(g) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC),

NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(h) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the “Contracting Officer” or “Chief of the Contracting Office”.

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (JUN 2008)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(2) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (2) 52.219-3, Notice of HUBZone Small Business Set-Aside (Jan 1999) (15 U.S.C. 657a).

___ (3) 52.219-4, Notice of Price Evaluation Preference for HUBZone Small Business Concerns (JUL 2005) (if the offeror elects to waive the preference, it shall so indicate in its offer) (15 U.S.C. 657a).

___ (4) [Removed].

___ (5)(i) 52.219-6, Notice of Total Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-6.

___ (iii) Alternate II (MAR 2004) of 52.219-6.

___ (6)(i) 52.219-7, Notice of Partial Small Business Set-Aside (JUNE 2003) (15 U.S.C. 644).

___ (ii) Alternate I (OCT 1995) of 52.219-7.

___ (34) 52.232-29, Terms for Financing of Purchases of Commercial Items (FEB 2002) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).

___ (35) 52.232-30, Installment Payments for Commercial Items (OCT 1995) (41 U.S.C. 255(f), 10 U.S.C. 2307(f)).

___ (36) 52.232-33, Payment by Electronic Funds Transfer--Central Contractor Registration (OCT 2003) (31 U.S.C. 3332).

___ (37) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332).

___ (38) 52.232-36, Payment by Third Party (MAY 1999) (31 U.S.C. 3332).

___ (39) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (40)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

____ (ii) Alternate I (APR 2003) of 52.247-64.

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (NOV 2006) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (February 2002) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (7) 52.237-11, Accepting and Dispensing of $1 Coin (AUG 2007)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If

this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vi) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

(vi) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(vii) 52.222-50, Combating Trafficking in Persons (AUG 2007) (22 U.S.C. 7104(g)). Flow down required in accordance with paragraph (f) of FAR clause 52.222-50.

(viii) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(x) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the conclusion of the contract term in which the order is issued.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before the contract expires.

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (MAR 2008)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

_X__ 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(2) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(3) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (APR 2007) (15 U.S.C. 637 note).

(4) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JUN 2005) (41 U.S.C. 10a-10d, E.O. 10582).

(5) ___ 252.225-7012, Preference for Certain Domestic Commodities (MAR 2008) (10 U.S.C. 2533a).

(6) ___ 252.225-7014, Preference for Domestic Specialty Metals (JUN 2005) (10 U.S.C. 2533a).

(7) ___ 252.225-7015, Restriction on Acquisition of Hand or Measuring Tools (JUN 2005) (10 U.S.C. 2533a).

(8) ___ 252.225-7016, Restriction on Acquisition of Ball and Roller Bearings (MAR 2006) (Section 8065 of Public Law 107-117 and the same restriction in subsequent DoD appropriations acts).

(9) ___ 252.225-7021, Trade Agreements (MAR 2007) (19 U.S.C. 2501-2518 and 19 U.S.C. 3301 note).

(10) ___ 252.225-7027, Restriction on Contingent Fees for Foreign Military Sales (APR 2003) (22 U.S.C. 2779).

(11) ___ 252.225-7028, Exclusionary Policies and Practices of Foreign Governments (APR 2003) (22 U.S.C. 2755).

(12)(i) ___ 252.225-7036, Buy American Act--Free Trade Agreements--Balance of Payments Program (MAR 2007) (41 U.S.C. 10a-10d and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (OCT 2006) of 252.225-7036.

(13) ___ 252.225-7038, Restriction on Acquisition of Air Circuit Breakers (JUN 2005) (10 U.S.C. 2534(a)(3)).

(14) ___ 252.226-7001, Utilization of Indian Organizations, Indian-Owned Economic Enterprises, and Native Hawaiian Small Business Concerns (SEP 2004) (Section 8021 of Pub. L. 107-248 and similar sections in subsequent DoD appropriations acts).

(15) ___ 252.227-7015, Technical Data--Commercial Items (NOV 1995) (10 U.S.C. 2320).

(16) ___ 252.227-7037, Validation of Restrictive Markings on Technical Data (SEP 1999) (10 U.S.C. 2321).

(17) ___ 252.232-7003, Electronic Submission of Payment Requests and Receiving Reports(MAR 2008) (10 U.S.C. 2227).

(18) ___ 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(19) _X__ 252.243-7002, Requests for Equitable Adjustment (MAR 1998) (10 U.S.C. 2410).

(20)(i) ___ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ___ Alternate I (MAR 2000) of 252.247-7023.

(iii) ___ Alternate II (MAR 2000) of 252.247-7023.

(iv) ___ Alternate III (MAY 2002) of 252.247-7023.

(21) ___ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.225-7014, Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).

(2) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.225-7042 AUTHORIZATION TO PERFORM (APR 2003)

The offeror represents that it has been duly authorized to operate and to do business in the country or countries in which the contract is to be performed.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

Section J - List of Documents, Exhibits and Other Attachments

EXHIBITS AND ATTACHMENTS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A.	Schedule of Supplies and Services
B.	Port Tariff
C.	CRAFT Report
D.	OOTW Sample
E.	Historical Craft Data of Ship Visists

ATTACHMENT NO.	
1.	Classification of Ships
2.	Floating Line of Demarcation (FLD) Specifications
3.	Picket Boat Operations & Specifications
4.	Security Guard Operations
5.	Fuel Specifications
6.	Water Taxi Specifications
7.	Request for Sanitary Inspection
8.	Quality Assurance Provisions (including Appendices A & B)
9.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A, SECTION B2 – SCHEDULE OF SUPPLIES AND SERVICES
Separate Excel spreadsheet is attached. Complete all unit prices in U.S. Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer to verify the formula when evaluating prices.

EXHIBIT B – PORT TARIFF ITEMS
The Excel spreadsheet provides estimates of port tariff rates only.

EXHIBIT C – CRAFT REPORT
The CRAFT report must be submitted within seven (7) days upon completion of a ship visit. Copies of certified invoices shall be forwarded to the Contracting Officer.

EXHIBIT D – OPERATIONS OTHER THAN WAR (OOTW) SAMPLE PROVISIONS
The listing under this Excel spreadsheet is a sample for information purposes only. No Pricing is required.

EXHIBIT E – HISTORICAL CRAFT DATA OF SHIP VISITS
The listing derived from historical data extracted from CRAFT data for 2007.

ATTACHMENT 1
SHIP CLASSIFICATIONS (DESCRIPTION OF U.S. NAVY SHIPS BY CLASS AND TYPE)

The following are Ship Classifications:

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2
FLOATING LINE OF DEMARCATION SPECIFICATIONS (CLIN XX11XX)

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

3.1. Continuous Line FLD – If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

3.1.2. Specifications:

3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 3
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 4
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the

ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

Minimum Requirements for Purchases of Commercial Distillate Fuels ((Navy) Marine Gas Oil) for Bunkers

The following minimum requirements have been established for use when buying fuel (gas oil - 100% distillate) from commercial sources when F76 is not available. Marine Gas Oil is not acceptable as cargo fuel on Navy Oilers.

TEST	**METHOD**	**REQUIREMENTS**
1. Cetane Number	ASTM D 613	45 min
or		
Cetane Index	ASTM D 976	45 min

Note: A cetane index of 41 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exc maximum of 338ºC. A cetane number of 40 or above, but less than 45, is acceptable provided the 90% Distillation P does not exceed a maximum of 338°C.

2. Appearance @ 21ºC or ambient temperature (whichever higher)	Visual	Clear & Bright
or		
Water and Sediment	ASTM D 2709	0.05% max
3. Distillation. 90% Point	ASTM D 86	375ºC max
4. Flash Point	ASTM D 93	60ºC min
5. Pour Point	ASTM D 97	Report
6. Cloud Point	ASTM D 2500	-1.1ºC (30 °F)
7. Viscosity @ 40ºC	ASTM D 455	1.7 - 4.5 CST
8. Color	ASTM D 1500	3 max
9. Gravity	ASTM D 1298, D 287	Record
10. Carbon Residue	ASTM D 524	0.35% max
11. Ash	ASTM D 482	0.01% max
12. Sulfur	ASTM D 129, D 1552 D2622	1.00% max
13. Copper Corrosion	ASTM D 130	3 max

C16.23-2 COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC JAN 1998)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST	METHOD	REQUIREMENTS
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min
	NOTE: A Cetane Number of 40 minimum, or a Cetane Index of 41 minimum, is acceptable provided the 90 Percent Distillation Point does not exceed a maximum of 338^{O}C.		
2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min
	NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.		
5.	Cloud Point	ASTM D 2500	-1.1^{O}C (30^{O}F) max.
	NOTE: Cloud Point results will be evaluated based upon bunkering location.		

6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cst
7.	Color NOTE FOR DOMESTIC ITEMS: This Color test requirement is deleted if red dye has been added in compliance with U.S. Environmental Protection Agency or Internal Revenue Service regulations; however, the resulting fuel/dye blend must have a red tint. It shall not be visually brown or darker in appearance.	ASTM D 1500	3 max.
8.	Density @ 15^{O}C	ASTM D 1298	876 kg/m^3 max.
9.	Carbon Residue on 10% bottoms	ASTM D 524 ASTM D 189	0.35 mass % max.
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur	ASTM D 4294, ASTM D 1552, or ASTM D 2622	1.0 mass % max.
12.	Corrosion	ASTM D 130	3 max.
13.	Distillate Fuel (fuel shall contain no residual)	None	100%

C36 FUEL OIL, INTERMEDIATE, GRADES RMB-10 (IFO 60)/RME-25 (IFO 180)/RMG-35 (IFO 380) (DESC MAY 1997)

Product shall conform to ISO 8217:1996 or ASTM D 2069-91. Product conforming to ASTM D 2069-91 shall meet the following additional requirements:

REQUIREMENTS	**GRADE RMB-10 (IFO 60)**	**GRADE RME-25 (IFO-180)**	**GRADE RMG-35 (IFO 380)**	**GRADE TEST METHOD**
Density @15^{o}C, kg/m^3, max	981.0	991.0	991.0	ISO 3675/12185
Aluminum plus silicon, mg/kg, max	80	80	80	ISO 10478
Total Sediment, potential, %(m/m), max	0.10	0.10	0.10	ISO 10307-2

ATTACHMENT 6
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (Pacific Islands). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (Pacific Islands) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 7
REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 8
QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked

between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 8 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas

Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus

Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

ATP (RLU) Counts	Aerobic Plate Count (APC)	Coliform Count	
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeas and Mold cou
Product(s)	m	M		

Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.

5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.

M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]		
Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice

Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]		
Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.

8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries. Pies. Soft pretzels. Won ton wrappers. Filled bakery items.	All other bakery products, including Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry. Cookies, unfilled. Crackers. Cupcakes, unfilled. Dough, frozen or chilled. Dumplings, frozen. English muffins. Flour. Fruitcakes. Melba toast. Muffins Pancake batter, frozen. Pancake/waffle mix. Pasta, dry (noodles). Pizza crust. Taco shells. Toaster pastries. Pie crusts, unfilled. Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically: Fish, meat, poultry, dairy, egg, and shellfish products. Pickled eggs. Frozen dinners. Pudding novelties, frozen or chilled. Tofu.	All other dietary and specialty preparations, including: Baby formula, canned. Chips, nacho or potato. Creamer, coffee, imitation (non-dairy). Dips. Nacho cheese, canned. Nutri-why. Popcorn. Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products including: Salad dressings.

		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages,
	Ice.	including:
	Bottled water.	Dry ice.
		Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970	MRE food composite packages	Non-MRE composite food packages.
(*Note 2)		
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products.*
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

ATTACHMENT 9

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)

Husbanding Services
For
The Pacific Islands

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Detachment Singapore will use in evaluating port visit cost reporting and non-contract item pricing performance of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the port visit cost reporting and non-contracting pricing performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will set forth the staffing and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will

develop and implement a performance management system with processes to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The Government will make decisions based on performance measurement metric data and notify the contractor of those decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (KO) is responsible for monitoring contract compliance and contract administration; and resolving any differences between the observations documented by the requiring activity, and the contractor's performance. The KO will also have the responsibility for completing QA monitoring forms (refer to Attachments 9b and 9c) used to document the evaluation of the contractor's reporting and price performance.

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED

The contractor shall provide husbanding service support in accordance with the PWS. The reporting and non-contract item pricing performance standards are identified in the PWS. The acceptable level of performance is also described in the PWS.

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 9c.

4.3 The acceptable quality levels (AQL) located in Attachment 9a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes. Port visit cost reporting and non-contract item pricing performance standards are expressed in the PWS and measured by the required performance metrics in Attachment 9a.

5.2 The Government's QA monitoring, accomplished by the KO, will be reported using the monitoring forms in Attachments 9b and 9c. The forms, when completed, will document the KO's understanding of the contractor's performance under the contract to ensure that the PWS requirements are being met.

5.2.1 The KO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives should performance not meet the AQL.

6.2 Within 30 days following the end of each order's performance period, the KO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 9b) will become part of the QA documentation.

6.3 The KO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The KO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the KO as often as required or per the contractor's request. The agenda of the reviews may discuss:

- Performance measured by the metrics and trends
- Issues and concerns of both parties
- Recommendations made by the KO based on contractor information
- Issues arising from independent reviews and inspections

6.4 The KO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the KO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. Notifications. Consistent with FAR Part 12, the KO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. Deductions. The Government has the right to deduct a specified dollar for failure to meet performance standards. The amount is identified in the Performance Requirements Summary (PRS) of Attachment 9a.
3. Termination. If the KO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the KO shall issue a notice of termination, consistent with FAR Part 12.

LIST OF ATTACHMENTS

ATTACHMENT9a. Performance Reporting Summary (PRS)
ATTACHMENT9b. Quality Assurance Monitoring Form
ATTACHMENT9c. Quality Assurance Monitoring Form – Customer Complaint Investigation

ATTACHMENT 9 a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit CRAFT cost estimate to ship and Contracting Officer within two working days after receipt of LOGREQ (PWS Paragraph 1.1.3)	95%	E-mails receipts, files review, periodic, random, observations, complaints	$100 deduction for each documented instance when an estimate is submitted late and documentation in the contractor's past performance record
	Submit final CRAFT cost reports to the Contracting Officer within seven (7) working days of each ship's departure (PWS Paragraph 33.2)	95%	E-mail receipts, files review, random, complaints	$100 deduction for each documented instance when the report is submitted late and documentation in the contractor's past performance record
	CRAFT submittals are accurate and complete	95%	Files review, periodic, random, observations, complaints	Require contractor to take corrective action to correct inaccurate/incomplete reports and documentation in the contractor's past performance record
Pricing for Non-Contract Items	For non-contract items in excess of $3,000, the contractor provided the Contracting Officer information of the results of competition conducted for non-contract item pricing no later than seven (7) days after the ship's departure (PWS Paragraph 1.3.2)	95%	E-mail receipts, files review, periodic, random, complaints, observations	$100 deduction for each documented instance when results are submitted late and documentation in the contractor's past performance record
	The contractor has adequately documented fair and reasonable pricing for non-contract items over $3,000	90%	Files review, periodic, random, complaints, observations	Documentation in the contractor's past performance record

SUMMARY OF CHANGES

SECTION A - SOLICITATION/CONTRACT FORM

The total cost of this contract was increased by $231,004.80 from $359,570.32 (EST) to $590,575.12 (EST).

SECTION B - SUPPLIES OR SERVICES AND PRICES

CLIN 0002

The pricing detail quantity has increased by 231,004.80 from 359,570.32 to 590,575.12.

The total cost of this line item has increased by $231,004.80 from $359,570.32 (EST) to $590,575.12 (EST).

SECTION F - DELIVERIES OR PERFORMANCE

The following Delivery Schedule item for CLIN 0002 has been changed from:

DELIVERY DATE	QUANTITY	SHIP TO ADDRESS	UIC
POP 16-DEC-2008 TO 30-NOV-2009	N/A	N/A FOB: Destination	

To:

DELIVERY DATE	QUANTITY	SHIP TO ADDRESS	UIC
POP 16-DEC-2008 TO 30-NOV-2009	N/A	N/A FOB: Destination	

SECTION G - CONTRACT ADMINISTRATION DATA

Accounting and Appropriation

Summary for the Payment Office

As a result of this modification, the total funded amount for this document was increased by $231,004.80 from $359,570.32 to $590,575.12.

CLIN 0002:

AA: To be cited on each delivery or task order (CIN N4034508RCSG00050001) was increased by $231,004.80 from $359,570.32 to $590,575.12

SUMMARY OF CHANGES

SECTION A - SOLICITATION/CONTRACT FORM

The 'Payment will be made by' organization below has been added:

SEE INDIVIDUAL DELIVERY/TASK ORDERS
AS SPECIFIED

SECTION I - CONTRACT CLAUSES

The following have been modified:

ADDITIONAL CONTRACT TERMS AND CONDITIONS.

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of task/delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All task/delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(d) Order Limitations (FAR 52.216-19) (OCT 1995)

(a) *Minimum order.* When the Government requires supplies or services covered by this contract in an amount of less than US $5,000.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(b) *Maximum order*. The Contractor is not obligated to honor --

(1) Any order for services in support of more than three (3) vessels in a single port at the same time or any order to husband in excess of eight (8) ships at the same time in the geographic area covered by this contract. The three (3) vessel mix shall be defined as one (1) Class IV or below and two (2) Class III or below in a single port.

(2) Any order for a single item in excess of the maximum quantity for that item which is identified in the pricing schedule, Exhibit A, of this contract.

(3) Any order for a combination of items in excess of the total maximum quantity for the applicable performance period of this contract; or

(4) A series of orders from the Government within 120 days that together call for quantities exceeding the maximum quantities identified in the pricing schedule by more than two hundred percent (200%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless that order (orders) is returned to the ordering office within one (1) day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

(e) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(f) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The addresses and FAX telephone numbers of the Procuring Contracting Officers (PCO) are:

1. FISC Detachment Singapore
Commercial Address: PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

FAX Number: (852)-2511-4902

(g) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and

enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(h) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the “Contracting Officer” or “Chief of the Contracting Office”.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION B - SUPPLIES OR SERVICES AND PRICES

The following have been modified:
OVERVIEW OF CONTRACT
SECTION B1 OVERVIEW

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting the Pacific Islands. For purposes of this contract, "Pacific Islands" is defined as the geographic area encompassed by the lots described below at paragraph 2.3.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in the Pacific Islands. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, the following Lots apply:

2.3.1. Lot 1 is for Majuro, Marshall Islands
2.3.2. Lot 2 is Noumea, New Caledonia
2.3.3. Lot 3 is Madang, Papua New Guinea
2.3.4. Lot 4 is Honiara, Solomon Islands
2.3.5. Lot 5 is Nuku Alofa, Tonga
2.3.6. Lot 6 is Funafuti, Tuvalu
2.3.7. Lot 7 is Port Vila, Vanuatu
2.3.8. Lot 8 is Koror, Palau
2.3.9. Lot 9 is Management Fees for all other ports of Marshall Islands, New Caledonia, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Vanuatu, Palau, Fiji, Kiribati, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories).
2.3.10. Lot 10 is Operations Other Than War (OOTW) for all locations in Marshall Islands, New Caledonia, Papua New Guinea, Solomon Islands, Tonga, Tuvalu, Vanuatu, Palau, Fiji, Kiribati, Nauru, New Zealand, Western Samoa, French Polynesia and Federated States of Micronesia (excluding U.S. Territories).

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite Delivery Indefinite Quantity (IDIQ) contract. The HS Contractor agrees to furnish the services or supplies at the fixed prices listed in the Schedule of Services.

3.1. MINIMUM AND MAXIMUM QUANTITIES – The contract minimum quantity referred to in paragraph (b) of FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is set at a total of $20,000 worth of orders at the contract unit price(s) or as guaranteed minimum if no orders are issued. The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order(s)/delivery order(s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months and includes FAR52.217-8 OPTION TO EXTEND SERVICES clause. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is 18 months. The period of time within which the Government may order performance varies by lot. See section F for additional details.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of eight (8) ships at one time for the Pacific Islands.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services. For example U.S. Government personnel attending conferences, training and seminars where hotel, transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event.

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.
- Any MSC warranted Ordering Officer or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as "Reserved" or "TBD") in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The HS Contractor shall use its best reasonable effort to deliver supplies or services marked "Reserved" or "TBD" in accordance with an order's delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the "Reserved" or "TBD" item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR, which could be the SUPPO, or FISC Det. Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services - Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour

IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the LOT of the contract. For example Lot 1 would be 01XX, Lot 2 would be 02XX). The third and fourth digits are the service or supply item number. (For example 0101 is the first item, 0102 is the second item under Lot 1). If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O./Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The

Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water. HS Contractor

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Mr. Leonard G. Francis
Title of Individual:	Executive Group Chairman/President
Mailing Address:	15D Pandan Road Singapore 609266
Tel No:	(65) 62685300

Information concerning port visits for the 12-month period ending 31 December 2007 by USS vessels to ports covered by this contract is at Exhibit E, Historical CRAFT Data.

SECTION B1 - OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting Vietnam and Cambodia.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Danang, Vietnam, Sihanoukville, Cambodia, and all other ports in Vietnam and Cambodia. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 is for Danang, Vietnam; Lot 2 is for All Other Ports in Vietnam; Lot 3 is for Sihanoukville, Cambodia; Lot 4 is for All Other Ports in Cambodia; and Lot 5 is for OOTW in Vietnam and Cambodia.

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite Delivery Indefinite Quantity (IDIQ) contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1 MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is set at a total of $20,000 worth of orders at the contract unit price(s). The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order(s)/delivery order(s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a base period commencing from contract award date through 30 Nov 2009 and a six-month Option I period. The performance period of the base period of the contract shall continue unless terminated or extended in accordance with the other clauses herein. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is through 31 May 2010.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of four (4) ships at one time for Vietnam and Cambodia.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR, China and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services.
For example, U.S. Government personnel attending conferences, training and seminars where hotel, transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event..

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as “Reserved” or TBD”) in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The HS Contractor shall use its best reasonable effort to deliver supplies or services marked as “Reserved” or “TBD” in accordance with an order’s delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the “Reserved” or “TBD” item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR, which could be the SUPPO or FISC Detachment Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for

termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make

available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services -Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.)/Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis	(b)(6), (b)(7)(C)

Section C - Descriptions and Specifications

PERFORMANCE WORK STATEMENT
TASKS: The HS Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES. Except for the services described below at paragraphs 1.1.6 and 1.1.8, the HS Contractor shall be compensated for providing the Pre-Arrival Husbanding Duties described in this section by the Government's order and payment for the initial day of Management Services and one additional day of Management Services at the subsequent day rate. Compensation for staging (paragraph 1.1.6 below) is addressed at paragraph 17.2 of the Section B1 Overview. Compensation for assisting the ship's Advance Party is addressed below at paragraph 1.1.18. Except when the facts detailed in paragraph 1.1.18 apply, the Government will not typically issue a separate order for Pre-Arrival Husbanding Duties.

1.1.1. The HS Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The HS Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The HS Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract, Resrved, TBD or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs. The portion of the LOGREQ that covers items that are pre-priced in the contract, when submitted by, under authority of, or on behalf of an AGR, is an order under this contract. Orders for Reserved, TBD, or non-contract items will be finalized once the AGR and HS Contractor agree on a price as described at Section B1, paragraph 11.2.

Orders placed by a LOGREQ may be cancelled in whole or in part as described in the Cancellation of Orders paragraph of this contract.

1.1.4. These estimates shall be provided for all US Navy, Military Sealift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the HS Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

1.1.6. The HS Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The HS Contractor shall coordinate with other US government Contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The HS Contractor shall assist the ship's Advance Party to include planning and coordination meetings. The HS Contractor shall not be required to expend more than 32 manhours assisting the ship's advance party or to expend more than $1,000 for the travel, meals, and lodging of its personnel assisting the ship's advance party unless it is provided a separate order for Advance Party Pre-Arrival Husbanding Services or unless an AGR orders a mutually-acceptable number of days of Management Services (not to exceed the total number of days for the visit)

and the HS Contractor confirms in writing that payment for the days of Management Services that have been ordered will provide full compensation for the Pre-Arrival Husbanding Duties.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The HS Contractor shall Husband the ship while it is at the berthing location.

1.2.2. The HS Contractor shall install all ordered equipment upon the ship's arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The HS Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The HS Contractor shall brief the designated ship representative about HS Contractor-provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. The HS Contractor shall provide its POC information with 24-hour contact phone numbers.

1.2.5. The HS Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and Performance Work Statement (PWS), applicable port tariffs and current prices for frequently ordered services such as laundry services.

1.2.6. Money Exchange Services:

1.2.6.1. The HS Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. The HS Contractor shall maintain adequate records justifying its basis for determining the Official Exchange Rate and shall make those records available to the AGR upon request. This Official Exchange Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The HS Contractor shall arrange for authorized moneychangers to exchange U.S. dollars for ship personnel into local currency. Money Exchange services shall be made available onboard ship to crewmembers at least two hours daily with buy-back service on the day before the ship's departure. The moneychangers may include a commission of not more than plus or minus 1.5% difference from the Official Exchange Rate described above.

1.2.7. Laundry Services:

1.2.7.1. The HS Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The HS Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All HS Contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The HS Contractor shall provide all interpreter services to assist the Supply Officer to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract in support of the ship's visit. This limited set of interpretor services is required under the Management Services CLIN and is separate from the interpretor services required under CLIN XX19.

1.2.9. Mail Delivery Services: The HS Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The HS Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) HS Contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers the location of the ship's visit then the HS Contractor must refer all MWR requests to the authorized ITT Contractor. If awarded, the ITT Contractor is the U.S. Navy's sole representative for this service. Under no circumstances will the HS Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The HS Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these Contractors to submit invoices and receive payments by the ship if it has a mutual agreement with the other Contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other Contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The HS Contractor shall assist ship personnel with immigration and customs requirements necessary for them to enter the country where the ship's visit is to be performed. This includes providing Visa and Customs application forms. The HS Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The HS Contractor shall facilitate the ship's timely departure.

1.2.13.1. The HS Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The HS Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The HS Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

1.3.1. Purchase order to be issued to a vendor other than the HS Contractor for additional supplies and services. When requirements exist for supplies or services that are not included on the Schedule of Supplies and Services as priced, Reserved, or TBD, the HS Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the HS Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall make the acquisition selection decision and issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The ship's Supply Officer shall normally issue a purchase order to the selected vendor rather than issuing an order to the HS Contractor that requires the HS Contractor to provide the supplies or services. The HS Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission

included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The HS Contractor shall facilitate receipt of the items by the ship. The HS Contractor shall not arrange unofficial requirements or personal requests from individual crewmembers under auspices of this contract. The HS Contractor shall use the specifications for FF&V, Bread, and Eggs that are included as part of this contract when arranging for those supplies.

1.3.2. Supplies and services to be provided by the HS Contractor. In the event the above process cannot be followed by the ship's Supply Officer, and the ship's Supply Officer orders the additional supplies and services from the HS Contractor, the HS Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the HS Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rationale for decision. Any communication concerning non pre-priced items to be acquired under this subparagraph will not be considered an order until the HS Contractor and the AGR have agreed on a price for the supplies or services. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or not later than 7 days after the ship's departure from the visited port. The HS Contractor's record of promoting competition as required by this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 13, Standards for Professional Service.

1.3.3. Purchasing procedures. Not later than 60 days after contract award, the HS Contractor shall submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the HS Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The HS Contractor shall assure that the provider of items arranged under this line item furnished to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Delivery charges shall be included in the price rather than being shown separately.

1.4.2. If the total cost of FF&V and subsistence items ordered and received by a ship under this contract exceeds $10,000.00 for a port visit, the HS Contractor shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the HS Contractor shall provide copies of all quotes obtained. This report is in addition to the CRAFT report.

1.4.3. The HS Contractor shall ensure that the sources it recommends to the ship's SUPPO for the supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 7.

1.4.4. The HS Contractor shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the HS Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The HS Contractor shall comply with the Quality Assurance Provisions as per Attachment 8 when providing or arranging to provide FF&V, bread, eggs, and other subsistence items.

1.5. PRE-SAILING VISIT: The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction up to three (3) percent. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The HS Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The HS Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The HS Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF MANAGEMENT FEE (First Day and Subsequent Days) AND OPERATIONS OTHER THAN WAR OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (First Day and Subsequent Days)(LOT 5) (CLIN XX34 and CLIN XX35)

2.1 CLINs XX34 and XX35 authorize the Government to order Management Services in support of Operations Other Than War. Recognizing that the specific Management Services that may be required will likely vary depending on the particulars of the individual Operation Other Than War, the CLINs are priced on a per person/per day basis. At the time the Government orders services under the CLINs it will provide the HS Contractor a detailed list of tasks that the HS Contractor shall perform. The tasks shall be within the scope of the tasks further described below. The HS Contractor shall use its best efforts to fully perform the set of tasks within the limitation of the number of persons/number of days of service ordered by the Government. The HS Contractor shall promptly notify the Government if it believes that it will be unable to fully perform the specified tasks because the Government has not ordered sufficient services under these CLINs.

2.2. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.3. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.4. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.5. If the Government has need of Management Services in support of an Operation Other Than War for disaster relief response, it will order Management Services under CLIN XX34. If the Government has need of Management Services in support of an Operation Other Than War for other purposes, it will order Management Services under CLIN XX35.

2.6. The HS Contractor shall furnish personnel who are familiar with the manner in which the U.S. Navy operates, speak the local language that is normally used at the site of the OOTW, and speak and read English. The HS Contractor shall ensure that the personnel provided under these CLINs arrive at the OOTW site by the date and time specified in the order. The Government may require that personnel arrive as soon as 24 hours after the order is issued. The First Day and Subsequent Day Management Fee rates shall include any costs for the HS Contractor employees to travel to and from the OOTW site, and the costs of food and lodging for the HS Contractor while at the OOTW site. HS Contractor employees will not normally be provided meals or lodging at U.S. Government expense nor will they typically be entitled to Government-furnished lodging and meals on a reimbursable basis.

2.7. For each increment of one person for one day that the Government orders, the HS Contractor shall provide one qualified employee to work on tasks identified at the time the order is issued for a period of at least 12 hours per day. The HS Contractor employee will normally perform those tasks at the OOTW site. The HS Contractor shall provide the Government a Point of Contact for questions and issues that arise in connection with the tasks identified at the time the order is issued who can be contacted during the portion of the 24-hour day that the HS Contractor’s employee is not at the OOTW site.

2.8. These are not personal services CLINs. HS Contractor employees performing services under these CLINs will perform the tasks identified by the Government at the time the order is issued. The HS Contractor employees performing the services are under the supervision and direction of the HS Contractor. Should the Government have concerns with the manner in which the tasks are being performed or have a need to modify the tasks, it shall contact the HS Contractor.

2.9. Services that may be required under this CLIN include, but are not limited to, providing interpreter support, providing expertise on locally-sensitive cultural issues, liaison with local political and police authorities, and providing technical assistance in acquiring necessary supplies and services. A sample list of the type supplies and services that the Government may require assistance in acquiring is attached at Exhibit D. The HS Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the HS Contractor shall make every effort to locate at least three sources. As with the Management Services CLINs for Husbanding Services, the Government may also direct the HS Contractor to acquire necessary supplies and services under these OOTW CLINs that the Government requires.

2.10. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, these CLINs will apply. If a similar Management Service is ordered for delivery in the port vicinity and the requirement is received from the ship or a contingent on the ship, the HS Contractor’s Husbanding fees and CLINS shall apply.

2.11. If an advance party arrives in a country for OOTW and requires services under these CLINs prior to the start of the OOTW event, the HS Contractor shall be compensated for the services provided at the subsequent day rates for these CLINs. The HS Contractor is not required to provide any services to an advance party under these OOTW CLINs without first receiving an order for such services from an AGR. The HS Contractor may be required to

support multiple operations at the same time, or a single operation at multiple locations, the HS Contractor may bill for each operation/location for which the HS Contractor's services are ordered.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The HS Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The HS Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The HS Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The HS Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the HS Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX05)

5.1. The HS Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

5.2. The HS Contractor shall remove sewage from the ship in HS Contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

5.3. The HS Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

5.4. The HS Contractor shall provide CHT hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

5.5. When collection of CHT is done via barge, the HS Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

5.6. The HS Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 13, Standards for Professional Services.

5.7. The HS Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

6. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX06)

6.1. The HS Contractor shall arrange for landlines to be installed aboard the ship.

6.2. The HS Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

6.3. The HS Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

6.4. The HS Contractor shall provide commercial telephone services and sale of phone cards for personal use by crewmembers.

6.5. The HS Contractor shall provide pre-paid International Calling Cards for official use.

7. CRANE (CLIN XX07) - The HS Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the HS Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The HS Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

8. DOCKAGE AND WHARFAGE (CLIN XX08) - The HS Contractor shall provide pier and wharf usage.

9. FENDERS (CLIN XX09) - The HS Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

9.1 The HS Contractor shall provide camels as fenders for the ship.

10. FLEET LANDING (CLIN XX10) - The HS Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The HS Contractor shall ensure that this area is kept clean during the ship visit in port.

11. FORCE PROTECTION (CLIN XX11)

11.1. General (CLINs XX01 & XX02): The HS Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The HS Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The HS Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the HS Contractor must verify they are available and are scheduled to show up on time. The HS Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR. The HS Contractor shall not add any requirements unless first receiving direction to do so as provided at paragraph 11.2 below.

11.1.1. Access Points: The HS Contractor shall establish a single entry and exit point to the pier area.

11.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

11.1.3. Personnel Identification: The HS Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify personnel while they are working.

11.1.3.1. Background Checks. The HS Contractor shall conduct security background checks on employees with local or national police departments or other government organizations. The HS Contractor shall not

use employees if the results of their background investigation indicate they may be a security risk to the ship or its crewmembers.

11.1.3.2. The HS Contractor shall issue photo identification badges to its personnel and ensure subHS Contractor personnel have photo identification badges. Badges shall be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge so that it is visible at all times.

11.1.3.3. The HS Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as HS Contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

11.1.4. Access Lists: The HS Contractor shall develop a daily list of authorized personnel, vehicles and vessels that may have access to the ship area. This list will be given to ship FP officers, security guards, and other Contractors as required.

11.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

11.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, driver's name, time and duration of visit, and purpose of their work.

11.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

11.1.5. Inspections. The HS Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled area. If they go outside the controlled area they must be re-inspected before continuing their work.

11.1.6. Stand-Off Distances:

11.1.6.1. Objects: To the maximum extent practicable the HS Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship.

11.1.6.2. Unloading Zones: To the maximum extent practicable the HS Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship.

11.1.7. Warning Signs: The HS Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

11.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. The signs must include a clear warning that the use of deadly force may be authorized by the local security guards or police force.

11.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area, Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)

- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

11.1.8. Ship Schedules: The HS Contractor shall protect ship schedule information, both paper-based and electronic, from to individuals and contractors that are not directly involved in providing services to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect the ship schedule information shall be flowed down to all individuals and contractors that are direcly involved or may be directly involved or may be directly involved in providing service to the Navy under this contract. The HS Contractor's written policy shall describe the required measures to protect ship schedule information.

11.2. Non-Contract FP Measures: The HS Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The HS Contractor must explain what the added FP service will include and why it has been requested. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the HS Contractor will be authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

11.3. Beach Guard Office or Tent (CLIN XX11AA)

11.3.1. The HS Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ship's personnel while performing security checks on personnel, baggage, and vehicles.

11.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. The tents shall have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The HS Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher shall be provided and kept fully charged.

11.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

11.4. Dive and Vetting Operations (CLIN XX11AB)

11.4.1. The HS Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

11.4.2. The pier will be vetted prior to the ship's arrival.

11.4.3. To the maximum extent practicable the HS Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship..

11.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

11.4.5. The HS Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

11.5. Floating Line of Demarcation (CLINs XX11AC through XX11AE)

11.5.1. The HS Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers but is to help identify a safe standoff zone.

11.5.2. The HS Contractor shall comply with the specification of the FLD in Attachment 2.

11.6. Perimeter Fencing (CLIN XX11AF)

11.6.1. The HS Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the HS Contractor will provide portable chain link fencing with vehicle and walk up entrances.

11.6.2. The perimeter fence provided by the HS Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point: Entry available for vehicles and personnel.

11.7. Physical Security Barriers (CLIN XX11AG through XX11AJ)

11.7.1. The HS Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

11.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

11.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zigzag patterns to control the speed of access.

11.7.4. A personnel entry point must be established through the barriers.

11.7.5. Barriers may also be used to seal off secondary Port gates.

11.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

11.8. Picket Boats (CLIN XX11AK through XX11AN)

11.8.1. The HS Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

11.8.2. The HS Contractor shall comply with Attachment 3 for picket boat operations and specifications.

11.9. Portable Lighting (CLIN XX11AP)

11.9.1. The HS Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Port's installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

11.9.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

11.10. Security Guards Services (CLINs XX11AQ through XX11AT)

11.10.1. The HS Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

11.10.2. The HS Contractor shall comply with Attachment 4 for security guard operations.

11.10.3. Security guards shall be armed or unarmed in accordance with Exhibit A, Schedule of Supplies and Services..

11.11. Two Way Radios (CLIN XX11AU) - The HS Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

11.12. Hand Held Explosive Detectors (CLIN XX11AV) - The HS Contractor shall provide hand held explosive detectors capable of detecting explosives.

11.13. Hand Held Wand Metal Detectors (CLIN XX11AW) - The HS Contractor shall provide hand held metal detectors capable of detecting metal.

11.14. Walk Thru X-Ray & Metal Detector (CLIN XX11AX) - The HS Contractor shall provide a walk thru X-ray & metal detector capable of detecting metal.

11.15. X-ray Baggage Scanning Machine airport-type (CLIN XX11AY And CLIN XX11AZ) - The HS Contractor shall provide an X-ray baggage scanning machine capable of X-raying hand carried luggage and bags to determine its contents. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

11.16. Under Carriage Vehicle Scanner (CLIN XX12BA) - The HS Contractor shall provide an under carriage vehicle scanner to scan vehicle undercarriages.

12. FORKLIFT WITH OPERATOR (CLIN XX12) - The HS Contractor shall provide forklifts with operators for loading and unloading operations.

13. FUEL (CLIN XX13)

13.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the HS Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

13.2. If a ship requires the HS Contractor to provide fuel, the Husbanding HS Contractor shall contact the bunkering HS Contractor or HN source. If the HN or bunkering HS Contractor can provide the fuel within the time needed, the HS Contractor shall so inform the ship. However, if the HN or US Government bunkering Contractor cannot deliver

the fuel when required by the ship, the HS Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the HS Contractor arrange for fuel delivery.

13.3. The HS Contractor shall only charge fuel at the daily commercial fuel rate established by the port or local authorities. The HS Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

13.4. The HS Contractor shall provide fuel in accordance with Attachment 5 – Fuel Specifications.

13.5. The HS Contractor shall provide a fuel barge or truck to transport fuel to the ship.

13.6. The HS Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

13.7. The HS Contractor shall load the ordered fuel and transport to the ship. The HS Contractor shall transfer the fuel from the fuel barge or truck to the ship. The HS Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

13.8. The HS Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

13.9. In recognition of the fact that fuel is sold by weight (metric tons) and by volume (gallons or litres), the HS Contractor shall ensure all United States ships are provided with a fuel invoice and the appropriate customs certification demonstrating the quantity of fuel provided in metric tons and in gallons or liters.

13.10. Excess Fuel Procedures: If the ship does not offload all of the fuel ordered, the HS Contractor shall store the excess fuel and diligently attempt to sell it as soon as practicable. The HS Contractor shall receive a storage fee for up to three (3) days. The HS Contractor will receive a fuel disposal fee on a reimbursable basis upon presentation of vendor invoice for disposal services.

14. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX14)

14.1. The HS Contractor shall remove and dispose of “refuse” from the ship and areas surrounding trash bins, as well as any spilled refuse.

14.2. The HS Contractor shall provide dedicated refuse bins to the ship.

14.3. If collection is done by sea, the HS Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

14.4. The HS Contractor shall collect all loose refuse placed adjacent to refuse bins.

14.5. The HS Contractor shall immediately clean up any spilled refuse.

14.6. The HS Contractor shall properly dispose of all collected refuse.

15. LINESBOATS (CLIN XX15) - The HS Contractor shall provide Linesboats to assist in docking line handling operations.

16. LINE HANDLERS (CLIN XX16)

16.1. The HS Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier. One "Job" covers both securing and unsecuring the mooring lines.

16.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

17. MANLIFT (WITH OPERATOR) (CLIN XX17)

17.1. The HS Contractor shall provide a manlift with operator and a full fuel tank.

17.2. The HS Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

17.3. The HS Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The HS Contractor shall maintain documentation of ship personnel acknowledgement of the training.

18. MATERIAL HANDLING (CLIN XX18)

18.1. The HS Contractor shall provide material handling services for the ship. They will receive material shipped to them, clear the material through customs, store the material, report the status of the material, deliver the material to the ship, and forward the material if unable to deliver.

18.1.1. The HS Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

18.1.2. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

18.1.3. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the HS Contractor.

18.2. The HS Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

18.3. The HS Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

18.4. The HS Contractor shall use forklifts and cranes from The Schedule.

18.5. The HS Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

18.6. The HS Contractor shall deliver the package to the shp after arrival in port or the following morning.

18.7. The HS Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

18.8. The HS Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

18.9. The HS Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

19. MISCELLANEOUS (CLIN XX19)

19.1. INTERPRETER SERVICES (CLIN XX19AA) - The HS Contractor shall provide all interpreter services as ordered by the SUPPO. The interpreter shall be fluent in both spoken and written local language and English.

19.2. PORTABLE LATRINES (CLIN XX19AB)

19.2.1. The HS Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

19.2.2. The HS Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

19.2.3. The HS Contractor shall restock toilet paper, hand soap, and paper towels daily.

19.2.4. The HS Contractor shall clean latrines twice daily.

19.3. LOGISTIC SUPPORT TO GOVERNMENT TEAMS (CLIN XX19AC)

19.3.1. Government teams conduct surveys in a variety of ports in the Western Pacific theater. The Government may require the assistance of the HS Contractor in the ports to be surveyed. The HS Contractor shall provide estimated costs to the AGR and subject to approval by the AGR. The AGR shall provide DD Form 1155 or SF 1449 to the HS Contractor in support of this survey.

19.3.2. The HS Contractor shall assign an individual to participate in and assist with logistical arrangements for a team that will perform the survey. This team may visit a variety of ports in advance of ships' visits to assess the force protection levels of the port and to perform related functions. The HS Contractor's assistance shall include providing logistical support as requested by the Government, coordinating access and interviews with local officials, local husbanding services, and support HS Contractors, coordinating necessary translation services for the team, and assisting in the development of a final assessment report.

19.3.3. The HS Contractor shall invoice port surveys at the subsequent day husbanding fee for a Class I ship in the port. In addition, the HS Contractor shall be reimbursed for economy class air transportation and daily per diem rate that includes lodging, meals and other related expenses. The per diem rates shall be those set forth in the Joint Travel Regulations (JTR) at http://perdiem.hqda.pentagon.mil/perdiem/.

19.3.4. Other expenses related to the service(s) and anticipated by the HS Contractor will be invoiced and reimbursed at cost. The HS Contractor shall submit all receipts, invoices or other valid documents to support the incurred expenses. The HS Contractor shall not pay for hotels, meals, rental vehicles, telephone expenses and any other expenses that the Government team members may incur and for which they can be reimbursed under their Government travel orders.

20. OIL BOOMS (CLIN XX20)

20.1. The HS Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

20.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

20.3. The HS Contractor shall dispose all oil waste caught in the Oil Boom.

21. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX21)

21.1. The HS Contractor shall remove oily waste and aggregate water from the ship.

21.2. The HS Contractor shall pump oily waste and aggregate water from the ship to HS Contractor provided equipment.

21.3. The HS Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

21.4. The HS Contractor shall provide hoses of sufficient length from HS Contractor equipment to the ship with either 2.5" or 4" quick disconnect cam lock fittings.

21.5. When removal is done via barge, the HS Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

21.6. The HS Contractor shall properly dispose of all oily waste and aggregate water.

21.7. The HS Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

22. PAINT FLOAT (CLIN XX22)

22.1. The HS Contractor shall provide paint floats to hold personnel painting the ship.

22.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

22.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

23. PILOTS (CLIN XX23) - The HS Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

24. POTABLE WATER (CLIN XX24) - The HS Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

25. PRATIQUE (CLIN XX25) - The HS Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

26. SHORE POWER (CLIN XX26)

26.1. The HS Contractor shall provide shore power to the ship using

26.1.1. Port provided permanent connection system.

26.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

26.2 The HS Contractor shall provide all cables and make all power connections between the generator and ship.

26.3. The availability of shore power shall be in accordance with the schedule established by the ship.

27. SHORE STEAM (CLIN XX27) – The HS Contractor shall provide shore steam to the ship.

28. STEVEDORE SERVICES (CLIN XX28) - The HS Contractor shall provide stevedores and supervisors for general labor.

29. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX29)

29.1. The HS Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

29.2. The HS Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

30. TRANSPORTATION VEHICLES (CLIN XX30)

30.1. The HS Contractor shall provide vehicle service with qualified drivers for official government business.

30.2. The HS Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

30.3. The HS Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

30.4. The HS Contractor shall provide drivers who can speak and understand English clearly.

30.5. The HS Contractor shall provide only vehicles with air conditioning.

30.6. The HS Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

30.7. The HS Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

30.8. The HS Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

30.9. If the unit of issue is by “Day”, then the rental period shall constitute 12 hours.

31. TUGS (CLIN XX31)

31.1. The HS Contractor shall provide tugs to bring ships to and from berthing locations.

31.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

31.3. Tow ropes shall be synthetic ropes with a minimum strength of at least 80 tons.

31.4. If tugs are not available through the port authority, the HS Contractor shall use commercially available tugs.

32. WATER TAXIS (CLIN XX32)

32.1. The HS Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 6 – Water Taxi Specifications.

32.2. The HS Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

32.3. The HS Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

33. CRAFT REPORT (CLIN XX33)

33.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit C - CRAFT.

33.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each ship's departure.

34. OPERATIONS OTHER THAN WAR (OOTW) – DISASTER RELIEF – MANAGEMENT FEE (CLIN XX34) and OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY EXERCISE LOGISTICS SUPPORT – MANAGEMENT FEE (CLIN XX35).

See Paragraph 2 above

35. OOTW COST REPORT (CLIN XX36)

35.1. The HS Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each OOTW event, showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer within seven (7) working days of each OOTW events' completion.

Section D - Packaging and Marking

PER INDIVIDUAL DEL/TASK ORDER
Task Orders shall be issued upon funds availability. See schedule.

Section E - Inspection and Acceptance

INSPECTION AND ACCEPTANCE TERMS

Supplies/services will be inspected/accepted at:

CLIN	INSPECT AT	INSPECT BY	ACCEPT AT	ACCEPT BY
0001	Destination	Government	Destination	Government
0002	Destination	Government	Destination	Government
1001	N/A	N/A	N/A	Government
1002	N/A	N/A	N/A	Government
9000	N/A	N/A	N/A	Government
9001	N/A	N/A	N/A	Government

Section G - Contract Administration Data

INVOICE AND PAYMENTS

1. The HS Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the HS Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The HS Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the HS Contractor's best estimate and an adjustment will be made later.

2. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The HS Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the HS Contractor any surcharge imposed by the financial institution processing the credit card transaction. The Government will not reimburse a credit card surcharge for an amount greater than 3% of the invoice amount. Upon award of contract, the HS Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

ACCOUNTING AND APPROPRIATION DATA

AA: Funds shall be provided at the time of contract award to be issued with the task order.

AC: FUNDS SHALL BE PROVIDED AT THE TIME OF ISSUANCE OF TASK OR DELIVERY ORDER.
AMOUNT: $666,536.51
CIN 00000000000000000000000000000000: $666,536.51

Section I - Contract Clauses

CLAUSES INCORPORATED BY FULL TEXT

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

FAR Clauses http://acquisition.gov/comp/far/index.html
DFAR Clauses http://www.acq.osd.mil/dpap/dars/dfars/index.htm

(End of clause)

CLAUSES INCORPORATED BY REFERENCE

52.202-1	Definitions	JUL 2004
52.212-4	Contract Terms and Conditions--Commercial Items	FEB 2007
52.229-6	Taxes--Foreign Fixed-Price Contracts	JUN 2003
52.232-33	Payment by Electronic Funds Transfer--Central Contractor Registration	OCT 2003
52.232-36	Payment by Third Party	MAY 1999

INCORPORATED BY FULL TEXT
ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (JUN 2008)

(a) The Contractor shall comply with the following Federal Acquisition Regulation (FAR) clauses, which are incorporated in this contract by reference, to implement provisions of law or Executive orders applicable to acquisitions of commercial items:

(1) 52.233-3, Protest After Award (AUG 1996) (31 U.S.C. 3553).

(2) 52.233-4, Applicable Law for Breach of Contract Claim (OCT 2004) (Pub. L. 108-77, 108-78).

(b) The Contractor shall comply with the FAR clauses in this paragraph (b) that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

___ (1) 52.203-6, Restrictions on Subcontractor Sales to the Government (SEP 2006), with Alternate I (OCT 1995) (41 U.S.C. 253g and 10 U.S.C. 2402).

___ (36) 52.232-33, Payment by Electronic Funds Transfer--Central Contractor Registration (OCT 2003) (31 U.S.C. 3332).

___ (37) 52.232-34, Payment by Electronic Funds Transfer--Other than Central Contractor Registration (MAY 1999) (31 U.S.C. 3332).

___ (38) 52.232-36, Payment by Third Party (MAY 1999) (31 U.S.C. 3332).

___ (39) 52.239-1, Privacy or Security Safeguards (AUG 1996) (5 U.S.C. 552a).

___ (40)(i) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631).

____ (ii) Alternate I (APR 2003) of 52.247-64.

(c) The Contractor shall comply with the FAR clauses in this paragraph (c), applicable to commercial services, that the Contracting Officer has indicated as being incorporated in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items: (Contracting Officer check as appropriate.)

____ (1) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

____ (2) 52.222-42, Statement of Equivalent Rates for Federal Hires (MAY 1989) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (3) 52.222-43, Fair Labor Standards Act and Service Contract Act--Price Adjustment (Multiple Year and Option Contracts) (NOV 2006) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (4) 52.222-44, Fair Labor Standards Act and Service Contract Act--Price Adjustment (February 2002) (29 U.S.C. 206 and 41 U.S.C. 351, et seq.).

____ (5) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (6) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

____ (7) 52.237-11, Accepting and Dispensing of $1 Coin (AUG 2007)(31 U.S.C. 5112(p)(1)).

(d) Comptroller General Examination of Record. The Contractor shall comply with the provisions of this paragraph (d) if this contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records--Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(e) (1) Notwithstanding the requirements of the clauses in paragraphs (a), (b), (c), and (d) of this clause, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vi) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (May 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $550,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (MAR 2007) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (June 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201).

(vi) 52.222-41, Service Contract Act of 1965 (Nov 2007) (41 U.S.C. 351, et seq.).

(vii) 52.222-50, Combating Trafficking in Persons (AUG 2007) (22 U.S.C. 7104(g)). Flow down required in accordance with paragraph (f) of FAR clause 52.222-50.

(viii) 52.222-51, Exemption from Application of the Service Contract Act to Contracts for Maintenance, Calibration, or Repair of Certain Equipment--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(ix) 52.222-53, Exemption from Application of the Service Contract Act to Contracts for Certain Services--Requirements (Nov 2007) (41 U.S.C. 351, et seq.).

(x) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(2) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.216-18 ORDERING. (OCT 1995)

(a) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award date through 30 Nov 2009.

(b) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a delivery order or task order and this contract, the contract shall control.

(c) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the Schedule.

(End of clause)

52.216-19 ORDER LIMITATIONS. (OCT 1995)

(a) Minimum order. When the Government requires supplies or services covered by this contract in an amount of less than $5,000.00 , the Government is not obligated to purchase, nor is the Contractor obligated to furnish, those supplies or services under the contract.

(b) Maximum order. The Contractor is not obligated to honor:
(1) any order for services in support of more than three (3) vessels in a single port at the same time or any order to husband in excess of four (4) ships at the same time in the geographic area covered by this contract. The three vessel mix shall be defined as one (1) Class IV or below and two (2) Class III or below in a single port.

(2) Any order for a single item in excess of the maximum quantity for that item which is identified in the pricing schedule, Exhibit A, of this contract.

(3) Any order for a combination of items in excess of the maximum quantity for the applicable performance period of this contract; or

(4) A series of orders from the same ordering office within 120 days that together call for quantities exceeding the maximum quantities identified in the pricing schedule by more than 200 percent (200%).

(c) If this is a requirements contract (i.e., includes the Requirements clause at subsection 52.216-21 of the Federal Acquisition Regulation (FAR)), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) above.

(d) Notwithstanding paragraphs (b) and (c) above, the Contractor shall honor any order exceeding the maximum order limitations in paragraph (b), unless that order (or orders) is returned to the ordering office within one (1) day after issuance, with written notice stating the Contractor's intent not to ship the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the supplies or services from another source.

52.216-22 INDEFINITE QUANTITY. (OCT 1995)

(a) This is an indefinite-quantity contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies and services specified in the Schedule are estimates only and are not purchased by this contract.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. The Contractor shall furnish to the Government, when and if ordered, the supplies or services specified in the Schedule up to and including the quantity designated in the Schedule as the "maximum". The Government shall order at least the quantity of supplies or services designated in the Schedule as the "minimum".

(c) Except for any limitations on quantities in the Order Limitations clause or in the Schedule, there is no limit on the number of orders that may be issued. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(d) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 days following the conclusion of the contract term in which the order is issued.

(End of clause)

52.217-8 OPTION TO EXTEND SERVICES (NOV 1999)

The Government may require continued performance of any services within the limits and at the rates specified in the contract. These rates may be adjusted only as a result of revisions to prevailing labor rates provided by the Secretary of Labor. The option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed 6 months. The Contracting Officer may exercise the option by written notice to the Contractor within 15 days before the contract expires.

