. Place of Performance: The husbanding services required under this contract shall be performed at the following countries and ports:

Marshall Islands: Majuro and all other ports in Marshall Islands
New Caledonia: Noumea and all other ports in New Caledonia
Papua New Guinea: Madang and all other ports in Papua New Guinea
Solomon Islands: Honiara and all otherports in Solomon Islands
Tonga: Nuku Alofa and all other ports in Tonga
Tuvalu: Funafuti and all other ports in Tuvalu
Vanuatu: Port Vila and all other ports in Vanuatu
Palau: All ports in Palau
All other ports of Fiji, Kiribati, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories).

Operations Other Than War (OOTW) for all locations in Marshall Islands, New Caledonia, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Vanuatu, Palau, Fiji, Kiribati, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories).

ACCOUNTING AND APPROPRIATION DATA

AA: To be cited on each delivery or task order
AMOUNT: $359,570.32
CIN N4034508RCSG00050001: $359,570.32

INVOICES AND PAYMENTS

1. The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

2. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction. The Government will not reimburse a credit card surcharge for an amount greater than 3 percent of the invoice amount. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices presented to the ship shall be provided to FISC Det Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

Section I - Contract Clauses

CLAUSES INCORPORATED BY FULL TEXT

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

ADDITIONAL CONTRACT TERMS AND CONDITIONS.

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of task/delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All task/delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(d) Order Limitations (FAR 52.216-19) (OCT 1995)

(a) *Minimum order.* When the Government requires supplies or services covered by this contract in an amount of less than US $5,000.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(b) *Maximum order*. The Contractor is not obligated to honor --

(1) Any order for services in support of more than three (3) vessels in a single port at the same time or any order to husband in excess of eight (8) ships at the same time in the geographic area covered by this contract. The three (3) vessel mix shall be defined as one (1) Class IV or below and two (2) Class III or below in a single port.

(2) Any order for a single item in excess of the maximum quantity for that item which is identified in the pricing schedule, Exhibit A, of this contract.

(3) Any order for a combination of items in excess of the total maximum quantity for the applicable performance period of this contract; or

(4) A series of orders from the Government within 120 days that together call for quantities exceeding the maximum quantities identified in the pricing schedule by more than two hundred percent (200%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless that order (orders) is returned to the ordering office within one (1) day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(e) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(f) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