52.217-9 OPTION TO EXTEND THE TERM OF THE CONTRACT (MAR 2000)

(a) The Government may extend the term of this contract by written notice to the Contractor within 15 days; provided that the Government gives the Contractor a preliminary written notice of its intent to extend at least 60 days before the contract expires. The preliminary notice does not commit the Government to an extension.

(b) If the Government exercises this option, the extended contract shall be considered to include this option clause.

(c) The total duration of this contract, including the exercise of any options under this clause, shall not exceed 18 months.

(End of clause)

52.225-14 INCONSISTENCY BETWEEN ENGLISH VERSION AND TRANSLATION OF CONTRACT (FEB 2000)

In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (MAR 2008)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

__X 52.203-3, Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

(1) ___ 252.205-7000, Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

(2) ___ 252.219-7003, Small Business Subcontracting Plan (DoD Contracts) (APR 2007) (15 U.S.C. 637).

(3) ___ 252.219-7004, Small Business Subcontracting Plan (Test Program) (APR 2007) (15 U.S.C. 637 note).

(4) ___ 252.225-7001, Buy American Act and Balance of Payments Program (JUN 2005) (41 U.S.C. 10a-10d, E.O. 10582).

(5) ___ 252.225-7012, Preference for Certain Domestic Commodities (MAR 2008) (10 U.S.C. 2533a).

(6) ___ 252.225-7014, Preference for Domestic Specialty Metals (JUN 2005) (10 U.S.C. 2533a).

(7) ___ 252.225-7015, Restriction on Acquisition of Hand or Measuring Tools (JUN 2005) (10 U.S.C. 2533a).

(8) ___ 252.225-7016, Restriction on Acquisition of Ball and Roller Bearings (MAR 2006) (Section 8065 of Public Law 107-117 and the same restriction in subsequent DoD appropriations acts).

(9) ___ 252.225-7021, Trade Agreements (MAR 2007) (19 U.S.C. 2501-2518 and 19 U.S.C. 3301 note).

(10) ___ 252.225-7027, Restriction on Contingent Fees for Foreign Military Sales (APR 2003) (22 U.S.C. 2779).

(11) ___ 252.225-7028, Exclusionary Policies and Practices of Foreign Governments (APR 2003) (22 U.S.C. 2755).

(12)(i) ___ 252.225-7036, Buy American Act--Free Trade Agreements--Balance of Payments Program (MAR 2007) (41 U.S.C. 10a-10d and 19 U.S.C. 3301 note).

(ii) ___ Alternate I (OCT 2006) of 252.225-7036.

(13) ___ 252.225-7038, Restriction on Acquisition of Air Circuit Breakers (JUN 2005) (10 U.S.C. 2534(a)(3)).

(14) ___ 252.226-7001, Utilization of Indian Organizations, Indian-Owned Economic Enterprises, and Native Hawaiian Small Business Concerns (SEP 2004) (Section 8021 of Pub. L. 107-248 and similar sections in subsequent DoD appropriations acts).

(15) ___ 252.227-7015, Technical Data--Commercial Items (NOV 1995) (10 U.S.C. 2320).

(16) ___ 252.227-7037, Validation of Restrictive Markings on Technical Data (SEP 1999) (10 U.S.C. 2321).

(17) ___ 252.232-7003, Electronic Submission of Payment Requests and Receiving Reports(MAR 2008) (10 U.S.C. 2227).

(18) ___ 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(19) X__ 252.243-7002, Requests for Equitable Adjustment (MAR 1998) (10 U.S.C. 2410).

(20)(i) ___ 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(ii) ___ Alternate I (MAR 2000) of 252.247-7023.

(iii) ___ Alternate II (MAR 2000) of 252.247-7023.

(iv) ___ Alternate III (MAY 2002) of 252.247-7023.

(21) ___ 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

(1) 252.225-7014, Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).

(2) 252.237-7019, Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Public Law 108-375).

(3) 252.247-7023, Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

(4) 252.247-7024, Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631).

(End of clause)

252.222-7002 COMPLIANCE WITH LOCAL LABOR LAWS (OVERSEAS) (JUN 1997)

(a) The Contractor shall comply with all—

(1) Local laws, regulations, and labor union agreements governing work hours; and

(2) Labor regulations including collective bargaining agreements, workers' compensation, working conditions, fringe benefits, and labor standards or labor contract matters.

(b) The Contractor indemnifies and holds harmless the United States Government from all claims arising out of the requirements of this clause. This indemnity includes the Contractor's obligation to handle and settle, without cost to the United States Government, any claims or litigation concerning allegations that the Contractor or the United States Government, or both, have not fully complied with local labor laws or regulations relating to the performance of work required by this contract.

(c) Notwithstanding paragraph (b) of this clause, consistent with paragraphs 31.205-15(a) and 31.205-47(d) of the Federal Acquisition Regulation, the Contractor will be reimbursed for the costs of all fines, penalties, and reasonable litigation expenses incurred as a result of compliance with specific contract terms and conditions or written instructions from the Contracting officer.

(End of clause)

252.225-7042 AUTHORIZATION TO PERFORM (APR 2003)

The offeror represents that it has been duly authorized to operate and to do business in the country or countries in which the contract is to be performed.

(End of clause)

252.229-7000 INVOICES EXCLUSIVE OF TAXES OR DUTIES (JUNE 1997)

Invoices submitted in accordance with the terms and conditions of this contract shall be exclusive of all taxes or duties for which relief is available.

(End of clause)

252.232-7008 ASSIGNMENT OF CLAIMS (OVERSEAS) (JUNE 1997)

(a) No claims for monies due, or to become due, shall be assigned by the Contractor unless—

(1) Approved in writing by the Contracting Officer;

(2) Made in accordance with the laws and regulations of the United States of America; and

(3) Permitted by the laws and regulations of the Contractor's country.

(b) In no event shall copies of this contract of any plans, specifications, or other similar documents relating to work under this contract, if marked “Top Secret,” “Secret,” or “Confidential” be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive such documents. However, a copy of any part or all of this contract so marked may be furnished, or any information contained herein may be disclosed, to such assignee upon the Contracting Officer's prior written authorization.

(c) Any assignment under this contract shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment may be made to one party as agent or trustee for two or more parties participating in such financing. On each invoice or voucher submitted for

payment under this contract to which any assignment applies, and for which direct payment thereof is to be made to an assignee, the Contractor shall—

(1) Identify the assignee by name and complete address; and

(2) Acknowledge the validity of the assignment and the right of the named assignee to receive payment in the amount invoiced or vouchered.

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

AUTHORIZED CHANGES ONLY

Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address:	FISC Detachment Singapore PSA Sembawang Terminal Deptford Road, Building 7-4 Singapore 759657
Military Address:	PSC 470, Box 2150 FPO AP 96534-2150
FAX Numbers:	(65)-6-750-2639

PROVISIONS FOR WOOD PRODUCTS

Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

AGENCY PROTESTS

Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

Section J - List of Documents, Exhibits and Other Attachments

EXHIBITS AND ATTACHMENTS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A	Section B2 - Schedule of Supplies and Services
B	Port Tariff
C	CRAFT Report
D	OOTW Sample of Provisions
E	Historical Craft Data Of Ship Visits To Cambodia & Vietnam

ATTACHMENT NO.	DOCUMENT
1.	Classifications of Ships
2.	Floating Line of Demarcation Specifications (FLD)
3.	Picket Boat Operations & Specifications
4.	Security Guard Operations
5.	Fuel Specifications
6.	Water Taxi Specifications
7.	Request for Sanitary Inspection
8.	Quality Assurance Provisions (including Appendices A & B)
9.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A - Section B2 - SCHEDULE OF SUPPLIES AND SERVICES (ELINs)
Separate Excel spreadsheet is attached. Complete all unit prices in US Dollars under each lot for base and option periods and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer verify formulae when evaluating prices.

EXHIBIT B - PORT TARIFF ITEMS
The Excel spreadsheet provides estimates of port tariff rates only.

EXHIBIT C - CRAFT REPORT
The CRAFT submittal is required within seven (7) days upon completion of a ship visit. Copies of certified invoices shall be forwarded to the Contracting Officer.

EXHIBIT D - OPERATIONS OTHER THAN WAR (OOTW) SAMPLE PROVISIONS

The listing under this Excel spreadsheet is a sample for information purposes only. No Pricing is required.

EXHIBIT E - HISTORICAL CRAFT DATA OF SHIP VISITS TO CAMBODIA & VIETNAM
The quantities reflected in the solicitation were derived from CRAFT data before Nov 2007.

CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2

FLOATING LINE OF DEMARCATION SPECIFICATIONS (CLIN XX11AC THROUGH CLIN XX 11AE)

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

    3.1. Continuous Line FLD - If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

        3.1.1. The FLD must fully enclose ships at pier side or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

        3.1.2. Specifications:

            3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access Floatation devices positioned every meter on the line.

            3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

            3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

    3.2. Buoy System FLD - This is an acceptable alternative to the Continuous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

        3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

        3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Buoy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one

meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 3

PICKET BOAT OPERATIONS & SPECIFICATIONS (CLIN XX11AK THROUGH CLIN XX11AN)

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside the demarcation line or buoy system (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a bullhorn. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable bullhorn or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 4

SECURITY GUARD OPERATIONS (CLIN XX11AQ THROUGH CLIN XX11AT)

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pier side or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through Host Nation support.

1.3. There are two types of security guard services. One is for providing guards pier side to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The Contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The Contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pier side:

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pier side guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pier side security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor shall man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services shall be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards shall patrol in picket boats provided. The guards shall identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard shall immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones shall vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 5

FUEL SPECIFICATIONS (CLIN XX13)

The following are the Fuel Specifications for this contract:

1. SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	Requirement	Text Method
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC 90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	 Record Record 357ºC 385ºC 3.0	D 86 3/
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100ml, (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664
Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/
Corrosion, @ 100ºC, (max)	No. 1 ASTM	D 130
Hydrogen Content, % wt., (min)	12.5	D 4808
Ignition Quality, Cetane Number, (min) Cetane Index, (min)	42	D 613 (R), D 976 8/
Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2622
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains

visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

2. COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC MAY 2002)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min

NOTE: If the Cetane number is reported, the reported value shall apply to the base fuel without Cetane improving additives.

2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.

3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min
	NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.		
5.	Cloud Point	ASTM D 2500	-1.1^{O}C (30^{O}F) max.
	NOTE: Cloud Point results will be evaluated based upon bunkering location.		
6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cSt
7.	Color 4	ASTM D 1500	3 max.
	NOTE for deliveries outside the United States, the offerors must submit information on the composition, color and desired concentration of any dye to be used in order to obtain approval.		
8.	Density @ 15^{O}C	ASTM D 1298	876 kg/m^{3} max.
9.	Carbon Residue on 10% bottoms 5	ASTM D 524	0.35 mass % max.
	NOTE: For carbon residue on 10% bottoms, ASTM D 189 is an acceptable alternate method.		
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur 6	ASTM D 4294	1.0 mass % max.
	NOTE: For total sulfur content, ASTM D 1552 and ASTM D 2622 are acceptable alternate methods.		
12.	Corrosion	ASTM D 130	3 max.
13.	Composition Distillate Fuel (fuel shall contain no residual)	None	100%

3. FUEL OIL, INTERMEDIATE, GRADES RME-25 (IFO 180 AND RMG-35 (IFO 380) (DESC JUN 2004)

a. Product shall conform to ISO 8217:1996.

b. ALTERNATE TEST METHODS. The test methods below can also be used to determine the following requirements:

REQUIREMENTS TEST METHOD

1. Density @15^{o}C, kg/m^{3} ASTM D 4052
2. Carbon Residue ASTM D 4530
3. Vanadium, mg/kg ASTM D 5863
4. Aluminum plus silicon, mg/kg ASTM D 5184

c. SULFUR. Starting My 19, 2005, the sulfur limit for RME-25 (IFO 180) purchased under the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, maximum.

d. A. FOR THE BULK PROGRAM, RME-25 (IFO 180) purchased under the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, maximum. (DESC 52.246-9FFE).

ATTACHMENT 6

WATER TAXI SPECIFICATIONS (CLIN XX32)

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Detachment Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Detachment Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable local laws and regulations. All boats shall be manned by two (2) qualified operators (a driver and one other operator). In addition, the contractor shall meet all requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator’s/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by Local Authorities for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weather decks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., CO_2 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 7

REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 8

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. SANITARILY APPROVED SOURCES: All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DETACHMENT Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. DELIVERY VEHICLES: The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semi perishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. CODE DATING: Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. PACKAGING: Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. SHELF LIFE REQUIREMENTS: Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. TEMPERATURE REQUIREMENTS: Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. REJECTED ITEM: Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. FOREIGN ORIGIN PRODUCTS: Foreign establishments do not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD: See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. DAIRY PRODUCTS:

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. FROZEN MEAT AND POULTRY

a.. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. FROZEN WATERFOODS:

a.. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. SHELL EGGS:

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. BAKERY PRODUCTS:

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 8 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55^{o} to 65^{o}F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh

Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)

Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.

Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products		0 per ml (See notes 6&7)	0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products		20,000 per ml	10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts		50,000 per gram	20 per gram	
Ice cream products, vanilla and plain flavored		50,000 per gram	10 per gram	
Frozen dessert mix:				
Vanilla flavor		50,000 per gram	10 per gram	10 per gram
other flavors		50,000 per gram	20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:
1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.

5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]			
	Aerobic Plate Count	Coliform Count	ATP (RLU) Counts
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeas and Mold cou
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	> 2.5/wt	< 3.5/wt
pH	> 4.2	< 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M

Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. < 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]

Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu

Counts[2]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram	

Staphylococcus aureus	100 per gram	1000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]	Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]					
Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7

Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. < 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.

	Rabbits.	
	Salmon, smoked.	
	Squid.	
8910	All dairy foods and eggs, including:	Chocolate drink mix, non-dairy.
(*Notes 4, 5)	Cream, sterilized.	Powdered dairy mixes.
	Creamer, coffee, dairy.	Toppings, non-dairy.
	Dairy soft serve mixes.	
	Desserts/puddings, frozen.	
	Egg nog, canned.	
	Egg substitutes.	
	Italian ices.	
	Topping, real cream.	
	Yogurt, fresh or frozen.	
8915	All pre-cut pre-packaged minimum processed fresh	All unprocessed fruits and
(*Note 7, 8)	fruits and vegetables.	vegetables.
	Kimchee.	Olives.
	Mushrooms, whole and sliced.	Fruit juices and nectars, shelf stable
	Salads, non-meat, with or without dressing	or frozen concentrate.
	(not USDA listed).	
	Vegetable sprouts.	
	Fruit juices and nectars, refrigerated.	
8920	Bakery and cereal products (baked and unbaked,	All other bakery products, including
(*Notes 6, 9)	fresh and frozen), specifically:	Bagels.
	Croissants.	Batter mix, dry.
	Doughnuts	Biscuits, canned.
	Egg roll wrappers.	Breads, rolls, and buns.
	Flour and corn tortillas.	Cake mix, dry.
	Wet pasta (noodles).	Cakes, unfilled.
	Pastries.	Cookie mix, chilled or dry.
	Pies.	Cookies, unfilled.
	Soft pretzels.	Crackers.
	Won ton wrappers.	Cupcakes, unfilled.
	Filled bakery items.	Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.
		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940	Dietary foods and specialty preparations,	All other dietary and specialty
(*Notes 2, 3, 4, 5, 10)	specifically:	preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish	Baby formula, canned.

	products.	Chips, nacho or potato.
	Pickled eggs.	Creamer, coffee, imitation (non-dairy).
	Frozen dinners.	Dips.
	Pudding novelties, frozen or chilled.	Nacho cheese, canned.
	Tofu.	Nutri-why.
		Popcorn.
		Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products including:
		Salad dressings.
		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages, including:
	Ice.	Dry ice.
	Bottled water.	Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products.*
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.

9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

ATTACHMENT 9

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)
Husbanding Services for Vietnam/Cambodia

1.0 INTRODUCTION

This Quality Assurance Surveillance Plan (QASP) is pursuant to the requirements listed in the performance-based Performance Work Statement (PWS). This performance-based plan sets forth the procedures and guidelines the U.S. Fleet & Industrial Supply Center, Detachment Singapore will use in evaluating port visit cost reporting and non-contract item pricing performance of the husbanding service contractor.

1.1 PURPOSE

1.1.1. The purpose of the QASP is to describe the systematic methods used to measure performance and to identify the reports required and the resources to be employed. The QASP provides a means for evaluating whether the contractor is meeting the port visit cost reporting and non-contracting pricing performance standards identified in the PWS.

1.1.2 This QASP is designed to define roles and responsibilities, identify the performance objectives, define the methodologies used to monitor and evaluate the contractor's performance, describe quality assurance reporting, and describe the analysis of quality assurance monitoring results.

1.2 PERFORMANCE MANAGEMENT APPROACH

1.2.1 The performance-based PWS structures the acquisition around "what" service is required as opposed to "how" the contractor should perform the work. This QASP will define the performance management approach taken by the Contracting Officer to monitor, manage, and take appropriate action on the contractor's performance against expected outcomes or performance objectives communicated in the PWS. Performance management rests upon developing a capability to review and analyze information generated through performance metrics. The ability to make decisions based on the analysis of performance data is the cornerstone of performance management. The data generated in a performance management approach provides information that indicates whether or not expected outcomes for required services are being achieved adequately by the contractor.

1.2.2 Performance management also represents a significant shift from the more traditional Quality Assurance (QA) concepts in several ways. Performance management focuses on assessing whether or not outcomes are being achieved and migrates away from scrutiny on compliance with the processes and practices used to achieve the outcome. The only exceptions to process reviews are those required by law and compelling business situations such as safety and health. An outcome focus provides the contractor flexibility to continuously improve and innovate over the course of the contract as long as the critical outcomes expected are being achieved at the desired levels of performance.

1.3 PERFORMANCE MANAGEMENT STRATEGY

1.3.1 The contractor will set forth the staffing and procedures for self inspecting the quality, timeliness, responsiveness, customer satisfaction, and other performance requirements in the PWS. The contractor will develop and implement a performance management system with processes to assess and report their performance to the Contracting Officer.

1.3.2 The Contracting Officer will monitor performance and review performance reports furnished by the contractor to determine how the contractor is performing against communicated performance objectives. The

Government will make decisions based on performance measurement metric data and notify the contractor of those decisions. The contractor will be responsible for making required changes in processes and practices to ensure performance is managed effectively.

2.0 ROLES AND RESPONSIBILITIES

2.1. The Contracting Officer (KO) is responsible for monitoring contract compliance and contract administration; and resolving any differences between the observations documented by the requiring activity, and the contractor's performance. The KO will also have the responsibility for completing QA monitoring forms (refer to Attachments 9b and 9c) used to document the evaluation of the contractor's reporting and price performance.

2.2 The Authorized Government Representatives (e.g., Ship SUPPO) identified in the contract is responsible for monitoring, assessing, and communicating the technical performance of the contractor and assisting the contractor. Government surveillance may occur under authority of the Inspection/Acceptance paragraph of clause 52.212-4, Contract Terms and Conditions – Commercial Items, for any supply or service relating to the contract.

3.0 IDENTIFICATION OF SERVICES TO BE PERFORMED

The contractor shall provide husbanding service support in accordance with the PWS. The reporting and non-contract item pricing performance standards are identified in the PWS. The acceptable level of performance is also described in the PWS.

4.0 METHODOLOGIES TO MONITOR PERFORMANCE

4.1 In an effort to minimize the contract administration burden, simplified methods of surveillance techniques shall be used by the Government to evaluate contractor performance. The primary methods of surveillance are random checks, observations, inspections, complaints and review of those records and files that are required to be maintained and delivered under the PWS. The Contracting Officer may also use reports and input from the requiring activity as sources of comments on the contractor's performance.

4.2 The contractor is expected to establish and maintain professional communication between its employees and customers. The primary objective of professional communication between employees and customers is customer satisfaction. Customer satisfaction is the most significant external indicator of the success and effectiveness of all services provided and can be measured through customer complaints. Performance management drives the contractor to be customer focused through initially addressing customer complaints and investigating the issues and/or problems.

NOTE: The customer always has the option to communicate complaints to the Contracting Officer as opposed to the contractor. The Contracting Officer will accept the customer complaints and will investigate using the Quality Assurance Monitoring Form – Customer Complaint Investigation identified in Attachment 9c.

4.3 The acceptable quality levels (AQL) located in Attachment 9a, Performance Requirements Summary Table, for contractor performance are structured to allow the contractor to manage how the work is performed while providing negative incentives for performance shortfalls.

5.0 QUALITY ASSURANCE REPORTING

5.1 The performance management feedback loop begins with the communication of expected outcomes. Port visit cost reporting and non-contract item pricing performance standards are expressed in the PWS and measured by the required performance metrics in Attachment 9a.

5.2 The Government's QA monitoring, accomplished by the KO, will be reported using the monitoring forms in Attachments 9b and 9c. The forms, when completed, will document the KO's understanding of the contractor's performance under the contract to ensure that the PWS requirements are being met.

5.2.1 The KO will retain a copy of all completed QA monitoring forms.

6.0 ANALYSIS OF QUALITY ASSURANCE MONITORING RESULTS

6.1 The Government shall use the observation methods cited to determine whether the AQLs have been met. The Government will evaluate the results which then may be translated into the specific negative incentives should performance not meet the AQL's.

6.2 Within 30 days following the end of each order's performance period, the KO will prepare a written report summarizing the overall results of the quality assurance monitoring of the contractor's performance. This written report which consists of the contractor's submittals and the completed Quality Assurance Monitoring Forms (Attachment 9b) will become part of the QA documentation.

6.3 The KO may require the contractor's project manager, or a designated alternate, to meet with the Government personnel as deemed necessary to discuss performance evaluation. The KO will define a frequency of in-depth reviews with the contractor. However, if the need arises, the contractor will meet with the KO as often as required or per the contractor's request. The agenda of the reviews may discuss:

- Performance measured by the metrics and trends
- Issues and concerns of both parties
- Recommendations made by the KO based on contractor information
- Issues arising from independent reviews and inspections

6.4 The KO and contractor should jointly formulate tactical and long–term courses of action. Decisions regarding changes to metrics, thresholds, or service levels should be clearly documented. Changes to service levels, procedures, and metrics will be incorporated as a contract modification at the convenience of the KO.

7.0. FAILURE TO PERFORM

7.1 The contractor may receive deductions and negative past performance ratings or even termination based on failure to perform. The following criteria apply for determining appropriate action:

1. Notifications. Consistent with FAR Part 12, the KO shall notify the service provider of failure to meet standards through QA monitoring forms, cure notices, or show cause notices and shall inform the service provider manager or designated alternate of such notices.
2. Deductions. The Government has the right to deduct a specified dollar for failure to meet performance standards. The amount is identified in the Performance Requirements Summary (PRS) of Attachment 9a.
3. Termination. If the KO determines that the contractor has failed to perform to the extent that a termination for cause is justified, the KO shall issue a notice of termination, consistent with FAR Part 12.

LIST OF ATTACHMENTS TO QASP:

ATTACHMENT 9a - Performance Reporting Summary (PRS)

ATTACHMENT 9b - Quality Assurance Monitoring Form
ATTACHMENT 9c - Quality Assurance Monitoring Form - Customer Complaint Investigation

ATTACHMENT 9a

PERFORMANCE REQUIREMENTS SUMMARY (PRS)

Required Service	Performance Standards	Acceptable Quality Levels	Method Of Surveillance	Incentive (Negative) (Impact on Contractor Payments)
Port Visit Cost Reporting	Submit CRAFT cost estimate to ship and Contracting Officer within two working days after receipt of LOGREQ (PWS Paragraph 1.1.3)	95%	E-mails receipts, files review, periodic, random, observations, complaints	$100 deduction for each documented instance when an estimate is submitted late and documentation in the contractor's past performance record
	Submit final CRAFT cost reports to the Contracting Officer within seven (7) working days of each ship's departure (PWS Paragraph 33.2)	95%	E-mail receipts, files review, random, complaints	$100 deduction for each documented instance when the report is submitted late and documentation in the contractor's past performance record
	CRAFT submittals are accurate and complete	95%	Files review, periodic, random, observations, complaints	Require contractor to take corrective action to correct inaccurate/incomplete reports and documentation in the contractor's past performance record
Pricing for Non-Contract Items	For non-contract items in excess of $3,000, the contractor provided the Contracting Officer information of the results of competition conducted for non-contract item pricing no later than seven (7) days after the ship's departure (PWS Paragraph 1.3.2)	95%	E-mail receipts, files review, periodic, random, complaints, observations	$100 deduction for each documented instance when results are submitted late and documentation in the contractor's past performance record
	The contractor has adequately documented fair and reasonable pricing for non-contract items over $3,000	90%	Files review, periodic, random, complaints, observations	Documentation in the contractor's past performance record

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

☐ A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

☐ B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).

☐ C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:

X D. OTHER (Specify type of modification and authority)
FAR 52.217-8 (Nov 1999), Option to Extend Services

E. IMPORTANT: Contractor ☒ is not, ☐ is required to sign this document and return _____ copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)
Modification Control Number: nyspnt011016700

1. The purpose of this modification is to extend the current contract performance from 01 Jun 10 through 30 Nov 10 in accordance with the clause FAR 52.217-8, Option to Extend Services.

2. There is no change in the estimated total contract price as a result of this extension.

3. All other terms and conditions remain unchanged.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION B - SUPPLIES OR SERVICES AND PRICES

The following have been modified:
SECTION B1 - OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting Vietnam and Cambodia.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Danang, Vietnam, Sihanoukville, Cambodia, and all other ports in Vietnam and Cambodia. It is to provide services and supplies that are required by the ships while they are in port.

2.2. This contract also includes requirements for logistic support services and supplies for Operations Other Than War (OOTW) required by the U.S. Navy and other U.S. Government organizations or agencies.

2.3. The contract is subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 is for Danang, Vietnam; Lot 2 is for All Other Ports in Vietnam; Lot 3 is for Sihanoukville, Cambodia; Lot 4 is for All Other Ports in Cambodia; and Lot 5 is for OOTW in Vietnam and Cambodia.

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. This contract also requires that the HS Contractor assist ships that are being provided husbanding services to obtain unforeseen additional services or supplies that are required as part of the husbanding the ships while they are in port. Similar services may be required under the OOTW CLINs.

2.6. The holder of this contract is a US Navy Contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Indefinite Delivery Indefinite Quantity (IDIQ) contract. The HS Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

3.1 MINIMUM AND MAXIMUM QUANTITIES - The contract minimum quantity referred to in paragraph (b) of the FAR 52.216-22 Clause entitled "Indefinite Quantity" of this contract, is set at a total of $20,000 worth of orders at the contract unit price(s). The recording of the obligation of funds associated with the guaranteed minimum amount under the basic contract will be issued under task order(s)/delivery order(s) immediately upon award of this contract. The minimum guarantee applies to the base year period only.

4. DURATION OF CONTRACT - This contract is for a base period commencing from contract award date through 30 Nov 2009 and a six-month Option I period. The performance period of the base period of the contract shall continue unless terminated or extended in accordance with the other clauses herein. If the six (6) month extension of performance of services is exercised under FAR 52.217-8, the maximum duration of this contract is through 31 May 2010.

5. MULTIPLE SHIP VISITS - The HS Contractor is required to be able to simultaneously Husband a maximum of four (4) ships at one time for Vietnam and Cambodia.

6. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities if the port requires use of port-provided supplies and services or if the port-provided supplies and services are less expensive than similar services provided by the HS Contractor or its subcontractors, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

7. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The HS Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

8. LONG TERM SHIP VISITS –

8.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The HS Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit.

8.2. Unique/Particular Situations:

8.2.1. Frequent ship visits to ports: If a ship returns to a port within three (3) days (i.e. prior to the fourth calendar day), the Management Services fees for the return visit will be charged at the subsequent day rate. (example: If the ship departs Friday and comes back before Tuesday, it will be charged Management Service fees at the subsequent days rate during the return visit that begins prior to Tuesday. If the ship comes back on Tuesday, the Management Services will be charged at the first day rate for Tuesday, followed by the subsequent days rate for the following days.)

8.2.2. If a ship comes into port and does not request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged Management Service fees at the first or subsequent days rates, subject to the conditions in paragraph 10.2.1 and subject to the discussion at paragraph 20 below about ordering Management Services.

8.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The HS Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong SAR, China and Singapore.

9. SHIPYARDS - U.S. Navy Ships in shipyards at locations covered by this contract may order supplies and services from this contract without the requirement to also order Management Services.

10. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Service Fees. These orders do not involve continuous management of husbanding services and may be for items such as vehicles, phones or other services.
For example, U.S. Government personnel attending conferences, training and seminars where hotel, transportation and rental of cellular phones are required, may order those services through the HS Contractor to the extent those services are included in this contract. This provision does not apply to services that are required as part of an Operations Other Than War (OOTW) event..

11. ORDERING

11.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Yokosuka (including Sites/Detachments) warranted KO or their authorized representative.
- Any MSC warranted Ordering Officer or their authorized representative.

11.2. Advance Notice Period for Orders: The HS Contractor shall deliver the supplies and services listed on Exhibit A (not to include items marked as "Reserved" or TBD") in accordance with the time and date set by the order so long as the order is issued by an AGR at least 48 hours prior to the required delivery date and time. The HS Contractor shall use its best reasonable effort to deliver supplies or services marked as "Reserved" or "TBD" in accordance with an order's delivery schedule or time so long as the AGR and the HS Contractor come to agreement on the price of the "Reserved" or "TBD" item at least 48 hours in advance of the required delivery date and time. Occasionally, there may be short notice orders of less than 48 hours, which the HS Contractor shall support if possible. If the HS Contractor cannot support these requirements within 48 hours, then the AGR may satisfy them from other sources.

11.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR, which could be the SUPPO or FISC Detachment Singapore Contracting Officer. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at a rate not to exceed that of the originally ordered CLIN. An example would be if a 20-passengerbus was ordered, but was not available and the HS Contractor substituted two 10 passenger-vans. The HS Contractor shall charge a rate for the 10 passenger vans that does not exceed the rate for the one 20-passenger bus.

11.4. Cancellation of Orders:

11.4.1. Unless otherwise provided herein, in the event an order, or any portion of an order, is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. If several deliveries are required to satisfy an order or portion of an order, i.e., garbage pick-up and disposal on each of five days, then the 48-hour notice period shall be computed from each of the required delivery dates. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled "Termination for the Government's Convenience (FAR 52.212-4)", of the clause entitled "CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS."

11.4.2. In rare cases, when ordering items requires long lead times, the Government may apply the Termination for the Government's Convenience clause as referenced above even though an order was cancelled prior to 48 hours before a required delivery.

11.4.3. In every case, the HS Contractor is responsible for taking all necessary steps to mitigate the U.S. Government's damages or termination costs. As part of its mitigation, the Government reasonably expects that the HS Contractor shall consider these cancellation rights as it enters into agreements with its subcontractors and suppliers.

12. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and the HS Contractor shall be copied to the FISC Detachment Singapore Contracting Officer and Logistic Support Representative.

13. STANDARDS FOR PROFESSIONAL SERVICES

13.1. The HS Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the locations covered by this Contract.

13.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

13.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 9.

13.3. The HS Contractor shall obtain any necessary insurance, licenses and permits, and comply with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

13.4. The HS Contractor shall ensure that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

13.5. The HS Contractor shall ensure that subcontractors comply with these requirements.

14. HEIGHTENED VIGILANCE

14.1. The HS Contractor shall be alert at all times in order to contribute to the protection of the ship and its crew. The HS Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The HS Contractor shall report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

14.2. The HS Contractor shall fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the HS Contractor shall identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the HS Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The HS Contractor shall arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

15. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

16. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the HS Contractor is required to use government equipment, the HS Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The HS Contractor shall not be responsible for damage due solely to normal wear and tear.

17. CONTRACT PRICING

17.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

17.2. Fixed Price (other than items in which the price is set by a Port Tariff or other controlled price)- Prices are firm-fixed-price per unit and are inclusive of ALL costs.

17.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. The following non-exclusive set of costs is included in the unit price: labor performed during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

17.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

17.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

17.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

17.2.5. All Government taxes are included in the unit cost.

17.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). When the HS Contractor obtains a supply or service from a port or local government-type organization and the price of that item is set by a published price list, then the HS Contractor shall be reimbursed for the published price of the item. The HS Contractor shall not be paid an amount in addition to the published price of the item. These items are listed on Exhibit B, Port Tariff items.

17.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

17.5. Demurrage - Demurrage charges shall only be charged if the HS Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but, due to the fault of the government, was not attended to until 1500 hrs when pumping begins. The HS Contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

18. Management Services -Operations Other than War (OOTW) CLINs. When supplies or services are ordered under the Operations Other than War (OOTW) CLIN, the Government will clearly identify the days during the performance period for which it is ordering Management Services. Because of the range of situations under which the Government may order supplies and services under the OOTW CLINs, there is less certainty that the Government will order Management Services for each day of an Operation Other Than War than when the Government orders husbanding services. The HS Contractor is not required to provide any services described under the OOTW Management Services CLINs on those days for which services are not ordered.

19. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TBD	To Be Determined
TP	Trip

20. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX11 for Force Protection could be divided into XX11AA for Beach Guard Office and XX11AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.)/Task Order: A delivery order is an order for supplies and a task order is an order for services placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

- FORCE PROTECTION (FP). Security measures to protect a ship and its crew from dangerous situations such as terrorist actions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the HS Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary with the location. The U.S. Government is often exempt from host nation Government Taxes. The Government makes no representation as to the extent to which the HS Contractor may be liable for Host Nation Government taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services required by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other HS Contractors work with the ship, and assisting with requests for Non-Contract items. To the extent practicable, the HS Contractor shall utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

- Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

- Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The cost for CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is knowledgeable about an issue and is able to answer questions and make decisions concerning the issue.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples may include pilot services, tugs, picket boats, security guards, and potable water.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order. A "Reserved" item is an item that can be ordered when required.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and, if so, is authorized to sign contracts and place orders.

21. HS CONTRACTOR REPRESENTATIVE – The Government shall contact the following HS Contractor person(s) for prompt contract management:

Name of Individual:	Leonard G. Francis	(b)(6), (b)(7)(C)
Title of Individual:	Executive Group Chairman/ President

SECTION B1 OVERVIEW
OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting the Philippines.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Metro Manila, Subic Bay, Cebu, Puerto Princesa, General Santos, Zamboanga, Legazpi and all other ports in the Philippines. It is to provide services and supplies requested by the ships while in port.

2.2. This contract also includes logistic support services and supplies for Operations Other Than War (OOTW) required by other U.S. Government organizations or agencies. Examples include U.S. Marine Corps, U.S. Army, U.S. Air Force, Military Sealift Command (MSC), Naval Fleet Auxiliary Force (NFAF) ships, U.S. Coast Guard, etc.

2.3. The contract may be subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 is for Metro Manila, Lot 2 is for Subic Bay, Lot 3 is for Cebu, Lot 4 is for Puerto Princesa, Lot 5 is for General Santos, Lot 6 is for Zamboanga, Lot 7 is for Legazpi, Lot 8 is for all other ports in Philippines and Lot 9 is for Operations Other Than War (OOTW) for all locations in the Philippines.

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.6. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

4. DURATION OF CONTRACT - This contract is for a period of twelve (12) months. Additionally, the contract will include FAR52.217-8 OPTION TO EXTEND SERVICES clause. The possible contract duration is eighteen (18) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users - U.S. Navy ships visiting locations covered under this contract are required to use this contract if HSs are requested (with the exceptions noted below). Ship classifications are listed in Attachment 1.

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (USNS)
- U.S. Coast Guard (USCG) Ships
- U.S. Army Ships
- U.S. Government personnel conducting business in locations under this contract.
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent.

However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are “all or none”.

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of twelve (12) ships at one time for the Philippines.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

10. LONG TERM SHIP VISITS –

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within three (3) days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy

Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off of this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a

representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.2.1. The performance standards are explained in the Quality Assurance Surveillance Plan (QASP) – See Attachment 10.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package

PT Port Tariff
QTY Quantity
TBD To Be Determined
TP Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GARBAGE: See Attachment 2 – Refuse Definitions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The CLIN for CRAFT should be factored into the Management Fee. The NSP CLIN is used to administratively order any unpriced items in accordance with the pricing rationale in paragraph refer to Section C (SOW), Arranging Supply and Services.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: A supply or service for which the price will be negotiated at the time of order.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

- TO BE DETERMINED (TBD): Indicates uncertainty about some aspect of the requirement. Detailed information will be provided at time of order. Price will be negotiated once the additional information is provided.

- TRASH: See Attachment 2 – Refuse Definitions.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

CLAUSES INCORPORATED BY FULL TEXT

STATEMENT OF WORK (SOW)

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship’s arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship’s Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The Contractor is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers Philippines then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual agreement with the other contractors to perform these services for them. Any disputes or discrepancies arising from

the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or no later than 7 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the

following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) AND EXERCISE/ LOGISTIC SUPPORT FEES (LOT 2) (CLIN XX36)

2.1. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO’s).

2.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

2.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
2.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
2.5.3. current innoculation records
2.5.4. possess a valid up-to-date passport.

2.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. He is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The contractor team shall consist of a minimum of two personnel per location that the OOTW and/or Exercise/ Logistic Support is being conducted. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

2.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor’s Husbanding fees and CLINS shall apply.

2.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

7.3. The Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

7.4. The Contractor shall provide commercial telephone booth and sale of phone cards for personal use by crewmembers.

7.5. The Contractor shall provide pre-paid International Calling Cards for official use.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The Contractor shall ensure that this area is kept clean during the ship visit in port.

12. FORCE PROTECTION (CLIN XX12)

12.1. General (CLINs XX01 & XX02): The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The Contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.1.8. The Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The Contractor's written policy shall describe the required measures to protect ship schedule information.

12.2. Non-Contract FP Measures: The Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer

will coordinate this requirement with the ship's FP personnel. Once a decision is made then the Contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. Floating Line of Demarcation (CLINs XX12AC through XX12AD)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. Perimeter Fencing (CLIN XX12AE)

12.6.1. The Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if

additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved Entry Point: Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AF through XX12AJ)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AK)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations and specifications.

12.9. RESERVED (CLIN XX12AL)

12.10. Portable Lighting (CLIN XX12AM)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards Services (CLINs XX12AN through XX12AP)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.11.3. All security guards shall be armed.

12.12. EOD/Drug K9 Dogs & Handler Teams (CLIN XX12AQ) – The Contractor shall provide teams of EOD / Drug K9 detection teams. The teams shall include one (1) dog and one (1) handler.

12.13. Two Way Radios (CLIN XX12AR) - The Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

12.14 Hand Held Wand Metal Detectors (CLIN XX12AS) - The Contractor shall provide hand held metal detectors capable of detecting metal.

12.15. Hand Held Explosive Detectors (CLIN XX12AT) - The Contractor shall provide hand held explosive detectors capable of detecting explosives.

12.16. Walk Thru X-Ray & Metal Detector (CLIN XX12AU) - The Contractor shall provide walk thru X-ray & metal detector capable of detecting metal.

12.17. X-ray Baggage Scanning Machine airport-type (CLIN XX12AV) – The Contractor shall provide X-ray baggage scanning machine capable of X-raying hand carried luggage and bags to determine its contents. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

13. FORKLIFT WITH OPERATOR (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Contractor shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by theh port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.4. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.5. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.6. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.7. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.8. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. MANLIFT (WITH OPERATOR) (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and a full fuel tank.

18.2. The Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled “SHIP’S SPARE IN TRANSIT”

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship’s arrival.

19.1.4. Shipping documents shall be labeled ‘SHIP’S SPARE(S) IN TRANSIT” and addressed to the ship’s Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. MISCELLANEOUS (CLIN XX20)

20.1. Portable Latrine (CLIN XX20AA)

20.1.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

20.1.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

20.1.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

20.1.4. The Contractor shall clean latrines twice daily.

20.2. Tower Flood Light (CLIN XX20AB) – The Contractor shall provide tower flood light for additional lighting at pierside.

20.3. Security Flood Light (CLIN XX20AC) – The Contractor shall provide security flood light for additional lighting at pierside.

21. OIL BOOMS (CLIN XX21)

21.1. The Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.4. The Contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

23. PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. PRATIQUE (CLIN XX26) - The Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

27. REEFER CONTAINER (CLIN XX27)

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. SHORE POWER (CLIN XX28)

28.1. The Contractor shall provide shore power to the ship using

28.1.1. Port provided permanent connection system.

28.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

28.2. The Contractor shall provide all cables and make all power connections between the generator and ship.

28.3. The availability of shore power shall be in accordance with the schedule established by the ship.

29. RESERVED – SHORE STEAM (CLIN XX29) – The Contractor shall provide shore steam to the ship.

30. STEVEDORE SERVICES (CLIN XX30) - The Contractor shall provide stevedores and supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with qualified drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

33.4. If tugs are not available through the port authority, the Contractor shall use commercially available tugs.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit D - CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36) See MANAGEMENT SERVICES (CLIN XX01), paragraph 2 above also.

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted.
36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification.
36.3.3. Current inoculation records.

36.3.4. Possess a valid up-to-date passport.

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

37. OOTW COST REPORT (CLIN XX37)

37.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

37.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

INVOICE AND PAYMENT
INVOICES AND PAYMENTS

1. The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

2. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices presented to the ship shall be provided to FISC Det Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

CONTRACT CLAUSES
CLAUSES INCORPORATED BY REFERENCE

52.212-4	Contract Terms and Conditions – Commercial Items	FEB 2007
52.212-5	Contract Terms and Conditions Required to Implement Statutes or Executive Orders – Commercial Items	AUG 2007
52.216-21	Requirements	OCT 1995

CLAUSES INCORPORATED BY FULL TEXT

ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of task/delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All task/delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(a) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(b) *Maximum ordering amount*. The Contractor is not obligated to honor --

(1) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(2) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(3) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(c) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(d) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by

orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all the supplies or services specified in the Schedule that are required to be purchased by the Government activity or activities specified in the Schedule.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) RESERVED.

(j) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(k) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(l) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(m) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will

be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(n) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 2002) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(o) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Apr 2003) (46 U.S.C. Appx 1241 and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

http://www.acq.osd.mil/dp/dars/
http://www.arnet.gov/
http://farsite.hill.af.mil/

(End of clause)

252.201-7000 CONTRACTING OFFICER'S REPRESENTATIVE (DEC 1991)

(a) "Definition. Contracting officer's representative" means an individual designated in accordance with subsection 201.602-2 of the Defense Federal Acquisition Regulation Supplement and authorized in writing by the contracting officer to perform specific technical or administrative functions.

(b) If the Contracting Officer designates a contracting officer's representative (COR), the Contractor will receive a copy of the written designation. It will specify the extent of the COR's authority to act on behalf of the contracting officer. The COR is not authorized to make any commitments or changes that will affect price, quality, quantity, delivery, or any other term or condition of the contract.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (SEP 2005)

(a) The Contractor agrees to comply with the following Federal Acquisition Regulation (FAR) clause which, if checked, is included in this contract by reference to implement a provision of law applicable to acquisitions of commercial items or components.

__X__ 52.203-3 Gratuities (APR 1984) (10 U.S.C. 2207).

(b) The Contractor agrees to comply with any clause that is checked on the following list of Defense FAR Supplement clauses which, if checked, is included in this contract by reference to implement provisions of law or Executive orders applicable to acquisitions of commercial items or components.

____252.205-7000 Provision of Information to Cooperative Agreement Holders (DEC 1991) (10 U.S.C. 2416).

____252.219-7003 Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan (DoD Contracts) (APR 1996) (15 U.S.C. 637).

____ 252.219-7004 Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan (Test Program) (JUN 1997) (15 U.S.C. 637 note).

____ 252.225-7001 Buy American Act and Balance of Payments Program (JUN 2005) (41 U.S.C. 10a-10d, E.O. 10582).).

252.247-7024 Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

Section J - List of Documents, Exhibits and Other Attachments

EXHIBITS AND ATTACHMENTS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A	Schedule of Supplies and Services
B	Port Tariff
C	OOTW Sample
D	CRAFT Report

ATTACHMENT NO.	DOCUMENT
1.	Classifications of Ships
2.	Refuse Definitions
3.	Floating Line of Demarcation (FLD) Specifications
4.	Picket Boat Operations & Specifications
5.	Security Guard Operations
6.	Fuel Specifications
7.	Water Taxi Specifications
8.	Request for Sanitary Inspection
9.	Quality Assurance Provisions (including Appendices A & B)
10.	Quality Assurance Surveillance Plan (QASP)

EXHIBIT A – SCHEDULE OF SUPPLIES AND SERVICES
See Section B2 - Exhibit A (ELINs) Schedule of Supplies and Services.
Separate Excel spreadsheet is attached. Complete all unit prices in US Dollars under each lot and grand total. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer verify formulae when evaluating prices.
EXHIBIT B - PORT TARIFF ITEMS
The Excel spreadsheet provides estimates of port tariff rates only.
EXHIBIT C – OPERATIONS OTHER THAN WAR (OOTW) SAMPLE PROVISIONS
The listing under this Excel spreadsheet is a sample for information purposes only.
EXHIBIT D - CRAFT REPORT
The CRAFT submittal is required within seven (7) days upon completion of a ship visit. Copies of certified invoices shall be forwarded to the Contracting Officer.
EXHIBIT E – GOVERNMENT'S RESPONSE TO REQUEST FOR CLARIFICATIONS
The listing of clarifications from offerors and government's response.

ATTACHMENT 1

SHIP CLASSIFICATIONS (DESCRIPTION OF U.S. NAVY SHIPS BY CLASS AND TYPE)

The following are Ship Classifications:

Class IA	Draft ft (mt)	Length ft (mt)	Beam ft (mt)	Displ tons	Maximum Crew Members

CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

GLOSSARY OF TERMS AND ABBREVIATIONS

WMEC	MEDIUM ENDURANCE CUTTER

ATTACHMENT 2
REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
FLOATING LINE OF DEMARCATION SPECIFICATIONS (CLIN XX12XX)

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

    3.1. Continuous Line FLD - If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

        3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

        3.1.2. Specifications:

            3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

            3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

            3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

    3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

        3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACHMENT 4
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.11. Have minimum one meter high guardrails for security guard use.

7.12. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 5
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 6
FUEL SPECIFICATIONS

The following are the Fuel Specifications for this contract:

SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	**Requirement**	**Text Method**
Appearance, @ 25ºC or ambient temperature whichever higher	Clear, bright and free of vi particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC 90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	 Record Record 357ºC 385ºC 3.0	D 86 3/
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100m (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664
Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/
Corrosion, @ 100ºC, (max)	No. 1 ASTM	D 130
Hydrogen Content, % wt., (min)	12.5	D 4808
Ignition Quality, Cetane Number, (min) Cetane Index, (min)	42	D 613 (R), D 976 8/
Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does

not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

Minimum Requirements for Purchases of Commercial Distillate Fuels ((Navy) Marine Gas Oil) for Bunkers

The following minimum requirements have been established for use when buying fuel (gas oil - 100% distillate) from commercial sources when F76 is not available. Marine Gas Oil is not acceptable as cargo fuel on Navy Oilers.

TEST	**METHOD**	**REQUIREMENTS**
1. Cetane Number	ASTM D 613	45 min
or		
Cetane Index	ASTM D 976	45 min

Note: A cetane index of 41 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exc maximum of 338ºC. A cetane number of 40 or above, but less than 45, is acceptable provided the 90% Distillation P does not exceed a maximum of 338°C.

2. Appearance @ 21ºC or ambient temperature (whichever higher)	Visual	Clear & Bright
or		

Water and Sediment	ASTM D 2709	0.05% max
3. Distillation. 90% Point	ASTM D 86	375ºC max
4. Flash Point	ASTM D 93	60ºC min
5. Pour Point	ASTM D 97	Report
6. Cloud Point	ASTM D 2500	-1.1ºC (30 °F)
7. Viscosity @ 40ºC	ASTM D 455	1.7 - 4.5 CST
8. Color	ASTM D 1500	3 max
9. Gravity	ASTM D 1298, D 287	Record
10. Carbon Residue	ASTM D 524	0.35% max
11. Ash	ASTM D 482	0.01% max
12. Sulfur	ASTM D 129, D 1552 D2622	1.00% max
13. Copper Corrosion	ASTM D 130	3 max

C16.23-2 COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC JAN 1998)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST	METHOD	REQUIREMENTS
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min
	NOTE: A Cetane Number of 40 minimum, or a Cetane Index of 41 minimum, is acceptable provided the 90 Percent Distillation Point does not exceed a maximum of 338^{O}C.		
2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min
	NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.		
5.	Cloud Point	ASTM D 2500	-1.1^{O}C (30^{O}F) max.
	NOTE: Cloud Point results will be evaluated based upon bunkering location.		
6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cst
7.	Color	ASTM D 1500	3 max.

NOTE FOR DOMESTIC ITEMS: This Color test requirement is deleted if red dye has been added in compliance with U.S. Environmental Protection Agency or Internal Revenue Service regulations; however, the resulting fuel/dye blend must have a red tint. It shall not be visually brown or darker in appearance.

8.	Density @ 15°C	ASTM D 1298	876 kg/m^3 max.
9.	Carbon Residue on 10% bottoms	ASTM D 524 ASTM D 189	0.35 mass % max.
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur	ASTM D 4294, ASTM D 1552, or ASTM D 2622	1.0 mass % max.
12.	Corrosion	ASTM D 130	3 max.
13.	Distillate Fuel (fuel shall contain no residual)	None	100%

C36 FUEL OIL, INTERMEDIATE, GRADES RMB-10 (IFO 60)/RME-25 (IFO 180)/RMG-35 (IFO 380) (DESC MAY 1997)

Product shall conform to ISO 8217:1996 or ASTM D 2069-91. Product conforming to ASTM D 2069-91 shall meet the following additional requirements:

REQUIREMENTS	**GRADE RMB-10 (IFO 60)**	**GRADE RME-25 (IFO-180)**	**GRADE RMG-35 (IFO 380)**	**GRADE TEST METHOD**
Density @15°C, kg/m^3, max	981.0	991.0	991.0	ISO 3675/12185
Aluminum plus silicon, mg/kg, max	80	80	80	ISO 10478
Total Sediment, potential, %(m/m), max	0.10	0.10	0.10	ISO 10307-2

ATTACHMENT 7
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (Philippines). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator’s/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (Philippines) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9
QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked

between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. **FROZEN MEAT AND POULTRY**

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. **FROZEN WATERFOODS:**

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 12 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)

Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

	Aerobic Plate Count (APC)	Coliform Count
ATP (RLU) Counts		

Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeas and Mold cou
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.

M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.

4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]		
Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		

Arsenic[2]	
Trihalomethanes[2]	
Chlorine[2]	
Dissolved Solids[4]	
Silver [3]	None Detectable

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork		Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance
Cheese, soft and hard		Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Pasteurized, liquid, frozen or Dried egg		Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Pizza topping (meat & cheese)		Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Dried meats sticks, jerky [1]		Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram

Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants.	All other bakery products, including Bagels. Batter mix, dry.

	Doughnuts	Biscuits, canned.
	Egg roll wrappers.	Breads, rolls, and buns.
	Flour and corn tortillas.	Cake mix, dry.
	Wet pasta (noodles).	Cakes, unfilled.
	Pastries.	Cookie mix, chilled or dry.
	Pies.	Cookies, unfilled.
	Soft pretzels.	Crackers.
	Won ton wrappers.	Cupcakes, unfilled.
	Filled bakery items.	Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.
		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically:	All other dietary and specialty preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish products.	Baby formula, canned.
		Chips, nacho or potato.
	Pickled eggs.	Creamer, coffee, imitation (non-dairy).
	Frozen dinners.	
	Pudding novelties, frozen or chilled.	Dips.
	Tofu.	Nacho cheese, canned.
		Nutri-why.
		Popcorn.
		Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products including:
		Salad dressings.
		Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically:	All other nonalcoholic beverages, including:
	Ice.	
	Bottled water.	Dry ice.
		Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products.*
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

ATTACHMENT 10

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)
FOR
HUSBANDING SERVICES FOR REPUBLIC OF THE PHILIPPINES

1. PURPOSE

This Quality Assurance Surveillance Plan (QASP) sets forth the procedures and guidance that the Government will use in evaluating the contractor's performance in accordance with the terms and conditions of the Statement of Work (SOW).

The QASP is a Government developed and applied document used to make sure that systematic quality assurance methods are used in the contract administration of the performance standards included in this contract and in subsequent task orders issued under the contract. The intent is to ensure that the contractor performs in accordance with performance metrics set forth in the contract documents, that the Government receives the quality of services called for in the contract and that the Government only pays a reasonable price for the acceptable level of services received. The QASP is intended to accomplish the following:

1. Define the role and responsibilities of participating Government officials;
2. Define the key deliverables that will be assessed;
3. Describe the rating elements and the evaluation method that will be employed by the Government in assessing the Contractor's performance; and
4. Describe the process of performance assessment documentation.

2. AUTHORITY

Authority for issuance of this QASP is provided in the Statement of Work (SOW).

3. SCOPE

The QASP is put in place to provide Government surveillance oversight of the contractor's quality and price control efforts to assure that they are reasonable, timely, and effective in delivering the results specified in the contract or task order.

4. GOVERNMENT RESOURCES

The following definitions for Government resources are applicable to this plan:

Contracting Officer - A person duly appointed with the authority to enter into, administer, or terminate contracts and make related determinations and findings on behalf of the Government.

Logistic Support Representative (LSR) – A person who ensures that all logistic requirements for individual port visits/missions are satisfied and performs supply support management for all aspects of shipboard support. This includes the coordination and preparation of LOGREQ reply and meeting ship upon arrival.

5. RESPONSIBILITIES

The Government resources shall have responsibilities for the implementation of this QASP as follows:

Contracting Officer – The Contracting Officer ensures performance of all necessary actions for effective contracting, ensures compliance with the terms of the contract and safeguards the interests of the United States in

the contractual relationship. It is the Contracting Officer that assures the contractor receives impartial, fair, and equitable treatment under the contract. The Contracting Officer is ultimately responsible for the final determination of the adequacy of the contractor's performance.

Logistic Support Representative (LSR)- The LSR is responsible for technical administration of the project and assures proper Government surveillance of the contractor's performance. The LSR is not empowered to make any contractual commitments or to authorize any contractual changes on the Government's behalf. Any changes that the contractor deems may affect contract, price, terms, or conditions shall be referred to the Contracting Officer for action.

6. METHODS OF QA SURVEILLANCE

The below listed methods of surveillance shall be used in the administration of this QASP.

Customer Feedback – Customer feedback may be obtained from random customer complaints. Customer complaints, to be considered valid, must set forth clearly and in writing the detailed nature of the complaint, must be documented and must be forwarded to the contracting officer.

Periodic Inspection – The contracting officer shall conduct periodic inspections by reviewing information from the Port Visit Cost Report (PVCR) and in-house reports from the husbanding contractor. For the potential tasks identified in the SOW, the contracting officer or the LSR typically performs the periodic inspection on a monthly basis.

Random Monitoring - The contracting officer or LSR will conduct random monitoring by reviewing information from the Port Visit Cost Report and in-house reports from the husbanding contractor.

7. IDENTIFIED QA SURVEILLANCE ITEMS

The following items, identified within the SOW of the solicitation, are to be monitored under this QASP.

SOW: Husbanding Services

Measurement/Metric: Quality and timeliness

Performance Standard: Quality – no customer complaints
Timeliness – provision of supplies or services according to agreed-to-schedule between ship or ordering activity and contractor

Minimum Compliance Rate: Quality - 80%
Timeliness - 80%

SOW: Port Visit Cost Reporting Program

Measurement/Metric: Accuracy and timeliness

Performance Standard: Accuracy – no mandatory fields omitted and content correct
Timeliness – (i) Initial price estimate: No less than 48 hours after receipt of LOGREQ.
4. (ii) In port price status report: daily update

5. (iii) Final price reports: known prices 24 hours prior to departure, CRAFT and certified invoices 7 calendar days after departure, any changes 1 calendar day

Minimum Compliance Rate: Quality - 80%
Timeliness - 80%

8. DOCUMENTATION

The contracting officer shall maintain a complete QA file. All such records will be retained for the life of this contract. Information in the QA file will be considered when completing the annual CPARS report and when deciding if it is in the best interest of the government to exercise an option to extend the term of the contract.

9. QASP PERFORMANC REQUIREMENTS SUMMARY (PRS)
HUSBANDING SERVICE PROVIDER (HSP) FOR REPUBLIC OF THE PHILIPPINES QASP

QASP PRS MATRIX

PERFORMANCE REQUIREMENTS SUMMARY					
Deliverable or Service Requirement	**Measure-ment/Metric**	**Performance Requirement Standard**	**Minimum Compliance Rate**	**Surveillance Method**	**Procedures to be taken when performance standards are not met**
SOW: Husbanding Services	Quality	No customer complaint	80%	Direct inspection; Customer feedback	Seek resolution with contractor. Denote any lack of quality performance in contract file for past performance evaluation.
	Timeliness	Provision of supplies or services according to agreed-to-schedule between ship (logreq), LSR & Contractor	80%	Direct inspection; Customer feedback	Seek resolution with contractor. Denote any lack of quality performance in contract file for past performance evaluation.
SOW: Port Visit Cost Reporting	Accuracy	No info omitted and content correct	80%	Periodic inspection; Customer feedback	Seek corrections with contractor. Denote any lack of quality performance in contract file for past performance evaluation.
	Timeliness	(i) Initial: 48 hrs (ii) In port: update daily (iii) Final: - prior departure 24 hrs - after departure 7 days - changes 1 day	80%	Periodic inspection; Customer feedback	Seek corrections with contractor. Denote any lack of quality performance in contract file for past performance evaluation.

SUMMARY OF CHANGES

SECTION C - DESCRIPTIONS AND SPECIFICATIONS

The following have been modified:

STATEMENT OF WORK (SOW)

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship’s arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship’s Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The Contractor is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers Philippines then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual agreement

with the other contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship’s Supply Officer who shall issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The Contractor shall deliver to the vendor the Supply Officer’s or Contracting Officer’s order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or no later than 7 days after the ship’s departure from the visited port. The Contractor’s responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation;

and 3) Shall be fresh yet not overripe. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. RESERVED

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

7.3. The Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

7.4. The Contractor shall provide commercial telephone booth and sale of phone cards for personal use by crewmembers.

7.5. The Contractor shall provide pre-paid International Calling Cards for official use.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The Contractor shall ensure that this area is kept clean during the ship visit in port.

12. FORCE PROTECTION (CLIN XX12)

12.1. General (CLINs XX01 & XX02): The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The Contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.1.8. The Contractor shall protect ship schedule information, both paper-based and electronic, from disclosure to individuals and contractors that are not directly involved in providing service to the Navy in response to a verbal or written order from an authorized ordering official under the contract. This requirement to protect ship schedule information shall be flowed down to all individuals and contractors that are directly involved or may be directly involved in providing service to the Navy under this contract. The Contractor's written policy shall describe the required measures to protect ship schedule information.

12.2. Non-Contract FP Measures: The Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the Contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. Floating Line of Demarcation (CLINs XX12AC through XX12AD)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. Perimeter Fencing (CLIN XX12AE)

12.6.1. The Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved Entry Point: Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AF through XX12AJ)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AK)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations and specifications.

12.9. RESERVED (CLIN XX12AL)

12.10. Portable Lighting (CLIN XX12AM)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards Services (CLINs XX12AN through XX12AP)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.11.3. All security guards shall be armed.

12.12. EOD/Drug K9 Dogs & Handler Teams (CLIN XX12AQ) – The Contractor shall provide teams of EOD / Drug K9 detection teams. The teams shall include one (1) dog and one (1) handler.

12.13. Two Way Radios (CLIN XX12AR) - The Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

12.14 Hand Held Wand Metal Detectors (CLIN XX12AS) - The Contractor shall provide hand held metal detectors capable of detecting metal.

12.15. Hand Held Explosive Detectors (CLIN XX12AT) - The Contractor shall provide hand held explosive detectors capable of detecting explosives.

12.16. Walk Thru X-Ray & Metal Detector (CLIN XX12AU) - The Contractor shall provide walk thru X-ray & metal detector capable of detecting metal.

12.17. X-ray Baggage Scanning Machine airport-type (CLIN XX12AV) – The Contractor shall provide X-ray baggage scanning machine capable of X-raying hand carried luggage and bags to determine its contents. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

13. FORKLIFT WITH OPERATOR (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Contractor shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by theh port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.4. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.5. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.6. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.7. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.8. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. MANLIFT (WITH OPERATOR) (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and a full fuel tank.

18.2. The Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled “SHIP’S SPARE IN TRANSIT”

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship’s arrival.

19.1.4. Shipping documents shall be labeled ‘SHIP’S SPARE(S) IN TRANSIT” and addressed to the ship’s Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. MISCELLANEOUS (CLIN XX20)

20.1. Portable Latrine (CLIN XX20AA)

20.1.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

20.1.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

20.1.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

20.1.4. The Contractor shall clean latrines twice daily.

20.2. Tower Flood Light (CLIN XX20AB) – The Contractor shall provide tower flood light for additional lighting at pierside.

20.3. Security Flood Light (CLIN XX20AC) – The Contractor shall provide security flood light for additional lighting at pierside.

21. OIL BOOMS (CLIN XX21)

21.1. The Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.4. The Contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

23. PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. PRATIQUE (CLIN XX26) - The Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

27. REEFER CONTAINER (CLIN XX27)

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. SHORE POWER (CLIN XX28)

28.1. The Contractor shall provide shore power to the ship using

28.1.1. Port provided permanent connection system.

28.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

28.2. The Contractor shall provide all cables and make all power connections between the generator and ship.

28.3. The availability of shore power shall be in accordance with the schedule established by the ship.

29. RESERVED – SHORE STEAM (CLIN XX29) – The Contractor shall provide shore steam to the ship.

30. STEVEDORE SERVICES (CLIN XX30) - The Contractor shall provide stevedores and supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with qualified drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

33.4. If tugs are not available through the port authority, the Contractor shall use commercially available tugs.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit D - CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW) AND EXERCISE/ LOGISTIC SUPPORT FEES (LOT 2) (CLIN XX36)

36.1. Operations Other Than War (OOTW), sometimes referred to as "contingencies", are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

36.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise."

36.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

36.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO's).

36.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

36.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
36.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
36.5.3. current innoculation records
36.5.4. possess a valid up-to-date passport.

36.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The POC or his representative is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each support location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation

at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor's Husbanding fees and CLINS shall apply.

36.8. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. The Contractor may be required to support multiple operations at the same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.9. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

37. OOTW COST REPORT (CLIN XX37)

37.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

37.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

	X	10A. MOD. OF CONTRACT/ORDER NO. N40345-08-D-0004
	X	10B. DATED (SEE ITEM 13) 29-Feb-2008
CODE QB341	FACILITY CODE	

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS.
IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

☐ A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

☐ B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).

☐ C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:

X D. OTHER (Specify type of modification and authority)
Mutual Agreement

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)
Modification Control Number: nyspnt010816811

1. The purpose of this modification is to add pricing to the following 'RESERVED' CLINs as per attached Exhibit A.

2. The estimated contract total is increased by $99,950.00 from $1,796,469.08 to a new total of $1,896,419.08.

3. All other terms and conditions remain unchanged.:

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

Section B - Supplies or Services and Prices

SECTION B1 - CONTRACT OVERVIEW
SECTION B1 – CONTRACT OVERVIEW

1. OBJECTIVE

1.1. The objective of this contract is to obtain Husbanding Services for U.S. Navy ships and logistics support services required by U.S. Government organizations and agencies in Maldives and Bangladesh.

1.2. Additionally, the husbanding contractor may be called upon to provide services and supplies in support of exercises and Operations Other Than War (OOTW) within the territorial boundaries and in ports of Maldives and Bangladesh.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Maldives and Bangladesh.

2.2. The schedule of supplies/services and prices (See Exhibit A.) is sub-divided into lots. Lots may be for individual Ports or they may include several Ports under one (1) lot. For this contract Lot 1 is for Male, Maldives, Lot 2 is for All Other Ports in Maldives, Lot 3 is for Chittagong, Bangladesh, Lot 4 is for All Other Ports in Bangladesh and Lot 5 is for Operations Other Than War (OOTW) / Contingency Exercise Logistics Support.

2.3. The individual HS items provided under this contract are listed in Exhibit A – Schedule of Supplies and Services. Section B - Schedule of Supplies and Services (referred to as The Schedule) also references this same Exhibit A – Schedule of Supplies and Services. The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services. This clause “DEFINITION OF THE CONTRACTUAL REQUIREMENT” complements the clause herein entitled “REQUIREMENTS (OCT 1995) (FAR 52.216-21).”

4. DURATION OF CONTRACT - This contract is for six (6) months. Also, the contract will include FAR 52.217-8 OPTION TO EXTEND SERVICES clause. The total possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users – The following types of U.S. Government vessels are mandated to use this husbanding services contract. Ships classification and decriptions are listed in Attachment 1.

- U.S. Navy ships
- Military Sealift Command (MSC), Government-Owned Government Operated (GOGO) vessels

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- U.S. Coast Guard vessels
- Military Sealift Command Ships (MSC) Government-Owned Contractor-Operated (GOCO) and Contractor-Owned Contractor-Operated (COCO) ships
- U.S. Army Ships
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent. However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of 3 ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 – Classification of Ships, provides details.

10. LONG TERM SHIP VISITS

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within 3 days

(i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINS that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
JB	Job
LO	Lot
NSP	Not Separately Priced
PT	Port Tariff
TP	Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

    - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

    - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. Example, the cost of CLIN XX35, CRAFT is NSP. The cost of the CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used or not available at time of award of this contract. A "Reserved" item may be "UNRESERVED" at a later time during the duration of the contract when the "Reserved" item becomes commercially available and is required by the Government. Prices shall be competitively negotiated before it is included as a Contract Line Item (CLIN).

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual:	**LEONARD G. FRANCIS**	(b)(6), (b)(7)(C)

Section C - Descriptions and Specifications

SECTION C - PBSW
PERFORMANCE BASED STATEMENT OF WORK (PBSW)

A. GENERAL

1. SCOPE:

1.1. This Section identifies the contractor's areas of areas of responsibility and identifies the Government's
program objectives. The Government's program objectives pertain to husbanding services to be performed by the contractor for U.S. Navy Ships and logistics support services and supplies in support of special operation, such as exercises and Operations Other Than War (OOTW) required by the U.S. Government organizations and agencies in Maldives and Bangladesh. The Contractor shall perform the following tasks when ordered by an AGR.

1.2. The Contractor shall provide and monitor the provision of the supplies and services to assure their timely delivery in conformance with the PBSW. The Contractor shall assure that supplies and services arranged are in accordance with the Supply Officer (SUPPO) requirements and shall resolve any problems in meeting the requirements.

1.3. The Management services also include costs for arranging supplies and services described herein, costs associated with attendance at meetings and pre-deployment briefings. Any other compensation in the form of rebates and/or discounts shall be passed on to the U.S. Government.

1.4. The pricing for all services requiring the use of transportation type conveyances (i.e. trucks, barges for
CLINs for trash removal, CHT removal, potable water, landing barges, oily waste removal, etc) shall include the use of the equipment as required to complete the service in the statement of work (PBSW) without any additional charges for detention or demurrage.

2. QUALITY:

2.1. The contract will not specify how the Contractor is to perform, but measurable performance standards
are established in paragraph 2.2. below to monitor each ship's visit.

2.2. The performance standards are:

- timely submission of Cost Reporting Analysis and Forecasting Tool (CRAFT) estimates within two (2) working days after receipt of the Logistic Requirements (LOGREQ) but no later than 24 hours prior to the ship's arrival,

- timely submission of Cost Reporting Analysis and Forecasting Tool (CRAFT) actual (final) cost report within seven (7) calendar days from the completion of the ship's visit,

- accuracy of the actual (final) CRAFT report compared to the ship's port visit cost report,

- ship's satisfaction of the contractor's services during the port visits as identified in the ship's port visit cost report,

B. HUSBANDING SERVICES

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. U.S. Navy ships have been directed to provide, via e-mail, a copy of the unclassified LOGREQ message directly to the husbanding Contractor as described under Section I – Contract Clauses, Ordering (FAR 52.216-18). This LOGREQ will contain the majority of supplies and services required by the ship, and will represent the order upon which the Contractor shall begin performance.

1.1.2.1. A ship, an activity authorized to pass a LOGREQ on behalf of the ship (i.e. Port Service Office or Defense Attaché Officer (DAO), or an authorized ordering activity may notify the Contractor of a forthcoming visit requiring husbanding services. Upon notification of a visit, the Contractor shall make such preliminary arrangements as necessary with port authorities, other Government Contractors, and other commercial firms to provide supplies and services requested by the ship.

1.1.2.2. Ships will not provide force protection requirements in unclassified LOGREQ messages. The force protection requirements are specified in a classified LOGREQ issued by the ship to Government activities. The activity to which this message is addressed will contact the Contractor and pass the ship's force protection requirements for action. The Contractor shall confirm with the ship that these force protection requirements received have been actually ordered by the ship prior to beginning performance. The ship's Force SUPPO, Supply Officer (SUPPO) or Commanding Officer may also request additional force protection requirements not covered by the classified LOGREQ by email, telephone, or personally upon ship's arrival. The Contractor shall coordinate with the SUPPO before providing any additional force protection. If any other activity or individual orders force protection services (i.e. NCIS, etc) not covered in the ship's classified LOGREQ, the Contractor is required to immediately inform the ship and receive confirmation prior to beginning of these services.

1.1.3. The Contractor shall provide requested services and supplies.

1.1.4. The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's LOGREQ message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs.

1.1.5. These pre-arrival CRAFT estimates shall be provided for all U.S. Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other U.S. Government ship visiting the port.

1.1.6. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché' at the U. S. Defense Attaché Office.

1.1.7. The Contractor shall prepare and stage all required supplies and equipment prior to theship's arrival. Staging may be as required by each location.

1.1.8. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements. For example, the HS Contractor would coordinate Provisioning contractor's delivery dates, times, forklifts, cranes, stevedores, inspections, or any other item needed for them to perform their work at the berth.

1.1.9. The Contractor shall assist the ship's Advance Party to include planning and coordination meetings. When the Contractor hosts an advance party, the Contractor is entitled to bill at the "Subsequent Days daily rate" for husbanding services for each day of support provided "in person" to the advance party.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival. Upon initial boarding the Contractor shall provide all emergency telephone numbers, i.e. Police, Hospital, Firefighters, etc. In addition, the Contractor shall provide a copy of Overview, The Schedule, Port Tariffs and PBSW to the SUPPO.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall visit the ship at least once per day and shall be available on call at all times (24 hours per day, seven days per week) to assist the ship with requirements and to resolve problems. The Contractor shall work with the Government through FISC Detachment Singapore to identify and solve problems and exploit opportunities for cost savings and quality improvement.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank, newspaper, or other official published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. Moneychangers: The Contractor shall arrange for authorized moneychangers for ship personnel.

1.2.7. Laundry Services: The Contractor shall arrange for laundry and dry cleaning services for
the ship.

1.2.8. Interpreter Services: All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship shall provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers this Port location then the HS Contractor shall refer all MWR requests to the authorized ITT contractor.

1.2.11. Passing Requirements For Contractors Under Other Government Contracts:

1.2.11.1. The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts (i.e. Prime Vendor or Defense Energy Supply Center (DESC)) for various supplies and services required. This husbanding service includes all necessary actions to facilitate the acceptance of supplies or services rendered under Government contracts. Any disputes or discrepancies arising from the order will be resolved directly between the SUPPO and the other Contractor(s).

1.2.11.2. The Government will not pay the Contractor for any personal requests from individual crewmembers, whether military or civilian.

1.2.12. Customs and Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. Any excess costs associated with customs and immigration processing shall be submitted to the SUPPO for compensation. Any disputed costs shall be resolved by the Contracting Officer.

1.2.13. Medical Emergencies: If requested, the Contractor may be required to make arrangements for emergency medical treatment of ship's crewmembers while the ship is in port. In cases where a member is airlifted into a port by the ship, the Contractor, in coordination with the U.S. Consulate/Embassy, will arrange for proper medical care until the member can be returned to the ship, or evacuated to the United States. If there are costs associated in arranging these services, the Contractor shall obtain approval from the SUPPO/Contracting Officer prior to providing the support.

1.2.14. The Contractor shall facilitate the ship's timely departure.

1.2.14.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.14.2. The Contractor shall obtain a written receipt from an authorized ship personnel accepting all services or supplies provided.

1.2.14.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES & PROVIDING GENERAL ASSISTANCE

1.3.1. The ship(s) will submit LOGREQ's that include requests for a variety of services and supplies. The Contractor shall verify if any of the requested and supplies can be provided free of charge by the host nation. If these services and supplies are not available free of charge from the host nation they must be provided under this contract. If these services and supplies are not priced in the contract, or if these services and supplies are available under other U.S. Government contracts, the following applies:

1.3.2. SUPPLIES AND SERVICES NOT PRICED IN THE CONTRACT: When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the SUPPO of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three (3) sources for amounts greater than $3,000, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivery information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's SUPPO who shall issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer no later than 7 (seven) days after the ship's departure from the visited port. The Contractor shall deliver to the vendor the SUPPO or FISC Detachment Singapore Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the SUPPO or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall coordinate receipt of the items by the ship. For competition purposes, if three (3) sources are not available in the same port, the Contractor shall document and inform the SUPPO and FISC Detachment Singapore Contracting Officer. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the PBSWs furnished herein when arranging supplies and services.

1.3.3. In the event the above process cannot be followed by the SUPPO, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the sources whose offer is the most advantageous to the Government. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, paragraph 15: Standard for Professional Services.

1.3.4. No later than 60 days after contract award, the contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FFV, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards:

- Shall not be grown (cultivated) using nightsoil;
- Shall be free of pest and insect infestation; and
- Shall be fresh yet not overripe.

The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the SUPPO invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars

(Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained. If three (3) sources are not available in the same port, limiting competition the Contractor shall document and inform SUPPO and FISC Detachment Singapore Contracting Officer.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Detachment, Europe. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8 –Request for Sanitary Inspection. The U.S. Army Veterinary Command requires 90 days advance notice to arrange for inspection of new facilities.

1.4.4. The Contractors shall retain documentation of inspection of sources recommended or selected as suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 – Quality Assuarance Provisions (including Aooendices A & B).

1.5. PRE-SAILING VISIT:

1.5.1. The Contractor shall board the ship one day prior to its sailing date to present invoices for services and items provided under this contract (including non-contract items and port tariffs) that is in proper form and can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and adjustment will be made later.

1.5.2. Payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Naval Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer (CDO), SUPPO, or his designated representative.

2. (RESERVED) Not to be used.

3. (RESERVED) BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall have a flat non-slip surface to serve as a loading/unloading platform for passengers entering or leaving water taxis at the stern or side of the vessel. The barge shall have suitable self-fendering to prevent damage to the ship/water taxis and have a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place fenders between the breasting barge and the ship if requested by the SUPPO.

3.3. The Contractor shall provide a barge to use as a fender or as part of a fendering system between the ship and the pier or between other ships.

4. BROW (CLIN XX04)- Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The Contractor shall provide the brows specified in the schedule as ordered by the ship. The Contractor shall provide a suitable platform to accommodate ship mooring.

5. (RESERVED) CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship to ensure that contractor operations do not cause damage to the ship. The camels shall be flat surface platforms to be placed alongside the pier and sufficiently capable of breasting the ship away from the pier or from other ships.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships covered by this contract. The Contractor shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The Contractor shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence within one (1) hour upon ship's arrival and up to one (1) hour before the ship's departure whether, at anchorage or pierside.

6.2. The CHT services shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the United States Government. In those limited number of cases where this is not possible, the contractor shall provide a system to measure the volume of sewage deposited in the barge by the Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. For vessels that go pierside, where disposals through the use of pipeline is available, the Contractor shall be required to provide hoses, connections, hose connection and disconnection, and monitoring of the CHT removal.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

6.5. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1, paragraph 15., Standards for Professional Services. The Contractor shall comply with all the environmental regulations by the country.

6.7. The Contractor shall submit, as an attachment to the invoices, a document (certified by the ship's personnel) that indicates the quantity collected and the name of the disposal plant where the CHT will be disposed. The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the Contractor's report in writing. The Contractor is also responsible to keep all disposal certificates and shall make them available to FISC Detachment Singapore Contracting Officer upon request. If the ship concurs with the volume, the ship shall pay for the entire amount. If the ship contests the volume, the ship will pay for the amount it actually believes was pumped. The Contractor shall submit a request to FISC Detachment Singapore Contracting Officer for the difference, accompanied by disposal certificates. FISC Detachment Singapore Contracting Officer shall investigate and arrange for payment of any additional amounts that are determined to be due.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. Landlines: Whether installed on a permanent or temporary basis, sufficient landlines shall be made available for official, local, and international use. Charges shall be inclusive of all costs including connection fee, installation and removal of landlines. Usage charge will be the actual charges computed in accordance with the local or national tariff.

7.2. Cellular Telephone Services: Daily charges shall be inclusive of delivery, activation, long distance accounts, provision of 110V to 220V transformers, adapters and extra batteries. Telephone invoices received after the departure of the vessel shall be processed in accordance with Section G – Contract Administration Data, INVOICES AND PAYMENTS.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel, and support equipment such as slings, lifting bars, and nets. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations.

9. (RESERVED) DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations.

12. FORCE PROTECTION (CLIN XX12)

12.1 General: (CLINs XX01 & XX02) The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchor. The contractor must coordinate all aspects of FP planning with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.2.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.2.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.2.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.3. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.3.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.3.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.3.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.4. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.5. Stand-Off Distances:

12.1.5.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.5.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.6 Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.6.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be

given that the use of deadly force may be authorized by the local security guards or police force.

12.1.6.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC DET Singapore KO. The Contractor must explain what the FP service will entail and why it is being required. The KO will coordinate this requirement with appropriate FP personnel at FISC DET Singapore and COMLOGWESTPAC. Once a decision is made then the contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of 5 people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions. The office or tent shall be well lighted and identified for its intended use. The contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 lb, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB and CLIN XX12AC)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. (RESERVED) Floating Line of Demarcation (FLD) (CLIN XX12AD and XX12AE)

12.5.1. General:

12.5.1.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.1.2. The size of the FLD will depend on the class of ship. Pierside, the FLD should be positioned 400 feet (125 meters) fore and aft of the ship and 400 feet (125 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 400 feet (125 meters) outside the swing radius of the ship.

12.5.2. Continuous Line Floating Line of Demarcation (CLIN XX12AC) - The Contractor shall provide a Continuous Line FLD in accordance with Attachment 2 – Floating Line of Demarcation Specifications.

12.5.3. Buoy System Floating Line of Demaracation (CLIN XX12AD and XX12AE) - The Contractor shall provide a Buoy System in accordance with Attachment 2 – Floating Line of Demarcation Specifications.

12.6. Perimeter Fencing (CLIN XX12AF)

12.6.1. The contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material:	Chain link of aluminum or other durable metallic material
Height:	Minimum height of 2.5 meters (7 feet)
Base:	Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point:	Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AG THRU XX12AK)

12.7.1. The contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ships arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AL)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 3 – Picket Boat Operations & Specifications.

12.9. Portable Latrine (CLIN XX12AM)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2 The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. Portable Lighting (CLIN XX12AN)

12.10.1 The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards on Picket Boats (CLIN XX12AP)

12.11.1. The Contractor shall provide security guards to patrol in picket boats.

12.11.2. The Contractor shall comply with Attachment 4 – Security Guard Operations.

12.12. Security Guards Pierside (CLIN XX12AQ

12.12.1. The Contractor shall provide security guards Pierside to ensure only authorized personnel, vehicles, and material are allowed into restricted areas.

12.12.2. The Contractor shall comply with Attachment 4 - Security Guard Operations.

12.13. Two Way Radios (CLIN XX12AR) The Contractor shall provide two way radio sets capable of communicating with the ship to designated individuals.

12.14. (RESERVED) Hand Held Explosive Detector (CLIN XX12AS) – The Contractor shall provide hand held explosive detector capable of detecting explosives.

12.15. Hand Held Wand Metal Detector (CLIN XX12AT) – The Contractor shall provide hand held wand metal detector capable of detecting metal.

12.16. (RESERVED) Walk Thru Metal Detector (CLIN XX12AU) – The Contractor shall provide commercially available walk-thru metal detector equipment comparable to airport security systems type.

12.17. (RESERVED) X-Ray Machine Airport Type with Operators (CLIN XX12AV) The Contractor shall provide commercially available X-Ray machine comparable to airport security systems type. Equipment shall be manned by professionally trained operators to operate the equipment 24 hours a day.

12.18. (RESERVED) Under Carriage Vehicle Scanner (CLIN XX12AW) – The Contractor shall provide under carriage vehicle scanner to scan vehicle undercarriages.

13. FORKLIFT (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations.

14. FUEL (CLIN XX14)

14.1. Ships or other ordering activities may order fuel with the assistance of the Contractor. The Contractor shall advise visiting ships the availability of bunkers, or existing fuel contracts issued by Defense Energy Support Center (DESC) or Navy Petroleum Office (NPO). If requested by the SUPPO, the Contractor shall pass fuel orders to the appropriate fuel supplier, and will coordinate delivery. Disagreements between any DESC Contractor and the Contractor shall be forwarded to the DESC Contracting Officer through FISC Detachment Singapore. The DESC Overseas Ships' Bunkers Contract latest Bulletin may be accessed at http://www.desc.dla.mil. Contractors who buy bunkers or fuel through other than government sources when available without express authority in writing from the ordering officer or contracting officer do so at their own risk. If authorized, government shall not reimburse the contractor for more than what the government cost through approved DESC contracts would have been.

14.2. In the event that no U.S. Government or foreign Government owned bunker is available, or no DESC or NPO available contracts meets a ship's fuel requirement, or as directed in writing by the Contracting Officer, the Contractor shall assist the ship or the ordering official in arranging the

procurement of fuel. This fuel shall be provided in accordance with Attachment 5 – Fuel Specifications. The Contractor shall provide a fuel barge or truck to transport fuel to the ship if required. The Contractor shall be liable for any costs should the fuel provider fail to employ properly oil spill booms as required by local authorities or fails to comply with any local laws or regulations relating to the provision of fuel. Fuel caught in oil booms will be properly disposed. The invoice shall indicate the unit and total price for the fuel and the price for the delivery of fuel to the ship.

14.3. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.4. The Contractor shall load the ordered fuel and transport to the ship "free on board" (f.o.b.) whether at pierside or at anchorage. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.5. In recognition of the fact that fuel is sold by weight (metric tons) and by volume (gallons or liters), the Contractor shall ensure all United States ships are provided with a fuel invoice and the appropriate customs certification demonstrating the quantity of fuel provided in metric tons and in gallons or liters.

14.6. Excess Fuel Procedures. If the ship does not offload all of the fuel ordered, the contractor shall store the excess fuel and diligently attempt to sell it as soon as practicable. The Contractor shall receive a storage fee for up to three (3) days. The Contractor will receive a fuel disposal fee in accordance with the rate it proposed.

15. GARBAGE/TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse.

15.2. The Contractor shall provide a trash barge (with tug service if barge is not self-propelled) 24 hours a day with fendering to prevent damage to the ship and at least four (4) mooring lines to secure alongside the ship at anchorage. The barge's crew shall be entirely responsible for the tending of lines and for barge's security.

15.3. The Contractor is responsible to follow all environmental regulations.

15.4. In instances of bad weather, the Contractor shall remove barges within one hour of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the Contractor at least four (4) hours in advance for the barge pick-up at no additional cost to the Government.

16. LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17) - The Contractor shall provide line handlers with all required safety equipment to secure and unsecure mooring lines from the ship to the pier.

18. MANLIFT (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and full fuel tank.

18.2. The contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver. The Contractor is responsible for retaining proof of delivery documentation for a period of six (6) months for the purpose of reconciling invoices. All contractor material handling operations shall be conducted in a manner that ensures that items are not damaged.

19.2. The Contractor is responsible for providing secure/bonded storage for all inbound cargo and mail.

19.3. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.4. All material shipped shall be labeled “SHIP’S SPARE(S) IN TRANSIT”.

19.5. Material shipped shall arrive at least two (2) working days prior to ship’s arrival.

19.6. Shipping documents shall be labeled ‘SHIP’S SPARE(S) IN TRANSIT” and addressed to the ship’s Commanding Officer of the Unit and care of the Contractor.

19.7. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.8. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.9. If cranes and forklifts are not available at the port, the Contractor shall use forklifts and cranes from the Schedule.

19.10. The Contractor shall receive the package from the carrier and clear it through customs. All materials received shall be delivered while the ship is in port. Any damage must be noted prior to acceptance and reported to the point of contact designated by the ship Supply Officer.

19.11. The Contractor shall send status reports to the ship’s Supply Officer after receipt, after delivery, and if unable to deliver to a designated government representative.

19.12. The Contractor shall forward the material to a location specified by the ship Supply Officer or designated point of contact if for any reason it cannot be delivered to the ship.

20. MISCELLANEOUS (CLIN XX20)

20.1. INTERPRETER SERVICES (CLIN XX20AA) - The Contractor shall provide all interpreter services as ordered by the SUPPO. The interpreter shall be fluent in both spoken and written local language and English.

20.2. (RESERVED) (VARIOUS) (CLIN XX20AB)

21. OIL BOOMS (CLIN XX21) - The Contractor shall provide and deploy oil booms, as necessary and properly dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship and properly dispose it. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.2. The Contractor shall comply with the local environmental requirements where oily waste is disposed and shall be liable for any costs incurred as a result of the Contractor's failure to comply with such requirements. The Contractor shall retain all disposal certificates and shall make them available to FISC Detachment Singapore upon request.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship duty engineer shall verify in writing the amount removed.

22.4. The contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with suitable fendering to prevent damage to the ship and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall pre-position Oily Waste Barges / Trucks when necessary, in accordance with Force protection or other requirements.

22.7. In the event the Contractor subcontracts oily waste disposal, the Contractor shall be liable for any costs incurred as a result of the disposal operator's failure to comply with local requirements.

23. (RESERVED) PAINT FLOAT (CLIN XX23) - The Contractor shall provide paint floats to hold personnel painting the ship. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. (RESERVED) PRATIQUE/QUARANTINE AND INSPECTION SERVICE (QIS) (CLIN XX26) - When entering a port where Pratique /QIS charges apply, the Contractor shall only charge the tariff rate.

27. (RESERVED) REEFER CONTAINER (CLIN XX27) – The Contractor shall provide refrigerated storage at the temperature specified by the ship. Generators shall emit sound levels of less than 84 decibels.

28. (RESERVED) SHORE POWER (CLIN XX28)

28.1. The Contractor shall provide shore power to the ship using

28.1.1. Port provided permanent connection system.

28.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

28.2. The Contractor shall provide all cables and make all power connections between the generator and ship.

28.3. The availability of shore power shall be in accordance with the schedule established by the ship.

29. (RESERVED) SHORE STEAM (CLIN XX29) - The Contractor shall provide Shore Steam to the ship.

30. (RESERVED) STEVEDORES (CLIN XX30) - The Contractor shall provide stevedores with supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and immediate surroundings as practicable. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION (GROUND) VEHICLES (CLIN XX32)

32.1. The Contractor shall provide air conditioned motor vehicle service for official government business.

32.1.1. Sedans shall have a minimum capacity of four (4) passengers including the driver. Sedans shall have a minimum 1800 cc engine.

32.1.2. Passenger capacity for vans shall range from six (6) to 25 passengers as specified in Exhibit A, Schedule of Supplies and Services.

32.1.3. Passenger capacity for buses shall range from 40 to 60 passengers as specified in Exhibit A, Schedule of Supplies and Services.

32.2. The Contractor shall provide covered, lockable trucks to load/off load cargo and mail. The covered truck shall have a hydraulic lift to facilitate loading and offloading. The driver shall assist with loading and offloading.

32.3. The Contractor shall be responsible for security and prevent loss/damage/destruction of cargo and mail.

32.4. All drivers must be fully qualified and have necessary licenses. All vehicles must be properly registered, licensed and insured (including adequate passenger liability insurance). The contractor is responsible for delivering all cargo and personnel to the correct location on schedule.

32.5. At all times that vehicles are being used, the contractor shall ensure that the vehicles are in sound mechanical condition, meet all security requirements and meet all safety standards required by local laws and regulations so as to preclude breakdown and injury. All vehicles shall be in a clean condition when presented for service and shall be free of debris. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government shall have the right to reject the

vehicle for performance of services. The contractor shall ensure that each vehicle is jointly inspected before and after a trip by the contractor and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

32.6. If a vehicle is not operable when required under this contract, the Contractor shall provide, at no additional expense to the Government, a replacement vehicle within two (2) hours that complies in all respects with this contract.

32.7. Substitution of Vehicles:

32.7.1. If the Contractor does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the Contractor shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a sedan is ordered but unavailable, the Contractor shall furnish a higher group vehicle at the price listed for the vehicle originally ordered.

32.7.2. In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

32.8. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or Ordering Officer.

32.9. The Contractor shall obtain written acknowledgement of vehicle service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

32.10. The Contractor shall provide covered trucks with driver.

32.11. The Contractor shall provide drivers who can speak and understand English clearly. In the event if the driver is unable to speak English, the Contractor shall furnish an English speaking rider.

33. TUGS (CLIN XX33) - The Contractor shall provide tugs to bring ships to and from berthing locations.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 6 – Water Taxi Specifications. At the commencement of service, the Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule.

34.2. The Contractor shall ensure that all water taxis are fully licensed, registered, and insured, including adequate liability insurance, in accordance with local laws and regulations.

34.3. When required to arrive early for inspection as a force protection measure, service begins at time of inspection. Upon ship’s scheduled departure, the daily rate/hourly rate shall be pro-rated for water taxi services less than 24 hours in duration.

34.4. If the Contractor cannot provide the size of water taxi ordered, the Contractor shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event, the ship will be charged for the size of the water taxi ordered.

34.5. The Contractor shall return all items left in water taxis to the ship's SUPPO.

34.6. The Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for Government review and inspection.
34.7. Before the commencement of any services under this contract, the Contractor shall make the water taxi available to the ship's Boatswain or designated representative for inspection.

34.8. For any damage or destruction caused by the Government, the Contractor shall be responsible to ensure that the water taxi is jointly inspected before and after each trip by the Contractor and an authorized representative of the Government.

34.9. When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

34.10. If a water taxi is not operable when required under this contract, the Contractor shall immediately provide at no additional expense to the Government, a replacement water taxi which complies in all respects with this contract.

35. REPORTS (CLIN XX35)

35.1. CRAFT REPORT (CLIN XX35AA): The Contractor shall furnish a Cost Reporting and Forecasting Tool (CRAFT) Report covering all port costs paid by each ship for which the Contractor provides husbanding services. The term "port cost" includes all supplies or services identified in the section of contract titled "Supplies or Services" in Exhibit A and non-contract line items. The report format is provided in Exhibit C – CRAFT Report. The report shall be submitted to the FISC Detachment Singapore Contracting Officer or designated representative within seven (7) working days of each ship's departure.

35.2. Any revisions to the CRAFT shall be forwarded to FISC Detachment Singapore within seven (7) days of the change. If a ship departs port without paying all or part of a bill, the Contractor shall identify the line items not paid and support a change when the bill is paid.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTIGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36)

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted

36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification

36.3.3. Current inoculation records

36.3.4. Possess a valid up-to-date passport

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit D. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

Section G - Contract Administration Data

SECTION G-INVOICES & PAYMENTS
INVOICES AND PAYMENTS

1. The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

2. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices presented to the ship shall be provided to FISC Det Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

Section I - Contract Clauses

ADDITIONAL TERMS & CONDITIONS
ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered “issued” when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(1) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(2) *Maximum ordering amount*. The Contractor is not obligated to honor --

(i) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(ii) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(iii) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(3) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(4) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government’s requirements do not result in orders in the quantities described as “estimated” or “maximum” in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity’s requirement for the supplies and services specified in the Schedule that exceed the quantities that the activity may furnish within its own capabilities.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(j) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(k) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(l) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address:	FISC Detachment Singapore PSA Sembawang Terminal Deptford Road, Building 7-4, Unit 2-9 Singapore 759657
Military Address:	PSC 470, Box 2150 FPO AP 96534-2150
FAX Numbers:	(65)-6-750-2639 or 2382

(m) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 202) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(n) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

CLAUSES INCORPORATED BY REFERENCE

52.212-4	Contract Terms and Conditions--Commercial Items	SEP 2005
52.212-5	Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items	SEP 2005
52.216-21	Requirements	OCT 1995

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Apr 2003) (46 U.S.C. Appx 1241 and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

(c) In addition to the clauses listed in paragraph (e) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (Federal Acquisition Regulation 52.212-5), the Contractor shall include the terms of the following clauses, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

252.225-7014 Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).

252.237-7019 Training for Contractor Personnel Interacting with Detainees (SEP 2005) (Section 1092 of Pub. L. 108-375).

252.247-7023 Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631).

252.247-7024 Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) In addition to the clauses listed in paragraph (b) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5 (JUL 2005) (DEVIATION), the Contractor shall include the terms of the following clause, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

252.225-7014	Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).
252.232-7019	Training for Contractor Personnel Interacting with Detainees (SEP 2005) (Section 1092 of Pub. L. 108-375).
252.247-7023	Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631)
252.247-7024	Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

1. The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

2. Displacement is expressed in tons and represents fully loaded displacement.

3. The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

4. There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACH 2-FLD SPECIFICATION
ATTACHMENT 2 - FLOATING LINE OF DEMARCATION SPECIFICATIONS (CLIN XX12XX)

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

3.1. Continuous Line FLD - If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

3.1.1. FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

3.1.2. Specifications:

3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night,

that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACH 3-PICKET BOAT OPS & SPE
ATTACHMENT 3 - PICKET BOAT OPERATIONS & SPECIFICATIONS (CLIN XX12XX)

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACH 4-SECURITY GUARD OPS
ATTACHMENT 4 - SECURITY GUARD OPERATIONS (CLIN XX12XX)

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pier side or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through local police officials.

1.3. There are two types of security guard services. One is for providing guards pier side to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pier side:

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pier side guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pier side security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxis. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pier side operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. Rules of Engagement (ROEs) Pier side

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. Rule of Engagement (ROEs) for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following ROEs are to be followed:

3.8.1.1. Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2. If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3. The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4. As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACH 5-FUEL SPEC
ATTACHMENT 5 - FUEL SPECIFICATIONS (CLIN XX12XX)

The following are the Fuel Specifications for this contract:

SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	Requirement	Text Method
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC	 Record Record	D 86 3/

90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	357ºC 385ºC 3.0	
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100ml, (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664
Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/
Corrosion, @ 100ºC, (max)	No. 1 ASTM	D 130
Hydrogen Content, % wt., (min)	12.5	D 4808
Ignition Quality, Cetane Number, (min) Cetane Index, (min)	42	D 613 (R), D 976 8/
Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2622
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

(a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

(b) The test temperature shall be 25ºC.

(c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

Minimum Requirements for Purchases of Commercial Distillate Fuels ((Navy) Marine Gas Oil) for Bunkers

The following minimum requirements have been established for use when buying fuel (gas oil - 100% distillate) from commercial sources when F76 is not available. Marine Gas Oil is not acceptable as cargo fuel on Navy Oilers.

TEST	METHOD	REQUIREMENTS
1. Cetane Number	ASTM D 613	45 min
or		
Cetane Index	ASTM D 976	45 min

Note: A cetane index of 41 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exceed a maximum of 338ºC. A cetane number of 40 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exceed a maximum of 338°C.

2. Appearance @ 21ºC or ambient temperature (whichever higher)	Visual	Clear & Bright
or		
Water and Sediment	ASTM D 2709	0.05% max
3. Distillation. 90% Point	ASTM D 86	375ºC max
4. Flash Point	ASTM D 93	60ºC min
5. Pour Point	ASTM D 97	Report
6. Cloud Point	ASTM D 2500	-1.1ºC (30 °F)
7. Viscosity @ 40ºC	ASTM D 455	1.7 - 4.5 CST
8. Color	ASTM D 1500	3 max
9. Gravity	ASTM D 1298, D 287	Record
10. Carbon Residue	ASTM D 524	0.35% max

11.	Ash	ASTM D 482	0.01% max
12.	Sulfur	ASTM D 129, D 1552 D2622	1.00% max
13.	Copper Corrosion	ASTM D 130	3 max

C16.23-2 COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC JAN 1998)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min

NOTE: A Cetane Number of 40 minimum, or a Cetane Index of 41 minimum, is acceptable provided the 90 Percent Distillation Point does not exceed a maximum of 338^{o}C.

2.	Appearance @ 21^{o}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{o}C max.
4.	Flash Point	ASTM D 93	60^{o}C min

NOTE: The flash point value is absolute and no value less than 60^{o}C is permissible.

5.	Cloud Point	ASTM D 2500	-1.1^{o}C (30^{o}F) max.

NOTE: Cloud Point results will be evaluated based upon bunkering location.

6.	Viscosity @ 40^{o}C	ASTM D 445	1.7 - 4.5 cst
7.	Color	ASTM D 1500	3 max.

NOTE FOR DOMESTIC ITEMS: This Color test requirement is deleted if red dye has been added in compliance with U.S. Environmental Protection Agency or Internal Revenue Service regulations; however, the resulting fuel/dye blend must have a red tint. It shall not be visually brown or darker in appearance.

8.	Density @ 15^{o}C	ASTM D 1298	876 kg/m^{3} max.
9.	Carbon Residue on 10% bottoms	ASTM D 524	0.35 mass % max.
		ASTM D 189	
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur	ASTM D 4294,	1.0 mass % max.
		ASTM D 1552, or ASTM D 2622	
12.	Corrosion	ASTM D 130	3 max.
13.	Distillate Fuel (fuel shall contain no residual)	None	100%

C36 FUEL OIL, INTERMEDIATE, GRADES RMB-10 (IFO 60)/RME-25 (IFO 180)/RMG-35 (IFO 380) (DESC MAY 1997)

Product shall conform to ISO 8217:1996 or ASTM D 2069-91. Product conforming to ASTM D 2069-91 shall meet the following additional requirements:

REQUIREMENTS	GRADE RMB-10 (IFO 60)	GRADE RME-25 (IFO-180)	GRADE RMG-35 (IFO 380)	TEST METHOD
Density @15°C, kg/m^3, max	981.0	991.0	991.0	ISO 3675/12185
Aluminum plus silicon, mg/kg, max	80	80	80	ISO 10478
Total Sediment, potential, %(m/m), max	0.10	0.10	0.10	ISO 10307-2

ATTACH 6-WATER TAXI SPEC

ATTACHMENT 6 - WATER TAXI SPECIFICATIONS – (CLIN XX34)

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Detachment Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and these specifications, the ship will immediately notify the Contractor, the FISC Detachment Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including Commander Pacific Fleet (COMPACFLT).

5. COMSEVENTHFLT Specifications:

Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable host nation laws and regulations. Notwithstanding

compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

The following information shall be conspicuously posted in both English and the appropriate local language:

- Current Operator's/Captain's license and boat names.
- Passenger/weight capacity limits notice.
- Location of life jackets and other life saving equipment.
- Location of all exits indicated in large letters.
- Emergency procedures.
- Emergency lighting, both permanent and hand held, shall be available and in working order at all times.
- Operation of the boat shall be in a safe and seaworthy manner.
- The consumption of alcoholic beverages shall not be permitted aboard the boat.

Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by host nation for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

Security: During the term of this contract the ship(s) to be serviced agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

(a) Hull:

- Watertight integrity of weather decks, bulkheads, watertight closures and interior hull structures.
- Superstructure, including masts and stacks.
- Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.
- Provisions for drainage of sea water from exposed decks over the side and not into the bilges.
- Access/egress points- adequacy of number and location.

(b) Machinery:

- 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.
- Main propulsion and auxiliary machinery essential to operation of boat.
- Sea and bulkhead closure valves.
- Bilge auction strainers and dewatering systems-bilge pump to be tested by operation
- Bilges free of flammable liquids

(c) Electrical:

- Cables.
- Navigation, deck, and emergency lights.
- Rotating electrical machinery; e.g., generators and motors --Storage batteries

(d) Lifesaving equipment:

- Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.
- Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.
- First aid kits, life rings and distress lights.
- Distress signaling devices

(e) Fire fighting equipment:

- Fire pump - test by subjecting fire hose(s) to fire pump pressure.
- Portable fire extinguishers.
- Fixed systems, e.g., $C0_2$ cylinders.

(f) Steering apparatus:

(g) Miscellaneous systems and equipment:

- Harbor charts.
- Ground tackle and mooring lines.
- Whistle/fog horn, bell.
- Lighted compass.
- Radar.
- 2-way radio capable of Bridge-to-Bridge communications.
- Current license.

Operator qualifications.

Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement is that contained below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

i. Safety of operations. Insure the following are present and in working condition:
ii. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.
iii. Fire extinguishers sufficient for the size of the vessel operated.
iv. Radio (with battery backup) capable of Bridge-to-Bridge communications.
v. Anchor/chain sufficiency for the size of the vessel operated.
vi. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.
vii. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:
viii. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.
ix. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.
x. Ensure no bare or exposed electrical wires or connections are located in the passenger area.
xi. Validate that sufficient unobstructed exits are present and marked in English.
xii. Verify that no missile hazards, gear adrift, or trip hazards exist.

The following shall be conspicuously displayed, in English:

- Passenger/weight capacity.
- Location and number of life jackets.
- Location of life saving equipment.
- Locations of exits (if not obvious).

Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide

information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACH 7-REQ 4 SANITARY INSPEC
ATTACHMENT 7 - SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4
Singapore 759657

Dear Sir:

We are interested in supplying (specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhouses and dairies only).
List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.
European Economic community (EEC) and United States Department of Agriculture (USDA) plant establishment number(s).

ATTACH 8-QA PROVISIONS
ATTACHMENT 8 - QUALITY ASSURANCE PROVISIONS - September 2006

SECTION I. GENERAL REQUIREMENTS

1. SANITARILY APPROVED SOURCES: All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas

(http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. DELIVERY VEHICLES: The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semi-perishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. CODE DATING: Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. PACKAGING: Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. SHELF LIFE REQUIREMENTS: Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. TEMPERATURE REQUIREMENTS: Unless otherwise specified in this agreement, all perishable products shall be delivered between 32oF-41oF (0oC-5oC) for chilled and 0oF (-18oC) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. REJECTED ITEM: Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. FOREIGN ORIGIN PRODUCTS: Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD: See Appendix A below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. DAIRY PRODUCTS:

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32oF and 41oF (0oC and 5oC). Frozen products shall be delivered at 0oF (-18oC) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32oF and 41oF (0oC and 5oC).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32oF and 50oF (0oC and 10oC).

2. FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35oF and 55 °F (2oC and 12oC).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14oC). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

FROZEN MEAT AND POULTRY

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0oF (-18oC) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. FROZEN WATERFOODS:

a. Temperature at delivery 0oF (-18oC) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

SHELL EGGS:

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor’s name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41oF (5oC) or below.

6. BAKERY PRODUCTS:

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide (S02) in vehicle and no chemicals that release S02 should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55o to 65oF(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit 1
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons 1 (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges 1 (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red

Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide (S02) in vehicle and no chemicals that release S02 should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

1 Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products1,2

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs1,2		
	Aerobic Plate Count (APC)	Coliform Count ATP (RLU) Counts
Environmental swab See Note 3	100 per 50 sq cm	10 per 50 sq cm

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts4	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus 1	10 per gram	100 per gram
Vibrio vulnificus2,3	Zero (0) Tolerance	
Salmonella2	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) 3		Coliform	Combined Yeast
			count	and Mold count
Product(s)	m	M		
Aseptically processed juice1	0		0	0
Pasteurized Juice2		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice4	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee 1,3,4		
Counts 9	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp 7	200 per gram	
Streptococcus ssp 7	10 per gram	
Listeria monocytogenes8	0	
Salmonella ssp2,8	0	
Vibrio ssp5,8	0	
Salt %	> 2.5/wt	< 3.5/wt
pH	> 4.2	< 4.7
Polygalacturonase 6	Negative	

m =values above this level, but below that of M are marginal microbiological quality.

M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance1	
E.coli O157:H7	Zero (0) Tolerance1	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables 4		
Counts3	m	M

Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram2	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance1	
Salmonella species	Zero (0) Tolerance1	
Listeria moncytogenes	Zero (0) Tolerance1	
E. coli 0157:H7	Zero (0) Tolerance1	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. < 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level2

Counts	m	M
Standard plat count 1	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu

Counts2	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram	

Staphylococcus aureus	100 per gram	1000 per gram
Salmonella species1	Zero (0) Tolerance1	
Listeria moncytogenes1	Zero (0) Tolerance1	
Yersinia entercoliticus1	Zero (0) Tolerance1	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water1 and Vending Machine Water2 and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count 5	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride2		
Arsenic2		
Trihalomethanes2		
Chlorine2		
Dissolved Solids4		
Silver 3	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products4

Product(s)	APC3	Listeria spp.2	Salmonella2	Coliform2	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky 1	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products2,4

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram 3	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species1	Zero (0) Tolerance1	
Listeria moncytogenes1	Zero (0) Tolerance1	
E. coli 0157:H71	Zero (0) Tolerance1	
Campylobacter jejuni	Zero (0) Tolerance1	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. < 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905	All fish, meat, poultry, and shellfish, including:	Crabs, live.

(*Notes 2, 3)	Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries. Pies. Soft pretzels. Won ton wrappers. Filled bakery items.	All other bakery products, including: Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry. Cookies, unfilled. Crackers. Cupcakes, unfilled. Dough, frozen or chilled. Dumplings, frozen. English muffins. Flour. Fruitcakes. Melba toast. Muffins Pancake batter, frozen. Pancake/waffle mix. Pasta, dry (noodles). Pizza crust. Taco shells. Toaster pastries.

		Pie crusts, unfilled. Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically: Fish, meat, poultry, dairy, egg, and shellfish products. Pickled eggs. Frozen dinners. Pudding novelties, frozen or chilled. Tofu.	All other dietary and specialty preparations, including: Baby formula, canned. Chips, nacho or potato. Creamer, coffee, imitation (non-dairy). Dips. Nacho cheese, canned. Nutri-why. Popcorn. Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including: Salad dressings. Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically: Ice. Bottled water.	All other nonalcoholic beverages, including: Dry ice. Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.

2. Meat and poultry establishments listed in the USDA Meat and Poultry Inspection Directory may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.

3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the USDC Approved List of Fish Establishments and Products.

4. Directory listing is not required for shell egg sources listed in the Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs. Establishments listed in the USDA Meat and Poultry Inspection Directory for dried or liquid/frozen egg products may serve as sources for those products, as coded.

5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to

serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the Dairy Plants Surveyed and Approved for USDA Grading Service may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.

6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.

7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.

8. Only pasteurized juices are authorized for purchase by the DOD.

9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.

10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS.
IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

☐ A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

☐ B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).

☐ C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:

X D. OTHER (Specify type of modification and authority)
Mutual Agreement

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)
Modification Control Number: nysmnk020816813

1. This modification is issued to extend this husbanding contract for Maldives and Bangladesh for a period of 6 months from 09 May through 08 November 2008. This is in accordance to FAR 52.217-8 OPTION TO EXTEND SERVICES.

2. The total estimated value of the contract is increased from US$90, 151.20 by US$90,151.20 to obtain a new total of US$180,302.40.

3. All other terms and conditions remain unchanged.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

CLAUSES INCORPORATED BY REFERENCE

52.204-7	Central Contractor Registration	JUL 2006
52.212-4	Contract Terms and Conditions--Commercial Items	SEP 2005
52.232-33	Payment by Electronic Funds Transfer--Central Contractor Registration	OCT 2003

CLAUSES INCORPORATED BY FULL TEXT

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2006) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (SEP 2006) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (FEB 2006) (46 U.S.C. Appx 1241(b) and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

http://www.acq.osd.mil/dp/dars/
http://www.arnet.gov/
http://farsite.hill.af.mil/

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (OCT 2006) (DEVIATION)

(a) In addition to the clauses listed in paragraph (b) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5 (JUN 2006) (DEVIATION), the Contractor shall include the terms of the following clause, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

252.225-7014	Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).
252.237-7019	Training for Contractor Personnel Interacting with Detainees (SEP 2006) (Section 1092 of Pub. L. 108-375).
252.247-7023	Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631)
252.247-7024	Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

252.243-7001 PRICING OF CONTRACT MODIFICATIONS (DEC 1991)

When costs are a factor in any price adjustment under this contract, the contract cost principles and procedures in FAR part 31 and DFARS part 231, in effect on the date of this contract, apply.

SUP 5252.243-9400 Authorized Changes Only By the Contracting Officer (JAN 1992)

AUTHORIZED CHANGES ONLY BY THE CONTRACTING OFFICER (JAN 1992)

(a) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicate with Contractor personnel during the performance of this contract shall constitute a change under the 『Changes』 clause of this contract.
(b) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(c) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely with the Contracting Officer. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and telephone number of the Contracting Officer is:

Section B - Supplies or Services and Prices

SECTION B1 - OVERVIEW
SECTION B1 - OVERVIEW OF CONTRACT

1. OBJECTIVE

1.1. The objective of this contract is to obtain Husbanding Services for U.S. Navy ships and logistics support services required by U.S. Government organizations and agencies in Mauritius.

1.2. Additionally, the husbanding contractor may be called upon to provide services and supplies in support of exercises and Operations Other Than War (OOTW) within the territorial boundaries and in ports of Mauritius.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Mauritius.

2.2. The schedule of supplies/services and prices (See Exhibit A.) is sub-divided into lots. Lots may be for individual Ports or they may include several Ports under one (1) lot. For this contract Lot 1 is for Mauritius (Port Louis), Lot 2 is for All Other Ports in Mauritius and Lot 3 is for Operation Other Than War (OOTW) / Contingency Exercise Logistics Support.

2.3. The individual HS items provided under this contract are listed in Exhibit A – Schedule of Supplies and Services. Section B - Schedule of Supplies and Services (referred to as The Schedule) also references this same Exhibit A – Schedule of Supplies and Services. The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services. This clause “DEFINITION OF THE CONTRACTUAL REQUIREMENT” complements the clause herein entitled “REQUIREMENTS (OCT 1995) (FAR 52.216-21).”

4. DURATION OF CONTRACT - This contract is for six (6) months. Also, the contract will include FAR 52.217-8 OPTION TO EXTEND SERVICES clause. The total possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users – The following types of U.S. Government vessels are mandated to use this husbanding services contract. Ships classification and decriptions are listed in Attachment 1.

- U.S. Navy ships
- Military Sealift Command (MSC), Government-Owned Government Operated (GOGO) vessels
- U.S. Coast Guard vessels

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (MSC) Government-Owned Contractor-Operated (GOCO) and Contractor-Owned Contractor-Operated (COCO) ships
- U.S. Army Ships
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent. However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of 3 ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 – Classification of Ships, provides details.

10. LONG TERM SHIP VISITS

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within 3 days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship

departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to,

or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINS that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
JB	Job

LO	Lot
NSP	Not Separately Priced
PT	Port Tariff
TP	Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

    - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

    - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. Example, the cost of CLIN XX35, CRAFT is NSP. The cost of the CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used or not available at time of award of this contract. A “Reserved” item may be “UNRESERVED” at a later time during the duration of the contract when the “Reserved” item becomes commercially available and is required by the Government. Prices shall be competitively negotiated before it is included as a Contract Line Item (CLIN).

- SUPPO: A ship’s Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

_____

_____

Tel No: _____

Fax No: _____

Mobile: _____

E-mail address: _____

ITEM NO	SUPPLIES/SERVICES	ESTIMATED QUANTITY	UNIT	UNIT PRICE	ESTIMATED AMOUNT

Section C - Descriptions and Specifications

SECTION C - STATEMENT OF WORK
SECTION C – PERFORMANCE BASED STATEMENT OF WORK (PBSW)

A. GENERAL

1. SCOPE:

1.1. This Section identifies the contractor's areas of areas of responsibility and identifies the Government's
program objectives. The Government's program objectives pertain to husbanding services to be performed by the contractor for U.S. Navy Ships and logistics support services and supplies in support of special operation, such as exercises and Operations Other Than War (OOTW) required by the U.S. Government organizations and agencies in the specify country. The Contractor shall perform the following tasks when ordered by an AGR.

1.2. The Contractor shall provide and monitor the provision of the supplies and services to assure their timely delivery in conformance with the PBSW. The Contractor shall assure that supplies and services arranged are in accordance with the Supply Officer (SUPPO) requirements and shall resolve any problems in meeting the requirements.

1.3. The Management services also include costs for arranging supplies and services described herein, costs associated with attendance at meetings and pre-deployment briefings. Any other compensation in the form of rebates and/or discounts shall be passed on to the U.S. Government.

1.4. The pricing for all services requiring the use of transportation type conveyances (i.e. trucks, barges for
CLINs for trash removal, CHT removal, potable water, landing barges, oily waste removal, etc) shall include the use of the equipment as required to complete the service in the statement of work (PBSW) without any additional charges for detention or demurrage.

2. QUALITY:

2.1. The contract will not specify how the Contractor is to perform, but measurable performance standards
are established in paragraph 2.2. below to monitor each ship's visit.

2.2. The performance standards are:

- timely submission of Cost Reporting Analysis and Forecasting Tool (CRAFT) estimates within two (2) working days after receipt of the Logistic Requirements (LOGREQ) but no later than 24 hours prior to the ship's arrival,
- timely submission of Cost Reporting Analysis and Forecasting Tool (CRAFT) actual (final) cost report within seven (7) calendar days from the completion of the ship's visit,
- accuracy of the actual (final) CRAFT report compared to the ship's port visit cost report,
- ship's satisfaction of the contractor's services during the port visits as identified in the ship's port visit cost report,

B. HUSBANDING SERVICES

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. U.S. Navy ships have been directed to provide, via e-mail, a copy of the unclassified LOGREQ message directly to the husbanding Contractor as described under Section I – Contract Clauses, Ordering (FAR 52.216-18). This LOGREQ will contain the majority of supplies and services required by the ship, and will represent the order upon which the Contractor shall begin performance.

1.1.2.1. A ship, an activity authorized to pass a LOGREQ on behalf of the ship (i.e. Port Service Office or Defense Attaché Officer (DAO), or an authorized ordering activity may notify the Contractor of a forthcoming visit requiring husbanding services. Upon notification of a visit, the Contractor shall make such preliminary arrangements as necessary with port authorities, other Government Contractors, and other commercial firms to provide supplies and services requested by the ship.

1.1.2.2. Ships will not provide force protection requirements in unclassified LOGREQ messages. The force protection requirements are specified in a classified LOGREQ issued by the ship to Government activities. The activity to which this message is addressed will contact the Contractor and pass the ship's force protection requirements for action. The Contractor shall confirm with the ship that these force protection requirements received have been actually ordered by the ship prior to beginning performance. The ship's Force SUPPO, Supply Officer (SUPPO) or Commanding Officer may also request additional force protection requirements not covered by the classified LOGREQ by email, telephone, or personally upon ship's arrival. The Contractor shall coordinate with the SUPPO before providing any additional force protection. If any other activity or individual orders force protection services (i.e. NCIS, etc) not covered in the ship's classified LOGREQ, the Contractor is required to immediately inform the ship and receive confirmation prior to beginning of these services.

1.1.3. The Contractor shall provide requested services and supplies.

1.1.4. The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's LOGREQ message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs.

1.1.5. These pre-arrival CRAFT estimates shall be provided for all U.S. Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other U.S. Government ship visiting the port.

1.1.6. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché' at the U. S. Defense Attaché Office.

1.1.7. The Contractor shall prepare and stage all required supplies and equipment prior to theship's arrival. Staging may be as required by each location.

1.1.8. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements. For example, the HS Contractor would coordinate Provisioning contractor's delivery dates, times, forklifts, cranes, stevedores, inspections, or any other item needed for them to perform their work at the berth.

1.1.9. The Contractor shall assist the ship's Advance Party to include planning and coordination meetings. When the Contractor hosts an advance party, the Contractor is entitled to bill at the "Subsequent Days daily rate" for husbanding services for each day of support provided "in person" to the advance party.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival. Upon initial boarding the Contractor shall provide all emergency telephone numbers, i.e. Police, Hospital, Firefighters, etc. In addition, the Contractor shall provide a copy of Overview, The Schedule, Port Tariffs and PBSW to the SUPPO.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall visit the ship at least once per day and shall be available on call at all times (24 hours per day, seven days per week) to assist the ship with requirements and to resolve problems. The Contractor shall work with the Government through FISC Detachment Singapore to identify and solve problems and exploit opportunities for cost savings and quality improvement.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank, newspaper, or other official published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. Moneychangers: The Contractor shall arrange for authorized moneychangers for ship personnel.

1.2.7. Laundry Services: The Contractor shall arrange for laundry and dry cleaning services for the ship.

1.2.8. Interpreter Services: All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service

for the ship. The ship shall provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers this Port location then the HS Contractor shall refer all MWR requests to the authorized ITT contractor.

1.2.11. Passing Requirements For Contractors Under Other Government Contracts:

1.2.11.1. The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts (i.e. Prime Vendor or Defense Energy Supply Center (DESC)) for various supplies and services required. This husbanding service includes all necessary actions to facilitate the acceptance of supplies or services rendered under Government contracts. Any disputes or discrepancies arising from the order will be resolved directly between the SUPPO and the other Contractor(s).

1.2.11.2. The Government will not pay the Contractor for any personal requests from individual crewmembers, whether military or civilian.

1.2.12. Customs and Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. Any excess costs associated with customs and immigration processing shall be submitted to the SUPPO for compensation. Any disputed costs shall be resolved by the Contracting Officer.

1.2.13. Medical Emergencies: If requested, the Contractor may be required to make arrangements for emergency medical treatment of ship's crewmembers while the ship is in port. In cases where a member is airlifted into a port by the ship, the Contractor, in coordination with the U.S. Consulate/Embassy, will arrange for proper medical care until the member can be returned to the ship, or evacuated to the United States. If there are costs associated in arranging these services, the Contractor shall obtain approval from the SUPPO/Contracting Officer prior to providing the support.

1.2.14. The Contractor shall facilitate the ship's timely departure.

1.2.14.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.14.2. The Contractor shall obtain a written receipt from an authorized ship personnel accepting all services or supplies provided.

1.2.14.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES & PROVIDING GENERAL ASSISTANCE

1.3.1. The ship(s) will submit LOGREQ's that include requests for a variety of services and supplies. The Contractor shall verify if any of the requested and supplies can be provided free of charge by the host nation. If these services and supplies are not available free of charge from the host nation they must be

provided under this contract. If these services and supplies are not priced in the contract, or if these services and supplies are available under other U.S. Government contracts, the following applies:

1.3.2. SUPPLIES AND SERVICES NOT PRICED IN THE CONTRACT: When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the SUPPO of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three (3) sources for amounts greater than $3,000, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivery information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's SUPPO who shall issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer no later than 7 (seven) days after the ship's departure from the visited port. The Contractor shall deliver to the vendor the SUPPO or FISC Detachment Singapore Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the SUPPO or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall coordinate receipt of the items by the ship. For competition purposes, if three (3) sources are not available in the same port, the Contractor shall document and inform the SUPPO and FISC Detachment Singapore Contracting Officer. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the PBSWs furnished herein when arranging supplies and services.

1.3.3. In the event the above process cannot be followed by the SUPPO, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the sources whose offer is the most advantageous to the Government. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, paragraph 15: Standard for Professional Services.

1.3.4. No later than 60 days after contract award, the contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FFV, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards:

- Shall not be grown (cultivated) using nightsoil;
- Shall be free of pest and insect infestation; and
- Shall be fresh yet not overripe.

The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the SUPPO invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the

FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained. If three (3) sources are not available in the same port, limiting competition the Contractor shall document and inform SUPPO and FISC Detachment Singapore Contracting Officer.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Detachment, Europe. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8 –Request for Sanitary Inspection. The U.S. Army Veterinary Command requires 90 days advance notice to arrange for inspection of new facilities.

1.4.4. The Contractors shall retain documentation of inspection of sources recommended or selected as suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9 – Quality Assuarance Provisions (including Aooendices A & B).

1.5. PRE-SAILING VISIT:

1.5.1. The Contractor shall board the ship one day prior to its sailing date to present invoices for services and items provided under this contract (including non-contract items and port tariffs) that is in proper form and can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and adjustment will be made later.

1.5.2. Payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Naval Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within seven (7) working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer (CDO), SUPPO, or his designated representative.

2. (RESERVED) Not to be used.

3. (RESERVED) BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall have a flat non-slip surface to serve as a loading/unloading platform for passengers entering or leaving water taxis at the stern or side of the vessel. The barge shall have suitable self-fendering to prevent damage to the

ship/water taxis and have a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place fenders between the breasting barge and the ship if requested by the SUPPO.

3.3. The Contractor shall provide a barge to use as a fender or as part of a fendering system between the ship and the pier or between other ships.

4. BROW (CLIN XX04)- Most US Navy vessels carry brows. However, the use of their own brows is dependent upon the type of mooring obtained and other vessel considerations. The Contractor shall provide the brows specified in the schedule as ordered by the ship. The Contractor shall provide a suitable platform to accommodate ship mooring.

5. (RESERVED) CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship to ensure that contractor operations do not cause damage to the ship. The camels shall be flat surface platforms to be placed alongside the pier and sufficiently capable of breasting the ship away from the pier or from other ships.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor is responsible for the entire cycle necessary to collect, remove, and dispose the Collection Holding Transfer (CHT) bacteriological/chemical liquids from ships covered by this contract. The Contractor shall provide all necessary equipment, personnel and facilities to perform the services including pumps, hoses and connections compatible with the ships being serviced. The Contractor shall be responsible for the supervision of the collection, transportation and disposal services to avoid any overflow of waste on the barge and at the pier. Services shall commence within one (1) hour upon ship's arrival and up to one (1) hour before the ship's departure whether, at anchorage or pierside.

6.2. The CHT services shall be a dedicated service. The term "dedicated service" means a service provided exclusively to the United States Government. In those limited number of cases where this is not possible, the contractor shall provide a system to measure the volume of sewage deposited in the barge by the Government's ship or otherwise ensure that the ship is charged only for its "pro rata" share of CHT. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. For vessels that go pierside, where disposals through the use of pipeline is available, the Contractor shall be required to provide hoses, connections, hose connection and disconnection, and monitoring of the CHT removal.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

6.5. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1, paragraph 15., Standards for Professional Services. The Contractor shall comply with all the environmental regulations by the country.

6.7. The Contractor shall submit, as an attachment to the invoices, a document (certified by the ship's personnel) that indicates the quantity collected and the name of the disposal plant where the CHT will be disposed. The ship's personnel shall verify all removal figures at time of CHT collection and the ship duty engineer shall certify the accuracy of the Contractor's report in writing. The Contractor is also responsible to keep all disposal certificates and shall make them available to FISC Detachment Singapore Contracting Officer upon request. If the ship concurs with the volume, the ship shall pay for the entire

amount. If the ship contests the volume, the ship will pay for the amount it actually believes was pumped. The Contractor shall submit a request to FISC Detachment Singapore Contracting Officer for the difference, accompanied by disposal certificates. FISC Detachment Singapore Contracting Officer shall investigate and arrange for payment of any additional amounts that are determined to be due.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. Landlines: Whether installed on a permanent or temporary basis, sufficient landlines shall be made available for official, local, and international use. Charges shall be inclusive of all costs including connection fee, installation and removal of landlines. Usage charge will be the actual charges computed in accordance with the local or national tariff.

7.2. Cellular Telephone Services: Daily charges shall be inclusive of delivery, activation, long distance accounts, provision of 110V to 220V transformers, adapters and extra batteries. Telephone invoices received after the departure of the vessel shall be processed in accordance with Section G – Contract Administration Data, INVOICES AND PAYMENTS.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel, and support equipment such as slings, lifting bars, and nets. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations.

12. FORCE PROTECTION (CLIN XX12)

12.1 General: (CLINs XX01 & XX02) The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchor. The contractor must coordinate all aspects of FP planning with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.2.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.2.2. The Contractor shall issue photo identification badges to their personnel and

ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.2.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.3. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.3.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.3.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.3.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.4. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.5. Stand-Off Distances:

12.1.5.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.5.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.6 Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.6.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.6.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)

- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC DET Singapore KO. The Contractor must explain what the FP service will entail and why it is being required. The KO will coordinate this requirement with appropriate FP personnel at FISC DET Singapore and COMLOGWESTPAC. Once a decision is made then the contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of 5 people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions. The office or tent shall be well lighted and identified for its intended use. The contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 lb, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. Floating Line of Demarcation (FLD) (CLIN XX12AC, XX12AD and XX12AE)

12.5.1. General:

12.5.1.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance

around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.1.2. The size of the FLD will depend on the class of ship. Pierside, the FLD should be positioned 400 feet (125 meters) fore and aft of the ship and 400 feet (125 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 400 feet (125 meters) outside the swing radius of the ship.

12.5.2. Continuous Line Floating Line of Demarcation (CLIN XX12AC) - The Contractor shall provide a Continuous Line FLD in accordance with Attachment 2 – Floating Line of Demarcation Specifications.

12.5.3. Buoy System Floating Line of Demaracation (CLIN XX12AD and XX12AE) - The Contractor shall provide a Buoy System in accordance with Attachment 2 – Floating Line of Demarcation Specifications.

12.6. (RESERVED) Perimeter Fencing (CLIN XX12AF)

12.6.1. The contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material:	Chain link of aluminum or other durable metallic material
Height:	Minimum height of 2.5 meters (7 feet)
Base:	Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point:	Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AG THRU XX12AJ)

12.7.1. The contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ships arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AK)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 3 – Picket Boat Operations & Specifications.

12.9. (RESERVED) Portable Latrine (CLIN XX12AL)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2 The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. (RESERVED) Portable Lighting (CLIN XX12AM)

12.10.1 The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards on Picket Boats (CLIN XX12AN)

12.11.1. The Contractor shall provide security guards to patrol in picket boats.

12.11.2. The Contractor shall comply with Attachment 4 – Security Guard Operations.

12.12. Security Guards Pierside (CLIN XX12AP)

12.12.1. The Contractor shall provide security guards Pierside to ensure only authorized personnel, vehicles, and material are allowed into restricted areas.

12.12.2. The Contractor shall comply with Attachment 4 - Security Guard Operations.

12.13. Two Way Radios (CLIN XX12AQ) The Contractor shall provide two way radio sets capable of communicating with the ship to designated individuals.

12.14. (RESERVED) Hand Held Explosive Detector (CLIN XX12AR) – The Contractor shall provide hand held explosive detector capable of detecting explosives.

12.15. Hand Held Wand Metal Detector (CLIN XX12AS) – The Contractor shall provide hand held wand metal detector capable of detecting metal.

12.16. (RESERVED) Walk Thru Metal Detector (CLIN XX12AT) – The Contractor shall provide commercially available walk-thru metal detector equipment comparable to airport security systems type.

12.17. (RESERVED) X-Ray Machine Airport Type with Operators (CLIN XX12AU) The Contractor shall provide commercially available X-Ray machine comparable to airport security systems type. Equipment shall be manned by professionally trained operators to operate the equipment 24 hours a day.

12.18. (RESERVED) Under Carriage Vehicle Scanner (CLIN XX12AV) – The Contractor shall provide under carriage vehicle scanner to scan vehicle undercarriages.

13. FORKLIFT (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations. The forklifts provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations.

14. (RESERVED) FUEL (CLIN XX14)

14.1. Ships or other ordering activities may order fuel with the assistance of the Contractor. The Contractor shall advise visiting ships the availability of bunkers, or existing fuel contracts issued by Defense Energy Support Center (DESC) or Navy Petroleum Office (NPO). If requested by the SUPPO, the Contractor shall pass fuel orders to the appropriate fuel supplier, and will coordinate delivery. Disagreements between any DESC Contractor and the Contractor shall be forwarded to the DESC Contracting Officer through FISC Detachment Singapore. The DESC Overseas Ships' Bunkers Contract latest Bulletin may be accessed at http://www.desc.dla.mil. Contractors who buy bunkers or fuel through other than government sources when available without express authority in writing from the ordering officer or contracting officer do so at their own risk. If authorized, government shall not reimburse the contractor for more than what the government cost through approved DESC contracts would have been.

14.2. In the event that no U.S. Government or foreign Government owned bunker is available, or no DESC or NPO available contracts meets a ship's fuel requirement, or as directed in writing by the Contracting Officer, the Contractor shall assist the ship or the ordering official in arranging the procurement of fuel. This fuel shall be provided in accordance with Attachment 5 – Fuel Specifications. The Contractor shall provide a fuel barge or truck to transport fuel to the ship if required. The Contractor shall be liable for any costs should the fuel provider fail to employ properly oil spill booms as required by local authorities or fails to comply with any local laws or regulations relating to the provision of fuel. Fuel caught in oil booms will be properly disposed. The invoice shall indicate the unit and total price for the fuel and the price for the delivery of fuel to the ship.

14.3. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.4. The Contractor shall load the ordered fuel and transport to the ship "free on board" (f.o.b.) whether at pierside or at anchorage. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.5. In recognition of the fact that fuel is sold by weight (metric tons) and by volume (gallons or liters), the Contractor shall ensure all United States ships are provided with a fuel invoice and the appropriate customs certification demonstrating the quantity of fuel provided in metric tons and in gallons or liters.

14.6. Excess Fuel Procedures. If the ship does not offload all of the fuel ordered, the contractor shall store the excess fuel and diligently attempt to sell it as soon as practicable. The Contractor shall receive a storage fee for up to three (3) days. The Contractor will receive a fuel disposal fee in accordance with the rate it proposed.

15. GARBAGE/TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of "refuse" from the ship and areas surrounding trash bins, as well as any spilled refuse.

15.2. The Contractor shall provide a trash barge (with tug service if barge is not self-propelled) 24 hours a day with fendering to prevent damage to the ship and at least four (4) mooring lines to secure alongside the ship at anchorage. The barge's crew shall be entirely responsible for the tending of lines and for barge's security.

15.3. The Contractor is responsible to follow all environmental regulations.

15.4. In instances of bad weather, the Contractor shall remove barges within one hour of being directed to do so by the ship. Should a vessel with a trash barge alongside experience an emergency where the ship must depart, the SUPPO will advise the Contractor at least four (4) hours in advance for the barge pick-up at no additional cost to the Government.

16. LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17) - The Contractor shall provide line handlers with all required safety equipment to secure and unsecure mooring lines from the ship to the pier.

18. MANLIFT (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and full fuel tank.

18.2. The contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver. The Contractor is responsible for retaining proof of delivery documentation for a period of six (6) months for the purpose of reconciling invoices. All contractor material handling operations shall be conducted in a manner that ensures that items are not damaged.

19.2. The Contractor is responsible for providing secure/bonded storage for all inbound cargo and mail.

19.3. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.4. All material shipped shall be labeled "SHIP'S SPARE(S) IN TRANSIT".

19.5. Material shipped shall arrive at least two (2) working days prior to ship's arrival.

19.6. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the Contractor.

19.7. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.8. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.9. If cranes and forklifts are not available at the port, the Contractor shall use forklifts and cranes from the Schedule.

19.10. The Contractor shall receive the package from the carrier and clear it through customs. All materials received shall be delivered while the ship is in port. Any damage must be noted prior to acceptance and reported to the point of contact designated by the ship Supply Officer.

19.11. The Contractor shall send status reports to the ship's Supply Officer after receipt, after delivery, and if unable to deliver to a designated government representative.

19.12. The Contractor shall forward the material to a location specified by the ship Supply Officer or designated point of contact if for any reason it cannot be delivered to the ship.

20. (RESERVED) MISCELLANEOUS (CLIN XX20)

21. (RESERVED) OIL BOOMS (CLIN XX21) - The Contractor shall provide and deploy oil booms, as necessary and properly dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship and properly dispose it. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.2. The Contractor shall comply with the local environmental requirements where oily waste is disposed and shall be liable for any costs incurred as a result of the Contractor's failure to comply with such requirements. The Contractor shall retain all disposal certificates and shall make them available to FISC Detachment Singapore upon request.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship duty engineer shall verify in writing the amount removed.

22.4. The contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with suitable fendering to prevent damage to the ship and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall pre-position Oily Waste Barges / Trucks when necessary, in accordance with Force protection or other requirements.

22.7. In the event the Contractor subcontracts oily waste disposal, the Contractor shall be liable for any costs incurred as a result of the disposal operator's failure to comply with local requirements.

23. (RESERVED) PAINT FLOAT (CLIN XX23) - The Contractor shall provide paint floats to hold personnel painting the ship. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. PRATIQUE/QUARANTINE AND INSPECTION SERVICE (QIS) (CLIN XX26) - When entering a port where Pratique /QIS charges apply, the Contractor shall only charge the tariff rate.

27. (RESERVED) REEFER CONTAINER (CLIN XX27) – The Contractor shall provide refrigerated storage at the temperature specified by the ship. Generators shall emit sound levels of less than 84 decibels.

28. (RESERVED) SHORE POWER (CLIN XX28)

28.1. The Contractor shall provide shore power to the ship using

28.1.1. Port provided permanent connection system.

28.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

28.2. The Contractor shall provide all cables and make all power connections between the generator and ship.

28.3. The availability of shore power shall be in accordance with the schedule established by the ship.

29. (RESERVED) SHORE STEAM (CLIN XX29) - The Contractor shall provide Shore Steam to the ship.

30. STEVEDORES (CLIN XX30) - The Contractor shall provide stevedores with supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and immediate surroundings as practicable. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION (GROUND) VEHICLES (CLIN XX32)

32.1. The Contractor shall provide air conditioned motor vehicle service for official government business.

32.1.1. Sedans shall have a minimum capacity of four (4) passengers including the driver. Sedans shall have a minimum 1800 cc engine.

32.1.2. Passenger capacity for vans shall range from six (6) to 25 passengers as specified in Exhibit A, Schedule of Supplies and Services.

32.1.3. Passenger capacity for buses shall range from 40 to 60 passengers as specified in Exhibit A, Schedule of Supplies and Services.

32.2. The Contractor shall provide covered, lockable trucks to load/off load cargo and mail. The covered truck shall have a hydraulic lift to facilitate loading and offloading. The driver shall assist with loading and offloading.

32.3. The Contractor shall be responsible for security and prevent loss/damage/destruction of cargo and mail.

32.4. All drivers must be fully qualified and have necessary licenses. All vehicles must be properly registered, licensed and insured (including adequate passenger liability insurance). The contractor is responsible for delivering all cargo and personnel to the correct location on schedule.

32.5. At all times that vehicles are being used, the contractor shall ensure that the vehicles are in sound mechanical condition, meet all security requirements and meet all safety standards required by local laws and regulations so as to preclude breakdown and injury. All vehicles shall be in a clean condition when presented for service and shall be free of debris. If a vehicle does not meet the requirements of this contract as determined by the Ordering Officer, the U.S. Government shall have the right to reject the vehicle for performance of services. The contractor shall ensure that each vehicle is jointly inspected before and after a trip by the contractor and an authorized representative of the U.S. Government. The U.S. Government will not consider any claim for damage to a vehicle which has not been inspected.

32.6. If a vehicle is not operable when required under this contract, the Contractor shall provide, at no additional expense to the Government, a replacement vehicle within two (2) hours that complies in all respects with this contract.

32.7. Substitution of Vehicles:

32.7.1. If the Contractor does not have available the type of vehicle ordered and the vehicle has been ordered at least 24 hours in advance, the Contractor shall substitute a vehicle type equal to or better than the vehicle ordered at the price listed for the type of vehicle originally ordered. EXAMPLE: If a sedan is ordered but unavailable, the Contractor shall furnish a higher group vehicle at the price listed for the vehicle originally ordered.

32.7.2. In the case of passenger or cargo vans, there shall be no substitution without the approval of the ship placing the order.

32.8. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or Ordering Officer.

32.9. The Contractor shall obtain written acknowledgement of vehicle service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

32.10. The Contractor shall provide covered trucks with driver.

32.11. The Contractor shall provide drivers who can speak and understand English clearly. In the event if the driver is unable to speak English, the Contractor shall furnish an English speaking rider.

33. TUGS (CLIN XX33) - The Contractor shall provide tugs to bring ships to and from berthing locations.

34. (RESERVED) WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 6 – Water Taxi Specifications. At the commencement of service, the Contractor is required to advise the ship of scheduled breaks and any changes to the taxi service schedule.

34.2. The Contractor shall ensure that all water taxis are fully licensed, registered, and insured, including adequate liability insurance, in accordance with local laws and regulations.

34.3. When required to arrive early for inspection as a force protection measure, service begins at time of inspection. Upon ship's scheduled departure, the daily rate/hourly rate shall be pro-rated for water taxi services less than 24 hours in duration.

34.4. If the Contractor cannot provide the size of water taxi ordered, the Contractor shall provide a larger size water taxi, or a combination of water taxis, that in total capacity equates to the size of the water taxi ordered. In any event, the ship will be charged for the size of the water taxi ordered.

34.5. The Contractor shall return all items left in water taxis to the ship's SUPPO.

34.6. The Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times. Logs must be available upon request for Government review and inspection.

34.7. Before the commencement of any services under this contract, the Contractor shall make the water taxi available to the ship's Boatswain or designated representative for inspection.

34.8. For any damage or destruction caused by the Government, the Contractor shall be responsible to ensure that the water taxi is jointly inspected before and after each trip by the Contractor and an authorized representative of the Government.

34.9. When providing water taxi service to aircraft carriers and amphibious helicopter carriers, the water taxi height depends on carrier deck overhang and pontoon width, i.e., the wider the pontoon the farther out the water taxi will be located with subsequent increased clearance. The requirement is that pontoon width/water taxi height/deck overhang dimensions must be such that the water taxi is able to make aft, port and starboard side approaches with adequate clearance between water taxi superstructure and carrier deck overhang.

34.10. If a water taxi is not operable when required under this contract, the Contractor shall immediately provide at no additional expense to the Government, a replacement water taxi which complies in all respects with this contract.

35. REPORTS (CLIN XX35)

35.1. CRAFT REPORT (CLIN XX35AA): The Contractor shall furnish a Cost Reporting and Forecasting Tool (CRAFT) Report covering all port costs paid by each ship for which the Contractor provides husbanding services. The term "port cost" includes all supplies or services identified in the section of contract titled "Supplies or Services" in Exhibit A and non-contract line items. The report

format is provided in Exhibit C – CRAFT Report. The report shall be submitted to the FISC Detachment Singapore Contracting Officer or designated representative within seven (7) working days of each ship's departure.

35.2. Any revisions to the CRAFT shall be forwarded to FISC Detachment Singapore within seven (7) days of the change. If a ship departs port without paying all or part of a bill, the Contractor shall identify the line items not paid and support a change when the bill is paid.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTIGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36)

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted

36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification

36.3.3. Current inoculation records

36.3.4. Possess a valid up-to-date passport

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit D. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise”. It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

Section G - Contract Administration Data

INVOICES AND PAYMENTS

1. The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

2. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

3. Copies of all invoices presented to the ship shall be provided to FISC Det Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

CLAUSES INCORPORATED BY FULL TEXT

ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(1) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(2) *Maximum ordering amount*. The Contractor is not obligated to honor --

(i) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(ii) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(iii) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(3) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(4) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities.

Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirement for the supplies and services specified in the Schedule that exceed the quantities that the activity may furnish within its own capabilities.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(j) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(k) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(l) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(m) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 202) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(n) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Apr 2003) (46 U.S.C. Appx 1241 and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

(10) The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

(11) Displacement is expressed in tons and represents fully loaded displacement.

(12) The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

(13) There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACH 2 - FLD SPECIFICATIONS

ATTACHMENT 2 - FLOATING LINE OF DEMARCATION SPECIFICATIONS (CLIN XX12XX)

The following are Floating Line of Demarcation (FLD) Specifications used for this contract:

1. The Contractor shall provide a FLD to identify a restricted area in the water of approximately 330 feet (100 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. The FLD is to help identify a safe standoff zone.

2. The size of the FLD will depend on the class of ship. Pier side, the FLD should be positioned 330 feet (100 meters) fore and aft of the ship and 330 feet (100 meters) out into the water from the ship. If sufficient space is not available then the FLD will be positioned as far as possible from the ship. At anchorage, the FLD will be positioned 330 feet (100 meters) outside the swing radius of the ship.

3. There are two types of FLDs that are currently authorized.

    3.1. Continuous Line FLD - If allowed by the Port, the Contractor shall provide a Continuous Line FLD per the specifications listed below.

        3.1.1. The FLD must fully enclose ships at dockside or at anchorage. The FLD will have an Entry Control Point (ECP) where the FLD may be opened up when authorized watercraft require access to the ship. The Contractor will provide a boat and crew to open up and close the FLD at the ECP.

        3.1.2. Specifications:

            3.1.2.1. Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.Floatation devices positioned every meter on the line.

            3.1.2.2. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing strobe lights (standing at least one meter high above the water) and positioned every 75 meters along the line.

            3.1.2.3. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the FLD. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD intact at all times regardless of sea conditions. Failure of the system to remain in place may result in deductions to the invoice.

    3.2. Buoy System FLD - This is an acceptable alternative to the Continous Line FLD requirement. Some Ports may require the buoys to be temporarily moved and replaced if a commercial ship requires the water space.

        3.2.1. The Contractor shall provide a Buoy System FLD per the specifications provided below.

        3.2.2. The Contractor shall provide a Buoy System FLD to identify a restricted area around ships. The purpose of the Bouy System FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large red or yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 100 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2

nautical miles. In addition, buoys must also be visible on both ship and shore based radar. The Picket Boats will patrol outside of this visual reference. The Buoy System FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) workboats to tend to the Buoy System FLD at all times.

3.2.3. Provide the system with weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

ATTACH 3 - PICKET BOAT

ATTACHMENT 3 - PICKET BOAT OPERATIONS & SPECIFICATIONS (CLIN XX12XX)

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACH 4 - SECURITY GUARD OPS
ATTACHMENT 4 - SECURITY GUARD OPERATIONS (CLIN XX12XX)

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pier side or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through local police officials.

1.3. There are two types of security guard services. One is for providing guards pier side to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pier side:

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pier side guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pier side security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxis. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pier side operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. Rules of Engagement (ROEs) Pier side

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. Rule of Engagement (ROEs) for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following ROEs are to be followed:

3.8.1.1. Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2. If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3. The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4. As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACH 5 - FUEL SPECIFICATIONS
ATTACHMENT 5 - FUEL SPECIFICATIONS (CLIN XX12XX)

The following are the Fuel Specifications for this contract:

SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	Requirement	Text Method
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC	 Record Record	D 86 3/

90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	357ºC 385ºC 3.0	
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100ml, (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664
Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/
Corrosion, @ 100ºC, (max)	No. 1 ASTM	D 130

Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2622
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

(a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

(b) The test temperature shall be 25ºC.

(c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

Minimum Requirements for Purchases of Commercial Distillate Fuels ((Navy) Marine Gas Oil) for Bunkers

The following minimum requirements have been established for use when buying fuel (gas oil - 100% distillate) from commercial sources when F76 is not available. Marine Gas Oil is not acceptable as cargo fuel on Navy Oilers.

TEST	METHOD	REQUIREMENTS
1. Cetane Number	ASTM D 613	45 min
or		
Cetane Index	ASTM D 976	45 min

Note: A cetane index of 41 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exceed a maximum of 338ºC. A cetane number of 40 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exceed a maximum of 338°C.

2. Appearance @ 21ºC or ambient temperature (whichever higher)	Visual	Clear & Bright
or		
Water and Sediment	ASTM D 2709	0.05% max
3. Distillation. 90% Point	ASTM D 86	375ºC max
4. Flash Point	ASTM D 93	60ºC min
5. Pour Point	ASTM D 97	Report
6. Cloud Point	ASTM D 2500	-1.1ºC (30 °F)
7. Viscosity @ 40ºC	ASTM D 455	1.7 - 4.5 CST
8. Color	ASTM D 1500	3 max
9. Gravity	ASTM D 1298, D 287	Record
10. Carbon Residue	ASTM D 524	0.35% max
11. Ash	ASTM D 482	0.01% max

12. Sulfur	ASTM D 129, D 1552 D2622	1.00% max
13. Copper Corrosion	ASTM D 130	3 max

C16.23-2 COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC JAN 1998)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min
	NOTE: A Cetane Number of 40 minimum, or a Cetane Index of 41 minimum, is acceptable provided the 90 Percent Distillation Point does not exceed a maximum of 338^{O}C.		
2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min
	NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.		
5.	Cloud Point	ASTM D 2500	-1.1^{O}C (30^{O}F) max.
	NOTE: Cloud Point results will be evaluated based upon bunkering location.		
6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cst
7.	Color	ASTM D 1500	3 max.
	NOTE FOR DOMESTIC ITEMS: This Color test requirement is deleted if red dye has been added in compliance with U.S. Environmental Protection Agency or Internal Revenue Service regulations; however, the resulting fuel/dye blend must have a red tint. It shall not be visually brown or darker in appearance.		
8.	Density @ 15^{O}C	ASTM D 1298	876 kg/m^3 max.
9.	Carbon Residue on 10% bottoms	ASTM D 524	0.35 mass % max.
		ASTM D 189	
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur	ASTM D 4294, ASTM D 1552, or ASTM D 2622	1.0 mass % max.
12.	Corrosion	ASTM D 130	3 max.
13.	Distillate Fuel (fuel shall contain no residual)	None	100%

C36 FUEL OIL, INTERMEDIATE, GRADES RMB-10 (IFO 60)/RME-25 (IFO 180)/RMG-35 (IFO 380) (DESC MAY 1997)

Product shall conform to ISO 8217:1996 or ASTM D 2069-91. Product conforming to ASTM D 2069-91 shall meet the following additional requirements:

	GRADE	GRADE	GRADE

REQUIREMENTS	RMB-10 (IFO 60)	RME-25 (IFO-180)	RMG-35 (IFO 380)	TEST METHOD
Density @15°C, kg/m^3, max	981.0	991.0	991.0	ISO 3675/12185

Total Sediment, potential, %(m/m), max	0.10	0.10	0.10	ISO 10307-2

ATTACH 6 - WATER TAXI SPEC

(RESERVED) ATTACHMENT 6 - WATER TAXI SPECIFICATIONS – (CLIN XX34)

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxi specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Detachment Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and these specifications, the ship will immediately notify the Contractor, the FISC Detachment Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including Commander Pacific Fleet (COMPACFLT).

5. COMSEVENTHFLT Specifications:

Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable host nation laws and regulations. Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

The following information shall be conspicuously posted in both English and the appropriate local language:

- Current Operator's/Captain's license and boat names.
- Passenger/weight capacity limits notice.
- Location of life jackets and other life saving equipment.
- Location of all exits indicated in large letters.
- Emergency procedures.
- Emergency lighting, both permanent and hand held, shall be available and in working order at all times.
- Operation of the boat shall be in a safe and seaworthy manner.
- The consumption of alcoholic beverages shall not be permitted aboard the boat.

Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by host nation for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

Security: During the term of this contract the ship(s) to be serviced agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

(a) Hull:

- Watertight integrity of weather decks, bulkheads, watertight closures and interior hull structures.
- Superstructure, including masts and stacks.
- Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.
- Provisions for drainage of sea water from exposed decks over the side and not into the bilges.
- Access/egress points- adequacy of number and location.

(b) Machinery:

- 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.
- Main propulsion and auxiliary machinery essential to operation of boat.
- Sea and bulkhead closure valves.
- Bilge auction strainers and dewatering systems-bilge pump to be tested by operation
- Bilges free of flammable liquids

(c) Electrical:

- Cables.
- Navigation, deck, and emergency lights.
- Rotating electrical machinery; e.g., generators and motors --Storage batteries

(d) Lifesaving equipment:

- Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.
- Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.
- First aid kits, life rings and distress lights.
- Distress signaling devices

(e) Fire fighting equipment:

- Fire pump - test by subjecting fire hose(s) to fire pump pressure.
- Portable fire extinguishers.
- Fixed systems, e.g., $C0_2$ cylinders.

(f) Steering apparatus:

(g) Miscellaneous systems and equipment:

- Harbor charts.
- Ground tackle and mooring lines.
- Whistle/fog horn, bell.
- Lighted compass.
- Radar.
- 2-way radio capable of Bridge-to-Bridge communications.
- Current license.

Operator qualifications.

Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement is that contained below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

i. Safety of operations. Insure the following are present and in working condition:
ii. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.
iii. Fire extinguishers sufficient for the size of the vessel operated.

iv. Radio (with battery backup) capable of Bridge-to-Bridge communications.
v. Anchor/chain sufficiency for the size of the vessel operated.
vi. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.
vii. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:
viii. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.
ix. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.
x. Ensure no bare or exposed electrical wires or connections are located in the passenger area.
xi. Validate that sufficient unobstructed exits are present and marked in English.
xii. Verify that no missile hazards, gear adrift, or trip hazards exist.

The following shall be conspicuously displayed, in English:

- Passenger/weight capacity.
- Location and number of life jackets.
- Location of life saving equipment.
- Locations of exits (if not obvious).

Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACH 7 - REQ 4 SANITARY INSP

ATTACHMENT 7 - SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC Detachment Singapore
PSA Sembawang Terminal
Deptford Road, Building 7-4
Singapore 759657

Dear Sir:

We are interested in supplying (specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhouses and dairies only).
List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.
European Economic community (EEC) and United States Department of Agriculture (USDA) plant establishment number(s).

ATTACH 8 - QA PROVISIONS
ATTACHMENT 8 - QUALITY ASSURANCE PROVISIONS - September 2006

SECTION I. GENERAL REQUIREMENTS

1. SANITARILY APPROVED SOURCES: All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas

(http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. DELIVERY VEHICLES: The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semi-perishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. CODE DATING: Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. PACKAGING: Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. SHELF LIFE REQUIREMENTS: Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. TEMPERATURE REQUIREMENTS: Unless otherwise specified in this agreement, all perishable products shall be delivered between 32^{o}F-41^{o}F (0^{o}C-5^{o}C) for chilled and 0^{o}F (-18^{o}C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. REJECTED ITEM: Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. FOREIGN ORIGIN PRODUCTS: Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD: See Appendix A below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. DAIRY PRODUCTS:

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32°F and 41°F (0°C and 5°C). Frozen products shall be delivered at 0°F (-18°C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32°F and 41°F (0°C and 5°C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32°F and 50°F (0°C and 10°C).

2. FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35°F and 55 °F (2°C and 12°C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

FROZEN MEAT AND POULTRY

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. FROZEN WATERFOODS:

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

SHELL EGGS:

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor’s name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. BAKERY PRODUCTS:

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55^{o} to 65^{o}F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)

Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:

1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]

ATP (RLU) Counts	Aerobic Plate Count (APC)	Coliform Count
Environmental swab See Note 3	100 per 50 sq cm	10 per 50 sq cm

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen				
	Standard Plate Count (SPC) [3]		Coliform count	Combined Yeast and Mold count
Product(s)	m	M		
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	> 2.5/wt	< 3.5/wt
pH	> 4.2	< 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram

Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. < 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]

Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu

Counts[2]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram	
Staphylococcus aureus	100 per gram	1000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]	Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.

M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]					
Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	

Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. < 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized.	Chocolate drink mix, non-dairy. Powdered dairy mixes.

	Creamer, coffee, dairy.	Toppings, non-dairy.
	Dairy soft serve mixes.	
	Desserts/puddings, frozen.	
	Egg nog, canned.	
	Egg substitutes.	
	Italian ices.	
	Topping, real cream.	
	Yogurt, fresh or frozen.	
8915	All pre-cut pre-packaged minimum processed fresh	All unprocessed fruits and
(*Note 7, 8)	fruits and vegetables.	vegetables.
	Kimchee.	Olives.
	Mushrooms, whole and sliced.	Fruit juices and nectars, shelf
	Salads, non-meat, with or without dressing	stable or frozen concentrate.
	(not USDA listed).	
	Vegetable sprouts.	
	Fruit juices and nectars, refrigerated.	
8920	Bakery and cereal products (baked and unbaked,	All other bakery products,
(*Notes 6, 9)	fresh and frozen), specifically:	including:
	Croissants.	Bagels.
	Doughnuts	Batter mix, dry.
	Egg roll wrappers.	Biscuits, canned.
	Flour and corn tortillas.	Breads, rolls, and buns.
	Wet pasta (noodles).	Cake mix, dry.
	Pastries.	Cakes, unfilled.
	Pies.	Cookie mix, chilled or dry.
	Soft pretzels.	Cookies, unfilled.
	Won ton wrappers.	Crackers.
	Filled bakery items.	Cupcakes, unfilled.
		Dough, frozen or chilled.
		Dumplings, frozen.
		English muffins.
		Flour.
		Fruitcakes.
		Melba toast.
		Muffins
		Pancake batter, frozen.
		Pancake/waffle mix.
		Pasta, dry (noodles).
		Pizza crust.
		Taco shells.
		Toaster pastries.
		Pie crusts, unfilled.
		Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940	Dietary foods and specialty preparations,	All other dietary and specialty
(*Notes 2, 3, 4, 5, 10)	specifically:	preparations, including:
	Fish, meat, poultry, dairy, egg, and shellfish	Baby formula, canned.
	products.	Chips, nacho or potato.
	Pickled eggs.	Creamer, coffee, imitation (non-
	Frozen dinners.	dairy).
	Pudding novelties, frozen or chilled.	Dips.

	Tofu.	Nacho cheese, canned. Nutri-why. Popcorn. Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including: Salad dressings. Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically: Ice. Bottled water.	All other nonalcoholic beverages, including: Dry ice. Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the USDA Meat and Poultry Inspection Directory may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the USDC Approved List of Fish Establishments and Products.
4. Directory listing is not required for shell egg sources listed in the Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs. Establishments listed in the USDA Meat and Poultry Inspection Directory for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the Dairy Plants Surveyed and Approved for USDA Grading Service may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

1. CONTRACT ID CODE	PAGE OF PAGES

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS. IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).
	C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:
X	D. OTHER (Specify type of modification and authority) MUTUAL AGREEMENT

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)

Modification Control Number: nyssnk010813798

1. This modification is issued for the following:
   a. P00003 is cancelled in its entirety and replace by Modification No. P00004
   b. Add Lot 4 - All Other Locations in the Mascarene Islands, ports to include Comoros, Reunion, Rodrigues, Cargados Carajos Shoals including the former islands of the Saya de Malha, Nazareth and Soudan Banks excluding Mauritius.
   c. Replace Exhibit A, Section B Schedule of Supplies and Services with the revised attachment.
2. The estimated total contract price is increased by US$13,000 from US$91,735.00 to a new estimated grand total of US$104,735.00.
3. All Other Terms and Conditions remain unchanged.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION B - SUPPLIES OR SERVICES AND PRICES

The following have been modified:
SECTION B1 - OVERVIEW
SECTION B1 - OVERVIEW OF CONTRACT

1. OBJECTIVE

1.1. The objective of this contract is to obtain Husbanding Services for U.S. Navy ships and logistics support services required by U.S. Government organizations and agencies in Mauritius.

1.2. Additionally, the husbanding contractor may be called upon to provide services and supplies in support of exercises and Operations Other Than War (OOTW) within the territorial boundaries and in ports of Mauritius.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Mauritius.

2.2. The schedule of supplies/services and prices (See Exhibit A.) is sub-divided into lots. Lots may be for individual Ports or they may include several Ports under one (1) lot. For this contract Lot 1 is for Mauritius (Port Louis), Lot 2 is for All Other Ports in Mauritius and Lot 3 is for Operation Other Than War (OOTW) / Contingency Exercise Logistics Support.

2.3. The individual HS items provided under this contract are listed in Exhibit A – Schedule of Supplies and Services. Section B - Schedule of Supplies and Services (referred to as The Schedule) also references this same Exhibit A – Schedule of Supplies and Services. The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services. This clause “DEFINITION OF THE CONTRACTUAL REQUIREMENT” complements the clause herein entitled “REQUIREMENTS (OCT 1995) (FAR 52.216-21).”

4. DURATION OF CONTRACT - This contract is for six (6) months. Also, the contract will include FAR 52.217-8 OPTION TO EXTEND SERVICES clause. The total possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users – The following types of U.S. Government vessels are mandated to use this husbanding services contract. Ships classification and decriptions are listed in Attachment 1.

- U.S. Navy ships

- Military Sealift Command (MSC), Government-Owned Government Operated (GOGO) vessels
- U.S. Coast Guard vessels

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (MSC) Government-Owned Contractor-Operated (GOCO) and Contractor-Owned Contractor-Operated (COCO) ships
- U.S. Army Ships
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent. However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of 3 ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 – Classification of Ships, provides details.

10. LONG TERM SHIP VISITS

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within 3 days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINS that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
JB	Job

LO Lot
NSP Not Separately Priced
PT Port Tariff
TP Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders.

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

    - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

    - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. Example, the cost of CLIN XX35, CRAFT is NSP. The cost of the CRAFT should be factored into the Management Fee.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used or not available at time of award of this contract. A “Reserved” item may be “UNRESERVED” at a later time during the duration of the contract when the “Reserved” item becomes commercially available and is required by the Government. Prices shall be competitively negotiated before it is included as a Contract Line Item (CLIN).

- SUPPO: A ship’s Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual: _____

Title of Individual: _____

Mailing Address: _____

_____

Tel No: _____

Fax No: _____

Mobile: _____

Section B - Supplies or Services and Prices

OVERVIEW SECTION III

SECTION B1 – CONTINUATION

1. OBJECTIVE

1.1. The objective of this contract is to obtain Husbanding Services for U.S. Navy Ships and logistics support services required by U.S. Government organizations and agencies in India and all other ports in India.

1.2. Additionally, the husbanding contractor may be called upon to provide services and supplies in support of exercises and Operations Other Than War (OOTW) in India.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in India and all other ports in India.

2.2. The schedule of supplies/services and prices (See Exhibit A.) is sub-divided into lots. Lots may be for individual Ports or they may include several Ports under one (1) lot. For this contract Lot I is for Cochin, Lot 2 is for Chennai, Lot 3 is for Mumbai, Lot 4 is for Vasco Da Gama (GOA), Lot 5 is for All Other Ports in India and Lot 6 is for Operations Other Than War (OOTW).

2.3. The individual HS items provided under this contract are listed in Section B2, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT

3.1. This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services. This clause “DEFINITION OF THE CONTRACTUAL REQUIREMENT” complements the clause herein entitled “REQUIREMENTS (OCT 1995) (FAR 52.216-21).”

4. DURATION OF CONTRACT - This contract is for six (6) months. Additionally, the contract will include FAR 52.217-8 OPTION TO EXTEND SERVICES clause. The possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users - U.S. Navy ships visiting locations covered under this contract are required to use this contract if HSs are requested (with the exceptions noted below). Ship classifications are listed in Attachment 1.

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (USNS)

- U.S. Coast Guard (USCG) Ships
- U.S. Army Ships
- U.S. Government personnel conducting business in locations under this contract.
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent.

However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of four (8) ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

10. LONG TERM SHIP VISITS –

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within three (3) days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate

(example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off of this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

BN Bin

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CB M	Cubic Meter Bin
CISF	Central Industrial Security Force
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
GRT	Gross Registered Ton
HR	Hour
IDD	International Direct Dialing
IN	Indian Navy
JB	Job
LO	Lot
LB	Pound
MTR	Meter
MIN	Minimum
MAX	Maximum
MO	Month
MT	Metric Ton
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TP	Trip
TBD	To be Determined
SHIFT	Per Shift

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GARBAGE: See Attachment 1 – Refuse Definitions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The CLIN for CRAFT should be factored into the Management Fee. The NSP CLIN is used to administratively order any unpriced items in accordance with the pricing rationale in paragraph refer to Section C (SOW), Arranging Supply and Services.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used in this contract. A "Reserved" item is an item that can be ordered when required but currently not available.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

- TRASH: See Attachment 2 – Refuse Definitions.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual:	LEONARD G. FRANCIS	(b)(6), (b)(7)(C)
Title of Individual:	MANAGING DIRECTOR	
Mailing Address:	15D PANDAN ROAD SINGAPORE 609266	15D PANDAN ROAD SINGAPORE 609266

Section C - Descriptions and Specifications

STATEMENT OF WORK (SOW)

TASKS: The Contractor shall perform the following tasks when ordered by an AGR.

1. **MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 2 – Classifications of Navy Ships)**

1.1. PRE-ARRIVAL HUSBANDING DUTIES

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The contractor shall furnish to each ship and FISC Det Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated quantities and prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship’s arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché’ at the U. S. Defense Attaché Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship’s Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the contractor will provide their POC information with 24-hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6 Money Exchange Services

1.2.6.1. Moneychangers: The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate as stated below.

1.2.6.2. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. RESERVED – (Interpreter Services)

1.2.9. Mail Delivery Service: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers India then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual agreement with the other contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Det Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Det Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13 The Contractor shall facilitate the ship's timely departure.

1.2.13.1 The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer and courtesy copy to FISC Det Singapore Contracting Officer who shall issue appropriate contractual documents. The Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FFV, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Det Singapore Contracting Officer during the ship visit or no later than 7 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FFV, Bread and Eggs and other subsistence items. FFV shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3)

Shall be fresh yet not overripe. Bread and Eggs must be in accordance with Attachments 9 and 10. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FFV and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Det Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FFV and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Detachment, Europe. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 11.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources. For inspection of new facilities, the U.S. Army Veterinary requires 90 days advance notice.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 10.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Det Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) AND CONTINGENCY EXERCISE/ LOGISTIC SUPPORT FEES (LOT 6) (CLIN XX36)

2.1. Operations Other Than War (OOTW), sometimes referred to as "contingencies", are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise."

2.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO's).

2.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

2.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
2.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
2.5.3. current innoculation records
2.5.4. possess a valid up-to-date passport

2.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. He is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The contractor team shall consist of a minimum of two personnel per location that the OOTW and/or Exercise/ Logistic Support is being conducted. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

2.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor's Husbanding fees and CLINS shall apply.

2.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

3. **BREASTING AND FENDERING BARGE (CLIN XX03)**

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship and have a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place fenders between the breasting barge and the ship.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. **BROW (CLIN XX04)**

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not to damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting the submarine deck. Also, the submarine brow must be capable of supporting shore power cables without damaging the cable.

5. **RESERVED- (CAMELS) (CLIN XX05) -** The Contractor shall provide camels as fenders for the ship.

6. **COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)**

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to Contractor provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to vessel and with a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with C1. Paragraph 14. Standards For Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force Protection or other requirements.

7. **COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)**

7.1. The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with charges capable of using dual voltage.

7.3. The Contractor shall provide activation, auto-roaming, long distance accounts, and airtime for land and hand phones.

7.4. The Contractor shall provide prepaid International Calling Cards.

8. **CRANE (CLIN XX08) -** The Contractor shall provide cranes with operators, required assistant personnel, and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. **DOCKAGE AND WHARFAGE FEE (CLIN XX09) -** The Contractor shall provide pier and wharf usage.

10. **FENDERS (CLIN XX10) -** The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. **RESERVED – (FLEET LANDING) (CLIN XX11) -** The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct FP operations.

12. **FORCE PROTECTION (CLIN XX12)**

12.1. General: (CLINs XX01 & XX02) The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7 Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Det Singapore Contracting Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of 5 people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions. The office or tent shall be well lighted and identified for its intended use. The contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 lb, CO2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB AND XX12AC)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. Floating Line of Demarcation (CLIN XX12AD THRU XX12AF)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FPM is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FPM is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. Perimeter Fencing (CLIN XX12AG AND XX12AH)

12.6.1. The contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved
Entry Point: Entry available for vehicles and personnel

12.7. Physical Security Barriers (CLIN XX12AJ THRU XX12AM)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AN AND XX12AP)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations.

12.9. Portable Latrine (CLIN XX12AQ)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. Portable Lighting (CLIN XX12AR)

12.10.1 The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Armed Security Guards Services (CLIN XX12AS THRU XX12AU)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pier side to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.14. Two Way Radios (CLIN XX12AV) The Contractor shall provide two way radio sets capable of communicating with the ship to designated individuals.

12.15. Handheld Explosive Detectors (CLIN XX12AW AND XX12AX). The Contractor shall provide handheld explosive detectors capable of detecting explosives.

12.16. Handheld Wand Metal Detector, high sensitivity (CLINXX 12AY AND XX12AZ). The Contractor shall provide handheld wand metal detectors with high sensitivity capable of detecting metal.

12.17. Walk thru Metal Detectors, Airport Type (CLIN XX12BA AND XX12BB). The Contractor shall provide walk thru metal detectors capable of detecting metal.

12.18. X-ray Baggage Scanning Machines Airport Type with High Resolution Color (CLIN XX12BC). The Contractor shall provide X-ray baggage scanning machines airport type with high resolution color that are capable of X-raying hand carried luggage and bags to determine its contents. Professionally trained operators shall manned the equipment 24 hours a day.

12.19. RESERVED – (UNDER CARRIAGE VEHICLE SCANNER) (CLIN XX12BD)

13. **FORKLIFT WITH OPERATOR (CLIN XX13)** - The Contractor shall provide forklifts with operators for loading and unloading operations. Sizes in the schedule indicate the maximum lifting capacity of the forklift.

14. **RESERVED – (FUEL) (CLIN XX14)**

14.1. Normally, fuel is provided by the HN or by other U.S. Government bunkering contracts. However, if those sources are not available then the HS contractor may be required assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Agent shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Det Singapore and request approval to proceed. Only after this is done may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by the port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs

associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.5. The Contractor shall provide fuel in accordance with Fuel Specifications.

14.6 The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.7. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.8 The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.9. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. **GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)**

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship, and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. **LINESBOATS (CLIN XX16) -** The Contractor shall provide Linesboats to assist in docking line handling operations.

17. **LINE HANDLERS (CLIN XX17)**

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. **RESERVED – (MANLIFT) (CLIN XX18)**

18.1. The Contractor shall provide a manlift with a full fuel tank.

18.2. The contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 each morning.

18.3. If an operator is not provided, the Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled "SHIP'S SPARE IN TRANSIT"

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

19.1.4. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Det Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. RESERVED- (MISCELLANEOUS) (CLIN XX20)

21. OIL BOOMS (CLIN XX21)

21.1. Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

21.4. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

22. **OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)**

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship duty engineer shall verify in writing the amount removed.

22.4. The contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste Barges / Trucks when necessary, in accordance with Force protection or other requirements.

23. **RESERVED- (PAINT FLOAT) (CLIN XX23)**

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. **PILOTS (CLIN XX24) -** The Contractor shall provide pilots to navigate the ship to and from the berthing locations.

25. **POTABLE WATER (CLIN XX25) -** The Contractor shall deliver fresh, potable water to the intake hose of the requesting ship in accordance with Attachment 6.

26. **RESERVED – (PRATIQUE) (CLIN XX26)** The Contractor shall provide First Port of Entry Clearance with the local authorities.

27. **RESERVED – (REEFER CONTAINER) (CLIN XX27)**

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. **RESERVED – (SHORE POWER) (CLIN XX28)**

28.1. The Contractor shall provide diesel generators with fuel along side the ship to supply shore power to the vessel. Generators shall emit sound levels of less than 84 decibels.

28.2. The Contractor shall provide all cables and make all power connections between the generator and ship.

29. **RESERVED- (SHORE STEAM) (CLIN XX29)** - The Contractor shall provide Shore Steam to the ship.

30. **STEVEDORES (CLIN XX30)** - The Contractor shall provide stevedores and supervisors for general labor.

31. **TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)**

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. **TRANSPORTATION VEHICLES (CLIN XX32)**

32.1. The Contractor shall provide vehicle service with drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Det Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. **TUGS (CLIN XX33)**

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

34. **WATER TAXIS (CLIN XX34)**

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Det Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by an authorized ship representative. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX 35)

35.1.1. The Contractor shall prepare and submit a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit C – CRAFT Report.

35.2. The report shall be submitted to FISC Det Singapore Contracting Officer or FISC Det Singapore within five working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36) See paragraph 2 above also.

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted.
36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification.
36.3.3. Current inoculation records.
36.3.4. Possess a valid up-to-date passport.

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a

single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

37. OOTW COST REPORT (CLIN XX37)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit C – CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

52.212-5	Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items	SEP 2005

CLAUSES INCORPORATED BY FULL TEXT

ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) **Oral orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999).** Oral orders may be placed, providing the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract; date order was placed, name and title of person placing order; an itemized listing of supplies or services furnished; unit price and extension of each item; and, delivery or performance date.

(3) Invoices for supplies or services furnished in response to oral orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(1) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(2) *Maximum ordering amount*. The Contractor is not obligated to honor --

(i) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(ii) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(iii) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(3) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(4) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirement for the supplies and services specified in the Schedule that exceed the quantities that the activity may furnish within its own capabilities.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(j) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(k) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(l) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore

PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(m) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 202) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(n) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Apr 2003) (46 U.S.C. Appx 1241 and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

252.247-7024	Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

SECTION J - LIST OF ATTACHMENTS AND EXHIBITS

Applicable documents, exhibits, and attachments for this contract are:

ATTACHMENT NO.	DOCUMENT
1.	Refuse Definitions
2.	Classification of Ships
3.	Floating Line of Demarcation Specification
4.	Picket Boat Operations & Specifications
5.	Armed Security Guard Operations
6.	Potable Water Specification
7.	Water Taxi Specifications
8.	Appendix A, Perishable Food
9.	Appendix B, Microbiological criteria
10.	Quality Assurance Provisions
11.	Sample letter for Request of Inspection

ATTACHMENT NO.	DOCUMENT
A	Schedule of Supplies and Services
B	Port Tariff
C	CRAFT Report
D	OOTW Sample of Provisions

ATTACHMENT 1

REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

12. **"Refuse"** includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

13. **"Garbage"** means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

14. **"Ashes"** means the residue from burned wood, coal, coke, and other combustible material.

15. "**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

16. "**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

17. "**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

18. "**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

19. "**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 2

SHIP CLASSIFICATIONS (DESCRIPTION OF U.S. NAVY SHIPS BY CLASS AND TYPE)

The following are Ship Classifications used for this contract.

Class IA	Draft ft (mt)	Length ft (mt)	Beam ft (mt)	Displ tons	Maximum Crew Members
HSIC	5 (1.4)	82 (24.99)	17.5 (5.33)	57	21
PC 2-8	8 (2.4)	179(54.6)	26(7.9)	354	52
Class I					
ARS 50-53	18 (5.5)	255 (77.7)	51 (15.5)	3,181	99

20. The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

21. Displacement is expressed in tons and represents fully loaded displacement.

22. The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

23. There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 3

FLOATING LINE OF DEMARCATION (FLD) SPECIFICATIONS

The following are the Governments basic requirements for the Floating Line of Demarcation Specifications to be used for this contract:

1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around anchored ships. The purpose of the FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar. The Picket Boats will patrol outside of this visual reference. The FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) work boats to tend to the FLD at all times. The FLD is not designed to stop approaching unauthorized watercraft rather it is to help identify a safe standoff zone.

2. The size of the Floating Perimeter will be approximately 2500 meters to 2700 meters based on a ship's length of approximately 800 feet.

3. Weights sufficient to anchor the FLD in place to the seabed. The size and number of weights will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD line intact at all times regardless of sea conditions.

4. The Contractor shall have communication capabilities, either VHF or cellular phone with Port Operation and U.S. Navy vessel. The contractor shall report the status of the Floating Visual Line of Demarcation to Port Operation control every two hours or other regular interval agreed upon between Contractor and Port Operation Control.

5. The Contractor shall provide a minimum of two (2) work boats to tend the FLD at all times while the system is deployed.

6. The FLD shall be deployed in the most expeditious manner as soon as the U.S. Navy vessel is anchored.

7. When the FLD is retrieved, the Contractor must show documentary proof that all equipment deployed is removed from the location.

8. The Contractor shall provide the U.S. Navy, Port Authority/Host Nation an updated and current emergency contact list in case of contingencies.

9. Below are two examples of FLDs.

9.1. Example 1 - Continuous Line FLD –

9.1.1. Specifications: Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable ECP for access.

9.1.2. Buoys or floats positioned every meter on the line sufficient to keep line afloat and visible on the surface of the water.

9.1.3. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar.

9.1.4. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the perimeter. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the perimeter intact and in position at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

9.2. Example 2 - Floating Buoy System (FBS)

9.2.1. Specifications: The FBS must clearly show a perimeter line and fully surround the ships at anchorage. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the demarcation line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical. In addition, buoys must also be visible on ship's/port radar.

9.2.2. Weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

10. Contract Pricing: Prices are firm-fixed-price per unit and are inclusive of all costs which include the following:

10.1.1 Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

10.2. Mobilization and Demobilization (Mob & De-mob). All Mob & De-mob costs shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes transportation of equipment and charges for the use of cranes, forklifts, tugs, workboats and any other equipment and labor required for the deployment, maintenance and retrieval for the floating perimeter.

10.3. Repositioning equipment. All repositioning of equipment shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

10.4. Pre-positioning / Pre-staging and Vetting Operations. All pre-positioning / Pre-staging and vetting operations shall be included in the unit price. The vessel shall only be charged for the actual number days that the perimeter is in use while the ship is port. No additional days shall be charged.

11. Time Calculations: These CLINs are based on daily rates. Time will begin being measured once the equipment is deployed round the vessel and capable of operations.

12. General: The Contractor is responsible for providing floating visual line of demarcation. The Contractor must work closely with other US Navy contractors such as subsistence contractor. The Contractor will follow the requirements below unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

13. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

13.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

13.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

14. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

14.2. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

14.3. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

14.4. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

15. Inspections: The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

ATTACHMENT 4

PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

24. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

25. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

26. Ships at anchorage will normally require two Picket Boats.

27. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet

all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

28. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

29. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

30. The Picket Boat will meet the following requirements:

    7.1. Licensed for commercial operations by local country Department of Transportation.

    7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

    7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

    7.4. If a deckhand crewmember is required, only qualified personnel are used.

    7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

    7.6. Minimum length of 8 meters and capable of carrying three people.

    7.7. Minimum 18 knots speed.

    7.8. Capable of operating for 8 hours without refueling.

    7.9. Have toilet facilities on board.

    7.10. Have minimum one meter high guardrails for security guard use.

    7.11. Additional required equipment:

        7.11.1. Two-way radio for communication with ship and authorities

        7.11.2. Portable loudhailer or megaphone

        7.11.3. Portable air horn

        7.11.4. Portable Spotlight

ATTACHMENT 5

SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through local police officials.

1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside: (CLIN XX12AT AND XX12AU)

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats: (CLIN XX12AS)

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided

under CLIN XX12AS. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 6

POTABLE WATER SPECIFICATIONS

The following are Potable Water specifications used for this contract.

NATIONAL PRIMARY DRINKING WATER REGULATIONS (NPDWR) BUREAU OF MEDICINE AND SURGERY (BUMED) TREATED WATER QUALITY STANDARDS /ENVIRONMENTAL PROTECTION AGENCY

CONTAMINANT	**MCLG (mg/L)** [1]	**MCL (mg/L)**	**AL (mg/L** [2]**)**
ASBESTOS	7 million fibers/L longer that 10 micrometers	7 million fibers/L longer than 10 micrometers	
ARSENIC		0.05	
BARIUM	2	2	
CADMIUM	0.005	0.005

NITRITE (AS N)	1	1	
Total NITRATE and Nitrite (as N)	10	10	
SELENIUM	0.05	0.05	
FLUORIDE	4	4	

(1) **Maximum contaminant level goal (MCLG).** The maximum level of a contaminant in drinking water at which no known or anticipated adverse effect on the health of persons would occur, and which allows an adequate margin of safety. MCLGs are no enforceable health goals.

(2) **Action level (AL)**. Concentrations of lead or copper in water that determine, in some cases, whether a water system must install corrosion control treatment, monitor source water, replace lead service lines, and undertake a public education program.

(3) The copper action level is exceeded if the concentration of copper in more than 10 percent of tap water samples properly collected during any monitoring period is greater than 1.3 mg/L (i.e., if the "90th percentile" copper level is greater that 1.3 mg/L).

(4) The lead action level is exceeded if the concentration of lead in more that 10 percent of tap water samples properly collected during any monitoring period is greater that 0.015 mg/L (i.e., if the "90th percentile" lead level is greater than 0.015 mg/L).

Contaminant levels for volatile organic chemicals (VOCs) (effective 01 January 1993)

TOTAL TRIHALOMETHANES (THE SUM OF THE CONCENTRATIONS OF BROMODICHLOROMETHANE, DIBROMOCHLOROMETHANE, TRIBROMOMETHANE		0.10[(1)]

(BROMOFORM), AND TRICHLOROMETHANE (CHLOROFORM)		

Note:
(1) The MCL for total trihalomethanes applies only to water systems serving 10,000 or more individuals and which add a disinfectant to the water. For systems serving less than 10,000 individuals, individual States or BUMED (in overseas locations) may adopt an effective date for the MCL.

Microorganisms	**MCLG[1] (mg/L)[2]**	**MCL or TT[1] (mg/L)[2]**
Cryptosporidium	as of 01/01/02:0	as of 01/01/02:TT 3
Giardia lamblia	0	TT[3]
Heterotrophic plate count	n/a	TT[3]
Legionella	0	TT[3]
Total Coliforms (including fecal coliform and E. Coli)	zero	5.0%[4]
Turbidity	n/a	TT[3]
Viruses (enteric)	zero	TT[3]

Note:
[1] Definitions:
Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to MCLGs as feasible using the best available treatment technology and taking cost into consideration. MCLs are enforceable standards.
Maximum Contaminant Level Goal (MCLG) - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety and are non-enforceable public health goals.
Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
Treatment Technique - A required process intended to reduce the level of a contaminant in drinking water.

[2] Units are in milligrams per liter (mg/L) unless otherwise noted. Milligrams per liter are equivalent to parts per million.

[3] EPA's surface water treatment rules require systems using surface water or ground water under the direct influence of surface water to (1) disinfect their water, and (2) filter their water or meet criteria for avoiding filtration so that the following contaminants are controlled at the following levels:

- Cryptosporidium: (as of January 1, 2002) 99% removal/inactivation
- Giardia lamblia: 99.9% removal/inactivation
- Viruses: 99.99% removal/inactivation
- Legionella: No limit, but EPA believes that if Giardia and viruses are removed/inactivated, Legionella will also be controlled.
- Turbidity: At no time can turbidity (cloudiness of water) go above 5 nephelolometric turbidity units (NTU); systems that filter must ensure that the turbidity go no higher than 1 NTU (0.5 NTU for conventional or direct filtration) in at least 95% of the daily samples in any month. As of

January 1, 2002, turbidity may never exceed 1 NTU, and must not exceed 0.3 NTU in 95% of daily samples in any month.

· HPC: No more than 500 bacterial colonies per milliliter.

[4] No more than 5.0% samples total coliform-positive in a month. (For water systems that collect fewer than 40 routine samples per month, no more than one sample can be total coliform-positive). Every sample that has total coliforms must be analyzed for fecal coliforms. There may not be any fecal coliforms or E. coli.

[5] Fecal coliform and E. coli are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Disease-causing microbes (pathogens) in these wastes can cause diarrhea, cramps, nausea, headaches, or other symptoms. These pathogens may pose a special health risk for infants, young children, and people with severely compromised immune systems.

Coliform Bacteria

a. The MCL for coliform bacteria (also called total coliforms) is based on the presence or absence of total coliforms in a sample rather than on an estimate of coliform density.

b. The MCL for potable water systems analyzing at least 40 samples each month: No more than 5.0 percent of the monthly samples may be total coliform-positive.

c. The MCL for systems analyzing fewer than 40 samples each month: No more than one sample each month may be total coliform-positive.

d. Monitoring and Analytical Requirements

(1) Public water systems must collect total coliform samples at sites which are representative of water through the distribution system. Sampling must be accomplished according to a written sampling plan. The monitoring frequency and number of routine samples required for total coliform monitoring are based on the population served by the system and the type of water source, i.e., groundwater, surface water, etc. Sampling requirements for the Navy public water system apply.

(2) The standard sample volume for microbiological analyses must be 100 milliliters.

(3) Approved methods of microbiological analysis include the Auto analysis Coliert System, also called the Minimum Media ONPG-MUG (MMO-MUG) Test; the Presence-Absence (PA) Coliform Test; the Multiple-Tube Fermentation (MTF) Technique; and the Membrane Filter (MF) Technique. A step-by-step microbiological test procedure for shipboard use applies.

e. Repeat Monitoring

(1) A set of three repeat samples for each total coliform-positive routine sample must be collected. One repeat sample must be collected from the same tap as the original total coliform-positive sample, the other repeat samples must be collected from within five service connections of the original total coliform-positive sample. At least one sample must be upstream and the other downstream. These repeat samples must be collected within 24 hours of being notified of the positive result of the original sample, unless the Contracting Officer on a case-by-case basis waives this requirement.

(2) If a total coliform-positive sample is at the end of the distribution system, or one service connection away from the end of the distribution system, the Contracting Officer may waive the requirement to collect at least one sample upstream or downstream of the original positive sampling site.

(3) If total coliforms are detected in any repeat sample, the system must collect another set of repeat samples, as before.

(4) If any routine or repeat sample is total coliform-positive, it must also be analyzed to determine if fecal coliforms are present, except that the system may test for E. coli in lieu of fecal coliforms, or E. coli testing on total coliform-positive samples if the system treats every total coliform-positive sample as fecal coliform positive or E. coli positive and complies with all requirements which apply when a sample is fecal coliform-positive.

Turbidity: The MCL for turbidity applies to both community water systems and non community water systems using surface water sources in whole or in part. The MCL for turbidity in drinking water measured at representative entry points to the distribution system is:

a. One turbidity unit for monthly average (5 turbidity units monthly may apply at Contracting Officer option).

b. Five turbidity units (maximum) average for 2 consecutive days.

The MCL for Radiological Contaminants are:
Gross alpha particle activity including radium 226 but excluding
radon and uranium . . . . . 15 pCi/L
Beta particles and photon emitters ……4 millirems / year
Combined radium 226 and radium 228 . . . . . .5 pCi/L
Tritium . . . . . 20,000 pCi/L
Strontium-90. . . . . 8 pCi/L
Uranium …….. 30ug/L

Note: Screening indicators have been established for radiological contaminants. Gross Alpha present at less than or equal to 5 pCi/L, as an indicator, eliminates the need to analyze for radium 226 and 228. Gross beta present at less than or equal to 8 pCi/L, as an indicator, eliminates the need to analyze for tritium and strontium-90.

Sodium and Corrosivity. No MCLs have been published; however, monitoring is required.

National Secondary Drinking Water Regulations (NSDWR) The Secondary Maximum Contaminant Levels (MCLs)

CONTAMINANT	MCL (mg/L)
ALUMINUM	0.05 TO 0.02
CHLORIDE	250
COLOR	15 COLOR UNITS
COPPER	1
CORROSIVITY	NONCORROSIVE
FLUORIDE	2
FOAMING AGENTS	0.5
IRON	0.3
MANGANESE	0.05
ODOR	3 THRESHOLD ODOR NUMBER
PH	6.5 - 8.5
SILVER	0.10
SULFATE	250
TOTAL DISSOLVED SOLIDS (TDS)	500

ZINC	5

Note: The contaminants covered by this regulation are those that may adversely affect the aesthetic quality of the drinking water. These secondary levels represent goals for drinking water quality but are not Federally enforceable.

(3) The reception, handling, storage, and delivery of potable water to ship's water systems shall be carried out under completely sanitary conditions.

(4) For pierside berthing, delivery shall be made by hose from the pier whenever possible. If barge service is deemed necessary, the Contractor shall ascertain from the ship's Supply Officer the exact amount needed prior to making delivery.

(5) The Contractor shall make deliveries during normal working hours, unless otherwise approved by the ship's Supply Officer or his/her authorized representative.

(6) All equipment, trucks and barges used by the Contractor in performance of these services shall be subject to inspection and test by an authorized representative of the U.S. Government as the Contracting Officer may specify. Final inspection/acceptance shall be subject to approval by the ship's Chief Engineer or his/her authorized representative. The U.S. Government inspectors shall be entitled to inspect the equipment, trucks, and barges at all reasonable times, as often as they may deem necessary, and at such reasonable place or places as the U.S. Government may specify.

(7) The Contractor shall, without cost to the U.S. Government, furnish the necessary personnel and facilities to conduct such test and examination of samples of water and barges used hereunder as the Government inspector may designate, to determine the extent or possibility of contamination of such water, equipment, and barges. The Contractor may, at its option and cost, have the tests conducted by a recognized Sanitary Inspector provided that the performance of the tests and examinations by such Sanitary Inspection has been approved in advance and in writing by the U.S. Government Inspector.

(8) All tests and examinations, whether performed by or on behalf of the Contractor, shall be conducted in the presence of the U.S. Government Inspector.

(9) The Contractor agrees to furnish such reports and execute such forms as the U.S. Government may require in connection with services performed under this contract and further agrees that requests for such reports and execution of such forms will be executed promptly.

ATTACHMENT 7

WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxie specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (insert country). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator’s/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (insert country) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

EXHIBIT A – SCHEDULE OF SUPPLIES & SERVICES

Exhibit A – See separate EXCEL spreadsheet. The Contractor shall complete all unit prices in US Dollars, totals under each lot and grand total for all Lots. A completed Excel soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer verify formula when evaluating prices.

EXHIBIT B - PORT TARIFF TYPE COSTS

Exhibit B – The EXCEL spreadsheet provides estimates of port tariffs only.

EXHIBIT C – CRAFT REPORT

Exhibit C – The submission CRAFTReport is required upon completion of a ship's visit.

EXHIBIT D – OOTW SAMPLE

Exhibit D – This listing under this Excel spreadsheet is a sample for information only.

AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

1. CONTRACT ID CODE	PAGE OF PAGES
J	1 | 2

2. AMENDMENT/MODIFICATION NO.	3. EFFECTIVE DATE	4. REQUISITION/PURCHASE REQ. NO.	5. PROJECT NO.(If applicable)
P00003	31-Jan-2008	N4034507RCSG0029	

6. ISSUED BY	CODE	7. ADMINISTERED BY (If other than item 6)	CODE
U.S. FLEET AND INDUSTRIAL SUPPLY CENTER DET SINGAPORE BUILDING 7-4 PSA SEMBAWANG TERMINAL DEPTFORD ROAD SINGAPORE 759657	N40345	**See Item 6**	

8. NAME AND ADDRESS OF CONTRACTOR (No., Street, County, State and Zip Code)		
GLENN DEFENSE MARINE (ASIA) PTE LTD MR. LEONARD FRANCIS 15D PANDAN ROAD SINGAPORE 609266		9A. AMENDMENT OF SOLICITATION NO.
		9B. DATED (SEE ITEM 11)

CODE QB341 FACILITY CODE	X	10B. DATED (SEE ITEM 13) 02-Aug-2007

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS.
IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

	A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.
X	B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).

Section B - Supplies or Services and Prices

OVERVIEW SECTION III
OVERVIEW OF CONTRACT

1. OBJECTIVE

1.1. The objective of this contract is to obtain Husbanding Services for U.S. Navy Ships and logistics support services required by U.S. Government organizations and agencies in Vanuatu.

1.2. Additionally, the husbanding contractor may be called upon to provide services and supplies in support of exercises and Operations Other Than War (OOTW) in Vanuatu.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Vanuatu.

2.2. The schedule of supplies/services and prices (See Exhibit A.) is sub-divided into lots. Lots may be for individual Ports or they may include several Ports under one (1) lot. For this contract Lot I is for Port Vila and Lot II is for All Other Ports in Vanuatu.

2.3. The individual HS items provided under this contract are listed in Section B2, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT

3.1. This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services. This clause "DEFINITION OF THE CONTRACTUAL REQUIREMENT" complements the clause herein entitled "REQUIREMENTS (OCT 1995) (FAR 52.216-21)."

4. DURATION OF CONTRACT - This contract is for six (6) months from 01 Jul 07 to 31 Dec 07. Additionally, the contract will include FAR 52.217-8 OPTION TO EXTEND SERVICES clause. The possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users - U.S. Navy ships visiting locations covered under this contract are required to use this contract if HSs are requested (with the exceptions noted below). Ship classifications are listed in Attachment 1.

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (USNS)
- U.S. Coast Guard (USCG) Ships
- U.S. Army Ships
- U.S. Government personnel conducting business in locations under this contract.

- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent. However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of four (4) ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

10. LONG TERM SHIP VISITS –

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within three (3) days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off of this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package

PT Port Tariff
QTY Quantity
TP Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GARBAGE: See Attachment 2 – Refuse Definitions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The CLIN for CRAFT should be factored into the Management Fee. The NSP CLIN is used to administratively order any unpriced items in accordance with the pricing rationale in paragraph refer to Section C (SOW), Arranging Supply and Services.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used in this contract. A “Reserved” item is an item that can be ordered when required but currently not available.

- SUPPO: A ship’s Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

- TRASH: See Attachment 2 – Refuse Definitions.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual: Leonard G. Francis

Title of Individual: Managing Director

Mailing Address: 15D Pandan Road, Singapore 609266

Tel No: (65) 62727937

Fax No: (65) 62707240

Mobile: (65) 97983155

SECTION C – STATEMENT OF WORK

TASKS: The Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship’s arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship’s Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

1.2.1. The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The Contractor is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers Vanuatu then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual

agreement with the other contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer who shall issue appropriate contractual documents and courtesy copy to FISC Detachment Singapore Contracting Officer. The Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or no later than 7 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) AND EXERCISE/ LOGISTIC SUPPORT FEES (LOT 2) (CLIN XX36)

2.1. Operations Other Than War (OOTW), sometimes referred to as "contingencies", are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise."

2.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO's).

2.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

2.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
2.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
2.5.3. current innoculation records
2.5.4. possess a valid up-to-date passport.

2.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. He is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The contractor team shall consist of a minimum of two personnel per location that the OOTW and/or Exercise/ Logistic Support is being conducted. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

2.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor's Husbanding fees and CLINS shall apply.

2.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. RESERVED - BROW (CLIN XX04)

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. RESERVED - CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. RESERVED - The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

7.3. The Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

7.4. The Contractor shall provide commercial telephone booth and sale of phone cards for personal use by crewmembers.

7.5. The Contractor shall provide pre-paid International Calling Cards for official use.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The Contractor shall ensure that this area is kept clean during the ship visit in port.

12. FORCE PROTECTION (CLIN XX12)

12.1. General (CLINs XX01 & XX02): The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The Contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the Contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. Floating Line of Demarcation (CLINs XX12AC through XX12AD)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. RESERVED - Perimeter Fencing (CLIN XX12AE)

12.6.1. The Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved Entry Point: Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AF through XX12AJ)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AK)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations and specifications.

12.9. Portable Latrine (CLIN XX12AL)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. Portable Lighting (CLIN XX12AM)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards Services (CLINs XX12AN through XX12AP)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.11.3. All security guards shall be armed.

12.12. Two Way Radios (CLIN XX12AQ) - The Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

12.13. Hand Held Explosive Detectors (CLIN XX12AR) - The Contractor shall provide hand held explosive detectors capable of detecting explosives.

12.14 Hand Held Wand Metal Detectors (CLIN XX12AS) - The Contractor shall provide hand held metal detectors capable of detecting metal.

12.15. Walk Thru X-Ray Machine (CLIN XX12AU) & Metal Detector (CLIN XX12AT) - The Contractor shall provide walk thru X-ray Machine & metal detector capable of X-raying hand carried luggage and bags to determine its contents, and also capable of detecting metal. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

12.16. Under Carriage Vehicle Scanner (CLIN XX12AV) - The Contractor shall provide under carriage vehicle scanner to scan vehicle undercarriages.

13. FORKLIFT WITH OPERATOR (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Contractor shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by theh port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.4. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.5. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.6. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.7. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.8. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. RESERVED - LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. RESERVED - LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. RESERVED - MANLIFT (WITH OPERATOR) (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and a full fuel tank.

18.2. The Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled “SHIP’S SPARE IN TRANSIT”

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship’s arrival.

19.1.4. Shipping documents shall be labeled ‘SHIP’S SPARE(S) IN TRANSIT” and addressed to the ship’s Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. MISCELLANEOUS (CLIN XX20)

20.1. INTERPRETER SERVICES (CLIN XX20AA) – The Contractor shall arrange for interpreter/translator services necessary to assure timely delivery and performance of the supplies and services ordered by the SUPPO. The interpreter/translator shall be fluent in both spoken and written local language and English.

21. RESERVED - OIL BOOMS (CLIN XX21)

21.1. The Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.4. The Contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

23. RESERVED - PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

25. RESERVED - POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. RESERVED - PRATIQUE (CLIN XX26) - The Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

27. RESERVED - REEFER CONTAINER (CLIN XX27)

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. RESERVED - SHORE POWER (CLIN XX28)

28.1. The Contractor shall provide shore power to the ship using

28.1.1. Port provided permanent connection system.

28.1.2. Or diesel generators with fuel along side the ship. Generators shall emit sound levels less than 84 decibels.

28.2. The Contractor shall provide all cables and make all power connections between the generator and ship.

28.3. The availability of shore power shall be in accordance with the schedule established by the ship.

29. RESERVED – SHORE STEAM (CLIN XX29) – The Contractor shall provide shore steam to the ship.

30. RESERVED - STEVEDORE SERVICES (CLIN XX30) - The Contractor shall provide stevedores and supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with qualified drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

33.4. If tugs are not available through the port authority, the Contractor shall use commercially available tugs.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit D - CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36) See MANAGEMENT SERVICES (CLIN XX01), paragraph 2 above also.

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted.

36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification.
36.3.3. Current inoculation records.
36.3.4. Possess a valid up-to-date passport.

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

37. OOTW COST REPORT (CLIN XX37)

37.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

37.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

(End of clause)

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Apr 2003) (46 U.S.C. Appx 1241 and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) In addition to the clauses listed in paragraph (b) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5 (JUL 2005) (DEVIATION), the Contractor shall include the terms of the following clause, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

252.225-7014	Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).
252.232-7019	Training for Contractor Personnel Interacting with Detainees (SEP 2005) (Section 1092 of Pub. L. 108-375).
252.247-7023	Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631)
252.247-7024	Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(1) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(2) *Maximum ordering amount*. The Contractor is not obligated to honor --

(i) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(ii) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(iii) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(3) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(4) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirement for the supplies and services specified in the Schedule that exceed the quantities that the activity may furnish within its own capabilities.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(j) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(k) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(l) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address:	FISC Detachment Singapore PSA Sembawang Terminal Deptford Road, Building 7-4, Unit 2-9 Singapore 759657
Military Address:	PSC 470, Box 2150 FPO AP 96534-2150
FAX Numbers:	(65)-6-750-2639 or 2382

(m) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 202) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(n) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

Section J - List of Documents, Exhibits and Other Attachments

CLAUSES INCORPORATED BY FULL TEXT

LIST OF ATTACHMENTS/EXHIBITS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT	NO. OF PAGES
A	Schedule of Supplies and Services	3
B	Port Tariff	1
C	Operations Other Than War (OOTW) Sample Provisions	2
D	CRAFT Report	3

ATTACHMENT NO.	DOCUMENT	NO. OF PAGES
1.	Classifications of Ships	3
2.	Refuse Definitions	1
3.	Floating Line of Demarcation (FLD) Specifications	3
4.	Picket Boat Operations & Specifications	2
5.	Security Guard Operations	3
6.	Fuel Specifications	4
7.	Water Taxi Specifications	5
8.	Request for Sanitary Inspection	2
9.	Quality Assurance Provisions (including Appendices A & B)	16

NOTE:
EXHIBIT A – SCHEDULE OF SUPPLIES AND SERVICES
Offeror shall complete all unit prices in US Dollars. A completed EXCEL soft copy shall be forwarded to the Contracting Officer as part of the offer to enable the Contracting Officer for evaluation of the prices.

EXHIBIT B - PORT TARIFF ITEMS
The EXCEL spreadsheet provides estimates of port tariffs only.

EXHIBIT C – OPERATIONS OTHER THAN WAR (OOTW) SAMPLE PROVISIONS
The listing under this Excel spreadsheet is a sample for information purposes only.

EXHIBIT D - CRAFT REPORT
The submission CRAFT Report is required within seven (7) days upon completion of a ship's port visit.

The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

Displacement is expressed in tons and represents fully loaded displacement.

The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2

REFUSE SERVICE DEFINITIONS

The following are Refuse Definitions used for this contract:

"Refuse" includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

"Garbage" means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

"Ashes" means the residue from burned wood, coal, coke, and other combustible material.

"**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

"**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

"**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

"**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

"**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
FLOATING LINE OF DEMARCATION (FLD) SPECIFICATIONS

The following are the Governments basic requirements for the Floating Line of Demarcation Specifications to be used for this contract:

1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around anchored ships. The purpose of the FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to CNB radar. The Picket Boats will patrol outside of this visual reference. The FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum 2 (two) work boats to tend to the FLD at all times. The FLD is not designed to stop approaching unauthorized watercraft rather it is to help identify a safe standoff zone.

2. The size of the Floating Perimeter will be approximately 2500 meters to 2700 meters based on a ship's length of approximately 800 feet.

3. Weights sufficient to anchor the FLD in place to the seabed. The size and number of weights will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD line intact at all times regardless of sea conditions.

4. The Contractor shall have communication capabilities, either VHF or cellular phone with Port Operation Control and U.S. Navy vessel. The contractor shall report the status of the Floating Visual Line of Demarcation to Port Operation control every two hours or other regular interval agreed upon between Contractor and Port Operation Control.

5. The Contractor shall provide a minimum of two (2) work boats to tend the FLD at all times while the system is deployed.

6. The FLD shall be deployed in the most expeditious manner as soon as the U.S. Navy vessel is anchored.

7. When the FLD is retrieved, the Contractor must show documentary proof that all equipment deployed is removed from the location.

8. The Contractor shall provide the U.S. Navy, Port Authority/Host Nation an updated and current emergency contact list in case of contingencies.

9. Below are two examples of FLDs.

4. Example 1 - Continuous Line FLD –

Specification: Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable Entry Control Point (ECP) for access.

Buoys or floats positioned every meter on the line sufficient to keep line afloat and visible on the surface of the water.

Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar.

Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the perimeter. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the perimeter intact and in position at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

b. Example 2 - Floating Buoy System (FBS) - RESERVED

Specifications: The FBS must clearly show a perimeter line and fully surround the ships at anchorage. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the demarcation line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical. In addition, buoys must also be visible on ship's/port radar.

Weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

10. Contract Pricing: Prices are firm-fixed-price per unit and are inclusive of all costs which include the following:

a. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

b. Mobilization and Demobilization (Mob & De-mob). All Mob & De-mob costs shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes transportation of equipment and charges for the use of cranes, forklifts, tugs, workboats and any other equipment and labor required for the deployment, maintenance and retrieval for the floating perimeter.

c. Repositioning equipment. All repositioning of equipment shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

d. Pre-positioning / Pre-staging and Vetting Operations. All pre-positioning / Pre-staging and vetting operations shall be included in the unit price. The vessel shall only be charged for the actual number days that the perimeter is in use while the ship is port. No additional days shall be charged.

11. Time Calculations: These CLINs are based on daily rates. Time will begin being measured once the equipment is deployed round the vessel and capable of operations.

12. General: The Contractor is responsible for providing floating visual line of demarcation. The Contractor must work closely with other US Navy contractors such as subsistence contractor. The Contractor will follow the requirements below unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

13. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

a. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the

company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

b. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

14. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

a. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

b. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

c. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

15. Inspections: The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

ATTACHMENT 4
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

1. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

2. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

3. Ships at anchorage will normally require two Picket Boats.

4. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

5. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

6. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

7. The Picket Boat will meet the following requirements:

7.1. Licensed for commercial operations by local country Department of Transportation.

7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 5
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

    1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

    1.2. Security guards may be provided through private security firms or through local police officials.

    1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

    1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

    1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside:

    2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

    2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

    2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

    2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

    2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

    2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. ROEs Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats:

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the

ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 6
FUEL SPECIFICATIONS

The following are the Fuel Specifications for this contract:

SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	**Requirement**	**Text Method**
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC 90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	 Record Record 357ºC 385ºC 3.0	D 86 3/
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100ml, (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664
Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/

Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2622
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

Minimum Requirements for Purchases of Commercial Distillate Fuels ((Navy) Marine Gas Oil) for Bunkers

The following minimum requirements have been established for use when buying fuel (gas oil - 100% distillate) from commercial sources when F76 is not available. Marine Gas Oil is not acceptable as cargo fuel on Navy Oilers.

TEST	METHOD	REQUIREMENTS
1. Cetane Number	ASTM D 613	45 min
or		
Cetane Index	ASTM D 976	45 min

Note: A cetane index of 41 or above, but less than 45, is acceptable provided the 90% Distillation Point does not exceed a maximum of 338ºC. A cetane number of 40 or above, but less than 45, is acceptable provided the 90%

Distillation Point does not exceed a maximum of 338°C.

2. Appearance @ 21ºC or ambient temperature (whichever higher)	Visual	Clear & Bright
or		
Water and Sediment	ASTM D 2709	0.05% max
3. Distillation. 90% Point	ASTM D 86	375ºC max
4. Flash Point	ASTM D 93	60ºC min
5. Pour Point	ASTM D 97	Report
6. Cloud Point	ASTM D 2500	-1.1ºC (30 °F)
7. Viscosity @ 40ºC	ASTM D 455	1.7 - 4.5 CST
8. Color	ASTM D 1500	3 max
9. Gravity	ASTM D 1298, D 287	Record
10. Carbon Residue	ASTM D 524	0.35% max
11. Ash	ASTM D 482	0.01% max
12. Sulfur	ASTM D 129, D 1552 D2622	1.00% max
13. Copper Corrosion	ASTM D 130	3 max

C16.23-2 COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC JAN 1998)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min
	NOTE: A Cetane Number of 40 minimum, or a Cetane Index of 41 minimum, is acceptable provided the 90 Percent Distillation Point does not exceed a maximum of 338^{O}C.		
2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min
	NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.		

5.	Cloud Point	ASTM D 2500	-1.1^{o}C (30^{o}F) max.

NOTE: Cloud Point results will be evaluated based upon bunkering location.

6.	Viscosity @ 40^{o}C	ASTM D 445	1.7 - 4.5 cst
7.	Color	ASTM D 1500	3 max.

NOTE FOR DOMESTIC ITEMS: This Color test requirement is deleted if red dye has been added in compliance with U.S. Environmental Protection Agency or Internal Revenue Service regulations; however, the resulting fuel/dye blend must have a red tint. It shall not be visually brown or darker in appearance.

8.	Density @ 15^{o}C	ASTM D 1298	876 kg/m^{3} max.
9.	Carbon Residue on 10% bottoms	ASTM D 524	0.35 mass % max.
		ASTM D 189	
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur	ASTM D 4294, ASTM D 1552, or ASTM D 2622	1.0 mass % max.
12.	Corrosion	ASTM D 130	3 max.
13.	Distillate Fuel (fuel shall contain no residual)	None	100%

C36 FUEL OIL, INTERMEDIATE, GRADES RMB-10 (IFO 60)/RME-25 (IFO 180)/RMG-35 (IFO 380) (DESC MAY 1997)

Product shall conform to ISO 8217:1996 or ASTM D 2069-91. Product conforming to ASTM D 2069-91 shall meet the following additional requirements:

REQUIREMENTS	**GRADE RMB-10 (IFO 60)**	**GRADE RME-25 (IFO-180)**	**GRADE RMG-35 (IFO 380)**	**TEST METHOD**
Density @15^{o}C, kg/m^{3}, max	981.0	991.0	991.0	ISO 3675/12185
Aluminum plus silicon, mg/kg, max	80	80	80	ISO 10478
Total Sediment, potential, %(m/m), max	0.10	0.10	0.10	ISO 10307-2

ATTACHMENT 7
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxie specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Det Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Det Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of (insert country). Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by (insert country) for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

REQUEST FOR SANITARY INSPECTION

SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhoused and dairies only).

List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9
QA PROVISIONS

FISC DETACHMENT SINGAPORE

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING**: Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packaged in non-returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix B below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32°F and 41°F (0°C and 5°C). Frozen products shall be delivered at 0°F (-18°C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32°F and 41°F (0°C and 5°C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32°F and 50°F (0°C and 10°C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price

adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35°F and 55 °F (2°C and 12°C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. FROZEN MEAT AND POULTRY

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. FROZEN WATERFOODS:

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. **SHELL EGGS:**

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 12 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55^{o} to 65^{o}F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw

Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)

Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.

Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:
1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]			
	Aerobic Plate Count (APC)	Coliform Count	ATP (RLU) Counts
Environmental swab	100 per 50 sq cm	10 per 50 sq cm	See Note 3

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram
Vibrio vulnificus[2,3]	Zero (0) Tolerance	
Salmonella[2]	Zero (0) Tolerance	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen

Product(s)	Standard Plate Count (SPC) [3] m	M	Coliform count	Combined Yeast and Mold count
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]		
Counts [9]	m	M
Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.

3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	
E.coli O157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]		
Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	

Salmonella species	Zero (0) Tolerance[1]
Listeria moncytogenes	Zero (0) Tolerance[1]
E. coli 0157:H7	Zero (0) Tolerance[1]

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]

Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu

Counts[2]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram	
Staphylococcus aureus	100 per gram	1000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]	Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.
2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]					
Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]		
Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or he off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.

	Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetable Olives. Fruit juices and nectars, shelf stable frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fres and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries. Pies. Soft pretzels. Won ton wrappers. Filled bakery items.	All other bakery products, including Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry. Cookies, unfilled. Crackers. Cupcakes, unfilled. Dough, frozen or chilled. Dumplings, frozen. English muffins. Flour. Fruitcakes. Melba toast. Muffins Pancake batter, frozen. Pancake/waffle mix. Pasta, dry (noodles). Pizza crust. Taco shells. Toaster pastries. Pie crusts, unfilled. Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically: Fish, meat, poultry, dairy, egg, and shellfish products Pickled eggs. Frozen dinners. Pudding novelties, frozen or chilled. Tofu.	All other dietary and specialty preparations, including: Baby formula, canned. Chips, nacho or potato. Creamer, coffee, imitation (non-dair Dips. Nacho cheese, canned. Nutri-why. Popcorn.

		Puddings, canned.
8945		Fats and food oils, including margar
8950		All condiments and related products including: Salad dressings. Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically: Ice. Bottled water.	All other nonalcoholic beverages, including: Dry ice. Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.
3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products*.
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

1. CONTRACT ID CODE	PAGE OF PAGES

Section B - Supplies or Services and Prices

OVERVIEW
SECTION B1 – CONTINUATION

OVERVIEW OF CONTRACT

1. OBJECTIVE

1.1. The objective of this contract is to obtain Husbanding Services for U.S. Navy Ships and logistics support services required by U.S. Government organizations and agencies in Noumea and all other ports in New Caledonia.

1.2. Additionally, the husbanding contractor may be called upon to provide services and supplies in support of exercises and Operations Other Than War (OOTW) in New Caledonia.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Noumea and all other ports in New Caledonia.

2.2. The schedule of supplies/services and prices (See Exhibit A.) is sub-divided into lots. Lots may be for individual Ports or they may include several Ports under one (1) lot. For this contract Lot I is for Noumea, Lot II All Other Ports and Lot III OOTW, New Caledonia.

2.3. The individual HS items provided under this contract are listed in Section B2, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.4. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.5. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT

3.1. This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services. This clause "DEFINITION OF THE CONTRACTUAL REQUIREMENT" complements the clause herein entitled "REQUIREMENTS (OCT 1995) (FAR 52.216-21)."

4. DURATION OF CONTRACT - This contract is for six (6) months and commences from 22 Jun 2007 through 21 Dec 2007. Additionally, the contract will include FAR 52.217-8 OPTION TO EXTEND SERVICES clause. The possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users - U.S. Navy ships visiting locations covered under this contract are required to use this contract if HSs are requested (with the exceptions noted below). Ship classifications are listed in Attachment 1.

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (USNS)
- U.S. Coast Guard (USCG) Ships
- U.S. Army Ships
- U.S. Government personnel conducting business in locations under this contract.
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent. However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of four (4) ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

10. LONG TERM SHIP VISITS –

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within three (3) days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the

subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off of this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT Collection, Holding Transfer Sewage Removal and Disposal

CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job
LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TP	Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge.

Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GARBAGE: See Attachment 2 – Refuse Definitions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The CLIN for CRAFT should be factored into the Management Fee. The NSP CLIN is used to administratively order any unpriced items in accordance with the pricing rationale in paragraph refer to Section C (SOW), Arranging Supply and Services.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used in this contract. A “Reserved” item is an item that can be ordered when required but currently not available.

- SUPPO: A ship’s Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

- TRASH: See Attachment 2 – Refuse Definitions.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual:	LEONARD G. FRANCIS	(b)(6), (b)(7)(C)
Title of Individual:	MANAGING DIRECTOR	
Mailing Address:	15D PANDAN ROAD SINGAPORE 609266	15D PANDAN ROAD SINGAPORE 609266

Section C - Descriptions and Specifications

STATEMENT OF WORK
STATEMENT OF WORK (SOW)

TASKS: The Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship’s arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship’s arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship’s Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The Contractor is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers New Caledonia then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual agreement with the other contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer and courtesy copy to FISC Detachment Singapore Contracting Officer who shall issue appropriate contractual documents. The Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or no later than 7 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following

specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) AND EXERCISE/ LOGISTIC SUPPORT FEES (LOT 2) (CLIN XX36)

2.1. Operations Other Than War (OOTW), sometimes referred to as "contingencies", are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise."

2.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO's).

2.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

2.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
2.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
2.5.3. current innoculation records
2.5.4. possess a valid up-to-date passport.

2.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. He is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The contractor team shall consist of a minimum of two personnel per location that the OOTW and/or Exercise/ Logistic Support is being conducted. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

2.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor's Husbanding fees and CLINS shall apply.

2.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. RESERVED - CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. RESERVED - The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

7.3. The Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

7.4. The Contractor shall provide commercial telephone booth and sale of phone cards for personal use by crewmembers.

7.5. The Contractor shall provide pre-paid International Calling Cards for official use.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The Contractor shall ensure that this area is kept clean during the ship visit in port.

12. FORCE PROTECTION (CLIN XX12)

12.1. General (CLINs XX01 & XX02): The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The Contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting

Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the Contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. RESERVED - Floating Line of Demarcation (CLINs XX12AC through XX12AE)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. Perimeter Fencing (CLIN XX12AF)

12.6.1. The Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved Entry Point: Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AG through XX12AK)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AL & XX12AM)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations and specifications.

12.9. Portable Latrine (CLIN XX12AN)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. Portable Lighting (CLIN XX12AP)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards Services (CLINs XX12AQ through XX12AS)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.11.3. All security guards shall be armed.

12.12. Two Way Radios (CLIN XX12AT) - The Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

12.13. RESERVED - Hand Held Explosive Detectors (CLIN XX12AU) - The Contractor shall provide hand held explosive detectors capable of detecting explosives.

12.14 RESERVED - Hand Hand Held Wand Metal Detectors (CLIN XX12AV) - The Contractor shall provide hand held metal detectors capable of detecting metal.

12.15. RESERVED - Hand Walk Thru X-Ray Machine (CLIN XX12AX) & Metal Detector (CLIN XX12AW) – The Contractor shall provide walk thru X-ray Machine & metal detector capable of X-raying hand carried luggage and bags to determine its contents, and also capable of detecting metal. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

12.15. RESERVED - Hand Under Carriage Vehicle Scanner (CLIN XX12AY) - The Contractor shall provide under carriage vehicle scanner to scan vehicle undercarriages.

13. FORKLIFT WITH OPERATOR (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Contractor shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by theh port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.4. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.5. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.6. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.7. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.8. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. RESERVED - LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. RESERVED - MANLIFT (WITH OPERATOR) (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and a full fuel tank.

18.2. The Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled “SHIP’S SPARE IN TRANSIT”

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship’s arrival.

19.1.4. Shipping documents shall be labeled ‘SHIP’S SPARE(S) IN TRANSIT” and addressed to the ship’s Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. RESERVED - MISCELLANEOUS

21. RESERVED - OIL BOOMS (CLIN XX21)

21.1. The Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.4. The Contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

23. RESERVED - PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. PRATIQUE (CLIN XX26) - The Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

27. RESERVED - REEFER CONTAINER (CLIN XX27)

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. RESERVED - SHORE POWER (CLIN XX28)

29. RESERVED – SHORE STEAM (CLIN XX29)

30. STEVEDORE SERVICES (CLIN XX30) - The Contractor shall provide stevedores and supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with qualified drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

33.4. If tugs are not available through the port authority, the Contractor shall use

commercially available tugs.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit D - CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36) See paragraph 2 above also.

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted.
36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification.
36.3.3. Current inoculation records.
36.3.4. Possess a valid up-to-date passport.

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

37. OOTW COST REPORT (CLIN XX37)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

35.3. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

CLAUSES INCORPORATED BY REFERENCE

52.212-5	Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items	SEP 2005

CLAUSES INCORPORATED BY FULL TEXT

ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(1) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(2) *Maximum ordering amount*. The Contractor is not obligated to honor --

(i) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(ii) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(iii) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(3) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(4) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirement for the supplies and services specified in the Schedule that exceed the quantities that the activity may furnish within its own capabilities.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(j) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(k) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(l) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address:	FISC Detachment Singapore PSA Sembawang Terminal Deptford Road, Building 7-4, Unit 2-9 Singapore 759657
Military Address:	PSC 470, Box 2150 FPO AP 96534-2150
FAX Numbers:	(65)-6-750-2639 or 2382

(m) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 202) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(n) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the “Contracting Officer” or “Chief of the Contracting Office”.

1. The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

2. Displacement is expressed in tons and represents fully loaded displacement.

3. The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

4. There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

GLOSSARY OF TERMS AND ABBREVIATIONS

AGOS	RESEARCH SHIP
AGSS	RESEARCH SUBMARINE
AOE	FAST COMBAT SUPPORT SHIP
ARS	SALVAGE SHIP

ATTACHMENT 2 - REFUSE SERVICES
ATTACHMENT 2 - REFUSES SERVICE
Refuse Service Definitions

The following are Refuse Definitions used for this contract:

5. **"Refuse"** includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

6. **"Garbage"** means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

7. **"Ashes"** means the residue from burned wood, coal, coke, and other combustible material.

8. "**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

9. "**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

10. "**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

11. "**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

12. "**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
FLOATING LINE OF DEMARCATION (FLD) SPECIFICATIONS

1. The following are the Governments basic requirements for the Floating Line of Demarcation Specifications to be used for this contract:

1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around anchored ships. The purpose of the FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar. The Picket Boats will patrol outside of this visual reference. The FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum two (2) work boats to tend to the FLD at all times. The FLD is not designed to stop approaching unauthorized watercraft rather it is to help identify a safe standoff zone.

2. The size of the Floating Perimeter will be approximately 2500 meters to 2700 meters based on a ship's length of approximately 800 feet.

3. Weights sufficient to anchor the FLD in place to the seabed. The size and number of weights will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD line intact at all times regardless of sea conditions.

4. The Contractor shall have communication capabilities, either VHF or cellular phone with Port Operation Control and U.S. Navy vessel. The contractor shall report the status of the Floating Visual Line of Demarcation to Port Operation control every two hours or other regular interval agreed upon between Contractor and Port Operation Control.

5. The Contractor shall provide a minimum of two (2) work boats to tend the FLD at all times while the system is deployed.

6. The FLD shall be deployed in the most expeditious manner as soon as the U.S. Navy vessel is anchored.

7. When the FLD is retrieved, the Contractor must show documentary proof that all equipment deployed is removed from the location.

8. The Contractor shall provide the U.S. Navy, Port Authority/Host Nation an updated and current emergency contact list in case of contingencies.

9. Below are two examples of FLDs.

a. Example 1 - Continuous Line FLD –

i. Specifications: Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable Entry Control Point for access.

ii. Buoys or floats positioned every meter on the line sufficient to keep line afloat and visible on the surface of the water.

iii. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar.

iv. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the perimeter. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the perimeter intact and in position at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

b. Example 2 - Floating Buoy System (FBS)

i. Specifications: The FBS must clearly show a perimeter line and fully surround the ships at anchorage. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the demarcation line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical. In addition, buoys must also be visible on ship's/port radar.

ii. Weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

10. Contract Pricing: Prices are firm-fixed-price per unit and are inclusive of all costs which include the following:

    a. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

    b. Mobilization and Demobilization (Mob & De-mob). All Mob & De-mob costs shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes transportation of equipment and charges for the use of cranes, forklifts, tugs, workboats and any other equipment and labor required for the deployment, maintenance and retrieval for the floating perimeter.

    c. Repositioning equipment. All repositioning of equipment shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

    d. Pre-positioning / Pre-staging and Vetting Operations. All pre-positioning / Pre-staging and vetting operations shall be included in the unit price. The vessel shall only be charged for the actual number days that the perimeter is in use while the ship is port. No additional days shall be charged.

11. Time Calculations: These CLINs are based on daily rates. Time will begin being measured once the equipment is deployed round the vessel and capable of operations.

12. General: The Contractor is responsible for providing floating visual line of demarcation. The Contractor must work closely with other US Navy contractors such as subsistence contractor. The Contractor will follow the requirements below unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

13. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

    a. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

    b. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

14. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

    a. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

    b. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

    c. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

15. Inspections: The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

ATTACHMENT 4
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

13. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

14. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

15. Ships at anchorage will normally require two Picket Boats.

16. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

17. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

18. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

19. The Picket Boat will meet the following requirements:

    7.1. Licensed for commercial operations by local country Department of Transportation.

    7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

    7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience,

skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

7.4. If a deckhand crewmember is required, only qualified personnel are used.

7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

7.6. Minimum length of 8 meters and capable of carrying three people.

7.7. Minimum 18 knots speed.

7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 5
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through local police officials.

1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards - At Pierside

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. Rules of Engagement (ROE) Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards - In Picket Boat

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 6
FUEL SPECIFICATIONS

The following are the Fuel Specifications for this contract:

1. SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	**Requirement**	**Text Method**
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC	 Record Record	D 86 3/

90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	357ºC 385ºC 3.0	
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100ml, (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664
Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/
Corrosion, @ 100ºC, (max)	No. 1 ASTM	D 130
Hydrogen Content, % wt., (min)	12.5	D 4808
Ignition Quality, Cetane Number, (min) Cetane Index, (min)	42	D 613 (R), D 976 8/
Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2622
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

2. COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC MAY 2002)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min

NOTE: If the Cetane number is reported, the reported value shall apply to the base fuel without Cetane improving additives.

2.	Appearance @ 21^{O}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{O}C max.
4.	Flash Point	ASTM D 93	60^{O}C min

NOTE: The flash point value is absolute and no value less than 60^{O}C is permissible.

5. Cloud Point — ASTM D 2500 -1.1^{O}C (30^{O}F) max.
NOTE: Cloud Point results will be evaluated based upon bunkering location.

6.	Viscosity @ 40^{O}C	ASTM D 445	1.7 - 4.5 cSt
7.	Color 4	ASTM D 1500	3 max.

NOTE for deliveries outside the United States, the offerors must submit information on the composition, color and desired concentration of any dye to be used in order to obtain approval.

8.	Density @ 15^{O}C	ASTM D 1298	876 kg/m^3 max.

9.	Carbon Residue on 10% bottoms 5 NOTE: For carbon residue on 10% bottoms, ASTM D 189 is an acceptable alternate method.	ASTM D 524	0.35 mass % max.
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur 6 NOTE: For total sulfur content, ASTM D 1552 and ASTM D 2622 are acceptable alternate methods.	ASTM D 4294	1.0 mass % max.
12.	Corrosion	ASTM D 130	3 max.
13.	Composition Distillate Fuel (fuel shall contain no residual)	None	100%

3. FUEL OIL, INTERMEDIATE, GRADES RME-25 (IFO 180 AND RMG-35 (IFO 380) (DESC JUN 2004)

a. Product shall conform to ISO 8217:1996.

b. ALTERNATE TEST METHODS. The test methods below can also be used to determine the following requirements:

REQUIREMENTS TEST METHOD

1. Density @15^{o}C, kg/m^{3} ASTM D 4052
2. Carbon Residue ASTM D 4530
3. Vanadium, mg/kg ASTM D 5863
4. Aluminum plus silicon, mg/kg ASTM D 5184

c. SULFUR. Starting My 19, 2005, the sulfur limit for RME-25 (IFO 180) purchased under the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, maximum.

d. A. FOR THE BULK PROGRAM, RME-25 (IFO 180) purchased undr the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, masimum. (DESC 52.246-9FFE).

ATTACHMENT 7 - WATER TAXI SPEC
ATTACHMENT 7 - WATER TAXI SPECIFICATIONS

WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxie specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger

compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Detachment Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Detachment Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of New Caledonia. Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator’s/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by New Caledonia for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

Attachment 8 – Sanitary Inspection
SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhouses and dairies only).
List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9 - QA PROVISIONS
ATTACHMENT 9 - QA PROVISIONS

FISC DETACHMENT SINGAPORE

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the re[illegible] agreement, product is protected from contamination, and quality is preserved. Products shal[illegible] returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix A below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. FROZEN MEAT AND POULTRY

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. FROZEN WATERFOODS:

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. SHELL EGGS:

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41^{o}F (5^{o}C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 12 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55° to 65°F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.

Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava
Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)
Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas

Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).

Appendix B - CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD

Microbiological criteria for dairy products[1,2]

Product(s)	Standard Plate Count (SPC) (See notes 3&4)	Coliform count (See note 4)	combined yeast and mold count (See note 4)	Preliminary incubation count (See note 5)
Aseptically processed and packaged Milk and milk products	0 per ml (See notes 6&7)		0 per ml (See note 6)	0 per ml (See note 6)
Buttermilk and acidophilus milk			10 per gram	
Cottage cheese			10 per gram	10 per gram
Cream, sour cultured			10 per gram	10 per gram
Grade A pasteurized milk and milk products	20,000 per ml		10 per ml	200,000 per ml
Ice cream products, flavored, fruit and / or nuts	50,000 per gram		20 per gram	
Ice cream products, vanilla and plain flavored	50,000 per gram		10 per gram	
Frozen dessert mix:				
Vanilla flavor	50,000 per gram		10 per gram	10 per gram
other flavors	50,000 per gram		20 per gram	10 per gram
Yogurt, chilled			10 per gram	
Yogurt, frozen, plain			10 per gram	
Yogurt, frozen, flavored			20 per gram	
Yogurt, soft serve mix			10 per gram	

Notes:
1. Phosphates as specified in the PMO.
2. Products shall be free of antibiotic or pesticide residues or below the action levels established for such residues by the applicable Federal Regulatory Agency. Antibiotic residue testing shall be by the method described in the PMO. Examinations and test to detect adulterants, including pesticides, shall be conducted by methods recognized by the applicable Federal regulatory agency.
3. Not applicable to cultured products.
4. All counts are maximum allowed standards.
5. Samples must be received within 72 hrs of pasteurization. Preliminary incubation test is used as a determination of keeping quality.
6. Nonconformance's will be considered an imminent health hazard.
7. Either aerobic or anaerobic SPC.

Microbiological criteria for Environmental Swabs[1,2]		
	Aerobic Plate Count	Coliform Count
ATP (RLU) Counts	(APC)	
Environmental swab See Note 3	100 per 50 sq cm	10 per 50 sq cm

Notes:
1. Microbiological counts can be used as an index for evaluating the sanitation status of processing equipment and the facility.
2. All counts are maximum recommended limits.
3. Relative Light Units (RLU) are directly correlated to log cfu/sq cm . RLU maximum tolerances are dependent upon the manufacturer of the ATP bioluminescence reader. Follow manufacturer's instructions for RLU limits.

Microbiological criteria for Fish, fresh or frozen, including shellfish		
Counts[4]	m	M
Aerobic Plate Count (APC)	5,000 per gram	1,000,000 per gram
E. coli	10 per gram	500 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Vibrio parahaemolyticus [1]	10 per gram	100 per gram

Vibrio vulnificus[2,3]	Zero (0) Tolerance
Salmonella[2]	Zero (0) Tolerance

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Used for oysters and fish designed to be consumed raw.
2. No viable pathogen in a 25 gram sample.
3. Limit is established as non-detectable depending on method used and detection limit.
4. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Fruit Juice, Fresh or Frozen

Product(s)	Standard Plate Count (SPC) [3] m	M	Coliform count	Combined Yeast and Mold count
Aseptically processed juice[1]	0		0	0
Pasteurized Juice[2]		20,000 per ml	20 per ml	200 per ml
Non-Pasteurized Juice[4]	50,000 per ml	100,000 per ml		

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Must be labeled as aseptically processed and process must be verified.
2. Must be labeled as pasteurized.
3. Plate count limits for juices, except for aseptically processed juice, are used as a quality indicator and may assist in determining keeping quality and/or shelf life.
4. Non-pasteurized juice is not approved for US Armed Forces Procurement.

Microbiological criteria for Kimchee [1,3,4]

Counts [9]	m	M

Coliform (MPN)	10 per gram	
Clostridium perfringens	100 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Pseudomonas ssp [7]	200 per gram	
Streptococcus ssp [7]	10 per gram	
Listeria monocytogenes[8]	0	
Salmonella ssp[2,8]	0	
Vibrio ssp[5,8]	0	
Salt %	$\geq$ 2.5/wt	$\leq$ 3.5/wt
pH	$\geq$ 4.2	$\leq$ 4.7
Polygalacturonase [6]	Negative	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. Products containing monosodium glutamate (MSG), nuts or nut oils must be labeled appropriately to reflect potential allergenic contents.
2. Only for varieties containing meat or poultry, sprouts, watercress or melon.
3. Varieties of Kimchee include, but are not limited to: Vegetables: winter, spring, cucumber, wrapped, Yolma, Chang, radish (Nabak), white (Pak), western-cabbage, pony-tail radish (Chonggak), eggplant, green onion, pumpkin, spinach, leek, green pepper; Chanachi: radish, green pepper, cucumber, garlic cabbage; Kaktagi: radish, radish and oyster Kaktuki; Tong Chimi;: radish tongchimi; Shikhae: chicken, andong, Alaskan Pollock shikhae.
4. All Kimchee products must be delivered and stored refrigerated with a definitive shelf life marked on each container.
5. Only for varieties containing fish or seafood ingredients.
6. Polyglacturonase activity is an indicator of overripening and spoilage, inferring the possible presence of Bacillus subtilus, Saccaromyces fragilis, Candida pseudotropicalis, Oospora lactis, Asperfillus ssp., and Penicillium ssp.
7. Excessive acidification may be due to high counts of these organisms; this is an indicator of very poor quality product.
8. Zero tolerance pathogens.
9. Products may not be examined for all microbial characteristics as listed above.

Microbiological criteria for Retail Ground Beef, Beef Trimmings, Ground Pork , Poultry (Chilled or Frozen)		
Counts	m	M
Aerobic Plate Count (APC)	100,000 per gram	1,000,000 per gram
Fecal Coliform	50 per gram	500 per gram
Total coliform	100 per gram	1,000 per gram
E. coli	10 per gram	< 110 per gram
Coagulase Positive Staph	<100 per gram	500 per gram
Salmonella species	Zero (0) Tolerance[1]	

E.coli O157:H7	Zero (0) Tolerance[1]

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.

Microbiological limits for Sandwiches, Prepared Salads and Spreads, Bagged Salad, and Cut Vegetables [4]

Counts[3]	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli most probable number (MPN)	3 per gram[2]	10 per gram
Coliform (fecal)	10 per gram	100 per gram
Yeast and mold count	200 per gram	1,000 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Campylobacter jejuni	Zero (0) Tolerance[1]	
Salmonella species	Zero (0) Tolerance[1]	
Listeria moncytogenes	Zero (0) Tolerance[1]	
E. coli 0157:H7	Zero (0) Tolerance[1]	

m =values above this level, but below that "M" are of marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:

1. No viable pathogen in a 25 gram sample.
2. $\leq$ 10 per gram if using 3M Petri Film for E. coli counting.
3. Products may not be examined for all microbial characteristics as listed above. Contact laboratory if specific tests are required.
4. Tuna, chicken, ham and egg salads are tested the same, regardless whether on bread or submitted in tubs, buckets or other retail containers.

Microbiological criteria for Soft Serve Ice (cream) Milk and Soft Serve Yogurt at the retail/user level[2]

Counts	m	M
Standard plat count [1]	50,000 per gram	250,000 per gram
Coliform	10 per gram	100 per gram
Combined Yeast & Mold		100 per gram

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
Standard Plate Count (SPC) does not apply to yogurt products.
Soft serve and Yogurt machines.

Microbiological limits for Tofu			
Counts[2]		m	M
Aerobic plate count (APC)		100,000 per gram	1,000,000 per gram coli (MPN)
<3 per gram	10 per gram		
Staphylococcus aureus		100 per gram	1000 per gram
Salmonella species[1]		Zero (0) Tolerance[1]	
Listeria moncytogenes[1]		Zero (0) Tolerance[1]	
Yersinia entercoliticus[1]		Zero (0) Tolerance[1]	

Legend:
m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. Products may not be examined for all microbial characteristics as listed above.

Microbiological and Chemical criteria for Bottled Water[1] and Vending Machine Water[2] and Ice		
Counts	m	M
Coliform	0 per 100 ml	
Coliform (bottled water)	0 per 250ml	
Heterotrophic Plate Count [5]	1000 per ml	100,000 per ml
Pseudomonas aeruginosa	Zero (0) Tolerance	
Flouride[2]		
Arsenic[2]		
Trihalomethanes[2]		
Chlorine[2]		
Dissolved Solids[4]		
Silver [3]	None Detectable	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. Bottled water is tested IAW the specific limits set forth by the Code of Federal Regulations (CFR) and current Environmental Protection Agency (EPA) regulations.

2. Vending machine water requirements are from the Association of Food and Drug Officials Model Code, 1997; Ice standards are derived from the International Packaged Ice Association. These are the minimum tests required for Vending Machine water.
3. Current published regulatory limits apply.
4. Only those machines utilizing silver impregnated carbon filters. Dissolved solids measurements are for vending machines labeled "Purified".
5. Ice and water derived from well water or surface water sources marketed at retail have higher allowable HPC limits. See current guidelines established in the CFR.

Microbiological criteria for Retail/User level Pre-packaged Deli and RTE Products[4]

Product(s)	APC[3]	Listeria spp.[2]	Salmonella[2]	Coliform[2]	E.Coli O157:H7
Luncheon Meats, frankfurters, Beef, poultry & pork	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	
Cheese, soft and hard	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pasteurized, liquid, frozen or Dried egg	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Pizza topping (meat & cheese)	Zero (0) Tolerance	Zero (0) Tolerance	100/g	Zero (0) Tolerance	
Dried meats sticks, jerky [1]	Zero (0) Tolerance	Zero (0) Tolerance	10/g	Zero (0) Tolerance	

Notes:
1. Yeast and mold combined count should not exceed 100 /g.
2. No viable pathogen in a 25 gram sample. All counts are maximum allowable limits.
3. See Table Below for APC values in RTE Products.
4. Includes all like type/style products not otherwise listed.

Additional Microbiological limits for Commercial (Food Court Style) RTE Products[2,4]

Counts	m	M
Aerobic plate count (APC)	100,000 per gram	1,000,000 per gram
E. coli (MPN)	3 per gram [3]	10 per gram
Staphylococcus aureus	100 per gram	1,000 per gram
Clostridium perfringens	100 per gram	1,000 per gram
Bacillus cereus	100 per gram	1,000 per gram
Salmonella species[1]	Zero (0) Tolerance[1]	
Listeria moncytogenes[1]	Zero (0) Tolerance[1]	
E. coli 0157:H7[1]	Zero (0) Tolerance[1]	
Campylobacter jejuni	Zero (0) Tolerance[1]	

m =values above this level, but below that of M are marginal microbiological quality.
M =values above this level are unacceptable and the product may be rejected and deliveries suspended.

Notes:
1. No viable pathogen in a 25 gram sample.
2. This table is primarily designed for hot food lines.
3. ≤ 10 per gram if using 3M Petri Film for E. coli counting.
4. Products may not be examined for all microbial characteristics when submitted. These values are primarily used when conducting food borne illness investigations and overall quality characteristics.

PART VI - Summary of Directory Listing Requirements

Federal Supply Class (*Note 1)	Listing Required	Listing Not Required
8905 (*Notes 2, 3)	All fish, meat, poultry, and shellfish, including: Buffalo meat. Fish, canned. Fish, fresh or fresh smoked, modified atmospheric packaged. Fish, fresh or frozen, packaged. Herring, pickled. Quail. Rabbits. Salmon, smoked. Squid.	Crabs, live. Crawfish, live. Fish, fresh or frozen, whole and/or eviscerated, head on or off, unscaled, unpackaged. Lobster, live. Shrimp, fresh or frozen, whole or head off.
8910 (*Notes 4, 5)	All dairy foods and eggs, including: Cream, sterilized. Creamer, coffee, dairy. Dairy soft serve mixes. Desserts/puddings, frozen. Egg nog, canned. Egg substitutes. Italian ices. Topping, real cream. Yogurt, fresh or frozen.	Chocolate drink mix, non-dairy. Powdered dairy mixes. Toppings, non-dairy.
8915 (*Note 7, 8)	All pre-cut pre-packaged minimum processed fresh fruits and vegetables. Kimchee. Mushrooms, whole and sliced. Salads, non-meat, with or without dressing (not USDA listed). Vegetable sprouts. Fruit juices and nectars, refrigerated.	All unprocessed fruits and vegetables. Olives. Fruit juices and nectars, shelf stable or frozen concentrate.
8920 (*Notes 6, 9)	Bakery and cereal products (baked and unbaked, fresh and frozen), specifically: Croissants. Doughnuts Egg roll wrappers. Flour and corn tortillas. Wet pasta (noodles). Pastries. Pies. Soft pretzels. Won ton wrappers. Filled bakery items.	All other bakery products, including: Bagels. Batter mix, dry. Biscuits, canned. Breads, rolls, and buns. Cake mix, dry. Cakes, unfilled. Cookie mix, chilled or dry. Cookies, unfilled. Crackers. Cupcakes, unfilled.

		Dough, frozen or chilled. Dumplings, frozen. English muffins. Flour. Fruitcakes. Melba toast. Muffins Pancake batter, frozen. Pancake/waffle mix. Pasta, dry (noodles). Pizza crust. Taco shells. Toaster pastries. Pie crusts, unfilled. Waffles, frozen.
8925		All confectionery, nuts, and sugars.
8930		All jams, jellies, and preserves.
8935		Bouillon and soups.
8940 (*Notes 2, 3, 4, 5, 10)	Dietary foods and specialty preparations, specifically: Fish, meat, poultry, dairy, egg, and shellfish products. Pickled eggs. Frozen dinners. Pudding novelties, frozen or chilled. Tofu.	All other dietary and specialty preparations, including: Baby formula, canned. Chips, nacho or potato. Creamer, coffee, imitation (non-dairy). Dips. Nacho cheese, canned. Nutri-why. Popcorn. Puddings, canned.
8945		Fats and food oils, including margarine
8950		All condiments and related products, including: Salad dressings. Mexican salsa)
8955		All cocoa, coffee, and tea.
8960	Beverages, nonalcoholic; specifically: Ice. Bottled water.	All other nonalcoholic beverages, including: Dry ice. Fruit drink mix containing no fruit juices.
8965		Non-MRE beverages, alcoholic.
8970 (*Note 2)	MRE food composite packages	Non-MRE composite food packages.
8975		All tobacco products.

*Notes:

1. For complete item listing within each class of the 8900 (subsistence) Federal Supply Class (FSC) Group, refer to Federal Supply Catalog C8900-SL, Stock List--FSC Group 89 Subsistence.
2. Meat and poultry establishments listed in the *USDA Meat and Poultry Inspection Directory* may serve as sources of meat and poultry items as indicated. These products must bear the USDA shield and applicable

establishment number. USDA listed establishments processing products not subject to meat or poultry inspection acts must also be Directory listed for those items.

3. Directory listing is not required for establishments on the Interstate Certified Shellfish Shippers List (ICSSL). Fish, fresh or fresh smoked, modified atmospheric packaged (when distributed in a chill state) must be Packed Under Federal Inspection (PUFI) by the USDC or listed specifically in this Directory. Establishments supplying other fish products must be Directory listed unless listed by the United States Department of Commerce (USDC) in the *USDC Approved List of Fish Establishments and Products.*
4. Directory listing is not required for shell egg sources listed in the *Directory of Grading Offices and Plants Operating Under USDA Poultry and Egg Grading Programs*. Establishments listed in the *USDA Meat and Poultry Inspection Directory* for dried or liquid/frozen egg products may serve as sources for those products, as coded.
5. Establishments having a pasteurized milk compliance rating of 90 percent or higher, certified by a State milk sanitation officer, and listed in the *Sanitation Compliance and Enforcement Rating of Interstate Milk Shippers (IMS) List* may serve as sources of milk and milk products, as listed. Listing in this Directory is mandatory to serve as a source of other milk and milk products and/or frozen dessert items. Establishments listed in the *Dairy Plants Surveyed and Approved for USDA Grading Service* may serve as sources of manufactured or processed dairy products as listed by product code. Those operations denoted with "P" codes (packaging and processing) must be Directory listed when providing ungraded manufactured or processed dairy products.
6. Directory listing is not normally required for semiperishable and nonanimal origin ingredient sources for items such as ready-to-eat bakery products and ice cream.
7. Establishments processing ready-to-eat, chilled, and prepared non-meat salads (such as potato, egg, tuna, chicken, turkey, ham, bean, macaroni, or cole slaw) must be Directory listed.
8. Only pasteurized juices are authorized for purchase by the DOD.
9. Directory listing for natural and artificial cream or fruit filled pie crusts, cakes, and cookies is not required if the finished item will not support pathogenic microbial growth.
10. Establishments producing finished products containing less than 3 percent by weight components of animal origin may be exempted from Directory listing by the command publishing this Directory.

AMENDMENT OF SOLICITATION/MODIFICATION OF CONTRACT

1. CONTRACT ID CODE	PAGE OF PAGES
J	1 19

2. AMENDMENT/MODIFICATION NO.	3. EFFECTIVE DATE	4. REQUISITION/PURCHASE REQ. NO.	5. PROJECT NO.(If applicable)
P00002	10-Jun-2008	N4034507RCSG0025	

6. ISSUED BY	CODE	7. ADMINISTERED BY (If other than item 6)	CODE
U.S. FLEET AND INDUSTRIAL SUPPLY CENTER DET SINGAPORE BUILDING 7-4 PSA SEMBAWANG TERMINAL DEPTFORD ROAD SINGAPORE 759657	N40345	**See Item 6**	

8. NAME AND ADDRESS OF CONTRACTOR (No., Street, County, State and Zip Code)		
GLENN DEFENSE MARINE (ASIA) PTE LTD MR. LEONARD FRANCIS 15D PANDAN ROAD SINGAPORE 609266		9A. AMENDMENT OF SOLICITATION NO.
		9B. DATED (SEE ITEM 11)
	X	10A. MOD. OF CONTRACT/ORDER NO. N40345-07-D-0005
	X	10B. DATED (SEE ITEM 13) 22-Jun-2007
CODE QB341	FACILITY CODE	

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

☐ The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of Offer ☐ is extended, ☐ is not extended.

Offer must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing Items 8 and 15, and returning _____ copies of the amendment; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER. If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

12. ACCOUNTING AND APPROPRIATION DATA (If required)

13. THIS ITEM APPLIES ONLY TO MODIFICATIONS OF CONTRACTS/ORDERS.
IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

☐ A. THIS CHANGE ORDER IS ISSUED PURSUANT TO: (Specify authority) THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

☐ B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying office, appropriation date, etc.) SET FORTH IN ITEM 14, PURSUANT TO THE AUTHORITY OF FAR 43.103(B).

☐ C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:

X D. OTHER (Specify type of modification and authority)
MUTUAL AGREEMENT

E. IMPORTANT: Contractor ☐ is not, ☒ is required to sign this document and return 1 copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (Organized by UCF section headings, including solicitation/contract subject matter where feasible.)
Modification Control Number: nyssns010819021

Performance extension

1. The purpose of this modification is to extend the performance period of the above-numbered contract from 21 Jun 08 through 31 Aug 08.
2. Changes to OOTW are highlighted in yellow. The revised schedule reflecting this is provided for your reference.
3. There is no increase in the prices as a result of this change.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

15A. NAME AND TITLE OF SIGNER (Type or print)		16A. NAME AND TITLE OF CONTRACTING OFFICER (Type or print)
		(b)(6), (b)(7)(C) CONTRACTING OFFICER TEL: (b)(6), (b)(7)(C)
15B. CONTRACTOR/OFFEROR	15C. DATE SIGNED	16B. UNITED STATES OF AMERICA BY (b)(6), (b)(7)(C)
(Signature of person authorized to sign)		(Signature of Contracting Officer)

16C. DATE SIGNED
10-Jun-2008

SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

SECTION A - SOLICITATION/CONTRACT FORM

The order period end date 31-Aug-2008 has been added.
The order period start date 22-Jun-2008 has been added.

SECTION B - SUPPLIES OR SERVICES AND PRICES

CLIN 0001

The CLIN extended description has changed from See Exhibit A for a complete listing of all CLINS and SUBCLINS for this CLIN.The period of performance of this contract shall be from 22 Jun 2007 through 21 Dec 2007 with an option to extend the period of performance of services up to a maximum of six months. to See Exhibit A for a complete listing of all CLINS and SUBCLINS for this CLIN.The period of performance of this contract shall be from 22 Jun 2008 through 31 Aug 2008..

SECTION C - DESCRIPTIONS AND SPECIFICATIONS

The following have been modified:

STATEMENT OF WORK

STATEMENT OF WORK (SOW)

TASKS: The Contractor shall perform the following tasks when ordered by an AGR.

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship’s arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated “additional” costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché’s Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship's Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The Contractor is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers New Caledonia then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual agreement with the other contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer and courtesy copy to FISC Detachment Singapore Contracting Officer who shall issue appropriate contractual documents. The Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or no later than 7 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect infestation; and 3) Shall be fresh yet not overripe. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in

U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the MasterCard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by the Financial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW) AND EXERCISE/ LOGISTIC SUPPORT FEES (LOT 2) (CLIN XX36)

2.1. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO’s).

2.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

2.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
2.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
2.5.3. current innoculation records
2.5.4. possess a valid up-to-date passport.

2.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor or his representative shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure sufficient personnel are available at each support location to effectively perform all necessary tasks that the OOTW and/or Exercise/ Logistic Support is being conducted. If there are multiple operations at same time, or a single operation at multiple

locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

2.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor's Husbanding fees and CLINS shall apply.

2.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. RESERVED - CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. RESERVED - The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

7.3. The Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

7.4. The Contractor shall provide commercial telephone booth and sale of phone cards for personal use by crewmembers.

7.5. The Contractor shall provide pre-paid International Calling Cards for official use.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The Contractor shall ensure that this area is kept clean during the ship visit in port.

12. FORCE PROTECTION (CLIN XX12)

12.1. General (CLINs XX01 & XX02): The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The Contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering

- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the Contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLIN XX12AB)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. RESERVED - Floating Line of Demarcation (CLINs XX12AC through XX12AE)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. Perimeter Fencing (CLIN XX12AF)

12.6.1. The Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved Entry Point: Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLIN XX12AG through XX12AK)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLIN XX12AL & XX12AM)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations and specifications.

12.9. Portable Latrine (CLIN XX12AN)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. Portable Lighting (CLIN XX12AP)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards Services (CLINs XX12AQ through XX12AS)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.11.3. All security guards shall be armed.

12.12. Two Way Radios (CLIN XX12AT) - The Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

12.13. RESERVED - Hand Held Explosive Detectors (CLIN XX12AU) - The Contractor shall provide hand held explosive detectors capable of detecting explosives.

12.14 RESERVED - Hand Hand Held Wand Metal Detectors (CLIN XX12AV) - The Contractor shall provide hand held metal detectors capable of detecting metal.

12.15. RESERVED - Hand Walk Thru X-Ray Machine (CLIN XX12AX) & Metal Detector (CLIN XX12AW) – The Contractor shall provide walk thru X-ray Machine & metal detector capable of X-raying hand carried luggage and bags to determine its contents, and also capable of detecting metal. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

12.15. RESERVED - Hand Under Carriage Vehicle Scanner (CLIN XX12AY) - The Contractor shall provide under carriage vehicle scanner to scan vehicle undercarriages.

13. FORKLIFT WITH OPERATOR (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Contractor shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by theh port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged

shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.4. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.5. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.6. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.7. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.8. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. RESERVED - LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. RESERVED - MANLIFT (WITH OPERATOR) (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and a full fuel tank.

18.2. The Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled "SHIP'S SPARE IN TRANSIT"

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

19.1.4. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. RESERVED - MISCELLANEOUS

21. RESERVED - OIL BOOMS (CLIN XX21)

21.1. The Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

22. OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.4. The Contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

23. RESERVED - PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. PRATIQUE (CLIN XX26) - The Contractor shall provide for quarantine services to include equipment and personnel inspections as required by local authorities.

27. RESERVED - REEFER CONTAINER (CLIN XX27)

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. RESERVED - SHORE POWER (CLIN XX28)

29. RESERVED – SHORE STEAM (CLIN XX29)

30. STEVEDORE SERVICES (CLIN XX30) - The Contractor shall provide stevedores and supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with qualified drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

33.4. If tugs are not available through the port authority, the Contractor shall use commercially available tugs.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by the ship’s duty officer onboard. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit D - CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36) See paragraph 2 above also.

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted.
36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification.
36.3.3. Current inoculation records.
36.3.4. Possess a valid up-to-date passport.

36.4. The Contractor POC, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient personnel are available at each support location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to

source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

37. OOTW COST REPORT (CLIN XX37)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

35.3. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

SECTION F - DELIVERIES OR PERFORMANCE

POP 22-JUN-2008 TO 31-AUG-2008	N/A	SEE SCHEDULE . SEE SCHEDULE SEE SCHEDULE AP 96534 FOB: Destination	A00000

SECTION I - CONTRACT CLAUSES

The following have been modified:

52.216-21 Requirements. (OCT 1995) -- ALTERNATE I (APR 1984)

(a) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(b) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Delivery-Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(c) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirements for supplies and services specified in the Schedule that exceed the quantities that the activity may itself furnish within its own capabilities.

(d) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(e) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(f) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after 30 Sep 2008.

(End of clause)

Section B - Supplies or Services and Prices

OVERVIEW
SECTION B1 – CONTINUATION

OVERVIEW OF CONTRACT

1. OBJECTIVE - The objective of this contract is to obtain husbanding services for U.S. Navy Ships visiting the ports in Tonga.

2. SCOPE

2.1. This contract is for Husbanding Services (HS) at any berthing or anchoring location in Nuku'alofa and all port in Tonga. It is to provide services and supplies requested by the ships while in port.

2.2. This contract also includes logistic support services and supplies for Operations Other Than War (OOTW) required by other U.S. Government organizations or agencies. Examples include U.S. Marine Corps, U.S. Army, U.S. Air Force, Military Sealift Command (MSC), Naval Fleet Auxiliary Force (NFAF) ships, U.S. Coast Guard, etc.

2.3. The contract may be subdivided into Lots. Lots may be for individual Ports or they may include several Ports under one Lot. For this contract, Lot 1 covers Nuku'alofa, Lot 2 All Other Ports and Lot 3 Operations Other Than War (OOTW).

2.4. The individual HS items provided under this contract are listed in Exhibit A, Schedule of Supplies and Services (referred to as The Schedule). The items are listed as separate Contract Line Item Numbers (CLINs).

2.5. There is also a requirement to assist the ship in obtaining unforeseen additional items relating to husbanding of the ship in port.

2.6. The holder of this contract is a US Navy contractor and not an Agent of the US Navy.

3. TYPE OF CONTRACT - This is a Firm-Fixed-Price Requirements contract. The Contractor agrees to furnish the services or supplies at the fixed price listed in the Schedule of Services.

4. DURATION OF CONTRACT - This contract is for six (6) months, commencing 8 Jun 2007 through 7 Dec 2007. Additionally, the contract will include FAR52.217-8 OPTION TO EXTEND SERVICES clause. The possible contract duration is twelve (12) months if the six (6) month extension of services is exercised under FAR 52.217-8.

5. CONTRACT USERS

5.1. Mandatory Users - U.S. Navy ships visiting locations covered under this contract are required to use this contract if HSs are requested (with the exceptions noted below). Ship classifications are listed in Attachment 1.

5.2. Optional Users - The following types of U.S. ships are not required to use this contract but may use it if desired. The Contractor is obligated to provide the service or supply at the same rates listed in The Schedule:

- Military Sealift Command Ships (USNS)
- U.S. Coast Guard (USCG) Ships
- U.S. Army Ships
- U.S. Government personnel conducting business in locations under this contract.
- Department of Defense (DoD) Chartered Ship: These ships usually have their own appointed agent.

However, users of this contract are obligated to order the required services listed in the Schedule of Supplies and Services including any Force Protection. Services ordered are "all or none".

5.3. Exceptions: The Government has the choice to use or not use this contract under the following types of situations:

- During U.S. Military Exercises or Operations.
- When Host Nation provided support is available.
- When U.S. Government owned supplies or services are available.
- When ship repair work is being done in conjunction with the Port Visit.
- Ships operating outside the Command and control of the 7th Fleet, or other U.S. Navy Fleets.
- Whenever a fixed price product or service listed in this contract is available at a lower price under a port tariff.

6. MULTIPLE SHIP VISITS - The contractor is required to be able to simultaneously Husband a maximum of four (4) ships at one time.

7. ESTIMATED QUANTITIES - The number of ship visits and required services or supplies are only estimates. There is no guarantee that the government will meet or exceed the estimates. The ship is not obligated to use all items in The Schedule.

8. ORDER OF PRIORITY OF USAGE - The HS Contractor must first use Host Nation (HN) support or U.S. Government owned equipment if available, then local Port Authorities, or finally provide it themselves to include subcontractors. The Schedule lists what items are available through HN and Port Authorities.

9. MARK V HIGH-SPEED-INTERCEPTOR-CRAFT (HSIC) - Mark V (HSIC) Special Operations Craft may be in port or in the direct vicinity for up to 90 days conducting operations. The Contractor will normally only board the vessels upon arrival and prior to departure to arrange their required support. Occasionally, they may have to provide follow-up support. Mark V vessels normally travel in pairs and Management fees will be based on the total fee for the pair of boats. Attachment 1 provides details.

10. LONG TERM SHIP VISITS –

10.1. For any ship which is in port in excess of ten (10) consecutive calendar days, the Subsequent Day Management Fee shall be reduced to 20% per day. An example would be, if a vessel was in port for 15 days and the first day management fee was $300 and the subsequent day fee was $100. The Contractor would charge $300 for the first day, $100 for the subsequent nine (9) days and $20 per day for the five (5) days in excess of ten (10) days. The total charge for management fees would be ($300+$900+$100) $1,300 for the 15 day port visit. During the period of reduction, the Contractor is relieved of all husbanding requirements specified by the Contracting Officer, Ordering Officer and / or AGR as unnecessary; and shall continue to provide only those services specifically authorized by the Contracting / Ordering Officer via verbal and /or written modification of the delivery order (CHT, trash removal, potable water etc).

10.2. Unique/Particular Situations:

10.2.1. Frequent ship visits between ports: If a ship is frequently visiting two or more ports, it will be charged the first day rate for the first day in each port. If the ship returns to one of the ports within three (3) days (i.e. prior to the fourth calendar day), subsequent visits to that port will be charged at the subsequent day rate. On the fourth day or subsequent day, the ship will be charged the first day rate (example: If the ship departs Friday and comes back before Tuesday, it will be charged subsequent day fees. If the ship comes back on Tuesday, it will be charged the first day rate).

10.2.2. If a ship comes into port and does not notify the Contractor or request any assistance, there will be no fees (e.g. if just dropping off passengers). If vessels request assistance of any kind, they will be charged first or subsequent days, subject to the conditions in paragraph 10.2.1. above.

10.3. Hazardous Material Disposal (HAZMAT)/Shipboard Generated Industrial Waste (SGIW): The Contractor shall not dispose/offload any hazardous waste requirements unless approval has been provided by the appropriate Navy Environmental office. Currently the only authorized locations approved to offload HAZMAT are Apra Harbor, Guam; Yokosuka, Japan; Sasebo, Japan; Hong Kong, China SAR and Singapore.

11. SHIPYARDS - U.S. Navy Ships in shipyards may order off of this contract without incurring Management Fees.

12. OTHER PERSONNEL - Other U.S. personnel conducting business at locations covered by this contract may order off of the contract without incurring Management Fees. These orders do not involve continuous management of husbanding services and maybe for items such as vehicles, phones or other services.

13. ORDERING

13.1. Ordering Items on Contract: Only Authorized Government Representatives (AGR) can place orders against this contract. AGRs for this contract are:

- Warranted ship Supply Officers (SUPPOs) and Assistant Supply Officers (ASUPPOs) of the ship visiting the port.
- Any FISC Detachment Singapore warranted KO or their authorized representative.

13.2. Short Notice Orders: Occasionally, there may be short notice orders of less than 48 hours, which the Contractor should support if possible. If the Contractor cannot support these requirements, then the AGR may solicit them from other companies.

13.3. Substitutions: Substitution of ordered CLIN shall not be allowed unless authorized and accepted in writing by the AGR and requiring activity. If accepted by the AGR or requiring vessel, substituted CLINs shall only be charged at the rate of the originally ordered CLIN. An example would be if a 20 pax bus was ordered, but was not available and substituted with two 10 pax vans. The Contractor will only be able to charge for one 20 pax bus, not two 10 pax vans. If the requiring activity and AGR agree to rates of the substituted CLINs, then it is not considered to be substitution but a change to the requirement.

13.4. Cancellation of Orders:

13.4.1. Unless otherwise provided herein, in the event an order is cancelled at least 48 hours prior to the required delivery, the U.S. Government will not be liable for any charges. For any order not cancelled at least 48 hours prior to the required delivery time, the Ordering activity shall be responsible for termination costs in accordance with the contract clause titled “Termination for the Government’s Convenience (FAR 52.212-4)”, of the clause entitled “CONTRACT TERMS AND CONDITIONS - COMMERCIAL ITEMS” as negotiated. Any disagreements shall be subject to the Disputes clause in the contract.

13.4.2. In rare cases, when ordering of items requires long lead times, the Government may negotiate cost reimbursement under the Termination for the Government’s Convenience clause as stated above.

13.4.3. In all cases, the Contractor is responsible for taking all necessary steps to mitigate any damages or termination costs on behalf of the U.S. Government.

14. CORRESPONDENCE IN ENGLISH - All correspondence shall be in English. All electronic communication between visiting vessels and contractor shall be copied to FISC Detachment Singapore Contracting Officer and Logistic Support Representative. This is to ensure oversight and assistance to either party as required.

15. STANDARDS FOR PROFESSIONAL SERVICES

15.1. The Contractor shall bring to the Navy the highest level of commitment to customer satisfaction including the timely delivery of goods and services at fair and reasonable prices to ships making port visits; continuous oversight of costs and performance throughout the areas covered by this contract; and, meaningful suggestions on strategies and tactics to control costs and improve performance under this contract. To this end, the Contractor shall identify a representative to act as the principal point of contact between itself and the U.S. Government concerning cost and performance issues throughout the Region. The duties of this individual shall not impede communications among ships, DAOs, Port Services Officers and the U.S. Government.

15.2. The quality of all services or supplies provided shall conform to the highest standards in the relevant profession, trade, or field of endeavor. All services shall be performed by individuals fully qualified and licensed in their relevant area.

15.3. The Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work at no additional cost to the Government.

15.4. The Contractor is responsible for ensuring that proper safety and health precautions are taken to protect personnel, the general public, and property of others.

15.5. The Contractor will ensure that subcontractors comply with these requirements.

16. HEIGHTENED VIGILANCE

16.1. The Contractor has an obligation to be alert at all times in order to contribute to the protection of the ship and its crew. The Contractor shall immediately report to the ship's command duty officer, or nearest available Navy official or Host Nation (HN) representative, any signs of suspicious activity in or around the site of performance. Suspicious activities include, but are not limited to, unauthorized personnel or vehicles in the vicinity of the site of performance, unusual equipment or movement of persons or supplies, and any other activity that may be perceived as a threat to United States forces. The Contractor also has an obligation to report any such activity perceived outside the site of performance, if such activity could reasonably have an impact on the site of performance or could be perceived as a threat to United States forces.

16.2. The Contractor will fully partner with U.S. Navy representatives in all matters that could impact the effectiveness of Force Protection services that are provided for or arranged under this contract to protect U.S. Navy Ships, Units and Personnel. Upon request the Contractor will identify to Navy Force Protection Personnel and Naval Criminal Investigative Service (NCIS) representatives the host country Law Enforcement, Military, Security counterparts, or other persons utilized by the Contractor for the purpose of providing Force Protection or other services to U.S. Navy Ships and forces. The Contractor will arrange introductions to these host counterparts if requested and make available for review any agreements pertaining to Force Protection arrangements or other services with the Host counterparts.

17. EQUIPMENT - All vehicles, watercraft, and equipment provided must be in sound mechanical condition, be in compliance with local laws and specifications, meet all local safety standards, and have all required current certifications and insurance.

18. GOVERNMENT PROVIDED EQUIPMENT OR MATERIAL (GFE or GFM) – In the event that the contractor is required to use government equipment, the Contractor shall be responsible for all loss or damage to, or the destruction of, Government property in its possession. The Contractor shall not be responsible for damage due solely to normal wear and tear.

19. CONTRACT PRICING

19.1. Contract Currency - All contract prices are in U.S. Dollars (US$).

19.2. Fixed Price - Prices are firm-fixed-price per unit and are inclusive of ALL costs.

19.2.1. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor perform during normal working hours, overtime for work performed outside normal working hours, weekend hours, holidays, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit. The Contractor shall only charge for actual usage while the vessel is in port.

19.2.2. Mobilization and Demobilization (Mob & Demob). All Mob & Demob costs and time shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes all associated equipment and labor required to satisfy vessel and port requirements.

19.2.3. Pre-Positioning / Pre-Staging - All Pre-Positioning or Pre-Staging cost and time for the purpose of vetting operations or otherwise shall be included in the unit price as part of the direct cost. This shall include all associated equipment and labor required to satisfy vessel and port requirements. Pre-staging or pre-positioning for vetting operations typically occurs one or two days prior to the arrival of the visiting vessel/s.

19.2.4. Repositioning equipment. All repositioning of equipment when required shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

19.2.5. All local Government taxes are included in the unit cost.

19.3. Port Tariff (PT) or other controlled prices - (See Exhibit B - Port Tariffs). Items listed as PT where a port or local government type organization controls the price will be paid at the current published rates. For example, if a port provides the Tug boat then the Contractor can only charge the U.S. Government what was charged for the Tug by the port.

19.4. Time Calculations - Several services are based on hourly or daily rates. Time will begin being measured once the equipment and /or labor is along side the vessel and capable of operations. Travel time to the location of performance shall not be charged.

19.5. Demurrage - Demurrage charges shall only be charged if the Contractor's equipment / service is unduly delayed due to the fault of the government for more than 1 hour from the requested time of commencement of an operation. Example, if the vessel requested a Collection Holding Transfer (CHT) truck at 1300 hrs, the truck arrives at 1300 hrs to start pumping, but was not attended to until 1500 hrs when pumping begins. The contractor will be able to charge for one hour of demurrage (1400 hrs – 1500 hrs). Demurrage charges will be charged as stated in the schedule of supplies and services. This only applies to CLINs that have demurrage charges as sub-CLINs.

20. ABBREVIATIONS - The abbreviations found within the contract Schedule are listed below:

CHT	Collection, Holding Transfer Sewage Removal and Disposal
CU M	Cubic Meter
DAO	Defense Attaché Officer
DY	Day
EA	Each
GL	Gallon (3.785 Liters)
HR	Hour
IDD	International Direct Dialing
JB	Job

LO	Lot
M	Meter
MIN	Minimum
NSP	Not Separately Priced
OOTW	Operations Other Than War
PAX	Passenger
PK	Package
PT	Port Tariff
QTY	Quantity
TP	Trip

21. DEFINITIONS

- AGR: Authorized Government Representative. The AGR may place orders against this contract for any supply or service.

- CAMELS: See Fenders

- CLIN: Contract Line Item Number (CLIN). A separate line item for each service or supply required in the contract.

- CLIN NUMBERING: CLINs consist of four numeric digits and two optional alpha letters. The first numeric digit indicates the year of the contract. The base year is zero (0), the first Option Year is one (1), and the second Option Year is two (2). (For example a base year would be 0XXX, and the first Option Year is 1XXX, and the second Option Year is 2XXX.) The second digit indicates the Lot number. (For example Lot 1 would be X1XX, Lot II would be X2XX) If there are no Lots in the contract then the second digit will be zero. (For example X0XX) The third and fourth digits are the service or supply item number. (For example XX01 is the first item, XX02 is the second item, and so forth.) If a CLIN needs to be subdivided into two or more separate items then two alpha letters will be used for each item starting with AA. (For example CLIN XX12 for Force Protection could be divided into XX12AA for Beach Guard Office and XX12AB Dive and Vetting Operations, and so forth)

- CONTRACTING OFFICER (KO): Government representative that holds a contracting warrant and is authorized to sign a contract or place an order.

- DAY: A calendar day.

- Delivery Order (D.O.): A delivery order is an order for supplies placed against an established contract or with Government sources.

- EXCLUSION ZONE: The restricted area between the ship and the seaward boundary for pier side ships, as determined by the ship's Commanding Officer.

- FENDERS: (Also called Camels) Device used to buffer the ship from the pier or for placing between barges and the ship. Device shall have sufficient cushion so as to keep the ship from impacting the pier or barge. Commercial or commonly used self-fendering devices normally consist of car and/or truck tires. These may not be sufficient for U.S. Navy purposes. The Contractor is to inform visiting vessel/s of this fact so that additional Yokohama type pneumatic fenders may be ordered when and if required.

- FORCE PROTECTION (FP). Security measures to protect a ship and their crew from dangerous situations such as terrorist actions. FP includes taking as many steps as possible to deter an attack. The HS contractor is responsible for contract FP items.

- GARBAGE: See Attachment 2 – Refuse Definitions.

- GOVERNMENT FURNISHED EQUIPMENT OR MATERIAL (GFE/GFM): Items fully transferred to the Contractor's control for use on this contract. The item must be fully accounted for, properly stored, and properly maintained in accordance with Government directives.

- GOVERNMENT TAX: Host Nation Government tax is a levy on goods and services made in the local country. The tax rate will vary from with the location. The U.S. Government is usually exempt from host nation Government Taxes.

- HOST NATION (HN): The country, which is being visited by the U.S. ship.

- HUSBAND: To provide all supplies and services requested by a ship during a port visit. This includes pre-arrival and post-arrival actions. It involves management and coordination of port services, ensuring Force Protection measures are implemented, facilitating other contractors work with the ship, assisting with Non-Contract item requests, and generally taking care of all the needs of the ship and personnel on board. It should utilize commercial shipping practices.

- MOBILIZATION AND DEMOBILIZATION (MOB & DEMOB):

  - Mobilization: Moving a piece of equipment from a storage or previous work location to the new required work location.

  - Demobilization: The reverse of Mobilization. Moving a piece of equipment from a current work location back to the storage location.

- NOT SEPARATELY PRICED (NSP): Item that is not separately priced. The CLIN for CRAFT should be factored into the Management Fee. The NSP CLIN is used to administratively order any unpriced items in accordance with the pricing rationale in paragraph refer to Section C (SOW), Arranging Supply and Services.

- POINT OF CONTACT (POC): A designated individual who is responsible for an item and is a single interface. The individual must be knowledgeable of the item and be able to answer questions and make decisions or obtain a decision when required.

- PORT TARIFF: Services or Supplies that are provided by Port Authorities, HN, military, or other government type organizations where the price is pre-established and controlled. Examples are pilot services, tugs, picket boats, security guards, and potable water. The Contractor has no control over the price and the ship will pay the prevailing rate at the time of service.

- PROVIDE: To source, order, transport, stage, set up, install, take down, remove, and store, as applicable. It includes everything and everyone necessary to perform the task such as labor, tools, equipment, materials, accessories, cables, and lines.

- REPOSITIONING: Moving a piece of equipment, such as a crane, to another required work location after it has been set up for work. This involves tear down and new set up actions.

- RESERVED: An item not used in this contract. A "Reserved" item is an item that can be ordered when required but currently not available.

- SUPPO: A ship's Supply Officer. The SUPPO may hold a limited contracting warrant and is authorized to sign contracts and place orders.

- TRASH: See Attachment 2 – Refuse Definitions.

22. CONTRACTOR REPRESENTATIVE – The Government shall contact the following Contractor person(s) for prompt contract management:

Name of Individual:	LEONARD G. FRANCIS	(b)(6), (b)(7)(C)
Title of Individual:	MANAGING DIRECTOR	
Mailing Address:	15D PANDAN ROAD SINGAPORE 609266	15D PANDAN ROAD SINGAPORE 609266

Section C - Descriptions and Specifications

STATEMENT OF WORK
STATEMENT OF WORK (SOW)

1. MANAGEMENT SERVICES (CLINs XX01 and XX02) (Attachment 1 – Classifications of Navy Ships)

1.1 PRE-ARRIVAL HUSBANDING DUTIES.

1.1.1. The Contractor shall communicate with the ship to coordinate requirements.

1.1.2. The Contractor shall order requested services and supplies.

1.1.3. Pre-arrival CRAFT Cost Estimate - The Contractor shall furnish to each ship and FISC Detachment Singapore Contracting Officer a CRAFT cost estimate in response to the receipt of a ship's Logistic Requirements' (LOGREQ) message. This estimate will be prepared using the CRAFT spreadsheet format, and will include estimated prices for all items submitted on the ship's LOGREQ whether pre-priced in the contract or non-contract items. It will not be sufficient to simply say that the estimated price is "per contract" or "per Port Tariff". This estimate shall be provided to the ship and the Contracting Officer within two (2) working days after receipt of the LOGREQ but no later than 24 hours prior to the ship's arrival, shall also include cost saving or avoidance recommendations, and will explain any anticipated "additional" costs.

1.1.4. These estimates shall be provided for all US Navy, Military Sea-lift Command (MSC), US Coast Guard, and any other US Government ship visiting the port.

1.1.5. The LOGREQ cost estimate does not replace the Husbanding Contractor's requirement to respond to the activity authorized to pass a LOGREQ on behalf of the ship, such as the Port Services Officer or the Naval Attaché at the U. S. Defense Attaché's Office.

1.1.6. The Contractor shall prepare and stage all required supplies and equipment prior to the ship's arrival. Staging may be as required by each location.

1.1.7. The Contractor shall coordinate with other US government contractors in performing their required services. This includes passing orders and coordinating delivery requirements.

1.1.8. The Contractor shall assist the ship's Advance Party to include planning and coordination meetings.

1.2. POST-ARRIVAL HUSBANDING DUTIES

The Contractor shall Husband the ship when at the berthing location.

1.2.2. The Contractor shall install all equipment upon ship arrival. Examples are brows, platforms, shore power cables, mooring lines, fenders, curb caps, steps, and telephones.

1.2.3. The Contractor shall board each ship as soon as practicable after arrival, but in no case more than two (2) hours after the ship's arrival.

1.2.4. The Contractor shall brief the designated ship representative about Contractor provided services upon arrival. This briefing shall include what was ordered, cost information, and scheduled times and dates for delivery. Also, the Contractor will provide their POC information with 24 hour contact phone numbers.

1.2.5. The Contractor shall provide the SUPPO upon ship's arrival a copy of The Schedule and SOW, applicable port tariffs and current prices for frequently ordered services such as laundry services and vehicle rental.

1.2.6. Money Exchange Services:

1.2.6.1. The Contractor shall determine an Official Exchange Rate based on local bank published exchange rates for U.S. dollars for that day. This Official Rate will be used for financial conversions not covered by payments in U.S. dollars.

1.2.6.2. The Contractor shall arrange for authorized moneychangers to exchange ship personnel U.S. dollars with local currency. Exchange services onboard ship shall be made available to crewmembers at least two hours daily with buy back service on the day before the ship's departure. The moneychangers may include a nominal commission of no more than plus or minus 1.5% difference from the Official Rate above.

1.2.7. Laundry Services:

1.2.7.1. The Contractor shall arrange for laundry and dry cleaning services for the ship. Service will be available for the ship's laundry and for individual crewmember usage. Crewmembers will settle their own bills. Vendors will be required to start service the first day of the ship arrival and ensure all items are returned to the ship prior to ship departure.

1.2.7.2. The Contractor shall assist in resolving vendor billing discrepancies.

1.2.8. Interpreter Services:

1.2.8.1. All contractor personnel who deal directly with the ship must speak and understand conversational English and be able to discuss technical aspects of shipboard requirements and services available in the port.

1.2.8.2. The Contractor is responsible for providing all interpreter services necessary to assure timely delivery and performance of the supplies and services ordered by the Supply Officer under this contract or any other contract.

1.2.9. Mail Delivery Services: The Contractor shall provide mail pick-up and delivery service for the ship. The ship must provide military members to escort the mail.

1.2.10. Moral Welfare and Recreation (MWR) Services:

1.2.10.1. The Contractor shall assist ship personnel in booking MWR trips, tours, hotel accommodations, or other MWR type items if there is no other U.S. Navy authorized Information, Ticket and Tours (ITT) contractor servicing the ship.

1.2.10.2. If an ITT contract has been awarded which covers Tonga then the HS Contractor must refer all MWR requests to the authorized ITT contractor. If awarded, the ITT contractor is the U.S. Navy's sole representative for this service. Only MWR may sell, offer, offer to sell, or collect a fee for booking or providing accommodation, tours, travel, recreation or entertainment to the ship's crew. Under no circumstances will the Contractor assist crew personnel in booking these services if an ITT representative is servicing the ship.

1.2.11. Passing Ship's Orders: The Contractor shall coordinate and pass orders, to include transmission via fax or e-mail, to other Contractors holding U.S. Government contracts. This service includes all necessary actions to facilitate the acceptance of supplies or services ordered under Government contracts. The HS Contractor shall also arrange for these contractors invoicing and payments by the ship. The HS contractor must have a mutual agreement with the other contractors to perform these services for them. Any disputes or discrepancies arising from the order will be resolved directly between the ship and the other contractor(s) with assistance from the HS Contractor and FISC Detachment Singapore.

1.2.12. Customs & Immigration: The Contractor shall assist ship personnel with immigration and customs requirements into their country. This includes providing Visa and Customs application forms. The Contractor shall contact the FISC Detachment Singapore prior to arrival to ascertain how many personnel will require assistance.

1.2.13. The Contractor shall facilitate the ship's timely departure.

1.2.13.1. The Contractor shall provide a timely cost estimate of provided services and supplies to the ship SUPPO prior to departure.

1.2.13.2. The Contractor must obtain a written receipt from an authorized ship representative accepting all services or supplies provided.

1.2.13.3. The Contractor shall remove all provided equipment.

1.3. ARRANGING SUPPLIES AND SERVICES

When requirements exist for items not priced in the Schedule of Supplies and Services, the Contractor shall assist the Supply Officer of the vessel in obtaining information from, and delivering information to, reliable sources for these items by identifying responsible sources, performing market surveys, providing pricing information from at least three sources whenever feasible, and delivering Government orders. In obtaining or delivering this information, the Contractor shall inform the potential sources that it is solely obtaining and delivering information for the U.S. Navy, and is not entering into any contractual commitment. The information obtained shall be submitted to the ship's Supply Officer and courtesy copy to FISC Detachment Singapore Contracting Officer who shall issue appropriate contractual documents. The Contractor shall deliver to the vendor the Supply Officer's or Contracting Officer's order to purchase the supplies or services. This order shall be in writing (facsimile and electronic transmission included) and signed by the Supply Officer or Contracting Officer specifying the price, item(s), quantity, and delivery requirements of the order. The Contractor shall facilitate receipt of the items by the ship. The Contractor is not required to arrange unofficial requirements or personal requests from individual crewmembers. In certain cases (i.e. Fuel, FF&V, Bread and Eggs) the Contractor shall use the SOWs furnished herein when arranging supplies and services.

In the event the above process cannot be followed by the Supply Officer, the Contractor is still responsible for promoting competition to the maximum extent practicable to obtain supplies and services from the source whose offer is the most advantageous to the Government. In addition, if the supply or service required is greater than $3,000, the Contractor shall provide information on the results of competition conducted by providing: name of the sources contacted, amount of each offer received (indicating the items ordered, quantity, unit price and total price) and rational for decision. This information must be provided to FISC Detachment Singapore Contracting Officer during the ship visit or no later than 7 days after the ship's departure from the visited port. The Contractor's responsibility to promote competition as indicated in this paragraph will be evaluated based on the criteria established in Section B1, Overview, paragraph 15, Standards for Professional Service; sub-paragraph 15.1 and 15.2.

No later than 60 days after contract award, the Contractor is required to submit written policy and procedures on Arranging Supplies and Services (to include purchasing procedures). The Contracting Officer will review the plan for acceptability, and may require revisions to the policy. When the Contracting Officer deems the written policy and procedures acceptable to the Government, the Contracting Officer will approve the plan.

1.4. FRESH FRUITS AND VEGETABLES (FF&V), BREAD, EGGS, AND OTHER SUBSISTENCE ITEMS

1.4.1. When requested by the ship, the Husbanding Contractor shall assist in arranging for the timely provision of FF&V, Bread and Eggs and other subsistence items. FF&V shall be of good quality and meet the following specific standards: 1) Shall not be grown (cultivated) using nightsoil; 2) Shall be free of pest and insect

infestation; and 3) Shall be fresh yet not overripe. The Husbanding Services Contractor shall assure that the provider of items arranged under this line item furnish to the Supply Officer invoices showing quantities furnished; unit price in U.S. dollars and total price in U.S. dollars (Example: 10 pounds tomatoes @ $1.00 USD per pound = $10.00 USD). Any delivery charges shall already been part of the price and should not be shown separately.

1.4.2. In all cases where the total cost of FF&V and subsistence items received by a ship exceeds $10,000.00 for a port visit, the Contractor, in addition to the CRAFT reports, shall submit a report via e-mail to FISC Detachment Singapore within ten (10) days after the visit. The report shall provide a breakdown of the FF&V and subsistence delivered, detailing items purchased, quantities, unit price, and total price (Example: 8 pounds Tomatoes @ $1.00 per pound = $8.00). In addition, the Contractor shall provide copies of all quotes obtained.

1.4.3. The Husbanding Contractor is responsible for ensuring that the sources recommended to the ship's SUPPO for supply of bread, eggs and other subsistence items, such as meat and dairy products, have been approved by the U.S. Army Veterinary Command Pacific. A listing of approved sources is available via the U.S. Army Veterinary Command's (USA VETCOM) Domino Web Page at: http://vets.amedd.army.mil/vetcom/directory.htm (DOD Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement. Information on how to request and obtain sanitary inspection is provided as Attachment 8.

1.4.4. Husbanding Contractors shall consider this requirement for inspection of sources when recommending or selecting suppliers of subsistence items. Under no circumstances should the Contractor recommend or offer for acceptance subsistence items from non-approved sources.

1.4.5. The Contractor shall comply with the Quality Assurance Provisions as per Attachment 9.

1.5. PRE-SAILING VISIT: The Contractor shall schedule and make a visit to the ship one day prior to its sailing date at a time permitting the presentation of invoices. At that time, the Contractor shall present an invoice for services provided under this contract which can be certified for receipt and finalized for payment. The Contractor will obtain a valid requisition, including accounting data, for any outstanding ship obligations which cannot be liquidated prior to ship's departure, for future modification by the Ordering Officer. The invoices for services not yet liquidated will be processed as the Contractor's best estimate and an adjustment will be made later.

1.5.1. The payment will be made by the ship prior to departure from the port. If payment was unable to be made by the ship due to extenuating circumstances, the payment will be made by the Disbursing Officer, U.S. Navy Region Center, Singapore, PSA Sembawang Terminal, Deptford Road, Building 7-4, Singapore 759657. Payment will be in U.S. dollars through electronic funds transfer or U.S. Treasury check. The Contractor must accept the U.S. Government commercial purchase card (GCPC). It will be up to the AGR to decide what payment method they use. Currently the U.S. Navy GCPC is the Mastercard. If a ship uses a U.S. Government credit card, the ship shall reimburse the Contractor any surcharge imposed by the financial institution processing the credit card transaction. The applicable credit card surcharge cannot exceed three (3) percent. Upon award of contract, the Contractor shall provide evidence furnished by theFinancial Institution of the credit card surcharge.

1.5.2. The Contractor shall also provide any invoices for port tariff items which have been completed for certification by the ship's Supply Officer.

1.5.3. Copies of all invoices presented to the ship shall be provided to FISC Detachment Singapore Contracting Officer within 5 working days from the departure of the visiting vessel.

1.5.4. The Contractor shall relay at that time any late information on pilot and tug schedule changes, and any additional information applicable to the ship and its departure. The Contractor's point of contact for this information shall be the Command Duty Officer, Supply Officer, or his designated representative.

2. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36)

2.1. Operations Other Than War (OOTW), sometimes referred to as “contingencies”, are defined as emergency situations caused by war, natural disaster, terrorist or subversive activities, collapse of law and order, or political instability. In addition to rescue and humanitarian relief missions, military contingencies can include demonstrations of force; raids; larger operations undertaken to protect U.S. interests, lives, and property; training efforts and exercises in preparation for actual contingencies shall also be included.

2.2. An exercise is defined as a prearranged, preplanned evolution being conducted between the U. S. Government and a foreign nation for Humanitarian, training, or other purpose of a specified duration. The name of the event will generally, but may not always, include the word “exercise.”

2.3. Logistic Support is defined as goods and services provided in a background framework to an operation or an exercise. Logistics Support can take place in the immediate vicinity of the operation/exercise or a great distance away.

2.4. An operation can be further defined as an unplanned, real world deployment of troops for an indefinite period of time. It can include Non-combatant Evacuation Operations (NEO’s).

2.5. The Navy's Husbanding Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a country wide network familiar with the different political and commercial infrastructures, as well as cultural and language nuances where the OOTW and/or Exercise/ Logistic Support is conducted to ensure timely fulfillment of the Navy's requirements. In addition to the above, the Contractor shall furnish personnel with the following qualifications:

2.5.1. ability to speak the local language in the country of the OOTW and/or Exercise/ Logistic Support
2.5.2. capacity to travel to the OOTW or forward logistic site within 24 hours of notification
2.5.3. current innoculation records
2.5.4. possess a valid up-to-date passport.

2.6. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. He is there to assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The contractor team shall consist of a minimum of two personnel per location that the OOTW and/or Exercise/ Logistic Support is being conducted. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

2.7. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the Contractor’s Husbanding fees and CLINS shall apply.

2.8. A sample of the potential list of OOTW and/or Exercise/Logistic Support supplies and services is provided for contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the Husbanding Contractor shall make every effort to locate at least three sources.

3. BREASTING AND FENDERING BARGE (CLIN XX03)

3.1. The Contractor shall provide a breasting barge alongside the ship. The barge shall be able to tie up water taxis, have a non-slip surface for passengers entering or leaving water taxis, and have a surface smooth enough to

allow the accommodation ladder to roll freely. The barge shall have suitable self-fendering to prevent damage to the ship a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

3.2. The Contractor shall place additional fenders between the breasting barge and the ship when requested.

3.3. The Contractor shall provide a barge to use as a buffer or as part of a fendering system between the ship and the pier or between other ships. The barge shall have suitable self-fendering to prevent damage to the ship and a minimum of four (4) mooring lines suitable to withstand extreme weather conditions.

4. BROW (CLIN XX04)

4.1. The Contractor shall provide brows for entry to and from the pier. Metal planking should also be used as necessary in order to not damage the surface of the pier.

4.2. Due to the dramatic height difference between the submarine deck and pier, the Contractor provided submarine brow must afford personnel a smooth and safe transit when entering or exiting thesubmarine deck. Also, the submarine brow must be capable of supporting shorepower cables without damaging the cable.

5. RESERVED - CAMELS (CLIN XX05) - The Contractor shall provide camels as fenders for the ship.

6. COLLECTION, HOLDING AND TRANSFER (CHT) SEWAGE REMOVAL AND DISPOSAL (CLIN XX06)

6.1. The Contractor shall remove sewage from the ship commencing within one (1) hour of the ship's arrival and up to one (1) hour before the ship's departure.

6.2. The Contractor shall pump sewage from the ship to contractor-provided equipment. If a holding tank is used it will be emptied prior to reaching 90% full capacity.

6.3. The Contractor shall accurately measure sewage removed from the ship. The ship duty engineer shall verify in writing the amount of discharged CHT.

6.4. The Contractor shall provide CHT hoses of sufficient length from contractor equipment to the ship with either 2.5” or 4” quick disconnect camlock fittings.

6.5. When collection of CHT is done via barge, the Contractor shall provide a barge with suitable self-fendering to prevent damage to the vessel and a minimum of four (4) mooring lines to secure alongside the ship.

6.6. The Contractor shall properly dispose of all sewage in accordance with Section B1 - OVERVIEW of the contract section, paragraph 15, Standards for Professional Services.

6.7. The Contractor shall pre-position CHT Barges when necessary in accordance with Force protection or other requirements.

7. COMMUNICATION SERVICES & EQUIPMENT (CLIN XX07)

7.1. The Contractor shall arrange for landlines to be installed aboard the ship.

7.2. The Contractor shall provide fully charged, mobile hand phones with chargers capable of using dual voltage. Each mobile phone provided shall include a spare battery and an operating manual/instruction with published rates for usage.

7.3. The Contractor shall provide activation, auto roaming, long distance accounts, and airtime for land and mobile hand phones.

7.4. The Contractor shall provide commercial telephone booth and sale of phone cards for personal use by crewmembers.

7.5. The Contractor shall provide pre-paid International Calling Cards for official use.

8. CRANE (CLIN XX08) - The Contractor shall provide cranes with operators, required assistant personnel (minimum two assistants), and support equipment such as slings, lifting bars, and nets. When ordered, the Contractor is required to provide mobile crane services (shore crane and floating crane) with operator. The Contractor shall co-ordinate with local Port Authorities as necessary to ensure that the services are available as required and at the times requested. The cranes provided shall be in sound mechanical condition and shall meet all applicable safety laws and regulations. The cranes shall be suitable for their intended use and shall be operated with due care and within all operating safety limits.

9. DOCKAGE AND WHARFAGE (CLIN XX09) - The Contractor shall provide pier and wharf usage.

10. RESERVED - FENDERS (CLIN XX10) - The Contractor shall provide Yokohama-type fenders with a minimum of two (2) mooring lines.

11. FLEET LANDING (CLIN XX11) - The Contractor shall provide a Fleet Landing site at designated piers. The Fleet Landing includes a water taxi drop off point and should be large enough to conduct Force Protection (FP) operations. The Contractor shall ensure that this area is kept clean during the ship visit in port.

12. FORCE PROTECTION (CLIN XX12)

12.1. General (CLINs XX01 & XX02): The Contractor is responsible for providing or coordinating listed Force Protection services as part of their Management Services. The Contractor must develop a comprehensive FP approach which ensures the best security for the ship whether at pierside or at anchorage. The Contractor must coordinate all aspects of FP planning and services with Port Authorities, HN agencies, and U.S. Embassy security staff. If the HN is supplying FP assets the Contractor must verify they are available and are scheduled to show up on time. The Contractor will follow the contract requirements in this FP section unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

12.1.1. Access Points: The Contractor shall establish a single entry and exit point to the pier area.

12.1.2. Security Clearance: Under no circumstances shall any services be substituted due to inability to obtain security clearances.

12.1.3. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

12.1.3.1. Background Checks. The Contractor shall run security background checks on employees with local or national police departments or other government organizations. The Contractor shall not use employees who fail this background investigation.

12.1.3.2. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

12.1.3.3. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

12.1.4. Access Lists: The Contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

12.1.4.1. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

12.1.4.2. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

12.1.4.3. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

12.1.5. Inspections. The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

12.1.6. Stand-Off Distances:

12.1.6.1. Objects: The Contractor shall move all objects such as cars, crates, and trash bins at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.1.6.2. Unloading Zones: The Contractor shall establish unloading zones at least 400 feet (125 meters) away from the ship or to the maximum extent practicable.

12.1.7. Warning Signs: The Contractor shall procure FP Warning Signs and post them in conspicuous places around the perimeter of the ship so they can easily be seen.

12.1.7.1. Purpose: The purpose of the warning signs is to delineate the secure area around ships and to warn unauthorized personnel not to enter. A clear warning must be given that the use of deadly force may be authorized by the local security guards or police force.

12.1.7.2. Sign Specifications:

- Language: Must be in the local language(s) as well as English.
- Wording: Must state "Restricted Area & Do Not Enter"
- Picture: Must depict the image of a person with a gun if weapons are allowed to be carried.
- Color: Yellow or white with black lettering
- Visibility: Must be highly visible from a distance of 400 feet (125 meters)
- Durability: Must withstand inclement weather for extended periods (minimum six continuous days)

12.2. Non-Contract FP Measures: The Contractor is prohibited from providing any requested FP measures that are not included in this contract unless approval is obtained from the FISC Detachment Singapore Contracting Officer. The Contractor must explain what the FP service will entail and why it is being required. The Contracting Officer will coordinate this requirement with the ship's FP personnel. Once a decision is made then the Contractor will be either authorized to proceed with the service at an agreed upon price or instructed to cancel the requirement.

12.3. Beach Guard Office or Tent (CLIN XX12AA)

12.3.1. The Contractor shall provide an office area or a tent for a Beach Guard Office at the pier for docked ships and at the Fleet Landing area for anchored ships. The purpose of the tent is to provide a shelter for contracted security guards, local police, and ships personnel while performing security checks on personnel, baggage, and vehicles.

12.3.2. The office or tent will be large enough to accommodate a minimum of five (5) people. Tents will have at least three roll down sides to protect people from the elements. The office or tent will be equipped with a table, two to four chairs as required, and a fan or heater depending on the weather conditions (inclusive of power supply). The office or tent shall be well lighted and identified for its intended use. The Contractor will ensure that there is a communication system with the ship such as a landline, two way radio, or cell phone in the office or tent. A fully charged, 20 LB, CO_2 fire extinguisher will be provided and kept fully charged.

12.3.3. Warning signs will be posted in the immediate area of the office or tent in English and HN language warning personnel of security measures.

12.4. Dive and Vetting Operations (CLINs XX12AB & XX12AC)

12.4.1. The Contractor shall arrange for divers to conduct underwater inspections of the pier area, the ship's hull, and supporting watercraft. The purpose of the divers is to detect any explosive devices attached to the ship's hull or around the pier area. If the diver discovers an explosive device, they shall not attempt to defuse or remove the device. They shall immediately report the device to the ship and local authorities.

12.4.2. The pier will be vetted prior to the ships arrival.

12.4.3. The Contractor shall vet all watercraft at least 400 feet (125 meters) from the ship or to the maximum extent practicable.

12.4.4. The dive team will have a minimum of three (3) divers including a supervisor, will have all required equipment, and will provide their own boat with driver capable of holding a minimum of seven personnel.

12.4.5. The Contractor may provide two armed or unarmed guards to be in the boat for the vetting operation. Purpose of the guards is similar to guards in Picket Boats.

12.5. RESERVED - Floating Line of Demarcation (CLINs XX12AD THROUGH XX12AF)

12.5.1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around docked or anchored ships. The purpose of the FLD is to establish a visual reference final demarcation line that unauthorized swimmers or watercraft should not be entering. The Picket Boats will patrol outside of this visual reference. The FLD is not designed to stop approaching unauthorized watercraft by fouling their propellers. Rather it is to help identify a safe standoff zone.

12.5.2. The Contractor shall comply with the specification of the FLD in Attachment 3.

12.6. Perimeter Fencing (CLIN XX12AG)

12.6.1. The Contractor shall provide an adequate Perimeter Fence around the pier area. The purpose of the perimeter fencing is to keep unauthorized individuals from easily gaining access to the Port area and the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep people out. If the Port has an outer perimeter fence with controlled vehicle access then that will normally be sufficient. If not, or if additional fencing is required to control access to the pier, then the Contractor will provide portable chain link fencing with vehicle and walk up entrances.

12.6.2. The perimeter fence provided by the Contractor must meet the following specifications:

Material: Chain link of aluminum or other durable metallic material
Height: Minimum height of 2.5 meters (7 feet)
Base: Temporarily set in pier or with sufficient concrete base to keep from being easily moved Entry Point: Entry available for vehicles and personnel.

12.7. Physical Security Barriers (CLINs XX12AH THRU XX12AL)

12.7.1. The Contractor shall provide physical security barriers to completely close off the pier area around the ship. There will be one vehicle and one personnel entry point. The purpose of the physical barriers is to keep unauthorized vehicles from easily gaining access to the Pier. It is designed to provide a safety barrier or standoff distance from the docked ship and to keep unauthorized vehicles from gaining access to the ship.

12.7.2. The barriers may be of different design and material as long as they are approved by the FP personnel. The most common form is the Water Filled Barrier (WFB) such as is used in road construction. Empty 20 ft or 40 ft shipping containers may also be used. As well as concrete block barriers. Availability will determine the requested type of barrier. A combination of barriers may also be used.

12.7.3. A vehicle entry point must be established through the barriers for vehicles servicing the ship. The entry point should be a series of zig zag patterns to control the speed of access.

12.7.4. A personnel entry point must be established through the barriers.

12.7.5. Barriers may also be used to seal off secondary Port gates.

12.7.6. All barriers must be placed prior to a ship's arrival. The ship's FP Officer will have final approval of positioning of the barriers and of the entry points.

12.8. Picket Boats (CLINs XX12AM & XX12AN)

12.8.1. The Contractor shall provide picket boats to protect the ship from all waterborne threats whether above or below the water. They shall immediately warn the ship of all perceived threats and keep unauthorized vessels or personnel out of the exclusion zone.

12.8.2. The Contractor shall comply with Attachment 4 for picket boat operations and specifications.

12.9. Portable Latrine (CLIN XX12AP)

12.9.1. The Contractor shall provide portable, water-flushed or chemical-type latrines with hand-washing facilities, toilet paper, hand soap, and paper towels.

12.9.2. The Contractor shall empty the holding tank prior to it reaching 90% full capacity and provide water as required.

12.9.3. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

12.9.4. The Contractor shall clean latrines twice daily.

12.10. Portable Lighting (CLIN XX12AQ)

12.10.1. The Contractor shall provide portable flood lights to provide additional lighting at pierside or to light the water around ships. The purpose of the lighting is to provide adequate lighting when the Ports installed lighting is not sufficient. Lights may be positioned on the pier or onboard the ship.

12.10.2. The floodlights shall be portable with their own generator power source. Each floodlight shall contain a minimum of 1,500 Watts of lighting.

12.11. Security Guards Services (CLINs XX12AR through XX12AT)

12.11.1. The Contractor shall provide security guards to patrol in picket boats and at pierside to ensure that only authorized personnel, vehicles, watercraft and material are allowed into restricted areas.

12.11.2. The Contractor shall comply with Attachment 5 for security guard operations.

12.11.3. All security shall be armed.

12.12. Two Way Radios (CLIN XX12AU) The Contractor shall provide two way radio sets capable of communicating with the ship, picket boats and to the shore patrol designated individuals.

12.13. RESERVED - Hand Held Explosive Detectors (CLIN XX12AV) - The Contractor shall provide hand held explosive detectors capable of detecting explosives.

12.14. Hand Held Metal Detectors (CLIN XX12AW) - The Contractor shall provide hand held metal detectors capable of detecing metal.

12.15. RESERVED - Walk Thru X-Ray Machine (CLIN XX12AX) & Metal Detector (CLIN XX12Y) - The Contractor shall provide walk thru X-ray Machine & metal detector capable of X-raying hand carried luggage and bags to determine its contents, and also capable of detecting metal. Equipment shall be manned by professionally trained operator to operate the equipment 24 hours a day.

12.16. Under Carriage Vehicle Scanner (CLIN XX12AZ) – The Contractor shall provide under carriage vehicle scanner to scan vehicle undercarriages.

13. FORKLIFT WITH OPERATOR (CLIN XX13) - The Contractor shall provide forklifts with operators for loading and unloading operations.

14. FUEL (CLIN XX14)

14.1. Normally, fuel is provided by the HN or by other U.S. Navy bunkering contracts. However, if those sources are not available, then the HS Contractor may be required to assist in obtaining the fuel. In that case, the Husbanding Contractor must comply with this paragraph and must ensure the attached specifications are met by the fuel provider.

14.2. If a ship requires the Husbanding Contractor to provide fuel, the Husbanding Contractor shall contact the bunkering contractor or HN source. If the HN or bunkering contractor can provide the fuel within the time needed, the Husbanding Contractor shall so inform the ship. However, if the HN or US Government bunkering contractor cannot deliver the fuel when required by the ship, the Contractor shall so inform the SUPPO or FISC Detachment Singapore and request approval to proceed. Only after this is done, may the Contractor arrange for fuel delivery.

14.3. The Contractor shall only charge fuel at the daily commercial fuel rate established by theh port or local authorities. The Contractor shall provide documentation of the daily rate to the SUPPO. The fuel price charged shall be free on board the ship whether at pier side or at anchor. Compensation for all husbanding efforts or costs associated with assisting in the acquisition and delivery of fuel (for instance, dealing with customs authorities) are

included in, and otherwise covered by, the daily fixed husbanding services rates set out in the Schedule of Supplies/Services of this contract.

14.4. The Contractor shall provide fuel in accordance with Attachment 6 – Fuel Specifications.

14.5. The Contractor shall provide a fuel barge or truck to transport fuel to the ship.

14.6. The Contractor shall inspect the barge or truck prior to each use with an independent, certified, and licensed surveyor. The barge or truck will be clean and certified before loading the fuel. The inspection shall be in the presence of the barge or truck operator and the fuel supplier.

14.7. The Contractor shall load the ordered fuel and transport to the ship. The Contractor shall transfer the fuel from the fuel barge or truck to the ship. The Contractor shall provide sufficient hoses with proper fittings or connections to effect fuel transfer operations.

14.8. The Contractor shall ensure the fuel provider uses oil spill booms and other environmental safety equipment required by local laws. Fuel caught in oil booms will be properly disposed.

15. GARBAGE AND TRASH REMOVAL & DISPOSAL (CLIN XX15)

15.1. The Contractor shall remove and dispose of garbage and trash from the ship.

15.2. The Contractor shall provide dedicated refuse bins to the ship.

15.3. If collection is done by sea, the Contractor shall provide a trash barge 24 hours a day with suitable fendering to prevent damage to the ship; and at least four (4) mooring lines to secure alongside the ship.

15.4. The Contractor shall collect all loose refuse placed adjacent to refuse bins.

15.5. The Contractor shall immediately clean up any spilled refuse.

15.6. The Contractor shall properly dispose of all collected refuse.

16. LINESBOATS (CLIN XX16) - The Contractor shall provide Linesboats to assist in docking line handling operations.

17. LINE HANDLERS (CLIN XX17)

17.1. The Contractor shall provide line handlers to secure and unsecure mooring lines from the ship to the pier.

17.2. Line handlers shall have all required safety equipment to perform the job. Examples are floating vests, gloves, and hard hats.

18. MANLIFT (WITH OPERATOR) (CLIN XX18)

18.1. The Contractor shall provide a manlift with operator and a full fuel tank.

18.2. The Contractor shall replenish the fuel and perform daily maintenance checks on the manlift prior to 0730 HR each morning.

18.3. The Contractor shall conduct training on safety and operating procedures during the turnover with ship personnel. The Contractor shall maintain documentation of ship personnel acknowledgement of the training.

19. MATERIAL HANDLING (CLIN XX19)

19.1. The Contractor shall provide material handling services for the ship. They will receive material shipped to them to include clearing customs, store the items, report the status of the items, deliver to the ship, and forward the items if unable to deliver.

19.1.1. The Contractor shall use counter-to-counter delivery and charge by each Bill of Lading.

19.1.2. All material shipped shall be labeled "SHIP'S SPARE IN TRANSIT"

19.1.3. Material shipped shall be arranged so as to have the material arrive at least 2 working days prior to ship's arrival.

19.1.4. Shipping documents shall be labeled 'SHIP'S SPARE(S) IN TRANSIT" and addressed to the ship's Commanding Officer of the Unit and care of the Contractor.

19.2. The Contractor shall provide Drayage (land transportation) services for material handling items to include required trucks and personnel.

19.3. The Contractor shall provide Lighterage (water transportation) services for material handling items to include required barges and personnel.

19.4. The Contractor shall use forklifts and cranes from The Schedule.

19.5. The Contractor shall receive the package from the carrier and clear it through customs when the ship has arrived and berthed or anchored in the respective port. Any damages must be noted prior to acceptance.

19.6. The Contractor shall deliver the package to the shp after arrival in port or the following morning.

19.7. The Contractor shall send status reports after receipt, after deliver, and if unable to deliver to a designated government representative or FISC Detachment Singapore.

19.8. The Contractor shall forward the package to a designated location if for any reason it cannot be delivered to the ship.

19.9. The Contractor shall store the package so that it will not be damaged and forward to the next port of call or otherwise directed by the ship.

20. MISCELLANEOUS

20.1. RESERVED - INTERPRETER SERVICES (CLIN XX20AA) - The Contractor shall arrange for interpreter/translator services necessary to assure timely delivery and performance of the supplies and services ordered by the SUPPO. The interpreter/translator shall be fluent in both spoken and written local language and English.

20.2. TOILET CLEANING (CLIN XX20AB)

20.2.1. The Contractor shall provide toilet cleaning three times daily at Clifford Pier.
20.2.2. The Contractor shall restock toilet paper, hand soap, and paper towels daily.

21. OIL BOOMS (CLIN XX21)

21.1. The Contractor shall provide oil booms to be used for containment, concentration, diversion and exclusion of oil floating on water.

21.2. Oil Booms provided shall have a flotation device at the top, a skirt below, a tension device, and a ballast device at the bottom.

21.3. The Contractor shall dispose all oil waste caught in the Oil Boom.

22. RESERVED - OILY WASTE AND AGGREGATE WATER REMOVAL & DISPOSAL (CLIN XX22)

22.1. The Contractor shall remove oily waste and aggregate water from the ship.

22.2. The Contractor shall pump oily waste and aggregate water from the ship to Contractor provided equipment.

22.3. The Contractor shall accurately measure oily waste and aggregate water removed from the ship. The ship's duty engineer shall verify in writing the amount removed.

22.4. The Contractor shall provide hoses of sufficient length from contractor equipment to the ship with either 2.5" or 4" quick disconnect camlock fittings.

22.5. When removal is done via barge, the Contractor shall provide a barge with fendering and a minimum of four (4) mooring lines to secure alongside the ship.

22.6. The Contractor shall properly dispose of all oily waste and aggregate water.

22.7. The Contractor shall pre-position Oily Waste barges/trucks when necessary in accordance with Force Protection or other requirements.

23. RESERVED - PAINT FLOAT (CLIN XX23)

23.1. The Contractor shall provide paint floats to hold personnel painting the ship.

23.2. The paint float deck shall be between two (2) to three (3) meters above the waterline and the scaffolding shall be no higher than 3.5 meters from the deck.

23.3. The ship is responsible to secure the paint float to the ship if rented for more than one day.

24. PILOTS (CLIN XX24) - The Contractor shall provide qualified pilots to navigate the ship to and from the berthing locations.

25. POTABLE WATER (CLIN XX25) - The Contractor shall deliver fresh, potable water to the requesting ship in accordance with the current World Health Organization (WHO) Guidelines for drinking-water quality, located at http://www.who.int/water_sanitation_health/dwq/gdwq3rev/en/index.html, to the intake hose of the requesting ship suitable for showering, cooking and cleaning. Water availability shall be in accordance with the delivery schedule specified by the SUPPO. The ship shall test and determine acceptability of the water delivered.

26. RESERVED - PRATIQUE (QUARANTINE SERVICE) (CLIN XX26) - The Contractor shall provide First Port of Entry Clearance with the local authorities.

27. RESERVED - REEFER CONTAINER (CLIN XX27)

27.1. The Contractor shall provide reefer containers with power source for refrigerated storage.

27.2. The Contractor shall provide diesel generators with fuel and properly sized to operate reefers continuously. Generators shall emit sound levels of less than 84 decibels.

27.3. The Contractor shall make all power connections between the generator and reefer.

27.4. The Contractor shall operate the reefer at the temperature specified by the ship.

28. RESERVED - SHORE POWER (CLIN XX28)

29. RESERVED – SHORE STEAM (CLIN XX29)

30. STEVEDORE SERVICES (CLI XX30) - The Contractor shall provide stevedores and supervisors for general labor.

31. TENT WITH EQUIPMENT FOR SPECIAL EVENTS (CLIN XX31)

31.1. The Contractor shall provide tents with accessory equipment. The tent package shall include a tent, lighting, ceiling fans, tables and chairs, electrical hookups, cable for power supply, and a generator with fuel that emits sound levels of less than 84 decibels.

31.2. The Contractor shall provide daily cleaning of the tent and a three-meter perimeter around the tent. Cleaning includes removing trash, sweeping, and mopping up spills.

32. TRANSPORTATION VEHICLES (CLIN XX32)

32.1. The Contractor shall provide vehicle service with qualified drivers for official government business.

32.2. The Contractor shall provide one-way transfer vehicles with drivers to transfer personnel between a designated pick-up point and a specified destination.

32.3. The Contractor shall provide covered trucks with driver. The covered truck shall have a hydraulic lift to facilitate loading and off loading. The driver shall assist with loading and off loading.

32.4. The Contractor shall provide drivers who can speak and understand English clearly.

32.5. The Contractor shall provide only vehicles with air conditioning.

32.6. The Contractor shall jointly inspect each vehicle with an authorized ship's representative, before and after each use.

32.7. The Contractor shall return all items left in rental vehicles to the ship's SUPPO or to FISC Detachment Singapore if the ship has departed.

32.8. The Contractor shall obtain written acknowledgement of vehicle service or one-way transportation service by an authorized ship representative. Trip tickets shall be used to document arrival and departure times, destinations, and type of vehicle.

33. TUGS (CLIN XX33)

33.1. The Contractor shall provide tugs to bring ships to and from berthing locations.

33.2. Tugs shall have a minimum towing capacity of 2,500 horsepower and not less than 35 tons bollard pull.

33.3. Towropes shall be synthetic ropes with a minimum strength of at least 80 tons.

33.4. If tugs are not available through the port authority, the Contractor shall use commercially available tugs.

34. WATER TAXIS (CLIN XX34)

34.1. The Contractor shall provide water taxis to transfer ship personnel to and from the ship and the pier in accordance with Attachment 7 – Water Taxi Specifications.

34.2. The Contractor shall return all items left in water taxis to the ship's SUPPO or FISC Detachment Singapore.

34.3. The Contractor shall obtain written acknowledgement of water taxi service by the ship's duty officer onboard. Logs shall be used to document arrival and departure times.

35. CRAFT REPORT (CLIN XX35)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The report format is provided in Exhibit D - CRAFT.

35.2. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

36. OPERATIONS OTHER THAN WAR (OOTW)/CONTINGENCY OPERATIONS AND DISASTER RELIEF FEES (CLIN XX36) See paragraph 2 above also.

36.1. OOTW refers to a "Contingency operation" as that term is defined in FAR 2.101. In addition, for purposes of this contract, it refers to rescue and humanitarian relief missions, Non-combatant Evacuation Operations (NEO's), or an unplanned, real world deployment of troops for an indefinite period of time. The provisions of FAR Part 18, Emergency Acquisitions (effective 5 Jul 2006), apply in full to the OOTW requirements of this contract.

36.2. Logistics Support is defined as goods and services provided in a background framework to an operation. Logistics Support can take place in the immediate vicinity of the operation or a great distance away.

36.3. The Contractor shall be familiar with the manner in which the U.S. Navy operates. The Contractor shall have a network familiar with the local political and commercial infrastructures, cultural and lingual background, and business practice. In order to assist the Navy's response to OOTW, the Contractor shall furnish personnel with the following qualifications:

36.3.1. Ability to speak the local language where OOTW is being conducted.
36.3.2. Capacity to travel to the OOTW or forward logistic site within 24 hours of notification.
36.3.3. Current inoculation records.
36.3.4. Possess a valid up-to-date passport.

36.4. The Contractor, or his or her representative, shall be available (either in person or by telephone) 24 hours a day, seven days a week, during the time frame of the OOTW and/or Exercise/ Logistic Support operation. The Contractor shall assist the on-site Government representative in fulfilling logistical requirements to include, but not limited to, translation services, identification of sources, liaison with local political and police authorities, and any other official requirements. The Contractor shall ensure that sufficient

personnel are available at each supported location to effectively perform all necessary tasks. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each team that is being deployed in support of OOTW and/or Exercise/ Logistic Support operations.

36.5. If the operation(s) is/are not associated with a ship, or if the action is away from the port city, OOTW and/or Exercise/ Logistic Support CLINS will apply. If the service is provided in port vicinity and the requirement is received from the ship or a contingent on the ship, the contractor's Husbanding fees and CLINS shall apply.

36.6. If an advance party arrives in a country for OOTW, the Contractor shall bill at the OOTW subsequent day rate. If the operation is on going, the Contractor shall bill the OOTW first day rate and then subsequent days. If there are multiple operations at same time, or a single operation at multiple locations, the Contractor may bill for each operation/location for which the Contractor's services are ordered.

36.7. Regardless of location, OOTW support requests for other than the basic service under this CLIN for operations not associated with ships are exempt from the requirements portion of the contract.

36.8. A sample of the potential list of OOTW and/or Exercise/ Logistic Support supplies and services is provided for Contractor reference in Exhibit C. The Contractor may be required to locate sources to furnish these supplies and services. The authorized U.S. Government contracting officer will negotiate a fair and reasonable price for these items at the time of placing the order. In conducting market research for requirements over $3,000, the husbanding Contractor shall make every effort to locate at least three sources and shall provide a copy of all documents to the Contracting Officer. In very unique time sensitive situations, the Contractor may be tasked to source and provide a large variety of supplies and services on a very compressed delivery schedule in support of large scale operations like NEOs, etc or other real world events. In these unique situations, the requirement to document market research and source selections for supplies/services over $3000 is still mandatory.

36.9. An exercise is defined as a prearranged, preplanned evolution being conducted between the Government and a foreign nation for training or other purpose of a specified duration. The name of the event will generally, but may not always, include the word "exercise". It includes training efforts and exercise-like activity in preparation for actual contingencies.

36.10. The Contractor shall provide exercise and logistics support in the same manner as is provided for OOTW support.

36.11. Disaster Relief is defined as emergency operations or preparedness to support civil society to cope with natural or man-made disasters. Disaster relief is concerned with recovery efforts.

36.12. The Contractor shall provide disaster relief support in the same manner as is provided for OOTW support.

37. OOTW COST REPORT (CLIN XX37)

35.1. The Contractor shall prepare a Cost Reporting and Forecasting Tool (CRAFT) Report for OOTW or each ship visit showing what services or supplies were ordered from the contract and what was actually provided. The sample report format is provided in Exhibit D – CRAFT.

35.3. The report shall be submitted to FISC Detachment Singapore Contracting Officer or FISC Detachment Singapore within seven (7) working days of each ship's departure.

52.212-5	Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items	SEP 2005

CLAUSES INCORPORATED BY FULL TEXT

ADDITIONAL CONTRACT TERMS AND CONDITIONS

(a) Oral Orders (Indefinite Delivery Contracts) (SUP 5252.216-9402) (JAN 1999). Oral orders may be placed, provided the following conditions are complied with:

(1) No oral order will exceed $100,000 or such lesser amount as may be specified elsewhere in the schedule of this contract.

(2) The Contractor will furnish with each shipment a delivery ticket, in triplicate, showing: contract number, order number under the contract, date order was placed, name and title of person placing order, an itemized listing of supplies or services furnished, unit price and extension of each item, and delivery or performance date.

(3) Invoices for supplies or services furnished in response to total orders will be accompanied with a received copy of each related delivery ticket.

(4) The ordering activity shall designate in writing the names of individuals authorized to place oral orders and will furnish a copy thereof to the Contractor.

(5) Written confirmation of oral orders will be issued as a means of documenting the oral order within 10 working days or oral orders will be confirmed twice a month, in writing, when more than one (1) oral order is consolidated for a single confirmation.

(b) Written Orders (Indefinite-Delivery Contracts) (SUP 5252.216-9403) (JAN 1992). All requests for Services and Supplies must be documented by an AGR with a written Task or Delivery Order using a SF 1449 or DD Form 1155. Written orders on Standard Form 1449/DD Form 1155 will contain the following information, consistent with the terms of the contract:

(1) Date of order;
(2) Contract number and order number;
(3) Item number and description, quantity, and unit price;
(4) Delivery or performance date;
(5) Place of delivery or performance (including consignee);
(6) Packaging, packing, and shipping instructions, if any;
(7) Accounting and appropriation data;
(8) Any other pertinent information.

(c) Payment by Third Party (FAR 52.232.36*)* (MAY 1999) - This clause is incorporated by reference.

(d) Ordering (FAR 52.216-18) (OCT 1995)

(1) Any supplies and services to be furnished under this contract shall be ordered by issuance of delivery orders or task orders by the individuals or activities designated in the Schedule. Such orders may be issued from contract award to final day of the contract.

(2) All delivery orders or task orders are subject to the terms and conditions of this contract. In the event of conflict between a task/delivery order or task order and this contract, the contract shall control.

(3) If mailed, a delivery order or task order is considered "issued" when the Government deposits the order in the mail. Orders may be issued orally, by facsimile, or by electronic commerce methods only if authorized in the schedule.

(e) Order Limitations (FAR 52.216-19) (OCT 1995)

(1) *Minimum ordering amount.* When the Government requires supplies or services covered by this contract in an amount of less than US $50.00, the Government is not obligated to order, nor is the Contractor obligated to furnish, those supplies or services under this contract.

(2) *Maximum ordering amount*. The Contractor is not obligated to honor --

(i) Any order for a single item in excess of the estimated quantity for that item, which is identified in the pricing schedule of this contract;

(ii) Any single order for a combination of items in excess of the total estimated dollar value for the applicable performance period of this contract; or

(iii) A series of orders from the Government within 120 days that together call for quantities exceeding the estimated quantities identified in the pricing schedule by more than two hundred percent (200%).

(3) This is a requirements contract (which incorporates FAR 52.216-21), the Government is not required to order a part of any one requirement from the Contractor if that requirement exceeds the maximum-order limitations in paragraph (b) of this section.

(4) Notwithstanding paragraphs (b) and (c) of this section, the Contractor shall honor any order exceeding the maximum ordering limitations in paragraph (b), unless the order(s) is returned to the ordering office within 3 days after issuance, with written notice stating the Contractor's intent not to furnish the item (or items) called for and the reasons. Upon receiving this notice, the Government may acquire the required supplies or services from another source.

(f) Contract Type. The resulting contract will be a Fixed Price Requirements contract.

(g) Requirements (FAR 52.216-21) (OCT 1995)-(ALTERNATE I) (APR 1984)

(1) This is a requirements contract for the supplies or services specified, and effective for the period stated, in the Schedule. The quantities of supplies or services specified in the Schedule are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment.

(2) Delivery or performance shall be made only as authorized by orders issued in accordance with the Ordering clause. Subject to any limitations in the Order Limitations clause or elsewhere in this contract, the Contractor shall furnish to the Government all supplies or services specified in the Schedule and called for by orders issued in accordance with the Ordering clause. The Government may issue orders requiring delivery to multiple destinations or performance at multiple locations.

(3) The estimated quantities are not the total requirements of the Government activity specified in the Schedule, but are estimates of requirements in excess of the quantities that the activity may itself furnish within its own capabilities. Except as this contract otherwise provides, the Government shall order from the Contractor all of that activity's requirement for the supplies and services specified in the Schedule that exceed the quantities that the activity may furnish within its own capabilities.

(4) The Government is not required to purchase from the Contractor requirements in excess of any limit on total orders under this contract.

(5) If the Government urgently requires delivery of any quantity of an item before the earliest date that delivery may be specified under this contract, and if the Contractor will not accept an order providing for the accelerated delivery, the Government may acquire the urgently required goods or services from another source.

(6) Any order issued during the effective period of this contract and not completed within that period shall be completed by the Contractor within the time specified in the order. The contract shall govern the Contractor's and Government's rights and obligations with respect to that order to the same extent as if the order were completed during the contract's effective period; provided, that the Contractor shall not be required to make any deliveries under this contract after thirty (30) days beyond the expiration of the contract.

(h) Option To Extend Services (FAR 52.217-8) (NOV 1999) (MODIFIED). In order to maintain continuity of service, the Government may require continued performance of any services within the limits and at the rates specified in the contract. This option provision may be exercised more than once, but the total extension of performance hereunder shall not exceed six (6) months. The Contracting Officer may exercise this option by written notice to the contractor within fifteen (15) days before the contract expires.

(i) Inconsistency Between English Version & Translation Of Contract (FAR 52.225-14) (FEB 2000). In the event of inconsistency between any terms of this contract and any translation into another language, the English language meaning shall control.

(j) Taxes – Foreign Fixed Price Contracts (FAR 52.229-6) (JUN 2003). Incorporated by reference.

(k) Payment by Electronic Funds Transfer--Central Contractor Registration (FAR 52.232-33) (OCT 2003). Incorporated by reference.

(l) Authorized Changes Only By The Contracting Officer (SUP 5252.243-9400) (JAN 1992)

(1) Except as specified in paragraph (b) below, no order, statement, or conduct of Government personnel who visit the Contractor's facilities or in any other manner communicates with Contractor personnel during the performance of this contract shall constitute a change under the "Changes" clause of this contract.

(2) The Contractor shall not comply with any order, direction or request of Government personnel unless it is issued in writing and signed by the Contracting Officer, or is pursuant to specific authority otherwise included as a part of this contract.

(3) The Contracting Officer is the only person authorized to approve changes in any of the requirements of this contract, and notwithstanding provisions contained elsewhere in this contract, the said authority remains solely the Contracting Officer's. In the event the Contractor effects any change at the direction of any person other than the Contracting Officer, the change will be considered to have been made without authority and no adjustment will be made in the contract price to cover any increase in charges incurred as a result thereof. The address and FAX telephone number of the Procuring Contracting Officer (PCO) are:

Commercial Address: FISC Detachment Singapore

PSA Sembawang Terminal
Deptford Road, Building 7-4, Unit 2-9
Singapore 759657

Military Address: PSC 470, Box 2150
FPO AP 96534-2150

FAX Numbers: (65)-6-750-2639 or 2382

(m) Provision for Wood Products SA 03-05 NAVSUP CLAIMANCY POLICY - Pinewood Nematode (microscopic roundworm) Free Non-Manufactured Wood Pacing (NMWP) Material (SWPM) (Nov 202) NAVSUP

(1) Definition. 'Pinewood nematode' as used in this provision, means a microscopic roundworm that has infested coniferous (softwood) trees.

(2) All non-manufactured wood lumber, pallets boxes, crates, containers, reels blocking and bracing, dunnage, drums, etc. for all shipments are required to be certified pest- (pinewood nematode) free. All wood pallets, boxes, crates, containers, reels, blocking and bracing, dunnage, drums, etc. ordered/delivered from vendors/suppliers shall be heat-treated and marked to the American Lumber Standards Committee (ALSC), NMWP policy and enforcement standards. The approved method for ensuring NMWP material is pinewood nematode free is as follows:

(i) Heat-treated to a minimum core temperature of 56°C(133°F) for at least 30-minutes in a closed chamber that has been tested evaluated, and approved officially for this purpose. In addition, the susceptible wood shall display an officially approved heat-treated marking enabling the identification of where and by whom the above treatment has been carried out.

(3) All bulk lumber procured for the fabrication of pallets, boxes, crates, containers, reels, skids, blocking and bracing, dunnage, drums, etc., shall be certified and marked as a part of the fabrication process, to the ALSC NMWP policy and enforcement standards. Vendors/Suppliers using ALSC-certified lumber to make or repair wooden boxes, crates, skids, containers, pallets, reels, drums, etc., must have formal processing procedures and documentation to ensure that only certified lumber leaves their fabrication point.

(4) This provision is self-deleting if the material or supplies are not shipped in NMWP material.

(n) Agency Protests

(1) Prior to submission of an agency protest, all parties should use their best efforts to resolve concerns raised by an interested party at the contracting officer level through open and frank discussions.

(2) FISC Detachment Singapore will process agency protests in accordance with the substantive and procedural requirements of FAR 33.104(d).

(3) Pursuant to FAR 33.103(d)(4), an agency protest may be filed directly with either the Contracting Officer or the Chief of the Contracting Office. A protestor who initially files an agency protest with the Contracting Officer may appeal an adverse decision to the Chief of the Contracting Office. Agency protest submissions should clearly identify the initial adjudicating official, i.e., the "Contracting Officer" or "Chief of the Contracting Office".

52.212-5 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS--COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) Comptroller General Examination of Record. The Contractor agrees to comply with the provisions of this paragraph (a) if the contract was awarded using other than sealed bid, is in excess of the simplified acquisition threshold, and does not contain the clause at 52.215-2, Audit and Records-Negotiation.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to the right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR Subpart 4.7, Contractor Records Retention, of the other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of form. This does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(b) Notwithstanding the requirements of any other clause in this contract, the Contractor is not required to flow down any FAR clause, other than those in paragraphs (i) through (vii) of this paragraph in a subcontract for commercial items. Unless otherwise indicated below, the extent of the flow down shall be as required by the clause--

(i) 52.219-8, Utilization of Small Business Concerns (MAY 2004) (15 U.S.C. 637(d)(2) and (3)), in all subcontracts that offer further subcontracting opportunities. If the subcontract (except subcontracts to small business concerns) exceeds $500,000 ($1,000,000 for construction of any public facility), the subcontractor must include 52.219-8 in lower tier subcontracts that offer subcontracting opportunities.

(ii) 52.222-26, Equal Opportunity (Apr 2002) (E.O. 11246).

(iii) 52.222-35, Equal Opportunity for Special Disabled Veterans, Veterans of the Vietnam Era, and Other Eligible Veterans (Dec 2001) (38 U.S.C. 4212).

(iv) 52.222-36, Affirmative Action for Workers with Disabilities (Jun 1998) (29 U.S.C. 793).

(v) 52.222-39, Notification of Employee Rights Concerning Payment of Union Dues or Fees (DEC 2004) (E.O. 13201)

(vi) 52.222-41, Service Contract Act of 1965, as Amended (JUL 2005), flow down required for all subcontracts subject to the Service Contract Act of 1965 (41 U.S.C. 351, et seq.).

(vii) 52.247-64, Preference for Privately Owned U.S.-Flag Commercial Vessels (Apr 2003) (46 U.S.C. Appx 1241 and 10 U.S.C. 2631). Flow down required in accordance with paragraph (d) of FAR clause 52.247-64.

(c) While not required, the contractor May include in its subcontracts for commercial items a minimal number of additional clauses necessary to satisfy its contractual obligations.

(End of clause)

52.252-2 CLAUSES INCORPORATED BY REFERENCE (FEB 1998)

This contract incorporates one or more clauses by reference, with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. Also, the full text of a clause may be accessed electronically at this/these address(es):

252.247-7024 Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.212-7001 CONTRACT TERMS AND CONDITIONS REQUIRED TO IMPLEMENT STATUTES OR EXECUTIVE ORDERS APPLICABLE TO DEFENSE ACQUISITIONS OF COMMERCIAL ITEMS (SEP 2005) (DEVIATION)

(a) In addition to the clauses listed in paragraph (b) of the Contract Terms and Conditions Required to Implement Statutes or Executive Orders--Commercial Items clause of this contract (FAR 52.212-5 (JUL 2005) (DEVIATION), the Contractor shall include the terms of the following clause, if applicable, in subcontracts for commercial items or commercial components, awarded at any tier under this contract:

252.225-7014	Preference for Domestic Specialty Metals, Alternate I (APR 2003) (10 U.S.C. 2533a).
252.232-7019	Training for Contractor Personnel Interacting with Detainees (SEP 2005) (Section 1092 of Pub. L. 108-375).
252.247-7023	Transportation of Supplies by Sea (MAY 2002) (10 U.S.C. 2631)
252.247-7024	Notification of Transportation of Supplies by Sea (MAR 2000) (10 U.S.C. 2631)

(End of clause)

252.233-7001 CHOICE OF LAW (OVERSEAS) (JUNE 1997)

This contract shall be construed and interpreted in accordance with the substantive laws of the United States of America. By the execution of this contract, the Contractor expressly agrees to waive any rights to invoke the jurisdiction of local national courts where this contract is performed and agrees to accept the exclusive jurisdiction of the United States Armed Services Board of Contract Appeals and the United States Court of Federal Claims for hearing and determination of any and all disputes that may arise under the Disputes clause of this contract.

(End of clause)

Section J - List of Documents, Exhibits and Other Attachments

LIST OF ATTACHMENTS/EXHIBITS
Applicable documents, exhibits, and attachments for this contract are:

EXHIBIT NO.	DOCUMENT
A	Schedule of Supplies and Services
B	Port Tariff
C	OOTW Sample of Provisions
D	CRAFT Report

ATTACHMENT NO.	DOCUMENT
1.	Classifications of Ships
2.	Refuse Definitions
3.	Floating Line of Demarcation (FLD) Specifications
4.	Picket Boat Operations & Specifications
5.	Security Guard Operations
6.	Fuel Specifications
7.	Water Taxi Specifications
8.	Request for Sanitary Inspection
9.	Quality Assurance Provisions

EXHIBIT A - SCHEDULE
See Section B2 - Exhibit A (ELINs) Schedule of Supplies and Services.

Separate Excel spreadsheet is attached.

EXHIBIT B - PORT TARIFF ITEMS
The Excel spreadsheet provides estimates of port tariff rates only.

EXHIBIT C - OOTW SAMPLE
The listing under this Excel spreadsheet is a sample for information purposes only.

EXHIBIT D - CRAFT REPORT
The CRAFT submittal is required within seven (7) days upon completion of a ship visit. Copies of certified invoices shall be forwarded to the Contracting Officer.

ATTACHMENT 1- SHIP CLASS
SHIP CLASSIFICATIONS (DESCRIPTION OF U.S. NAVY SHIPS BY CLASS AND TYPE)

The following are Ship Classifications:

Class IA	Draft ft (mt)	Length ft (mt)	Beam ft (mt)	Displ tons	Maximum Crew Members
HSIC	5 (1.4)	82 (24.99)	17.5 (5.33)	57	21
PC 2-8	8 (2.4)	179(54.6)	26(7.9)	354	52
Class I					
ARS 50-53	18 (5.5)	255 (77.7)	51 (15.5)	3,181	99

CVN 65	39 (11.9)	1,123 (342)	133 (40.5)	89,600	5,900
CVN 68-77	39 (11.9)	1,092 (332)	134 (41)	102,000	6,275

1. The draft, length and beam of all ships are expressed in terms of feet and parenthetically in terms of meters. In converting from feet to meters, all figures are rounded to the nearest meter.

2. Displacement is expressed in tons and represents fully loaded displacement.

3. The "Maximum Crew" column represents the total number of accommodations on board. The actual number of personnel on the ship may be expected to be 10% to 20% less than this figure. For amphibious ships (those with ship type abbreviations beginning with "L"), the manning figure includes troop berthing.

4. There may be certain variances between the data in this appendix and the actual configuration of ships deployed as part of the U.S. Seventh Fleet. However, such variances will be relatively minor.

ATTACHMENT 2 - REFUSES SERVICE

Refuse Service Definitions

The following are Refuse Definitions used for this contract:

5. **"Refuse"** includes all garbage, ashes, debris, rubbish and other similar waste material, and anything else delivered to the ship, but not taken onboard due to spoilage, etc., even though such refuse was not aboard the vessel when it arrived in port. Not included are explosives and incendiary waste and contaminated waste from medical and radiological processes.

6. **"Garbage"** means animal and vegetable waste (and containers thereof) resulting from the handling, preparation, cooking, and consumption of foods. Edible, or hog food, garbage is the portion of waste food, which has been segregated for salvage.

7. **"Ashes"** means the residue from burned wood, coal, coke, and other combustible material.

8. "**Debris**" means grass cuttings, tree trimmings, stumps, street sweepings, rooting and construction wastes, and similar waste material.

9. "**Rubbish**" means a variety of unsalvageable waste material such as metal, glass, crockery, floor sweepings, paper, wrappings, containers, cartons, and similar articles not used in preparing or dispensing food. Rubbish is further subdivided into:

10. "**Combustible Rubbish**" which can be burned readily in an incinerator or burning pit.

11. "**Noncombustible Rubbish**" which cannot be burned at ordinary incinerator temperatures (800 to 1,800 degrees F.)

12. "**Receptacles**" or "**Containers**" means cans, drums, bins, or similar receptacles, which can be handled easily, and multiple containers, which are handled by mechanical truck-mounted hoists. A **"bin"** is defined as a standard garbage bin used for this service which can vary in size. Size will be identified in The Schedule Sub-CLINs.

ATTACHMENT 3
FLOATING LINE OF DEMARCATION (FLD) SPECIFICATIONS

1. The following are the Governments basic requirements for the Floating Line of Demarcation Specifications to be used for this contract:

1. The Contractor shall provide a Floating Line of Demarcation (FLD) to identify a restricted area in the water of approximately 400 feet (125 meters) distance around anchored ships. The purpose of the FLD is to establish a visual reference (not necessarily a physically connected line) final demarcation line, visible day or night, that unauthorized swimmers or watercraft should not be entering. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar. The Picket Boats will patrol outside of this visual reference. The FLD shall have an Entry Control Point (ECP) where authorized watercraft are allowed access to and from the ship. The Contractor shall provide at a minimum two (2) work boats to tend to the FLD at all times. The FLD is not designed to stop approaching unauthorized watercraft rather it is to help identify a safe standoff zone.

2. The size of the Floating Perimeter will be approximately 2500 meters to 2700 meters based on a ship's length of approximately 800 feet.

3. Weights sufficient to anchor the FLD in place to the seabed. The size and number of weights will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the FLD line intact at all times regardless of sea conditions.

4. The Contractor shall have communication capabilities, either VHF or cellular phone with Port Operation Control and U.S. Navy vessel. The contractor shall report the status of the Floating Visual Line of Demarcation to Port Operation control every two hours or other regular interval agreed upon between Contractor and Port Operation Control.

5. The Contractor shall provide a minimum of two (2) work boats to tend the FLD at all times while the system is deployed.

6. The FLD shall be deployed in the most expeditious manner as soon as the U.S. Navy vessel is anchored.

7. When the FLD is retrieved, the Contractor must show documentary proof that all equipment deployed is removed from the location.

8. The Contractor shall provide the U.S. Navy, Port Authority/Host Nation an updated and current emergency contact list in case of contingencies.

9. Below are two examples of FLDs.

a. Example 1 - Continuous Line FLD –

i. Specifications: Continuous line made of nylon rope or steel cable (minimum 20mm) with at least one connectable Entry Control Point for access.

ii. Buoys or floats positioned every meter on the line sufficient to keep line afloat and visible on the surface of the water.

iii. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical miles. In addition, buoys must also be visible to ship's/port radar.

iv. Weights positioned at intervals along the line to anchor the line to the seabed and stabilize the perimeter. The number of weights, size and intervals will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the perimeter intact and in position at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

b. Example 2 - Floating Buoy System (FBS)

i. Specifications: The FBS must clearly show a perimeter line and fully surround the ships at anchorage. Large yellow buoys (minimum 1 meter in diameter) with battery powered flashing yellow strobe lights (standing at least one meter high above the water) and positioned every 120 meters along the demarcation line. The flashing yellow strobe lights must be visible day or night at a minimum distance of 2 nautical. In addition, buoys must also be visible on ship's/port radar.

ii. Weights sufficient to anchor each buoy to the seabed. The size of the weight will be determined by the conditions of the harbor or anchorage. It must be sufficient to keep the buoy line intact at all times regardless of sea conditions. Failure to do this may result deduction to the fees for the provided service.

10. Contract Pricing: Prices are firm-fixed-price per unit and are inclusive of all costs which include the following:

a. Each unit price includes all direct and indirect costs unless stated otherwise in the CLIN. Costs included in the unit price are such items as labor, materials, overhead General and Administrative (G&A) expenses, government taxes, and profit.

b. Mobilization and Demobilization (Mob & De-mob). All Mob & De-mob costs shall be included in the unit price as part of the direct cost unless authorized by a separate CLIN in The Schedule. This includes transportation of equipment and charges for the use of cranes, forklifts, tugs, workboats and any other equipment and labor required for the deployment, maintenance and retrieval for the floating perimeter.

c. Repositioning equipment. All repositioning of equipment shall be included in the unit price unless authorized by a separate CLIN in The Schedule.

d. Pre-positioning / Pre-staging and Vetting Operations. All pre-positioning / Pre-staging and vetting operations shall be included in the unit price. The vessel shall only be charged for the actual number days that the perimeter is in use while the ship is port. No additional days shall be charged.

11. Time Calculations: These CLINs are based on daily rates. Time will begin being measured once the equipment is deployed round the vessel and capable of operations.

12. General: The Contractor is responsible for providing floating visual line of demarcation. The Contractor must work closely with other US Navy contractors such as subsistence contractor. The Contractor will follow the requirements below unless directed differently by the ship's Security Officer, Advance Party FP Officer, or AGR.

13. Personnel Identification: The Contractor shall positively identify all personnel before allowing access to the pier area and be able to easily identify them while working.

    a. The Contractor shall issue photo identification badges to their personnel and ensure subcontractor personnel have photo identification badges. Badges should be standardized and have a passport type photo, name of the company, individuals name, identification number, and date of birth. Personnel will wear the badge to be visible at all times.

    b. The Contractor shall ensure that their employees and subcontractor employees wear appropriate uniform items to identify them as contractor personnel. Examples would be similar T-shirts, trousers, or coveralls with company names printed on the clothing.

14. Access Lists: The contractor shall develop a daily list of authorized personnel, vehicles and vessels who may have access to the ship area. This list will be given to ship FP officers, security guards, and other contractors as required.

    a. For individuals, the list will include their full name, identification number, company, time and duration of visit, and purpose of their work.

    b. For vehicles, the list will include a description of the vehicle, license plate number, drivers name, time and duration of visit, and purpose of their work.

    c. For vessels, the list shall include the master's name, vessel name, type, color, time and duration of visit, and purpose of their work.

15. Inspections: The Contractor shall inform company and sub-contractor personnel that Security Guards or U.S. FP personnel shall physically inspect all individuals, personal belongings, vehicles, and vessels prior to entering the work area. Upon completion of inspection, the individual, vehicle, or craft is to remain in a controlled environment. If they go outside the controlled area they must be re-inspected before continuing their work.

ATTACHMENT 4
PICKET BOAT OPERATIONS & SPECIFICATIONS

The following are the Picket Boat operating instructions and specifications used for this contract:

13. The contractor shall provide a Picket Boat with a driver to continuously patrol 24 hours a day around ships at pierside or at anchorage. The purpose of the picket boat is to keep unauthorized watercraft from approaching US ships. The picket boat shall establish a waterborne exclusion zone and keep all unauthorized watercraft from entering this zone.

14. The Contractor will arrange and manage picket boat services. At no time will coverage be allowed to lapse. If a Picket Boat has to refuel or come back for any reason then the contractor will ensure a replacement boat is provided for relief. The Picket Boats will not be allowed to leave the patrol area until their relief is on site.

15. Ships at anchorage will normally require two Picket Boats.

16. The Picket Boat will meet the minimum standards as set forth below. Services shall include a driver and any helpers or crew-members as required, insurance required by local law, maintenance, fuel, and any other operating items. All equipment used in the boat shall be in safe and mechanically sound condition and meet all standards as required by local laws and regulations. Two armed or unarmed security Guards will be provided to ride in the Picket Boat under a separate CLIN in the contract.

17. The Picket Boat will patrol outside of a final demarcation line or floating perimeter (usually about 100 meters from ship). The patrol zones will be coordinated and approved by the ship's Captain or Force Protection (FP) officer.

18. The Picket Boat shall intercept any unauthorized vessels attempting to approach the ship and the security guard will warn them away with a loudhailer. If the unauthorized vessel continues towards the ship, the security guard will warn the ship via two-way radio. The Picket Boat will circle the unauthorized vessel or attempt to block its approach. The Picket Boat will not ram the unauthorized vessel. If the unauthorized watercraft still continues toward the ship, the Picket Boat will stand off and let the ship deal with the threat. If the Picket Boat has Police authority they can use the local law enforcement Rules of Engagement to include armed force. The intent is to prevent unauthorized watercraft from getting close to US ships.

19. The Picket Boat will meet the following requirements:

    7.1. Licensed for commercial operations by local country Department of Transportation.

    7.2. Meet all safety standards and be seaworthy. All material effectively stowed. Free of potential flying hazards (missile hazards), debris and gear adrift.

    7.3. Piloted by a qualified driver with Certifications and licenses required by the local Government for the operation of the type, class or size of boat being operated. The driver will have the requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner. Driver must speak and understand English fluently.

    7.4. If a deckhand crewmember is required, only qualified personnel are used.

    7.5. Suitable for all weather operations to include protection from elements for crew and security guards.

    7.6. Minimum length of 8 meters and capable of carrying three people.

    7.7. Minimum 18 knots speed.

    7.8. Capable of operating for 8 hours without refueling.

7.9. Have toilet facilities on board.

7.10. Have minimum one meter high guardrails for security guard use.

7.11. Additional required equipment:

7.11.1. Two-way radio for communication with ship and authorities

7.11.2. Portable loudhailer or megaphone

7.11.3. Portable air horn

7.11.4. Portable Spotlight

ATTACHMENT 5
SECURITY GUARD OPERATIONS

The following are to be used for Security Guard operations for this contract:

1. General

1.1. The Contractor shall provide security guards for pierside or picket patrol boat operations. The purpose of the security guards is to provide a continuous, around-the-clock security presence to control access to the ship and warn the ship of any danger. The guards shall be on duty from the time the ship arrives until the ship departs. The security presence should ensure only authorized personnel, vehicles and vessels have access to the restricted area.

1.2. Security guards may be provided through private security firms or through local police officials.

1.3. There are two types of security guard services. One is for providing guards pierside to control access of personnel, vehicles, and material on or near the ship. The second type is to provide guards for picket or dive boats to control access of unauthorized swimmers or watercraft from approaching the ship.

1.4. The contractor shall coordinate security guard operations with boat operators and port authorities.

1.5. The contractor shall ensure security guards are qualified and have all necessary equipment, including firearms and ammunition if armed, for them to perform their service.

2. Security Guards – At Pierside: (CLIN XX12AQ)

2.1. Contractor shall man the pier with armed or unarmed security guards as specified in each LOGREQ and Task Order.

2.2. All pierside guard services will be performed within the parameters of local Laws and Regulations.

2.3. Overview. The purpose of the pierside security guards is to identify and deter any unauthorized personnel from gaining access to US ships or contracted water taxies. The ship will request the number of guards and required locations. The guards will establish patrol zones or an entry point to control access to the ship. They will check identification cards (IDs) and personal bags of all personnel wanting to board the ship or water taxi. They will report all contraband found in bags to

the ship. They will stop and direct unauthorized vehicles and personnel away from the ship. They will warn the ship and then detain any individuals who continue towards the ship or water taxi. If armed, as a last resort they should use their armed authority to protect the ship or water taxi. They should not allow unauthorized individuals access to a ship or water taxi.

2.4. Patrol zones or entry points will be at the landward access point to the ship or water taxi. Security Guard locations must be discussed and agreed upon by the ship's Commanding Officer/Master prior to start of service. The ship will give specific instructions to the Security Guard at an Arrival/Boarding Briefing for allowing guests and vendors to board the ship or water taxi. Security Guards must be present at all times during pierside operations.

2.5. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

2.6. The following equipment will be required as a minimum for each guard:

2.6.1. Uniform as provided by contractor or authorities;

2.6.2. If armed, firearm and ammunition (standard authorities issue);

2.6.3. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

2.6.4. Mirror on long handle for checking undersides of vehicles.

2.6.5. Flashlight for nighttime inspections.

2.6.6. Any locally required equipment to perform their job.

2.7. Rules of Engagement (ROE) Pierside

2.7.1. Unauthorized Individuals. When an unauthorized individual is identified the following ROEs are to be followed:

2.7.1.1. Verbally direct the unauthorized individual away from the restricted area.

2.7.1.2. If the warning is ignored, the security guard will immediately notify the ship of the threat via their communication device.

2.7.1.3. If the individual continues towards the ship or water taxi the Guard should position themselves to block access and use other necessary means to divert the person away from the area.

2.7.1.4. If armed, as a last resort, the security guard will use their armed authority to deter the unauthorized individual from gaining access to the ship or water taxi. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local Laws.

2.7.2. Baggage Search. When a suspicious item or contraband is discovered during inspection of individual bags the Security Guard will report the violation to the ship and detain the individual until the ship's Watch Officer or Duty Officer arrives and takes charge. They will also notify local police authorities if appropriate.

2.7.3. Other Incidents. The security guard will report to the ship any incidents where access to the ship was refused or any suspicious incidents occur.

3. Security Guards – In Picket Boats: (CLIN XX12AP)

3.1. The Contractor will man each Picket Boat or Dive Boat with two (2) armed or unarmed security guards unless specified differently by the ship.

3.2. All waterborne guard services will be performed within the parameters of local Laws and Regulations.

3.3. Overview. The purpose of the security guards on board Picket Boats or Dive Boats is to identify and deter any waterborne threats to US ships. The security guards will patrol in picket boats provided under CLIN XX12AK. The guards will identify any unauthorized watercraft in the vicinity of US ships and verbally direct them away. If the watercraft continues towards the US ship the security guard will immediately notify the ship of the threat, deter the watercraft from proceeding, and as a last resort, if armed, use their armed authority to protect the ship from the danger. They should not allow unauthorized watercraft to arrive alongside the ship under any circumstances. Security guard must be present at all times on board the boats while in operation.

3.4. Patrol zones will vary depending on vessel size and location. Picket Boat locations or patrol zones must be discussed and agreed upon by the ship's Commanding Officer or Master prior to start of service.

3.5. Picket boat Security Guards must report their status verbally to the ship every half hour via a communication device.

3.6. The Security Guard must be proficient in the English language and communicate well when conversing with ship personnel.

3.7. The following equipment will be required as a minimum for each guard:

3.7.1. If armed, firearm with ammunition (standard authorities issue);

3.7.2. Uniform as provided by contractor or authorities.

3.7.3. Foul weather clothing such as rubber boots or rain gear.

3.7.4. Means of communication to the ship and to local law enforcement personnel (such as cell phone, two way radios, or VHF radio).

3.7.5. Shipboard equipment including a Megaphone (loud hailer), search light, and binoculars.

3.7.6. Any other locally required equipment to perform their job.

3.8. ROEs for Boat Operations

3.8.1. Unauthorized Swimmer or Watercraft. When an unauthorized swimmer or watercraft is identified the following Rules of Engagement (ROEs) are to be followed:

3.8.1.1 Verbally direct the unauthorized swimmer or watercraft away from the US ship using the mega phone.

3.8.1.2 If the first warning is ignored, the security guard will immediately notify the ship of the threat.

3.8.1.3 The boat will circle around the unauthorized swimmer or watercraft and use any necessary means to divert them away from the ship.

3.8.1.4 As a last resort if armed, the security guard will use their armed authority to deter the unauthorized swimmer or watercraft from arriving alongside the ship. Firing of a weapon is an individual security guard responsibility and determination. Discharge of weapons shall be in accordance with existing local country laws.

3.8.2. Suspicious Watercraft. If a watercraft is spotted taking pictures or acting suspiciously, the security guard will contact the pertinent Maritime authorities such as Harbor Police or Coast Guard to request the craft be boarded and inspected. The security guard will not under any circumstance board suspicious watercraft.

ATTACHMENT 6
FUEL SPECIFICATIONS

The following are the Fuel Specifications for this contract:

1. SAMPLE OF MIL-F16884J

TABLE I. Physical and Chemical Requirements

Physical Requirements		
Characteristics	**Requirement**	**Text Method**
Appearance, @ 25ºC or ambient temperature whichever is higher	Clear, bright and free of visible particulates	D 4176 1/
Demulsification, @ 25ºC, minutes (max)	10	D 1401 2/
Density, @ 15ºC, kg/m^3 (max)	876	D 1298 (R), D 4052, D 287
Distillation, 10 % point, ºC 50% point, ºC 90% point, ºC, (max) end point, ºC, (max) Residue º Loss, % vol., (max)	 Record Record 357ºC 385ºC 3.0	D 86 3/
Cloud Point, ºC, (max)	-1ºC	D 2500
Color, (max)	3	D1500
Flash Point, ºC, (min)	60ºC	D 93 4/
Particulate Contamination, mg/liter, (max)	10	D 5432 5/
Pour Point, ºC, (max)	-6ºC	D 97
Viscosity, @ 40ºCm mm^2/second	- 1.7 - 4.3	D 445
Chemical Requirements		
Accelerated Storage Stability, total insolubles, mg/100ml, (max)	1.5	D5304 (R), D 2274 6/
Acid Number, mg KOH/100 ml, (max)	0.30	D 974 (R), D 664

Aniline Point, ºC, (min)	60ºC	D 611
Ash, % wt., (max)	0.005	D 482
Carbon Residue, on 10% bottoms, % wt., (max)	0.20	D 524 (R), D4530, D 189 7/
Corrosion, @ 100ºC, (max)	No. 1 ASTM	D 130
Hydrogen Content, % wt., (min)	12.5	D 4808
Ignition Quality, Cetane Number, (min) Cetane Index, (min)	42	D 613 (R), D 976 8/
Sulfur Content, % wt. (max)	1.0	D 4294 (R), D 129, D 1552, D 2622
Trace Metals, ppm, (max) Calcium Lead Sodium plus Potassium Vanadium	 1.0 0.5 1.0 0.5	D 3605 9/
Additive Names and Dosages	Record	

1. If the sample fails ASTM D 4176 because a slight haze was observed, the product must meet the requirement of ASTM D 2709, 0.05 percent volume maximum. A slight haze is acceptable if the water and sediment (ASTM D 2709) does not exceed 0.05 percent volume. If the sample fails, ASTM D 4176 because it contains visible sediment or particulate matter, but meets the requirement of 10 mg/1 (max) (ASTM D 5452), the fuel is considered acceptable, provided all other requirements are met.

2. The demulsification text shall be conducted in accordance with the following exceptions:

   (a) Synthetic sea water prepared in accordance with ASTM D 1141 shall be used as the emulsifying fluid.

   (b) The test temperature shall be 25ºC.

   (c) The demulsification time shall be that required for separation into two layers with no cuff at the interface. A lacy emulsion which does not form a band or cuff on the wall of the cylinder shall be disregarded. The fuel, water and emulsion layer volumes shall be recorded at one minute intervals and the demulsification time reported shall be to the nearest minute.

3. As the end point of the distillation is approached, if either a thermometer reading of 385ºC or a decomposition point is observed, discontinue the heating and resume the procedure as directed in ASTM D 86.

4. The flash point value is the absolute and no value less than 60ºC is permissible.

5. A one-liter minimum sample shall be used.

6. ASTM D 2274 may be used as an alternate method for testing storage stability provided the test time is extended from 16 hours to 40 hours.

7. When the finished fuel contains a cetane improver, the carbon residue requirement specified in Table I shall apply to the base fuel, without the cetane improver.

8. Either cetane number (ASTM D 613) or cetane index (ASTM D976) shall be reported. The cetane index requirement specified in Table I shall apply to the base fuel without cetane improving additives. Where cetane index is reported, the value shall be reported as the cetane index.

9. Any quantitative spectroscopic method may be employed if correlation to ASTM D 3605 is demonstrated to the satisfaction of the inspection authority.

2. COMMERCIAL MARINE GAS OIL MINIMUM SPECIFICATION REQUIREMENTS (DESC MAY 2002)

Offered product shall conform to the following requirements which are suitable for Marine Gas Turbine.

	TEST REQUIREMENTS	METHOD	
1.	Cetane Number	ASTM D 613	42 min
	or		
	Cetane Index	ASTM D 976	43 min
	NOTE: If the Cetane number is reported, the reported value shall apply to the base fuel without Cetane improving additives.		
2.	Appearance @ 21^{o}C or ambient temp. (whichever higher)	Visual	Clear & Bright
	or		
	Water & Sediment	ASTM D 2709	0.05 vol % max.
3.	Distillation, 90% point	ASTM D 86	357^{o}C max.
4.	Flash Point	ASTM D 93	60^{o}C min
	NOTE: The flash point value is absolute and no value less than 60^{o}C is permissible.		
5.	Cloud Point	ASTM D 2500	-1.1^{o}C (30^{o}F) max.
	NOTE: Cloud Point results will be evaluated based upon bunkering location.		
6.	Viscosity @ 40^{o}C	ASTM D 445	1.7 - 4.5 cSt
7.	Color 4	ASTM D 1500	3 max.
	NOTE for deliveries outside the United States, the offerors must submit information on the composition, color and desired concentration of any dye to be used in order to obtain approval.		
8.	Density @ 15^{o}C	ASTM D 1298	876 kg/m^{3} max.
9.	Carbon Residue on 10% bottoms 5	ASTM D 524	0.35 mass % max.
	NOTE: For carbon residue on 10% bottoms, ASTM D 189 is an acceptable alternate method.		
10.	Ash	ASTM D 482	0.01 mass % max.
11.	Sulfur 6	ASTM D 4294	1.0 mass % max.
	NOTE: For total sulfur content, ASTM D 1552 and ASTM D 2622 are acceptable alternate methods.		
12.	Corrosion	ASTM D 130	3 max.
13.	Composition Distillate Fuel (fuel shall contain no residual)	None	100%

3. FUEL OIL, INTERMEDIATE, GRADES RME-25 (IFO 180 AND RMG-35 (IFO 380) (DESC JUN 2004)

a. Product shall conform to ISO 8217:1996.

b. ALTERNATE TEST METHODS. The test methods below can also be used to determine the following requirements:

REQUIREMENTS TEST METHOD

1. Density @15^{o}C, kg/m^{3} ASTM D 4052
2. Carbon Residue ASTM D 4530
3. Vanadium, mg/kg ASTM D 5863
4. Aluminum plus silicon, mg/kg ASTM D 5184

c. SULFUR. Starting My 19, 2005, the sulfur limit for RME-25 (IFO 180) purchased under the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, maximum.

d. A. FOR THE BULK PROGRAM, RME-25 (IFO 180) purchased undr the DESC Bulk Purchase Program must meet a revised sulfur weight percent limit of 3.5, masimum. (DESC 52.246-9FFE).

ATTACHMENT 7 - WATER TAXI SPEC
WATER TAXI SPECIFICATIONS

The following are Commander 7th Fleet (COMSEVENTHFLT) Water Taxi specifications used for this contract.

1. Compliance - The Contractor shall comply fully with all applicable laws, ordinances, statutes, regulations, and licensing requirements for every task, and subtask, under this contract, whether performing with its own personnel or with subcontractors. The Contractor shall be fully liable for all aspects of performance listed in Schedule of Supplies/Services which the ship requires, although they may be subcontracted in part or full.

2. Quality of Equipment - All equipment provided must meet COMSEVENTHFLT water taxie specifications, meet all safety standards required by local law, and have any required current insurance certifications. Passenger compartments must be presented in a clean condition so as not to soil the passengers, their clothing or possessions, and be free of debris, grease and oil.

3. Quality of Services - The quality of all services rendered hereunder shall conform to the highest standards in the relevant profession, trade, or field of endeavor. Individuals fully qualified and licensed in the relevant profession, trade, or field shall render all services. Without additional expense to the Government, the Contractor shall be responsible for obtaining any necessary insurance, licenses and permits, and for complying with any applicable laws, codes, and regulations, in connection with the performance of the work. Further, the Contractor is responsible for ensuring that proper safety and health precautions are taken to protect the work, the worker, the public, and the property of others.

4. Inspection and Acceptance - The Contractor shall pre-inspect the provided boats using the COMSEVENTHFLT specifications set forth below. Boats failing the inspection will not be used. The Contractor shall provide a list of boats (including their name, registration number, capacity, etc.) meeting the specifications to the designated FISC Detachment Singapore Logistics Support Center (LSC) Water Taxi Inspector. The LSC

Inspector will use this specification for both pre-contract and periodic Contracting Officer/authorized representative inspections of the boats. Additionally, the LSC Inspector shall provide ships, prior to their arrival in port, a message list of boats that have been inspected. Should ships find discrepancies between the boats provided and this specification, the ship will immediately notify the Contractor, the FISC Detachment Singapore Contracting Officer (KO), and the LSC Inspector. An info message will be sent to Commander Logistics Western Pacific (COMLOGWESTPAC) and the operational chain of command up to and including COMPACFLT.

5. COMSEVENTHFLT Specifications:

5.1. Boat requirements: Boats furnished under this contract shall be watertight, staunch, strong, seaworthy, in sound mechanical condition, free of debris, and fitted for service required. Maintenance, safety, and other periodical inspections shall be performed as required by the applicable laws and regulations of Tonga. Notwithstanding compliance with local laws and regulations, the contractor shall meet all additional requirements as set forth throughout Section 5.

5.1.1. Each boat shall be equipped with at least one clean and serviceable life jacket for each passenger and crew member, and all jackets shall be stowed in a readily accessible place.

5.1.2. Each boat shall be capable of transporting a minimum of (see Schedule of Services) passengers. (Weight restrictions may also be set forth, if appropriate.)

5.1.3. The following information shall be conspicuously posted in both English and (the appropriate foreign language):

5.1.3.1. Current Operator's/Captain's license and boat names.

5.1.3.2. Passenger/weight capacity limit notice.

5.1.3.3. Location of life jackets and other life saving equipment.

5.1.3.4. Location of all exits indicated in large letters.

5.1.3.5. Emergency procedures

5.1.4. Emergency lighting, both permanent and hand held, shall be available and in working order at all times.

5.1.5. Operation of the boat shall be in a safe and seaworthy manner.

5.1.6. The consumption of alcoholic beverages shall not be permitted aboard the boat.

5.2. Operator qualifications: All personnel or employees of the contractor operating boats providing subject services shall have all certification required and issued by Tonga for the operation of the type class, or size of boat being operated by such personnel. In addition, all such personnel shall have requisite experience, skill, knowledge, and familiarity with the water area in which the boats are to be operated to ensure the boats are operated in a safe and seaworthy manner.

5.3. Security: During the term of this contract the ship(s) to be serviced (insert ship name if purchase order) agree(s) to provide adequate and sufficient security personnel for the purpose of maintaining the orderly transportation of its personnel and such civilians who may be transported. Such naval personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat--SOPA when more than one ship is in port). When embarked in a contractor operated boat, a boat officer will be responsible for the good order and discipline of naval personnel

onboard. He/she will also have the authority from the Commanding Officer of the serviced ship (or SOPA) to refuse the contracted boat to be boarded and/or sail under conditions the boat officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

5.4. Boat capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factor affecting safety.

5.5. Inspection/Acceptance: Each boat to be used in the performance of this contract shall be inspected by the (Contracting officer or Husbanding Agent, as appropriate), or authorized representative prior to acceptance. This inspection shall include but not be limited to:

5.5.1. Hull

5.5.1.1. Watertight integrity of weatherdecks, bulkheads, watertight closures and interior hull structures.

5.5.1.2. Superstructure, including masts and stacks.

5.5.1.3. Railings, bulwarks and their attachment to the hull, especially guardrails and lifelines.

5.5.1.4. Provisions for drainage of sea water from exposed decks over the side and not into the bilges.

5.5.1.5. Access/egress points- adequacy of number and location.

5.5.2. Machinery

5.5.2.1. 2-way radio or other reliable means of electronic communications (i.e., cellular phone) plus an additional battery back-up is required.

5.5.2.2. Main propulsion and auxiliary machinery essential to operation of boat.

5.5.2.3. Sea and bulkhead closure valves.

5.5.2.4. Bilge auction strainers and dewatering systems-bilge pump to be tested by operation

5.5.2.5. Bilges free of flammable liquids

5.5.3. Electrical

5.5.3.1. Cables.

5.5.3.2. Navigation, deck, and emergency lights.

5.5.3.3. Rotating electrical machinery; e.g., generators and motors --Storage batteries

5.5.4. Lifesaving equipment

5.5.4.1. Life preservers - sufficient number for maximum capacity of boat, accessible and in satisfactory condition.

5.5.4.2. Life raft(s) and hydrostatic release (where applicable) – sufficient for maximum boat capacity.

5.5.4.3. First aid kits, life rings and distress lights.

5.5.4.4. Distress signaling devices

5.5.5. Fire fighting equipment

5.5.5.1. Fire pump - test by subjecting fire hose(s) to fire pump pressure.

5.5.5.2. Portable fire extinguishers.

5.5.5.3. Fixed systems, e.g., C02 cylinders.

5.5.6. Steering apparatus

5.5.7. Miscellaneous systems and equipment

5.5.7.1. Harbor charts.

5.5.7.2. Ground tackle and mooring lines.

5.5.7.3. Whistle/fog horn, bell.

5.5.7.4. Lighted compass.

5.5.7.5. Radar.

5.5.7.6. 2-way radio capable of Bridge-to-Bridge communications.

5.5.7.7. Current license.

5.5.7.8. Operator qualifications.

5.6. Only approved boats shall be used in performance of this contract. The (LSC Inspector or Husbanding Services contractor, as appropriate) will provide each ship with a list of pre-approved boats. If the LSC Inspector or Husbanding Services contractor is not available for inspection and pre-approval of the boats, then the only inspection requirement-is that contained in paragraph 4.7 below. A complete inspection or verification by the ship designated representative of all items in this paragraph, however, is not precluded.

5.7. Notwithstanding the pre-approval contemplated above, the ship will as a minimum conduct a complete inspection of all contractor boats prior to acceptance and periodically thereafter. This inspection shall include but is not limited to the following:

5.7.1. Safety of operations. Insure the following are present and in working condition:

5.7.1.1. Navigation lights, area charts, lighted compass, distress signals, and a fog signal device.

5.7.1.2. Fire extinguishers sufficient for the size of the vessel operated.

5.7.1.3. Radio (with battery backup) capable of Bridge-to-Bridge communications.

5.7.1.4. Anchor/chain sufficiency for the size of the vessel operated.

5.7.1.5. Verify weather deck drains are free from obstructions and vent overboard vice into bilge.

5.7.2. Hazards to passengers. Conduct topside visual inspection for safe conditions of the following:

5.7.2.1. Establish that life jackets sufficient in quality, quantity, and readily accessible with locations marked in English.

5.7.2.2. Verify decks, railings, doors and seats are structurally sound, latched, and tightened as appropriate.

5.7.2.3. Ensure no bare or exposed electrical wires or connections are located in the passenger area.

5.7.2.4. Validate that sufficient unobstructed exits are present and marked in English.

5.7.2.5. Verify that no missile hazards, gear adrift, or trip hazards exist.

5.7.3. The following shall be conspicuously displayed, in English:

5.7.3.1. Passenger/weight capacity.

5.7.3.2. Location and number of life jackets.

5.7.3.3. Location of life saving equipment.

5.7.3.4. Locations of exits (if not obvious).

5.8. Critical safety equipment: In the event an item critical to safety is missing from the boat offered for service, the ship's Commanding Officer or designated representative will have the option of furnishing the missing item. In all cases where government furnished property is provided due to the contractor's failure to meet requirements of the contract, the Contracting officer should be notified immediately of the circumstances surrounding the deficiency so that appropriate action can be taken. If the Contracting officer is not on site, notification will be by message.

5.9. If applicable, FAR 52.245-4, Government-furnished Property (short form) (APR 1984), is incorporated by reference into this (contract or purchase order, as appropriate).

6. Onboard Security: The ship being serviced may provide security personnel for the purpose of maintaining the orderly transportation of their personnel. Such security personnel will be assigned at the discretion of the serviced ship's Commanding Officer (or Senior Officer Present Afloat (SOPA) when more than one ship is in port). When embarked in a Contractor operated boat, a Boat Officer will be responsible for the good order and discipline of personnel onboard. He/she will also have the authority from the Commanding Officer/SOPA to refuse the

contracted boat to be boarded and/or sail under conditions the Boat Officer considers to be unsafe and, once the contracted boat is underway, to direct its return to its previous mooring due to conditions deemed unsafe.

7. Boat Capacity: Actual passenger capacity at the time of the rendering of services will be determined by the ship's Commanding Officer or his designated representative; notwithstanding the advertised or licensed passenger capacity. Determination of actual passenger capacity will be based on the consideration of many factors, including, but not limited to, the condition of the boat as determined through an inspection, local weather or sea conditions, and any other factors affecting safety.

8. Deficient Boat - In the event the boat is determined unacceptable or deficiencies are found, the Contractor shall replace the boat or correct the deficiencies within one hour after receipt of notification. Failure to replace or correct the deficiencies may result in the reduction of the contract price or termination of the contract for default.

9. Government Furnished Property - In all cases where Government-furnished property is provided due to the Contractor's failure to meet requirements of the contract, the Contractor shall notify the KO and provide information about the circumstances surrounding the deficiency. If appropriate, a reduction in contract price may be made.

ATTACHMENT 8 - SANITARY INSPEC
SAMPLE LETTER REQUESTING SANITARY INSPECTION

(COMPANY LETTERHEAD)

Contracting Officer
FISC DETACHMENT SINGAPORE
PSA SEMBAWANG TERMINAL
DEPTFORD ROAD, BLDG 7-2
SINGAPORE 759657

Dear Sir:

We are interested in supplying (e.g. specify bread products or eggs) to the U.S. Navy ships calling at the Port of (insert name of port). It is understood that a U.S. Government sanitary inspection of our manufacturing plants and sources of raw materials must be conducted if they have not been previously approved prior to the award of any contract. We request, therefore, that a sanitary inspection be arranged for the following sources:

NAME AND ADDRESS OF PLANT OR SOURCE	PERSON TO CONTACT AND TELEPHONE NUMBER	PRODUCT OR MATERIAL
_____	_____	_____
_____	_____	_____

_____ _____ _____

_____ _____ _____

Sincerely,

LIST AND INFORMATION TO REQUEST FOR INITIAL INSPECTION

List of products for which approval is requested.
Establishment letterhead - four places.
Name of establishment owner.
Site area size - acres, square feet or square meters.
General description of the area surrounding the plant site.
Building description, i.e. material used in construction, age of building(s), size (in square feet or meters), and number of stories.
Drawing of floor plan of building(s) to include major production areas (for slaughterhouses and dairies only).
List of major processing equipment.
Sources of raw materials.
Output of finished product - average kilograms or tons per day, per week or per month.
Special codes printed on product packages which identify the establishment, the product, and the date of production or packaging.
Number of employees.
Are employees receiving pre-employment or periodic medical examinations? What is the frequency of the periodic examinations?
Program for employee instruction personal hygiene, food, handling techniques, and food hygiene and safety.
Cleaning and sanitizing methods, including chemical used.
Detailed written cleaning and sanitizing program.
Official water quality certification from the local government, including total aerobic bacteria plate count, coliform count, and chemistry.
Name of water source.
Waste disposal program.
Pest control program.
Name of inspection agencies which inspect the plant (government and civilian) and frequency of inspections. Are inspection reports available for review?
Flow chart for the manufacture of each major category of products listed in No.1 above from raw materials to finished products health control points.
What laboratory examinations are performed on products and plants environment? Are the results available for review?
Total number of company vehicles?
Key personnel and point of contact for inspectors.
Direction to plant.

ATTACHMENT 9 - QA PROVISIONS

FISC DET SINGAPORE

QUALITY ASSURANCE PROVISIONS
September 2006

SECTION I. GENERAL REQUIREMENTS

1. **SANITARILY APPROVED SOURCES:** All subsistence items shall be from approved sources as authorized, or exempted in NAVSUPINST 4335.4F/AR 40-657/AFR 161-32/MCO P10110.31G. Name and address of processing

facility shall identify any subcontracting entities utilized other than the primary contractors. FISC DET Singapore has available approved source listings of authorized subsistence incorporated into VETCOM Circular 40-1, Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement (Hawaii and Pacific) and other regions maintained and published by HQ, US Army Veterinary Command, Fort Sam Houston, Texas (http://vets.amedd.army.mil/vetsvcs/approved.nsf). The U.S. Army Veterinary Representative, prior to commencing a contract/Blanket Purchase Agreement (BPA), shall inspect all required potential sources identified. Failing to pass inspection shall be grounds for not issuing a BPA and grounds for cancellation if the facility fails inspection after a BPA has commenced. This applies to all contractors and subcontractors. Documents cited here shall be provided to the contractor upon written request.

2. **DELIVERY VEHICLES:** The supplies delivered under this contract/BPA shall be transported in a sanitary enclosed/covered or open flatbed vehicle. Semiperishable items delivered in open flatbed vehicle shall be covered with a tarp to protect products from rain or foreign objects. Vehicles shall be equipped to maintain the appropriate temperature for the subsistence being delivered. Vehicles shall be maintained in a sanitary condition to prevent contamination of the food and shall be subject to inspection by the government at all reasonable times. Supplies submitted for acceptance in vehicles, which are not sanitary, may be rejected without further inspection. Concurrent transportation of bulk contained pesticides, rodenticides, petroleum products, inedible products, household chemicals, or other caustic or volatile compounds are undesirable but occasionally necessary. When a carrier jointly transports subsistence and cleaning agents or hazardous products, the cleaning agents or hazardous products shall be segregated from the subsistence to the greatest extent. Segregated to the greatest extent means that all cleaning agents or hazardous products shall be unitized, loaded completely lower and horizontally from the subsistence to the maximum distance allowed by the physical configuration of the carrier. Shrink-wrap shall be used to secure items to pallets and provide stabilization.

3. **CODE DATING:** Master-shipping boxes shall be stamped or embossed with code dates, except Fresh Fruits and Vegetables, (FF&V). Coding must represent the date of slaughter, production, pasteurization, manufacture, or expiration/pull date. Open code shall have the date, month and year or Julian date, (last number of the year with the number of days). Closed code, such as letters and numbers, shall have an accompanying letter from the manufacturer explaining the code and shelf life.

4. **PACKAGING:** Standard commercial packaging is acceptable as long as it meets the requirements set forth in this agreement, product is protected from contamination, and quality is preserved. Products shall be packed in returnable commercial containers that do not exceed 55 pounds or 25 kilograms per container. The use of a plastic shrink-wrap to secure items to the pallet shall be minimized.

5. **SHELF LIFE REQUIREMENTS:** Unless otherwise specified in this agreement, products shall be delivered with not less than one-half (1/2) or fifty percent (50%) of their guaranteed shelf life remaining. If the supplies delivered DO not have the minimum number of days of shelf life remaining as set forth in this agreement, the government shall have the right to reject and/or require replacement.

6. **TEMPERATURE REQUIREMENTS:** Unless otherwise specified in this agreement, all perishable products shall be delivered between 32°F-41°F (0°C-5°C) for chilled and 0°F (-18°C) or below for frozen. Temperatures shall be checked between the primary container and the outer container to reduce product damage. If a discrepancy is suspected, internal temperature shall be checked prior to rejection or acceptance of the products.

7. **REJECTED ITEM:** Any item recommended for rejection by the U.S. Army Veterinary Representative or receiving activity shall be annotated on the invoice or delivery receipt. The Contracting Officer Representative shall negotiate on price adjustment for quality or short shelf life defect as requested by receiving activity based on the U.S. Army Veterinary Representative inspection results. Replacements shall be coordinated with the Contracting Officer Representative as requested by the receiving activity.

8. **FOREIGN ORIGIN PRODUCTS:** Foreign establishments DO not have to be Directory listed if the prepackaged finished items they produce are imported by distributors or brokers into the continental United States, Hawaii or Alaska for sale to U.S. Armed Forces. This exemption Does not apply to establishments importing food directly into the U.S. territories of American Samoa, Guam, or the Mariana Islands without entering the continental United States, Hawaii or Alaska.

9. **CRITERIA FOR MICROBIOLOGICAL LEVELS OF FOOD PROCURED BY DOD:** See Appendix A below.

SECTION II. QUALITY ASSURANCE PROVISIONS BY ITEM

1. **DAIRY PRODUCTS:**

a. Milk products shall be from approved sources and meet the raw, pasteurized, bacteriological and chemical requirements of the United States Public Health Service (USPHS) Publication 229 (Grade A Pasteurized Milk Ordinance). Frozen deserts and novelties shall be from approved sources in accordance with applicable military or local specifications or in the absence of applicable specifications, good manufacturing practice. Bacteriological and chemical testing may be accomplished at origin or destination. The U.S. Army Veterinary Representative shall submit non-conforming results to the Contracting Officer and provide a copy furnished to the contractor with a letter of explanation. The letter shall inform the contractor that unreliable quality controls may result in suspending further deliveries in accordance with NAVSUPINST 4355.6A/AR 40-70. NAVSUPINST 4355.6/AR 40-70 sets forth the microbiological testing program and suspension procedures for dairy products.

b. Temperature on delivery: Fresh dairy products shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C). Frozen products shall be delivered at 0^{o}F (-18^{o}C) or below.

c. Cheese Related Products:

(1) Soft cheeses such, as mozzarella, natural provolone, cream cheese, and etc., shall be delivered between 32^{o}F and 41^{o}F (0^{o}C and 5^{o}C).

(2) Hard cheeses such as natural cheese, natural Swiss, Swiss and American processed cheddar and processed natural Swiss, etc., shall be delivered between 32^{o}F and 50^{o}F (0^{o}C and 10^{o}C).

2. **FRESH FRUITS AND VEGETABLES (FF&V): See Appendix A.**

a. All FF&V shall be freshest product available. FF&V shall have eye appeal and shall be a minimum of 90% free from quality defects and 100% free of decay or loss. The Contracting Officer Representative shall negotiate a downward price adjustment for quality defects based on the U.S. Army Veterinary Representative inspection results and confirmed by receiving activity.

b. FF&V shall be delivered in an enclosed vehicle, equipped to maintain the temperature required for the type of FF&V. Mixed loads of FF&V shall be between 35^{o}F and 55 °F (2^{o}C and 12^{o}C).

c. FF&V such as bananas that are sensitive to ethylene oxide shall not be palletized and wrapped with items that are ethylene oxide producers such as apples. Plastic wrapped around the product inside the boxes shall be removed to allow air circulation.

d. Fresh mushrooms shall not be packaged airtight. Packages that are wrapped in plastic shall have air hole cut into plastic 1/8 inch in diameter or larger.

e. FF&V such as bananas, potatoes and onions that are sensitive to chill damage shall be delivered without refrigeration or not less than 56 °F (14°C). FF&V delivered in an open flatbed vehicle shall be protected with a tarp.

f. For repacked FF&V, the recycled boxes shall be clean and odorless; weigh not more than 45 pounds, (20 kilograms); labeled with the name and weight of the item on two adjacent sides of the box and legibly handwritten or printed.

3. FROZEN MEAT AND POULTRY

a. Unless otherwise requested, all frozen meat and poultry products must be USDA inspected or USDA certified. They must be listed in one of the following publications: "Meat and Poultry Inspection Directory", or "Directory of Sanitarily Approved Food Establishment for U.S. Armed Forces Procurement. ".

b. Temperature at delivery shall be 0°F (-18°C) or below. If the product is frozen to the point that a bimetallic thermometer cannot be pushed into the product and there does not appear to be significant surface thawing or crystallization the product shall be considered acceptable. These factors shall be considered due to the lack of proper equipment for drilling frozen item.

c. Age at delivery in the frozen state:

(1) Beef shall be delivered no more than 12 months after the date of pack.

(2) Poultry shall be delivered no more than 12 months after the date of pack.

(3) Pork shall be delivered no more than 12 months after the date of pack.

(4) Lamb and veal be delivered no more than 12 months after the date of pack.

NOTE: If the manufacture, slaughter or expiration date is stamped, not embossed on the box, the Health Certificate from origin shall be available for verification by the inspecting U.S. Army Veterinary Representative.

4. FROZEN WATERFOODS:

a. Temperature at delivery 0°F (-18°C) or below and shall be checked using the guidance reference previously in paragraph II.3.a.

b. Age at delivery in the frozen state:

(1) Seasonal packed items shall be delivered no more than 12 months after the date of pack.

(2) Oysters shall be delivered within 6 months of shucking/freezing.

(3) Shrimp shall be delivered within 180 days, of packaging/freezing.

c. General Guidance: All items shall be delivered in excellent condition, practically free of parasites, and show no evidence of mishandling.

5. SHELL EGGS:

a. Shell eggs shall be cleaned and free of damage (broken, cracked, leaker, etc.,). The U.S. Army Veterinary Representative shall recommend rejection of eggs with excessive dirt or feces.

NOTE: A small quantity of dirt is allowed on eggs delivered from plants that are only approved for unwashed eggs, small defined as having relatively little size or slight dimension.

b. Fresh shell eggs delivered directly from the farms within 48 hours of production may be delivered in unrefrigerated vehicles that are covered. The vehicles must meet all the requirements listed in Section I, par. 2. Boxes shall be marked with the date of production with the vendor's name and address.

c. Chilled fresh shell eggs that are procured from food distributors shall be delivered in refrigerated vehicles and shall be delivered within 15 days from the date of packaging. Internal temperature of eggs at delivery must be 41°F (5°C) or below.

6. **BAKERY PRODUCTS:**

a. Commercial labeling and/or coding shall be acceptable provided that the day or date of baking and packaging can be easily determined.

b. Bakery products shall be delivered within 48 hours from the date of production. Frozen bakery products shall be delivered within 6 months from the date of production, (SL 12 months), and in a refrigerated truck with a temperature of 0°F (-18°C).

SECTION III. SPECIFIED ANCHORAGE DELIVERIES

1. Due to the special circumstances associated with anchorage deliveries, the following exceptions are authorized, but shall not relieve the contractor or the BPA holder of any other requirements in the Quality Assurance Provisions unless specifically listed below:

a. Dairy products may be delivered in non-refrigerated containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. When a refrigerated unit is not used, the dairy products shall be packed in special containers that hold multiple units of product (bi-wall/tri-wall boxes), with dry ice based on the product weight to maintain internal temperature of 41°F (5°C). The special container shall be packed to allow air circulation within. Dairy products shall be given the highest priority for loading/off-loading upon receipt.

b. FF&V may be delivered in unrefrigerated containers in the most expeditious manner to ensure the least amount of exposure to high temperatures.

c. Miscellaneous frozen products may be delivered in non-freezer containers when the quantity ordered is not large enough to warrant a refrigerated container and a barge to deliver it. Frozen items shall be packed with dry ice based on the product weight to maintain frozen state. The special container shall be packed to allow air circulation within. Although slight temperature deviations may occur, proper packaging and sufficient quantities of dry ice shall preclude excessive temperature deviations and thawing. Any item showing sign of thawing shall be rejected.

2. Although special considerations are authorized in anchorage deliveries, no exceptions have been authorized or shall be accepted for reduced sanitary standards, including the sanitation of the vehicles, boats, and shipping containers. The reuse of containers to transport products with dry ice is authorized as long as the container is sanitary and serviceable.

3. No deviations to these Quality Assurance Provisions are authorized without prior written approval from the Contracting Officer and U.S. Army Veterinary Representative. Deviations shall be granted prior to quotes being accepted and only for the particular delivery in question.

APPENDIX A, PERISHABLE FOODS, TO ATTACHMENT 12 (QA PROVISIONS)

The following are requirements that apply to this contract:

PERISHABLE SUBSISTENCE COMPATABILITY GROUPS
(Extracted From DLAM 4145.12/ TM 38-400, April 1994)

Group 1

Temperature: 32° to 34°F (1° to 1°C).
Relative humidity: 90 to 95 percent.
Atmosphere: Normally used on berries and cherries only -10 to 20 percent CO_2.
Ice: Never in contact with commodity.

Note: Most members of this group not compatible with Group 6a or 6b because ethylene production by Group 1 can be high, and thus harmful to members of Group 6a or 6b.

Apples (except those varieties listed in Group 3)
Apricots
Berries (except cranberries) Cherries.
Figs (not with apples, danger of odor transfer to figs; also see Group 6a)
Grapes (not fumigated with surfer dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages).
Peaches
Pears
Persimmons Plums and Pomegranates
Quinces

Group 2

Temperature: 55^{o} to 65^{o}F(13° to 18°C)
Relative humidity: 85 to 95 percent.
Ice: Never in contact with commodity.
Avocados
Bananas
Eggplant {also see Group 5)
Grapefruit [1]
Guava

Limes
Mangoes
Muskmelons, other than cantaloupes
Casaba
Crenshaw
Honey Dew
Persian
Olive, fresh
Papayas
Pineapples {not with avocados, danger of avocados' odor absorption)
Tomatoes, green
Tomatoes, pink {also see Group 4)
Watermelons (also see Group 4 and 5)

Group 3

Temperature: 36° to 41°F (2°to 5°C).
Relative humidity: 90 to 95 percent: cantaloupes about 95 percent.
Ice: In contact with cantaloupes.
Apples (Grimes Golden and Jonathan (both, certain areas), Yellow Newton (California) and Mclntosh
Cantaloupes
Cranberries
Lemons [1] (use 50 to 55°F for more than a month)
Lychees (also see Group 4)
Oranges 1(Florida or Texas)
Tangerines

Group 4

Temperature: 40° to 45°F (4° to 7°C): beans 38° to 42°F (3° to 6°C).
Relative humidi1y: About 95 percent
Ice: Never in contact with commodity.
Beans snap
Lychees (also see Group 3)
Okra
Oranges [1] (California or Arizona)
Pepper; green (not with beans)
Pepper, red (if with green peppers, temperature adjusted toward top of range)
Squash, summer
Tomatoes, pink (also see Group 2)
Watermelons (also see Groups 2 and 5)

Group 5

Temperature: 50° to 55°F (10° to 13°C): ginger not below 55°F.
Relative humidity: 85 to 90 percent.
Ice: Never in contact with commodity.
Cucumbers
Eggplant (also see Group 2)

Ginger (not with eggplant, also see Group 7)
Potatoes (late crop)
Pumpkin and Squashes, winter
Watermelon (temperature adjusted for other members of the group; also see Groups 2 and 4),

Group 6a

This group, except for figs, grapes and mushrooms, is compatible with Group 6b
Temperature: 32° to34°F (0° to 1°C)
Relative humidity: 95 to 100 percent.
Ice: Never in contact with asparagus, figs, grapes, and mushrooms
Artichokes
Asparagus
Beefs, red
Endive and escarole
Figs (also see Group 1)
Grapes (not furnished with sulfur dioxide ($S0_2$) in vehicle and no chemicals that release $S0_2$ should be included in packages)
Greens
Leek (not with figs or grapes)
Lettuce
Mushrooms
Parsley
Parsnips
Peas
Rhubarb
Salsity
Spinach
Sweet Corn
Watercress

Group 6b

This group is compatible with Group 6a, except for figs, grapes and mushrooms.
Temperature: 13°to 13°F (0° to l°C)
Relative humidity: 95 to 100 percent
Ice: Contact acceptable for all
Broccoli
Brussels sprouts
Cabbage
Cauliflower
Celeriac
Celery
Horseradish Kohlrabi
Onions green (not with rhubarb. Figs, or grapes; probably not with mushrooms or sweet corn)
Radishes
Rutabagas
Turnips

Group 7

Temperature: 5° to 65°F (13° to 18°C)
Relative humidity: 85 to 90 percent.
Ice: never In contact with commodity.
Ginger (also see Group 5)
Potatoes, early crop (temperatures adjusted for others)
Sweet Potatoes

Group 8

Temperature: 32°to 34°F (0° to 13°C)
Relative humidity: 65 to 70 percent.
Ice: never in contact with commodity.
Garlic
Onions dry

[1] Citrus fruits -Biphenyl fungicide may impart off odors to other commodities

The above information was extracted from Lipton, W.J. and J. M. Harvey, Compatibility of Fruits and Vegetables During Transport in Mixed loads, US Department of Agriculture Research Service, ARS51- 48 (September 1972).
